[Docket No. AB–167 (Sub-364N)]

Rail Carriers; Conrail Abandonment in Jeannette, PA

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission has exempted Elliott Turbomachinery Co., Inc., which will acquire and operate 0.7 mile of railroad in Jeannette, PA, from 49 U.S.C. Subtitle IV.

DATES: Exemption effective on May 12, 1983. Petitions to reopen must be filed by June 1, 1983.

ADDRESSES: Send pleadings referring to Docket No. AB–167 (Sub-No. 364N) to:

(1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's Representative, Charles F. Hildebrand, Elliott Turbomachinery Co., Inc., Jeannette, PA 15644.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTAL INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4350 (DC Metropolitan area) or toll free (800) 424–5403.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances; Eli Lilly Industries, Inc.; Application

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on August 13, 1982, Eli Lilly Industries, Inc., Chemical Plant, Kilometer 146.7, State Road 2, Mayaguez, Puerto Rico 00780, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the Schedule II controlled substance Dextropropoxyphene (9273).

Any other such applicant and any person who is presently registered with the DEA to manufacture such substance, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, D.C. 20537, Attention: DEA Federal Register Representative (Room 1203), and must be filed no later than June 13, 1983.

Dated: May 4, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Subcommittee on Electrical Systems; Meeting

The ACRS Subcommittee on Electrical Systems will hold a meeting on May 26, 1983 in Room 1167, at 1717 H Street, NW, Washington, DC. The Subcommittee will discuss the generic implications of the scram breaker failures at the Salem Nuclear Power Plant.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Thursday, May 26, 1983—8:30 a.m. Until the Conclusion of Business

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Dr. Richard Savio (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m. EDT.

Dated: May 9, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

[Docket No. 50-348]

Alabama Power Company; Granting of Relief From ASME Section XI Inservice Testing Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Alabama Power Company (the licensee). The relief relates to the inservice testing program for the Joseph M. Farley Nuclear Plant, Unit No. 1 (the facility) located in Houston County, Alabama. The ASME Code requirements are incorporated by reference to the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of May 2, 1983.

The relief permits the licensee to test certain designated pumps and valves in a manner or on a schedule different from that prescribed in Section XI of the ASME Boiler and Pressure Vessel Code and applicable Addenda, as required by 10 CFR 50, because of inaccessibility, configuration of components, radiation level, or other valid reasons.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this relief.

For further details with respect to this action, see: (1) The application for relief dated May 1, 1979, as revised November 15, 1979, April 21, 1980, July 16, 1981, and October 25, 1982, (2) The Commission's letter dated May 2, 1983, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 2nd day of May 1983.

For the Nucler Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket Nos. 50-313 and 50-368]

Arkansas Power & Light Co.; Issuance of Amendments To Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 78 and 44 to Facility Operating License Nos. DPR-51 and NPF-6 issued to Arkansas Power & Light Company (the licensee), which revised the Technical Specifications for operation of Arkansas Nuclear One, Unit Nos. 1 and 2 respectively, located in Pope County, Arkansas. The amendments are effective as of the date of issuance.

The amendments change the Technical Specifications to require an audit of Emergency Preparedness Programs and the Safeguards Contingency Plans (Security Plan) at a frequency of at least once per twelve (12) months.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendments.

For further details with respect to this action, see: (1) The application for amendments dated March 15, 1983, (2) Amendment Nos. 78 and 44 to Facility Operating License Nos. DPR-51 and NPF-6, and (3) the Commission's letter dated April 29, 1983. These items are available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555 and at the Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 29th day of April 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch #3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-368]

Arkansas Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 45 to Facility Operating License No. NPF-6 issued to Arkansas Power & Light Company (the licensee), which revised the Technical Specifications for operation of Arkansas Nuclear One, Unit 2 (the facility), located in Pope County, Arkansas. The amendment was effective as of the date of issuance.

The amendment clarifies and modifies the emergency diesel generator load block application timing criteria.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

For further details with respect to this action, see: (1) The applications for amendment dated August 12, 1980 and February 3, 1983, (2) Amendment No. 45 to Facility Operating License No. NPF-6, and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555 and at the Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801. BILLING CODE 7590-01-M

[Docket No. 50-373]

Commonwealth Edison Co.; Issuance of Amendment of Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 14 to Facility Operating License No. NPF-11, issued to Commonwealth Edison Company for operation of the La Salle County Station, Unit No. 1 (the facility) located in Brookfield Township, La Salle County, Illinois.

This amendment consists of a deletion of License Condition 2.C.(28) and changes the Technical Specifications to incorporate the approved alternative Rad/Chem Technician qualification. The amendment is effective as of the date of issuance.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment and in the safety evaluation in support of the Amendment. Prior public notice of the

VOL 48 ISS 93 MY 12 1983 UMI

license amendment was not required since the Amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this Amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this Amendment.

For further details with respect to this action, see: (1) The application for amendment dated March 11, 1983; (2) Amendment No. 14 to License No. NPF-11, and (3) the related safety evaluation in support of the Amendment. BILLING CODE 7590-01-M

[Docket No. 50-335]

Florida Power & Light Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 58 to Facility Operating License No. DPR-67, issued to Florida Power & Light Company (the licensee), which revised Technical Specifications for operation of the St. Lucie Plant, Unit No. 1 (the facility), located in St. Lucie County, Florida. The amendment is effective as of the date of issuance.

The changes to the Technical Specifications were made to clarify and modify surveillance requirements and limiting conditions for operation for degraded grid voltage protection equipment and procedures.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated December 10, 1982, (2) Amendment No. 58 to License No. DPR-67 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-320]

GPU Nuclear Corp.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) in issued Amendment No. 21 to Facility Operating License No. DPR-73, issued to GPU Nuclear Corporation, Metropolitan Edison Company, Jersey Central Power & Light Company, and Pennsylvania Electric Company (the licensee).

Operating License No. DPR-73 formerly authorized operation of the Three Mile Island Nuclear Station, Unit 2 (TMI-2) located in Dauphin County, Pennsylvania, but that authorization was limited, by an Order for Modification of License dated July 20, 1979 to maintaining the facility in its present safe shutdown condition; 44 FR 45271 (August 1, 1979). This amendment effects changes to License No. DPR-73 with respect to the radiological environmental monitoring program requirements as specified in Appendix B of the Technical Specifications. Specifically, this amendment consists of changes to Appendix B of Operating License No. DPR-73 pertaining to the following: (1) Eliminate activities that are duplicated in the licensee's National Pollutant Discharge Elimination System (NPDES); (2) eliminate those programs that have been satisfactorily completed (Section 4 special studies); (3) eliminate those programs that are not related to monitoring the integrity of the river system in relation to the cleanup; (4) modify the General Ecological Survey (Section 3.1.2.a.1); (5) eliminate the erosion control inspection section; and (6) eliminate the discussion on herbicide use.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the act and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

We have determined that the amendment does not authorize a change in effluent types or total amounts or an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR 51.5(d)(4), that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated August 25, 1982 and amended by letter dated January 24, 1983, (2) Amendment No. 21 and License No. DPR-73 consiating of changes in the radiological environmental monitoring program requirements as specified in Appendix B of the Technical Specifications, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Government Publications Section, State Library of Pennsylvania 17126.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Program Director, TMI Program Office, Office of Nuclear Reactor Regulation.

Dated at Bethesda, Maryland, this 6th day of May 1983.

For the Nuclear Regulatory Commission.

Michael T. Masnik,

Acting Program Director, TMI Program Office, Office of Nuclear Reactor Regulation.

[FR Doc. 83-12762 Filed 5-11-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-298]

Nebraska Public Power District (Cooper Nuclear Station); Modification of January 13, 1981 and September 15, 1982 Orders

I

The Nebraska Public Power District (The licensee) is the holder of Facility Operating License No. DPR-46 which authorizes the licensee to operate the Cooper Nuclear Station at power levels not in excess of 2381 megawatts thermal (rated power). The facility is a boiling water reactor located at the licensee's site in Nemaha County, Nebraska.

On January 13, 1981 the Commission issued an Order modifying the License requiring (1) The licensee to promptly assess the suppression pool hydrodynamic loads in accordance with NEDO-24583-1 and the Acceptance Criteria contained in Appendix A to NUREG-0661: and (2) design and install any plant modifications needed to assure that the facility conforms to the Acceptance Criteria contained in Appendix A to NUREG-0661. The Order, published in the **Federal Register** on January 28, 1981 (46 FR 9286) required installation of any plant modifications needed to provide compliance with the Acceptance Criteria in Appendix A to NUREG-0661 be completed not later than September 30, 1982, or, if the plant is shutdown on that date, before the resumption of power thereafter. On September 15, 1982 the Commission issued an Order modifying the completion date specified in Section V of the January 13, 1981 Order. The Order, published in the **Federal Register** on September 27, 1982 (47 FR 42478) changed the completion date to prior to the start of Cycle 9 (at the completion of the licensees 1983 refueling outage).

III

On October 31, 1979, the staff issued an initial version of its acceptance criteria to the affected licensees. These criteria were subsequently revised in February 1980 to reflect acceptable alternative assessment techniques which would enhance the implementation of this program. Throughout the development of these acceptance criteria, the staff has worked closely with the Mark I Owners Group in order to encourage plant-unique assessments and modifications to be undertaken.

Since the development of these acceptance criteria significant progress has been made and it was the intent of the licensee to meet the extension date specified in the September 15, 1982 Order. However, as identified in an April 29, 1983 letter, unacceptable welds on Mark I containment modifications performed in 1982 have been found which are under evaluation and may require corrective measures.

This potential rework of an existing modification would be the only item identified in the Mark I Long Term Program not completed. All of the major Modifications, which are those associated with the torus, vent system, internal structures and safety relief valve piping will have been completed. All of the torus attached piping modifications and minor modifications will have also been completed.

The Commission believes that since all the modifications will have been completed except for the rework of an existing modification most of the intended margins of safety of the containment systems will have been achieved. In consideration of the range of modification completion dates presented in SECY-81-678 that was approved by the Commission, the Commission has concluded that the licensee's proposed completion schedule is both responsive and practicable.

The Commission has therefore determined to modify the January 13, 1981 Order, as modified by the Order of September 15, 1982, to extend the previously imposed completion dates for needed plant modifications. This Order continues in effect that exemption to General Design Criteria 50 of Appendix A to 10 CFR Part 50 granted on January 13, 1981.

The Commission has determined that good cause exists for the extension of the exemption, that such extension is authorized by law, will not endanger life or property or the common defense and security, and is in the public interest.

IV

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, including Sections 103 and 161i, and the Commission's regulations in 10 CFR Parts 2 and 50, it is ordered that the completion date specified in Section V of the January 13, 1981, "Order for Modification of License and Grant of Extension of Exemption," as modified by the Order of September 15, 1982, is hereby changed to read as follows: "Not later that 90 days after the start of Cycle 9." The Order of January 13, 1981, except as modified herein, remains in effect in accordance with its terms.

V

The licensee may request a hearing on this Order within 30 days of the date of publication of this Order in the **Federal Register**. A request for hearing shall be submitted to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any such hearing. If a hearing is held, the issue to be considered at such a hearing shall be whether the completion date specified in Section V of the January 13, 1981, "Order for Modification of License and Grant Extension of Exemption," should be changed to "Not later than 90 days after the Start of Cycle 9."

This Order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

Date at Bethesda, Maryland this 5th day of May 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket Nos. 50-245 and 50-336]

Northeast Nuclear Energy Company, et al.; Issuance of Amendments To Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 91 to Provisional Operating License No. DPR-21, and Amendment No. 86 to Facility Operating License No. DPR-65, to The Connecticut Light and Power Company, Western Massachusetts Electric Company and Northeast Nuclear Energy Company (the licensees), which amended the licenses for operation of Millstone Nuclear

VOL 48 ISS 93 MY 12 1983 UMI

Power Station, Units 1 and 2 (the facilities) located in the Town of Waterford, Connecticut. The amendments are effective as of their date of issuance.

The amendments amend the Millstone 1 and 2 licenses to reflect the merger of The Connecticut Light and Power Company (CL&P) and The Hartford Electric Light Company. Accordingly, the results of this action indicate CL&P and Western Massachusetts Electric Company as having authority to possess Millstone Station, Units 1 and 2, and the Northeast Nuclear Energy Company remaining as the responsible entity for operation of the facilities. With respect to Unit 1 only, this action also involves: (1) A change to Section 5.1 of the Technical Specifications, and (2) reissuance of the operating license in its entirety for clarity and format purposes only.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to these actions, see: (1) The application for amendments dated December 8, 1982, (2) Amendment No. 91 to License No. DPR–21 and Amendment No. 86 to License No. DPR–65, and (3) the Commission's related letter of transmittal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 5th day of May 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590–01–M

[Docket No. 50–275]

Pacific Gas and Electric Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 5 to Facility Operating License No. DPR–76 issued to the Pacific Gas and Electric Company (the licensee), for Diablo Canyon Nuclear Power Plant, Unit No. 1 (the facility) located in San Luis Obispo County, California. The amendment is effective as of the date of issuance.

The amendment extends the period relief from specific technical specifications for an additional 45 days (from May 6, 1983 to June 20, 1983) to allow for the movement of loads in excess of 2,500 pounds in order to make certain modifications in the Fuel Handling Building.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated December 21, 1982, and supplemental letter dated April 29, 1983 (2) Amendment No. 5 to Facility Operating License No. DPR–76, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the California Polytechnic State University Library, Documents and Maps Department, San Luis Obispo, California 93407. A copy of items (2) and (3) may be obtained upon request to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing, Office of Nuclear Reactor Regulation.

Dated at Bethesda, Maryland, this 5th day of May 1983.

BILLING CODE 7590–01–M

[Docket No. 50–311]

Public Service Electric and Gas Co., Philadelphia Electric Co., Delmarva Power and Light Co., and Atlantic City Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commissioin (the Commission) has issued Amendment No. 19 to Facility Operating License No. DPR–75, issued to Public Service Electric and Gas Company, Philadelphia Electric Company, Delmarva Power and Light Company, and Atlantic City Electric Company (the licensees), which revised Technical Specifications for operation of the Salem Nuclear Generating Station, Unit No. 2 (the facility) located in Salem County, New Jersey. The amendment is effective as of the date of issuance.

The amendment changes the Technical Specifications on Fxy to remove the cycle dependent values of Fxy as a function of core height and provide these Fxy values by means of a Peaking Factor Limit Report.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated January 31, 1983, (2) Amendment No. 19 to License No. DPR–75, and (3) the Commission's related

Safety Evaluation. Public Service Electric and Gas Co.; Philadelphia Electric Co., Delmarva Power and Light Co., and Atlantic City Electric Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 52 to Facility Operating License No. DPR–70 and Amendment No. 20 to Facility Operating License No. DPR–75, issued to Public Service Electric and Gas Company, Philadelphia Electric Company, Delmarva Power and Light Company, and Atlantic City Electric Company (the licensees), which revised Technical Specifications for operation of the Salem Nuclear Generating Station, Unit Nos. 1 and 2 (the facilities) located in Salem County, New Jersey. The amendments are effective as of the date of issuance.

The amendments change the partial power multiplier from 0.2 to 0.3

N

for FΔH.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated October 5, 1982, (2) Amendment Nos. 52 and 20 to License Nos. DPR–70 and DPR–75, and (3) the Commission's related Safety Evaluation. BILLING CODE 7590-01-M

[Docket Nos. 50-327 and 50-328]

Tennessee Valley Authority; Issuance of Amendment To Facility Operating License Nos. DPR-77 and DPR-79

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 30 to Facility Operating License No. DPR–77 and Amendment No. 19 to Facility Operating License No. DPR–79 issued to the Tennessee Valley Authority (the licensee), which revises the licenses for operation of the Sequoyah Nuclear Plant, Units 1 and 2, (the facility) located in Hamilton County, Tennessee. The amendments are effective 90 days after the date of issuance and are to be implemented in accordance with the provisions of 10 CFR 73.40(b) and 10 CFR 73.55(b)(4).

The amendments revise license conditions to include the Commission-approved Guard Training and Qualification Plan and the Safeguards Contingency Plan as part of the licenses.

The licensee's filing, which has been handled by the Commission as an application, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

The licensee's filings dated June 23, 1982, consist of Safeguards Information required to be protected from public disclosure pursuant to 10 CFR 73.21.

For further details with respect to this action, see: (1) Amendment No. 30 to Facility Operating License No. DPR–77; (2) Amendment No. 19 to Facility Operating License No. DPR–79; (3) the related Safety Evaluation Report; and (4) the Commission's related letter to the licensee dated MAY 5, 1983. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Chattanooga Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, Tennessee 37402. A copy of the above items may be obtained upon request to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Texas Utilities Generating Co., et al. (Comanche Peak Steam Electric Station, Units 1 and 2); Application for Operating License

May 6, 1983.

From June 13–17, 1983 the Atomic Safety and Licensing Board (Board) will continue its evidentiary hearing in this case at the Metro Center Hotel, 600 Commerce Street, Fort Worth, Texas 76102. This phase of the hearing is concerned with a staff study (the Construction Appraisal Team or "CAT" study) of quality assurance at Comanche Peak.

Ordinary hours of hearing will be from 9 a.m. to 5 p.m., subject to periodic recesses and to extension of hours in order to complete the hearing during the scheduled time period. Members of the public are invited to attend. Because the Board's time is expected to be dedicated to the receipt of evidence, there are no plans for permitting limited appearance statements during this sessions of hearings.

For the Atomic Safety and Licensing Board.

Peter B. Bloch,

Chairman, Administrative Judge.

Bethesda, Maryland.

BILLING CODE 7590-01-M

[Docket No. 50-324]

Carolina Power & Light Co. (Brunswick Steam Electric Plant, Unit 2); Revised Order Confirming Licensee Commitments on Post-TMI Related Issues

I

The Carolina Power & Light Company (the licensee) is the holder of Facility Operating License No. DPR–62 which authorizes the operation of the Brunswick Steam Electric Plant, Unit 2 (the facility) at steady-state power levels not in excess of 2436 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Brunswick County, North Carolina.

II

Following the accident at Three Mile Island Unit No. 2 (TMI–2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities based on the experience from the accident at TMI–2 and the official studies and investigations of the accident. The staff's proposed requirements and schedule for implementation are set forth in NUREG–0737, "Clarification of TMI Action Plan Requirements." Among these requirements are a number of items, consisting of hardware modifications, administrative procedure implementation and specific information to be submitted by the licensee, scheduled to be completed on or after July 1, 1981. On March 17, 1982, a letter (Generic Letter 82–05) was sent to all licensees of operating power reactors for those items that were scheduled to be implemented from July 1, 1981 through March 1, 1982. Subsequently, on May 5, 1982, a letter (Generic Letter 82–10) was also sent to all licensees of operating power reactors for those items that were scheduled for implementation after March 1, 1982. These letters are hereby incorporated. In these letters each licensee was requested to furnish within 30 days pursuant to 10 CFR 50.54(F) the following information for items which the staff had proposed for completion on or after July 1, 1981:

(1) For applicable items that have been completed, confirmation of completion and the date of completion, (2) For items that have not been completed, a specific schedule for implementation, which the licensee committed to meet, and (3) Justification for delay, demonstration of need for the proposed schedule, and a description of the interim compensatory measures being taken.

III

The licensee responded to Generic Letter 82–05 by letters dated April 23, June 24, July 1, and December 6, 1982; the licensee responded to Generic Letter 82–10 by letters dated June 9, and December 6, 1982. In these letters, the licensee made schedular commitments for the completion of each of the remaining items. Based on these commitments, the NRC issued the "Order Confirming Licensee Commitments on Post-TMI Related Issues" dated March 14, 1983 for Brunswick Steam Electric Plant, Unit 2.

By letter dated April 1, 1983 Carolina Power and Light Company requested relief from the commitment dates contained in said Order for three items for Brunswick Unit 2. The specific items are II.B.3, Post Accident Sampling, capability; II.F.1.1, Accident Monitoring, noble gas effluent monitors; and II.F.1.5, Accident Monitoring, continuous indication of containment water level. Carolina Power & Light Company requested that these completion dates be changed from June 1, 1983 to September 30, 1983.

The need for this schedular change resulted from the delayed completion of the outage work on Brunswick Unit 1, which required the diversion of resources from Unit 2 that were originally committed to completion of these items on Unit 2. With the completion dates extended to September 30, 1983 Carolina Power and Light Company plans to complete those portions of the installation requiring an outage during the ten-day outage scheduled for Unit 2 on April 9, 1983. At the end of that outage the installation will have progressed to the following extent: Post Accident Sampling, 95% installed; Noble Gas Effluent Monitors, 60% installed and Containment Water Level Instrumentation, 80% installed. The balance of the installation and testing would be completed by September 30, 1983. We have reviewed the proposed schedule for installation of these modifications, the potential need for the subject instrumentation during the period from June 1, 1983 to September 30, 1983 and the augmented interim instrumentation and procedures that are presently in place for monitoring the pertinent plant conditions in the event of an accident. We have concluded that the licensee has made reasonable progress toward installation of the subject instrumentation and that the interim measures that have been established are adequate to permit continued operation of Brunswick Unit 2 until September 30, 1983 when the subject instrumentation shall be fully operational.

We find, based on the above evaluation, that: (1) The licensee has taken corrective actions regarding the delays and has made a responsible effort to implement the NUREG–0737 requirements noted; (2) there is good cause for the delays; and (3) as noted above, interim compensatory measures have been provided.

IV

Accordingly, pursuant to Sections 103, 161i, and 161o of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered that the licensee shall: Implement and maintain Post-TMI related items II.B.3, II.F.1.1 and II.F.1.5 described in the licensee's submittals noted in Section III herein no later than September 30, 1983.

V

The licensee may request a hearing on this Order within 20 days of the date of publication of this Order in the Federal Register. A request for a hearing shall be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy shall also be sent to the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section IV of this Order. This Order is effective upon expiration of the time within which a hearing may be requested.

Dated at Bethesda, Maryland, this 5th day of May 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

POSTAL SERVICE

Implementation of Permanent Rates for Regular Bulk Third-Class Mail

AGENCY: Postal Service.

ACTION: Notice of Implementation of Permanent Rates For Regular Bulk Third-Class Mail.

SUMMARY: The Governors of the Postal Service have approved a recommendation from the Postal Rate Commission to implement permanent rates for regular bulk third-class mail, and the Board of Governors has directed that the changes are to be implemented at 12:01 a.m., May 22, 1983. The rates are contained in the Appendix to this notice.

EFFECTIVE DATE: 12:01 a.m., May 22, 1983.

FOR FURTHER INFORMATION CONTACT: Frances G. Beck, Associate General Counsel, Office of Rates and Classification Law (202) 245–4600.

SUPPLEMENTARY INFORMATION: On July 9, 1982, the Court of Appeals for the Second Circuit issued an opinion in *Time, Inc.*, v. *United States Postal Service*, 685 F. 2d 760 (2d Cir. 1982) holding, among other things, that the current rates for bulk third-class mail could be maintained only if reinstituted by the Board of Governors as temporary

1983
UMI

rates pursuant to 39 U.S.C. section 3641. In accordance with the Court's decision, the Board or Governors of the Postal Service met on August 3, 1982. By resolution, the Board of Governors specified that the rates in effect would be considered temporary rates effective August 20, 1982, under the provisions of 39 U.S.C. section 3641.

Subsequently, on February 16, 1983, the Governors of the United States Postal Service rejected a recommended decision by the Postal Rate Commission on permanent bulk third-class rates. Following the rejection, the Postal Rate Commission reconsidered its recommendation. The Recommended Decision upon Reconsideration, issued on April 18, 1983, was considered by the Governors of the United States Postal Service at their meeting on May 3, 1983. The Governors approved the rates recommended for regular bulk third-class mail and the Board of Governors directed that the changes be implemented at 12:01 a.m., May 22, 1983. Pending their further study of the matter, the Governors took no action on the recommended third-class bulk nonprofit rates. There will be no change in the rates paid by nonprofit mailers at this time. The Governors said: "The temporary full rates not in effect for nonprofit third-class bulk mail shall, therefore, remain in effect until they expire by action of law on May 22, at which time the full rates will revert to those in effect before March 22, 1981. In accordance with current law, however, the effective rates paid by the mailers shall be maintained at their current levels until October 1, 1983."

The Governors' decisions, the record of the Commission's hearings, and the Commission's recommended decisions may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The Governors' decisions and the Commission's recommended decisions are available for inspection in the Library at Headquarters, United States Postal Service, 475 L'Enfant Plaza West, SW., Washington, D.C. 20260.

(39 U.S.C. 3625)

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

SUMMARY OF PROPOSAL(S):

(1) Collection title: Procurement Requests
(2) Form(s) submitted: Request for Proposal
(3) Type of request: Existing collection in use without an OMB control number
(4) Frequency of use: On occasion
(5) Respondents: Business or other for-profit, Non-profit institutions, Small businesses or organizations
(6) Annual responses: 665
(7) Annual reporting hours: 4247
(8) Collection description: The collection obtains the information needed from bidders to award contracts for services or equipment.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312–751–4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Milo Sunderhauf (202–395–6880), Office of Management and Budget, Room 3201, New Executive Office Building, Washington, D.C. 20503

William A. Ozikowski,

Director of Planning and Information Management.

[Release No. 13217; (811-722)]

Scudder Special Fund, Inc.; Application Pursuant to Section 8(f) of the Act and Rule 8f–1 Thereunder for an Order Declaring That Applicant Has Ceased To Be an Investment Company

May 5, 1983.

Notice is hereby given that Scudder Special Fund, Inc. ("Applicant") (345 Park Avenue, New York, New York 10154), registered under the Investment Company Act of 1940 ("Act") as a diversified, open-end, management investment company, filed an application on November 24, 1982, for an order of the Commission, pursuant to Section 8(f) of the Act and Rule 8f–1 thereunder, declaring that Applicant has ceased to be an investment company as defined by the Act. All interested persons are referred to the Application on file with the Commission for a statement of the representations contained therein, a summary of which is set forth below.

Applicant states that it registered under the Act on June 1, 1956, by filing a registration statement on Form N–8B–1 pursuant to Section 8(b) of the Act. Applicant further states that it filed a registration statement on Form S–5 pursuant to the Securities Act of 1933 on May 11, 1956. It was incorporated under the laws of Delaware.

Applicant represents that, pursuant to a plan of merger approved by its Board of Directors on May 17, 1982, and by a majority of its shareholders on September 17, 1982, it transferred all of its securities and other assets, on September 30, 1982, to Scudder Capital Growth Fund, Inc. ("Capital Growth"), a registered investment company. Applicant further represents that it has filed a Certificate of Merger pursuant to the General Corporation Law of the State of Delaware and recorded a copy of the certificate in the Office of the Records of New Castle County, Delaware. Applicant states that, pursuant to the Merger, its shareholders became shareholders of Capital Growth, Applicant's corporate existence ceased, and Capital Growth commenced offering its shares to the public on a continuous basis.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and, upon the taking effect of such order, the registration of such company shall cease to be in effect. Rule 8f–1 under the Act prescribes Form N–8F as the form for application for an order, pursuant to Section 8(f) of the Act, where, as here pertinent, a registered investment company has merged or consolidated with another registered investment company.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 30, 1983, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34–19728; File No. SR–OCC–83–7]

Self-Regulatory Organizations; Proposed Rule Change by the Options Clearing Corporation Relating to a Proposed Revision of the Method Used To Calculate the Amount of Contributions by Clearing Members to OCC's Clearing Fund

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. § 78s(b)(1), notice is hereby given that on April 15, 1983, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by OCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Proposed Rule Change

The Options Clearing Corporation ("OCC") proposes to amend its rules as set forth below. *Italics* indicate material proposed to be added to OCC's existing rules and brackets indicate material to be deleted from existing rules.

RULES

Chapter X.—Clearing Fund
Contributions, Amount of Contributions

Rule 1001. (a) The contribution to the Stock Clearing Fund of each Stock Clearing Member (except recently admitted Clearing Members whose contributions are fixed pursuant to Article VIII of the By-Laws) for each calendar month shall be the greater of (x) $10,000, or (y) such Clearing Member's proportionate share of an amount equal to [7%] *5%*, or such greater percentage as the Board of Directors shall from time to time prescribe by resolution, of the average daily [value] *aggregate margin requirement in respect* of the stock option contracts outstanding

VOL 48 ISS 93 MY 12 1983 UMI

during the [three] preceding calendar month[s].

(b) The contribution to the [Debt] *Non-Equity* Securities Clearing Fund of each [Debt] *Non-Equity* Securities Clearing Member (except recently admitted Clearing Members whose contributions are fixed pursuant to Article VIII of the By-Laws) for each calendar month shall be the greater of (x) $100,000, or such greater amount as the Board of Directors may from time to time prescribe by resolution applicable to all [Debt] *Non-Equity* Securities Clearing Members, or (y) such Clearing Member's proportionate share of an amount equal to [7%] *5%*, or such greater percentage as the Board of Directors shall from time to time prescribe by resolution, of the average daily [value] *aggregate margin requirement in respect* of the [debt] *non-equity* securities option contracts outstanding during the [three] preceding calendar month[s].

(c) For the purposes of this Rule, the average daily [value] *aggregate margin requirement in respect* of stock option contracts or [debt] *non-equity* securities option contracts, as the case may be, outstanding during the [three] preceding calendar month[s] shall be determined by (i) determining, for each business day during the [three] preceding calendar month[s], the sum of [the] *all* daily *margin required to be deposited on such business day by all Clearing Members pursuant to Rules 601, 602, and 609* [options marking prices (determined in accordance with Chapter VI of the Rules) of all short positions in such option contracts maintained with the Corporation at the close of such business day]; (ii) calculating the sum of the amounts determined in step (i), and (iii) dividing the sum arrived at in step (ii) by the aggregate number of business days in such [three] preceding calendar month[s]. A Clearing Member's proportionate share shall be a fraction, the numerator of which shall be the daily average number of stock option or [debt] *non-equity* securities option contracts, as the case may be, held by such Clearing Member in open long and short positions with the Corporation during the [three] preceding calendar month[s], and the denominator of which shall be daily average number of stock option or [debt] *non-equity* securities option contracts, as the case may be, held by all Clearing Members in open long and short positions with the Corporation during such [three] preceding calendar month[s].

Interpretations and Policies

1. The Board of Directors of the Corporation has prescribed that, at the present time, the percentage amount referred to in paragraphs (a) and (b) of this Rule 1001 shall be 7% of the average daily aggregate margin requirement with respect to stock and non-equity securities options, respectively.

II. Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of, and basis for, the proposed rule change. The text of these statements may be examined at the places specified below. OCC has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed revision of Rule 1001 would base Clearing Members' contributions to OCC's Clearing Funds on aggregate margin requirements rather than open interest value. OCC believes that this change will relate the size of the Clearing Funds more closely to OCC's actual risks. It is contemplated that the change will reduce the size of Clearing Fund contributions and therefore reduce the burden on OCC's Clearing Members. Contributions would be based upon 30-day rather than 90-day averages of daily aggregate margin requirements in order that the size of the Clearing Funds will increase and decrease more rapidly in response to changes in aggregate margin requirements.

The proposed rule change is consistent with Section 17A(b)(3) (A), (D), and (F) of the Act because it provides for the safeguarding of securities and funds in OCC's custody, provides for the equitable allocation of Clearing Fund contributions, and protects investors and the public interests by providing for Clearing Funds that are sufficient to cover any anticipated loss by OCC through the default of a Clearing Member and are more reasonably related to OCC's actual risks.

(B) Burden on Competition

OCC does not believe that the proposed rule change would have any material impact on competition.

(C) Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments were not and are not intended to be solicited by OCC with respect to the proposed rule change, and no written comments have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

(a) by order approve such proposed rule change, or

(b) institute proceedings to determine whether the proposed rule should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 4, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19723; File No. SR-PSE-83-09]

Self-Regulatory Organization; Proposed Rule Change by the Pacific Stock Exchange Inc., Relating to the Increase of Option Positions and Exercise Limits

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 29, 1983, the Pacific Stock Exchange Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Pacific Stock Exchange Incorporated ("PSE" or "Exchange") proposes to amend Rule VI, Sections 5 and 6, of the Rules of its Board of Governors. The proposed amendments relate specifically to Rule VI, Section 5, Commentary .05 and .06, and Rule VI, Section 6, Commentary .01 (Brackets indicate deleted language; italics indicates added language.)

Rule VI, Section 5

Commentary .05

The current position limits established pursuant to Section 5 follow: aggregate positions shall be [2,000] *2,500 or 4,000* contracts on the same side of the market in the same underlying stock [.] , *which limit is determined in accordance with Commentary .06.* These position limits shall include [2,000] *2,500 or 4,000* long call options, or [2,000] *2,500 or 4,000* short put options, or any combination thereof not to exceed an aggregate of [2,000] *2,500 or 4,000* contracts, and [2,000] *2,500 or 4,000* short call options, or [2,000] *2,500 or 4,000* long put options, or any combination thereof not to exceed an aggregate of [2,000] *2,500 or 4,000* contracts. *Whether a limit is 2,500 or 4,000 option contracts shall be determined in the manner described in Commentary .06 below.*

Rule VI, Section 5

Commentary .06

The position limit shall be 4,000 contracts for options: (i) on an underlying stock which had trading volume of at least 20,000,000 shares during the most recent six-month trading period; or (ii) on an underlying stock which had trading volume of at least 15,000,000 shares during the most recent six-month trading period and has at least 60,000,000 shares currently outstanding. The position limit shall be 2,500 contracts for all other options.

The Exchange will review the volume and outstanding share information of all underlying stocks on which options are traded on the Exchange every six months to determine which limit shall apply. The 4,000 contract limit will be effective on the date set by the Exchange, while any change from a 4,000 contract limit to a 2,500 contract limit will take effect after the last expiration then trading, unless the requirement for a 4,000 contract limit is met at the time of the intervening six-month review.

Rule VI, Section 6

Commentary .01

The exercise limits established pursuant to this Section shall be [2,000] *2,500 or 4,000* option contracts of any particular class of options and it shall be the responsibility of each member organization accepting orders for the purchase (in opening transactions) of option contracts of a class of options dealt in on the Exchange to inform its customers of the applicable exercise limits and not to accept any exercise of an option contract from any customer in any instance in which such member organization has reason to believe that such customer, acting alone or in concert with others, has exceeded or is attempting to exceed such exercise limits. *Whether an exercise limit is 2,500 or 4,000 option contracts shall be determined in the manner described in Rule VI, Section 5, Commentary .06.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to increase position and exercise limits for stock options in order to add to market depth and liquidity.

Position and exercise limit rules were originally adopted by option exchanges in order to minimize the manipulative potential which could result from the accumulation of large option positions. In 1978, the Special Study of the Options Market ("Study") recognized a number of significant problems which resulted from the position limit rule restrictions, including the inability of large portfolio managers to utilize options as a vehicle to properly balance a portfolio's risk and potential reward. The Study recommended that existing Exchange Rules, which limited the size of option positions held by market participants, be reviewed and that their relaxation or elimination be considered. As a result of re-examination of position limits, as suggested in that Study, the Exchange proposed rule changes which were adopted in October 1980 to raise position and exercise limits from 1,000 to 2,000 contracts. In view of the increased use of the options markets and the experience gained during the two years since the position limits were increased in 1980, the Exchange believes that it is appropriate at this time to again increase position and exercise limits.

In its 1980 release approving position and exercise limit increases, the Commission made the following statements (Release No. 34-17237) that the Exchange believes also apply to the current proposal to increase limits:

> • • • There is substantial reason to believe that the current ceiling serves to constrict significantly the options activities of certain market professionals and institutions, possibly to the detriment of market depth and liquidity. In addition, the Commission believes that the surveillance capabilities of the options exchanges with respect to large options positions should minimize the possibility of manipulation. Finally, the Commission believes that the information and experience gained from approval of the proposed modification will enhance the ability of the options exchanges and the Commission to responsibly propose and effectively evaluate possible further modificaitons • • •

It should be noted that position limits cannot be justified as a protection against financial exposure. While unhedged larger positions do entail larger financial risks, position limits are cumbersome and ineffective mechanisms for limiting those risks. Rather, those rules which have been designed specifically to limit risk exposure should be used for this purpose; namely, suitability, margin, and net capital rules.

The change from 2,000 to 2,500 option contracts is minimal, especially in view of the Exchange's experience to date

VOL 48 ISS 93 MAY 12 1983 UMI

with the 2,000-contract limit. The change from 2,000 to 4,000 option contracts involves standards that are a protection against possible manipulation. These standards insure that only option contracts having an underlying stock that has either very high trading volume or high trading volume and a high number of shares outstanding will receive the higher limit. The standards mean that the options and stocks involved are significantly less susceptible to manipulation. To be eligible for the 4,000-contract limit, either the most recent six-month trading volume of the underlying stock must have totaled at least 20,000,000 shares; or the most recent six-month trading volume of the underlying stock must have totaled at least 15,000,000 shares and the underlying stock must have at least 60,000,000 shares currently outstanding.

Every six months, the Exchange will review the status of underlying stocks for options traded on the Exchange to determine which limit should apply. Two new lists shall be published and distributed to all members and member firms. The 4,000 limit will be effective on the date set by the Exchange, which date will allow time for appropriate notice to be given. Any change from a 4,000 to a 2,500 limit will take effect after the last expiration then trading, unless the requirement for a 4,000 limit is met at the time of the intervening six-month review.

The basis for this proposed rule change is Section 6(b)(5) of the 1934 Act, in that the proposed change would increase market depth and liquidity, which is in the public interest, while continuing to protect investors from manipulative activity.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change imposes no burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of the publication of this notice in the **Federal Register** or within such longer period: (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding; or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change; or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section.

Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned, self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 2, 1983.

George A. Fitzsimmons,

Secretary.

Paperwork Reduction Policies Affecting Small Business; Hearing and Request for Comments

The Chief Counsel for Advocacy will conduct six public hearings on small business paperwork burdens. The goal of the hearings is to assess the impact of the Paperwork Reduction Act of 1980 (PRA) on the small business community and to explore ways to provide greater relief from paperwork burdens.

Written comments or personal appearances are requested. Statements should respond to issues listed below but need not be limited by the list. One of the most difficult problems in assessing the effectiveness of paperwork control is the lack of specific information from small businesses. This notice and the public hearings seek to develop specific information.

Written comments by persons who will not be testifying at a hearing must be received by July 15, 1983. Requests to present an oral statement must be made two weeks in advance of the particular hearing, and witnesses are urged to make two copies of their testimony available to the Chief Counsel at the hearing.

Interested parties should submit two copies of their comments, suggestions, or other information about Federal paperwork and paperwork reduction policies to Mr. Frank S. Swain, Chief Counsel for Advocacy, U.S. Small Business Administration, Room 1012, 1441 "L" Street, NW., Washington, D.C. 20416. Attention: Paperwork Hearings.

To schedule testimony at one of the hearings, contact Dr. Philip Nicoll, Senior Advocate for Paperwork Policy, at the Office of Advocacy, U.S. Small Business Administration, Room 1012, 1441 "L" Street, NW., Washington, D.C. 20416, phone (202) 634-6180.

The dates and cities scheduled are:

Monday, June 6, 1983, Tampa, Florida
Wednesday, June 15, 1983, Dallas, Texas
Wednesday, June 22, 1983, Indianapolis, Indiana
Thursday, June 30, 1983, Boston, Massachusetts
Wednesday, July 13, 1983, San Francisco, California
Friday, July 15, 1983, Seattle, Washington

For exact times and places, call (202) 634-6180.

1. Reason for These Hearings

The Paperwork Reduction Act (PRA) was passed by Congress in 1980 to systematize and reduce Federal information collection and recordkeeping requirements. The Act marks the recognition of the increasing burden of duplicative government forms, reports and recordkeeping requirements.

Studies show that small businesses in particular are disproportionately burdened by Federal paperwork requirements. Since many paperwork burdens are the same for all companies regardless of size, small businesses' ability to compete is disproportionately affected by the paperwork aspects of regulation.

The PRA made several important changes in the law. It centralized Federal paperwork authority in the Office of Management and Budget and created the Office of Information and Regulatory Affairs (OIRA). The Act set goals for reduction of Federal paperwork by 25 percent from April 1981 to April 1983. It also provided that no person could be penalized for not complying with a Federal information collection requirement unless the requirement has been cleared by OMB and has been assigned an OMB clearance number.

The PRA authorized the OIRA to function until September 30, 1983, and Congress is currently considering reauthorization of the OIRA. The Chief Counsel for Advocacy has been charged by Congress with developing information to correct small business problems and is authorized by law to hold hearings for these purposes (Pub. L. 94-305, Sections 203(5) and 204(5)). Thus, the Chief Counsel seeks assistance from the public in gauging the progress made toward controlling regulations and paperwork through the Paperwork Reduction Act as well as other regulatory reform efforts. In addition the Chief Counsel oversees agency compliance with the Regulatory Flexibility Act, which directs agency analyses of both regulatory and paperwork burdens.

2. Who Should Comment or Testify?

Small business owners, small business organizations, or other individuals who can provide personal examples, statistical information, or other information or perceptions about trends in paperwork burdens affecting business at the Federal and state levels. For example, persons with experience with paperwork burdens related to the following would be particularly appropriate: Tax, government contracting, environmental, health and safety regulation, licensing, periodic business censuses, regulation of transportation, communications, banking or energy and construction.

3. Issues to Address

Information is welcome on any aspect of small business paperwork and recordkeeping policy, but specific responses for the following questions will be especially appreciated.

1. Have business-related Federal recordkeeping or reporting burdens increased or decreased since 1981?

2. Which paperwork requirements impose the greatest burdens on business? Please provide specific information on the costs imposed by the particular paperwork requirement or operational limitations. Are these changes that should be made in the paperwork requirement?

3. Are there examples where paperwork burdens have been reduced since 1981? What was the impact of these changes? Describe any initiatives by Federal agencies to involve small business in paperwork policy decisions.

4. Have state and local paperwork burdens changed since 1981? Please explain. Have states adopted paperwork requirements dropped by Federal agencies?

5. Is repetitious paperwork imposed by different units of the same agency or department, or by more than one agency or department of Federal or state government? Please describe.

6. Are you familiar with the public protection provision of the Paperwork Act? Do you know of Federal forms or recordkeeping requirements that do not bear an OMB clearance number? Document each one.

7. Are there changes that you would recommend in the Government's response to the paperwork problems of small businesses?

Dated: May 9, 1983.

Frank S. Swain,

Chief Counsel for Advocacy.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 83-023]

Certificate of Alternative Compliance; Notice of Certificate Granted for the 270' WMEC Class

AGENCY: Coast Guard, DOT.

ACTION: Notice.

SUMMARY: Pursuant to paragraph (c), Section 1605, Title 33 of the United States Code, notice of certification of alternative compliance granted to the 270' WMEC class of Coast Guard cutters is hereby made.

On January 5, 1983, the 270' Famous class was granted an exemption from the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) vertical and horizontal positioning requirements for masthead lights. These exemptions were made under authority of Rule 1(e) of 72 COLREGS and Sec. 6 of the International Navigational Rules Act of 1977 (91 Stat. 309, 33 U.S.C. 1605).

Rule 23 of 72 COLREGS requires vessels over 50 meters in length to carry a forward and after masthead light. Section 2 of Annex I to 72 COLREGS requires the forward masthead light to be carried not less than 11.6 meters (the maximum beam of the vessel) above the hull. The 270' WMEC class cannot meet this requirement because of its special construction and purpose.

The 270' class is equipped with an optical sight connected to its COMDAC system. This sight is located directly aft of the forward mast location. If the forward light is placed at the required height, it would interfere with the operation of the sight. The alternative vertical position for the forward masthead light is approximately 10.7 meters above the main deck. This is the closest possible compliance with the positioning requirements of Section 2 of Annex I to 72 COLREGS without interfering with the special function of the vessel.

Section 3 of Annex I to 72 COLREGS specifies a minimum horizontal distance between the two masthead lights of half the vessel's length. The 270' WMEC class cannot meet this requirement because of its special construction and purpose.

The helicopter hangar and flight deck limit the separation on the after end of the vessel and the gun mount on the forward deck limits separation between the masthead lights to about 16.4 meters. This is the closest possible compliance with the positioning requirements of Section 3 of Annex I to 72 COLREGS without interfering with the special function of the vessel.

The vessels in the 270' class include, but are not limited to, the following:
CGC BEAR (WMEC 901)
CGC TAMPA (WMEC 902)
CGC HARRIET LANE (WMEC 903)
CGC NORTHLAND (WMEC 904)
CGC SPENCER (WMEC 905)
CGC SENECA (WMEC 906)
CGC ESCANABA (WMEC 907)
CGC TAHOMA (WMEC 908)
(WMEC 909)

VOL 48 ISS 93 MAY 12 1983 UMI

(WMEC 910)
(WMEC 911)
(WMEC 912)
(WMEC 913)

A copy of the Certificate of Alternative compliance and documentation are available for inspection at Coast Guard Headquarters, Office of Navigation, Room 1006, 2100 Second St. S.W., Washington, D.C. 20593, between the hours of 8 a.m. and 3:30 p.m., Monday through Friday.

Dated: May 4, 1983.

R. A. Bauman,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

BILLING CODE 4910-14-M

Federal Aviation Administration

Updated Report of the Fleet Status and Compliance Plans of U.S. Domestic Aircraft Operators as They Move Toward Compliance with the FAA's Aircraft Noise Regulation

AGENCY: Federal Aviation Administration (FAA), DOT.

SUMMARY: The table below summarizes the fleet compliance status as of January 1, 1977 (approximately the date the regulation was issued), the status as of April 1, 1980, January 1, 1981, January 1, 1982, January 1, 1983, and fleet projections for the phased compliance deadline of January 1, 1985. When the regulation was issued, slightly over 20 percent of the U.S. fleet met the FAA noise standards. As of January 1, 1983, almost 73 percent of the fleet complied and that percentage will reach 86 percent by January 1, 1985.

DISCUSSION: In December 1976, the FAA issued Subpart E of Part 91 of the Federal Aviation Regulations [14 CFR Part 91] which prescribes noise limits for U.S. registered, civil subsonic turbojet airplanes with maximum weights over 75,000 pounds and having standard airworthiness certificates. These requirements prohibit domestic operation in the United States of affected airplanes after specified dates, with full compliance required by January 1, 1985.

In November 1980, the FAA issued a final rule (adopting Title III of the Aviation Safety and Noise Abatement Act of 1979) to extend these same noise compliance requirements to all operators of affected aircraft in the United States, whether U.S. or foreign registered. This rule also provided for exemptions to extend the compliance deadline for two-engine airplanes (DC-9, Boeing 737, BAC 1-11, and SE-201) to January 1, 1985 (for over 100 seats) or to January 1, 1988 (for 100 or fewer seats) as protection for small community service.

To ensure that all domestic operators are taking appropriate steps to meet the noise compliance requirements, the FAA amended 14 CFR Part 91 in December 1979, to require the operators of affected turbojet airplanes to provide the current status of their fleets and their plans for achieving timely and continuing compliance. The first summary report on Fleet Noise Compliance was published on July 17, 1980 (45 FR 48011), the second on August 6, 1981 (46 FR 40126), and the third on July 8, 1982 (47 FR 29754). This report is an update to that publication.

As originally issued, the FAA noise compliance regulation required full compliance by January 1, 1985. To date, the FAA has issued exemptions for 488 two-engine airplanes as protection for small community service. These exemptions were issued to 33 operators and extend the compliance dates to January 1, 1985, for 130 airplanes and to January 1, 1988, for 358 airplanes.

The table also indicates the pace at which U.S. operators are moving the four-engine narrowbody models (Boeing 707 and 720, DC-8) from domestic service. All of these will be gone by January 1, 1985, except for 75 stretch DC-8's, which are currently planned for reengining.

Information in the compliance plans submitted by many of the operators included future additions to their fleets. Where available, these data have been incorporated in the table. However, operators are not required to provide this type of information to the FAA under this program and, as a consequence, this table is not indicative of total future airplane purchases or the total future U.S. fleet.

FOR FURTHER INFORMATION CONTACT: Mr. Richard N. Tedrick, Manager, Noise Policy and Regulatory Branch, AEE-110, Noise Abatement Division, Office of Environment and Energy, Federal Aviation Administration, 800 Independence Avenue, S.W., Washington, D.C. 20591, Telephone: (202) 755-9027.

Issued in Washington, D.C., on April 28, 1983.

Richard N. Tedrick,

Acting Manager, Noise Abatement Division, AEE-100.

BILLING CODE 4910-13-M

Federal Highway Administration

[FHWA Docket No. 82-17, Notice 2]

Alternate Designs for Bridges; Policy Statement

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of policy statement.

SUMMARY: This notice provides a statement of FHWA policy on the development of alternate designs for major bridges to be constructed with Federal-aid highway funds. A proposed policy statement was published on October 18, 1982, in order to solicit public comments. Those comments as well as revisions to the proposed policy statement are discussed under the heading **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: Mr. F. D. Sears, Review and Analysis Branch Bridge Division, (202) 472-7680, or Mr. Michael J. Laska, Office of the Chief Counsel, (202) 426-0761, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Background

On December 4, 1979, the FHWA issued a Technical Advisory (TA) entitled Alternate Bridge Designs. This Technical Advisory was intended to stimulate competition in the design of safe and economical bridge structures and, at the same time, through the competitive bidding process, to take advantage of the prevailing economic conditions which will provide a finished structure at the lowest possible cost without sacrificing safety, quality, or aesthetics.

A memorandum was issued to all Regional Federal Highway Administrators on April 22, 1981, to strengthen FHWA's effort in promoting the use of alternate bridge designs among all State and local governments, including those that have adopted certification acceptance. On September 23, 1981, a second memorandum to all Regional Federal Highway Administrators requested each division office to review and revise its administrative procedures to ensure that alternate bridge designs would be incorporated in all major bridge projects. Guidelines were presented in still a third memorandum on June 16, 1982, to all Regional Federal Highway Administrators, so that FHWA field offices could take appropriate measures to assure themselves that the spirit and intent of alternate bridge designs were being followed.

On October 18, 1982, the FHWA published a notice of a proposed policy statement (47 FR 46403) on alternate bridge designs. The intent of this notice was to replace the current TA with a consolidated formal FHWA policy on Alternate Bridge Designs and to invite public comment thereon. This notice establishes a policy on alternate bridge design based on comments made to the docket as well as a further review.

Discussion of Comments

Sixty-eight comments were received in response to the proposed policy statement. Comments were submitted by representatives from the following interest groups: 43 government agencies (36 State, 6 local, and one Federal), 10 trade associations, 6 consulting firms, 6 contractors, and one private citizen.

A primary issue addressed by those submitting comments was the scope of the application of the proposed policy. Fourteen respondents indicated that the policy should only be applied to major bridges. Three respondents indicated that there should be no restrictions as to application. Eight respondents indicated a variety of estimated construction costs above which the policy should apply with the highest amount being $10 million. Although not specifically indicated in the October 18 Notice, it had been the intent of the FHWA that the policy would emphasize major bridges. Accordingly, the final policy statement has been revised to reflect the application to major bridges as defined in the Federal-Aid Highway Program Manual (FHPM 6-1-2-1).[1]

Another issue addressed concerned the requirements that States obtain documented concurrence of noncompetitiveness from industry to waive alternate design. Twenty-one respondents indicated opposition to such a requirement citing the difficulty and potential lack of objectivity in obtaining such concurrence. The FHWA agrees with the comments and for this reason, the final policy statement is revised to delete the requirement of documented concurrence.

Seventeen respondents addressed the utilization of value engineering clauses. While two respondents indicated that value engineering need not be applied, 10 respondents indicated that value engineering should apply at the design stage, while five indicated it should be applied during the construction stage. The final policy statement has been revised to encourage value engineering at the design stage. With regard to preliminary plan approval, 21 respondents commented that State expertise in bridge type selection should be recognized as a factor in reaching preliminary bridge plan approval decisions. The FHWA agrees with the comments made and for this reason, the final policy statement has been revised to reflect and acknowledge such State studies.

Upon further review, the provisions on specific construction methods within design documents and maintenance which were proposed in the October 18 Notice have been deleted. The deletions are being made because the povisions are considered not to be appropriately related to the policy being established. The provision on consideration of competitive materials and structural types has been simplified. Finally, a provision is added which states that the established policy shall not be interpreted to exclude consideration of alternate designs for any other type or classification of structure when appropriate.

Based upon the aforementioned analysis and discussion of comments made to the docket, the FHWA is establishing a policy to encourage alternate designs and strategies in the process of selecting the type of bridge to be constructed.

The final FHWA policy is as follows:

1. Preliminary plan development for major bridges should be based on engineering and economic evaluation of acceptable alternate designs. The definition of a major bridge is contained in the Federal-Aid Highway Program Manual (FHPM 6-1-2-1).

2. Alternate designs should consider the utilization of competitive materials and/or structural types.

3. Economic evaluation of preliminary estimates should take into consideration, to the maximum extent possible, the relative accuracy of estimates for state-of-the-art type methods of construction.

4. When comparative economic estimates are reasonably close to each other, two or more complete sets of contract documents should be prepared and advertised.

5. Value engineering at the design stage should be strongly encouraged.

6. Options should be considered for structure components (piling, expansion

[1] The FHPM is available for inspection and copying as prescribed in 49 CFR Part 7, Appendix D. Major bridges are bridges estimated to cost more than $5 million, or having spans in excess of 150 feet, or viaduct type of structures whose total length is in excess of 1,000 feet. This criterion applies to individual units of separated dual bridges.

joints, bearings, prestressing systems, etc.).

7. A determination of FHWA approval and participation in the development of alternate or single project plans, specifications and estimates for major bridges will be made after evaluation of a State's submittal of preliminary bridge plans and cost studies. Recognizing that the States are experienced and have broad expertise in factors pertinent to bridge type selection in their States, the FHWA will review comprehensive State studies and subsequent recommendations as a primary factor in reaching preliminary bridge plan approval decisions.

At the some time, FHWA approvals will be based upon the need to ensure safe, efficient and cost effective bridge projects which meet the aesthetic and structural requirements of the site and are based upon the latest, proven technology and techniques.

8. The submittal of preliminary bridge plans for approval should be accompanied by the State's plan for developing the project to completion (horizontal or vertical stage construction, number of contracts, etc.).

9. This policy shall not be interpreted as deterring any State or FHWA field office from considering alternate designs for any other type or classification of structure which they would consider appropriate.

This policy is written with the intent of taking advantage of the evolving state-of-the-art of bridge construction and fluctuating economic conditions in the market place while not compromising sound engineering, safety, quality control, or aesthetics.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The Procedures as provided by OMB Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and project apply to this program.)

Issued on: May 5, 1983.

L. P. Lamm,

Deputy Federal Highway Administrator, Federal Highway Administration.

[FR Doc. 83-12734 Filed 5-11-83; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement; San Mateo County, California

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project on Route 1 in San Mateo County, California.

FOR FURTHER INFORMATION CONTACT: David Eyres, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, California, 95809, telephone (916) 440-3541.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the California Department of Transportation, will prepare a draft environmental impact statement (EIS) on the proposed solutions to road failure on Route 1 at Devil's Slide. The limits of the proposed action run from Half Moon Bay Airport to Linda Mar Boulevard in the City of Pacifica, a distance of 7 miles.

The EIS will discuss the no project alternative and three route alternatives: the bypass alignment adopted by the California Highway Commission; a bypass alignment in the general vicinity of Martini Creek; and the existing Route 1 alignment. For the adopted and Martini Creek alignments, two design alternatives are under consideration.

1. Construction of a 2-lane highway with slow-vehicle lanes on grades; and

2. Construction of a 4-lane, ultimate 6-lane, freeway.

The existing alignment alternative will only provide a continuance of the existing 2-lane highway by realignment in the immediate vicinity of Devil's Slide.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed interest in this proposal.

A public scoping meeting was held on March 10, 1983, at the Farallone View Elementary School in Montara. Notice of the meeting was published in the *San Mateo Times*, the *Pacific Tribune*, and the *Half Moon Bay Review*. Another scoping meeting for local, State, and Federal agencies is scheduled for May 26, 1983, at 10:00 a.m., in Room 22, Caltrans District Office, 150 Oak Street, San Francisco, California. Public agencies involved with this project will be notified by mail of this meeting.

To ensure that the full range of issues related to this proposed action are addressed, and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address given above.

Issued on: May 3, 1983.

James H. Lamb,

Acting District Engineer, Sacramento, California.

Correction

In FR Doc. 83-11615 appearing on page 19812 in the issue of Monday, May 2, 1983, the date at the beginning of the sixteenth line of column two should have read, "June 10, 1983."

BILLING CODE 1505-01-M

National Highway Traffic Safety Administration

Calendar of Meetings for International Harmonization of Safety Standards

The National Highway Traffic Safety Administration (NHTSA) will continue its participation during this year in the international meetings to harmonize U.S. and foreign motor vehicle safety standards. These meetings will be conducted by the Group of Experts on the Construction of Vehicles (WP29) under the Inland Transport Committee of the United Nation's Economic Commission for Europe (ECE) and the eight groups of Rapporteurs of the WP29. The NHTSA participates in all of the rapporteur meetings except those on Pollution which are presented by the Enviornmental Protection Agency (EPA).

This calendar consists of those meetings in which the NHTSA and the EPA will provide representation and in which the public interest is expected. It is published for information and planning purposes and the meeting dates and places are subject to change. Inquiries or comments relating to specific meetings should be made at least two weeks preceding that meeting.

FOR FURTHER INFORMATION CONTACT: Francis J. Turpin, Office of Vehicle Safety Standards, (NRM-10), National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202) 426-2212.

BILLING CODE 4910-59-M

[Docket No. 83-04; Notice 1]

Planning for Safety Priorities; 1983 Safety Priorities Plan

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of availability and request for comment.

SUMMARY: This notice announces the availability of the NHTSA publication, "Planning for Safety Priorities: 1983 Safety Priorities Plan," and invites the public to submit comments. The plan presents NHTSA's program priorities in three basic categories: Highway and traffic safety, vehicle crashworthiness and vehicle crash avoidance. The plan also describes the significant safety problems, which were derived from analyses of NHTSA's statistical data bases, and the method and procedures used in establishing the safety priorities.

DATE: Deadline for submission of comments is July 5, 1983.

ADDRESSES: Interested persons may obtain a copy of the plan free of charge by contacting: Office of Administrative Operations (NAD-51), National Highway Traffic Safety Administration, Room 4423, 400 Seventh Street, SW., Washington, D.C. 20590; (202-426-0874).

All comments should refer to the docket and notice numbers and be submitted to: Docket Section (NAD-52) Room 5109, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. (Docket hours are 8:00 a.m. through 4:00 p.m.)

FOR FURTHER INFORMATION CONTACT: Ellen Kranidas, Director, Office of Planning and Analysis, Plans and Programs, National Highway Traffic Safety Administration, Room 5212, 400 Seventh Street, SW., Washington, D.C. 20590; (202-426-1600).

SUPPLEMENTARY INFORMATION: Previously, NHTSA has published multi-year plans for rulemaking, highway safety, and research and development. In contrast to past plans, the Safety Priorities Plan embodies a conscibus, coordinated and carefully devised balance between motor vehicle and highway safety types of activity. The agency has, for the first time, systematically focused one planning effort on the entire spectrum of known available or potential solutions. Instead of the more traditional compartmentalized approach to different aspects of the problem (i.e., highway and motor vehicle), this year-long planning effort has brought all agency resources together to address the same issues at the same time.

Some of the measures examined in this plan are immediate and short term, capable of being adopted now. Others, especially those involving extensive research, are of longer duration, or still in the planning process. In all cases, however, NHTSA's assessment of current safety priorities reflects the agency's concern that our national resources be directed at those activities and targets of opportunity which have the most realistic prospect of success.

The highway safety portion of the agency's planning exercise has led to greater emphasis than ever before on two aspects of driver/operator and passenger concern: Alcohol and drug impairment, and failure to use existing occupant restraint technology. Together, these areas of concern account for more than one-half of all accidents, and more than one-half of all fatalities and injuries in those accidents which do occur. The effects of improvements in these areas can be major, immediate and achievable through existing technology and vehicle equipment.

The agency has also accelerated its exploration of ways to improve motor vehicle safety technology. Expanding data collection and analysis activities are enabling NHTSA to better understand the causes of motor vehicle accidents and the manner in which people are injured when a crash does occur.

As a result, NHTSA can attempt to lessen the incidence of accidents and the severity of injuries through vehicle crash avoidance and crashworthiness activities, respectively. The top

VOL 48 ISS 93 MY 12 1983

priorities in the former area include vehicle lighting and braking improvements—particularly in the area of heavy truck braking—and in the latter area include steering assembly, side impact protection and vehicle interior improvements.

The safety priorities outlined in this plan are the result of a careful analysis by the agency of the Nation's safety problems, and the costs and benefits of alternative solutions to them. Although the agency is already undertaking development of the safety improvements described herein, the priority setting process, which is also described in detail, is ongoing and dynamic. It allows changes to be made in response to new accident data or research results and sets an orderly, disciplined and comprehensive set of criteria for the making of such changes.

Thus, this plan is also being published for public comment so that the agency may benefit from the expertise of those many persons and organizations concerned with highway safety.

(Secs. 401 et seq., Pub. L. 97-35, 95 Stat. 357 (23 U.S.C. 401 et seq.) and secs. 101 et seq., Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1381 et seq.); delegation of authority at 49 CFR 1.50 and 501.8)

Issued on May 4, 1983.

Barry Felrice,

Associate Administrator for Plans and Programs.

BILLING CODE 4910-59-M

Research and Special Programs Administration

Applications for Exemptions; List

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: List of Applicants for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Regulation of the Materials Transportation Bureau has received the applications described herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

DATES: Comment period closes June 14, 1983.

ADDRESS COMMENTS TO: Dockets Branch, Office of Regulatory Planning and Analysis, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 7th Street, SW., Washington, D.C.

NEW EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9038-N	E. I. Du Pont De Nemours & Company, Wilmington, DE.	49 CFR 173.301(d)	To authorize shipment of tetrafluoroethylene, inhibited, classed as a flammable gas in DOT Specification 3A2400 and 3AA2400 cylinders, interconnected by means of manifolding. (Mode 1.)
9039-N	Badger Welding Supplies, Inc., Madison, WI	49 CFR 173.34(e)(15)(i)	To authorize DOT Specification 3A and 3AA cylinders which are 35 years old or older to be hydrostatically tested every 10 years instead of every 5 years for shipment of those commodities authorized in 3A or 3AA cylinders. (Mode 1.)
9040-N	The Continental Group, Inc., Lombard, IL	49 CFR 173.249a (d)(3)	To manufacture, mark and sell non-DOT specification plastic lined fiber drums with non-removable plastic top heads for shipment of certain corrosive liquids. (Modes 1, 2, and 3.)
9041-N	Hercules Incorporated, Wilmington, DE	49 CFR 173.100 (bb), 175.3	To authorize shipment of devices, in specially designed packagings, containing small amounts of explosive described as detonating fuze, Class C. (Modes 1, 4.)
9042-N	Noury Chemical Corporation, Burt, NY	49 CFR 173.221	To authorize shipment of a Tert-Butyl Cumyl peroxide classed as an organic peroxide in DOT Specification 57 portable tanks. (Mode 1.)
9043-N	Ozelle Harrington Trucking Company, Benson, AZ.	49 CFR 173.154(a)(18)	To authorize shipment of ammonium nitrate, solution, classed as an oxidizer, in cargo tanks comparable to DOT Specification MC-307, except they have a design pressure of less than 25 psi. (Mode 1.)
9044-N	O'Neal, Jones & Feldman, Inc., St. Louis, MO	49 CFR 172.400, 173.25(a), 175.30(a)(3)	To authorize shipment of limited quantities of a poison B liquid, n.o.s. in specially designed composite type packaging without labeling. (Modes 1, 4, and 5.)
9045-N	International Paper Company, New York, NY	49 CFR 173.154, 173.245b, 173.365	To manufacture, mark and sell non-DOT specification six-sided corrugated fiberboard drums not to exceed 30 gallon capacity for shipment of various flammables, oxidizers and Class A poisonous solids. (Modes 1, 2.)
9046-N	Schenectady Chemicals, Inc., Schenectady, NY.	49 CFR 173.245	To authorize shipment of certain corrosive liquids, n.o.s. in DOT Specification 57 portable tanks. (Mode 1.)
9047-N	Union Carbide Corporation, Danbury, CT	49 CFR 173.124(a), 175.3	To authorize use of copper-bearing (brass) valves in DOT Specification cylinders and DOT Specification 5p drums containing ethylene oxide. (Modes 1, 2, 3, and 4.)
9048-N	Emerson Electric Company, Statesboro, GA	49 CFR 173.119, 173.304, 173.315	To manufacture, mark and sell meter proving units to be affixed to a truck or trailer used to calibrate meters containing liquid hydrocarbon products. (Mode 1.)
9049-N	U.S. Steel Supply Container, Chicago, IL	49 CFR 178.134-4	To authorize use of 256 DOT Specification 37M steel drums of 55 gallon capacity which were inadvertently embossed as DOT Specification 37A, for shipment of those commodities authorized in DOT Specification 37M. (Modes 1, 2.)
9050-N	United Executive Jet, Inc., Chesterfield, MO	49 CFR 172.101, 175.30	To authorize carriage of ammunition for small-arms with explosive projectile, Class A explosive via cargo-only aircraft. (Mode 4.)
9051-N	Amerex Corporation, Trussville, AL	49 CFR 178.60-19	To manufacture, mark and sell DOT Specification 4B cylinders with markings stamped on the skirt or footstand of the cylinders, for shipment of those commodities presently authorized in DOT Specification 4B cylinders. (Modes 1, 2, 3, 4, and 5.)
9052-N	Chemical Handling Equipment Co., Inc., Detroit, MI.	49 CFR Part 173, Subpart D, Subpart F, 173.266.	To manufacture, mark and sell non-DOT specification 225 gallon rotationally molded polyethylene portable tanks enclosed in a metal cage, for shipment of those corrosive liquids and hydrogen peroxide presently authorized in DOT Specification 34 and certain flammable liquids. (Modes 1, 2.)

NEW EXEMPTIONS—Continued

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9053-N	Delaware Valley Industrial Gases, Inc., Waterford Works, NJ.	49 CFR 173.34(L)	To authorize the rebuilding of DOT Specification 4 series cylinders in accordance with procedures approved initially by the Bureau of Explosives. (Modes 1, 2, 3, 4, and 5.)
9054-N	Florida Drum Company, Inc., Pine Bluff, AR	49 CFR 173.119, 173.125, 173.256, 173.266(b), Part 173, Subpart F.	To manufacture, mark and sell non-DOT specification 55-gallon polyethylene containers, for shipment of certain corrosive liquids, including those presently authorized in DOT Specification 34; hydrogen peroxide; classed as an oxidizer, and ethyl and methyl alcohol, classed as flammable liquids. (Modes 1, 2, and 3.)
9055-N	Welchem, Inc., Houston, TX	49 CFR 173.119, 173.245	To authorize shipment of various flammable liquids or corrosive materials (oil well treating compounds) contained in 6 separate 60 gallon steel tanks firmly mounted on the chassis of a truck. (Mode 1.)

This notice of receipt of applications for new exemptions is published in accordance with Section 107 of the Hazardous Materials Transportation Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on May 3, 1983.

Joseph T. Horning,

Chief, Exemptions and Approvals Division, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

BILLING CODE 4910-60-M

Applications for Renewal or Modification of Exemptions or Applications to Become a Party to an Exemption

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: List of Applications for Renewal or Modification of Exemptions or Application to Become a Party to an Exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Regulation of the Materials Transportation Bureau has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Except as otherwise noted, renewal applications are for extension of the exemption terms only. Where changes are requested (e.g. to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) they are described in footnotes to the application number. Application numbers with the suffix "X" denote renewal; application numbers with the suffix "p" denote party to. These applications have been separated from the new applications for exemptions to facilitate processing.

DATES: Comment period closes May 26, 1983.

ADDRESS COMMENTS TO: Dockets Branch, Office of Regulatory Planning and Analysis, Materials Transportation Bureau, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Branch, room 8426, Nassif Building, 400 7th Street, S.W., Washington, DC.

[1] To modify exemption by reducing nominal thickness of metal containers from 0.31 mm to 0.28 mm.

[2] To authorize water as an additional mode of transportation.

[3] To authorize poison B liquids, n.o.s. and flammable liquids/poisonous, n.o.s. and other poisons or flammable liquids, as additional commodities.

[4] To reissue exemption as shipper oriented rather than manufacture, mark and sell.

[5] To reissue exemption as shipper oriented rather than manufacture, mark and sell.

[6] To reissue exemption as shipper oriented rather than manufacture, mark and sell.

[7] To authorize shipment of certain flammable liquids/corrosive, n.o.s., classed as flammable liquids, as additional commodity.

[8] To change the wall stress at the minimum specified test pressure from 50,000 psi to 60,000 psi.

[9] To authorize water as an additional mode of transportation.

[10] To authorize DOT specification 12A fiberboard box as additional container for up to 1 gallon glass bottles of certain flammable liquid/corrosive, n.o.s. and corrosive liquids, n.o.s.

[11] To authorize ethyl and methyl alcohols and aqueous solutions, classed as flammable liquids and 52% or less hydrogen peroxide solution, classed as an oxidizer, as additional commodities.

[12] To authorize water as an additional mode of transportation.

[13] To authorize shipment of methyl bromide and methyl bromide mixtures in non-DOT specification foreign made cylinders.

[1] Request party status and to authorize rail and cargo vessel as additional modes of transportation

This notice of receipt of applications for renewal of exemptions and for party to an exemption is published in accordance with Section 107 of the Hazardous Materials Transportation Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on May 5, 1983.

Joseph T. Horning,

Chief, Exemptions and Approvals Division, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

[FR Doc. 83–12094 Filed 5–11–83; 8:45 am]

BILLING CODE 4910–60–M

Office of the Secretary

Reports, Forms, and Recordkeeping Requirements; Submittals to OMB, April 25–April 29, 1983

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Notice.

SUMMARY: This notice lists those forms, reports, and recordkeeping requirements, transmitted by the Department of Transportation, between April 15, 1983 and April 29, 1983 to the Office of Management and Budget (OMB) for its approval. This notice is published in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

FOR FURTHER INFORMATION CONTACT: John Windsor, John Chandler, or Annette Wilson, Information Requirements Division, M–34, Office of the Secretary of Transportation, 400 7th Stree SW., Washington, D.C. 20590, (202) 426–1887 or Gary Waxman or Wayne Leiss, Office of Management and Budget, New Executive Office Building, Room 3001, Washington, D.C. 20503, (202) 395–7313.

SUPPLEMENTARY INFORMATION:

Background

Section 3507 of Title 44 of the United States Code, as adopted by the Paperwork Reduction Act of 1980, requires that agencies prepare a notice for publication in the **Federal Register**, listing those information collection requests submitted to the Office of Management and Budget (OMB) for approval under the Act. OMB reviews and approves agency submittals in accordance with criteria set forth in that Act. In carrying out its responsibilities, OMB also considers public comments on the proposed forms, reporting and recordkeeping requirements.

On Mondays and Thursdays, as needed, the Department of Transportation will publish in the **Federal Register** a list of those forms, reporting and recordkeeping requirements that it has submitted to OMB for review and approval under the Paperwork Reduction Act. The list will include new items imposing paperwork burdens on the public as well as revisions, renewals and reinstatements of already existing requirments. OMB approval of an information collection requirement must be renewed at least once every three years. The published list also will include the following information for each item submitted to OMB:

(1) A DOT control number.

(2) An OMB approval number if the submittal involves the renewal, reinstatement or revision of a previously approved item.

(3) The name of DOT Operating Administration or Secretarial Office involved.

(4) The title of the information collection request.

(5) The form numbers used, if any.

(6) The frequency of required responses.

(7) The persons required to respond.

(8) A brief statement of the need for and uses to be made of the information collection.

Information Availability and Comments

Copies of the DOT information collection requests submitted to OMB may be obtained from the DOT officials listed in the "For Further Information Contact" paragraph set forth above.

Comments on the requests should be forwarded, as quickly as possible, directly to the OMB officials listed in the "For Further Information Contact" paragraph set forth above. If you anticipate submitting substantive comments, but find that more than 5 days from the date of publication is needed to prepare them, please notify the OMB officials of your intent immediately.

Items Submitted for Review by OMB

The following information collection requests were submitted to OMB between April 25, 1983, and April 29, 1983.

DOT No: 2138
OMB No: 2120–0035
By: Federal Aviation Administration
Title: Statement of Qualifications (DAR–DMIR–DER–DPRE–DME)
Forms: FAA Form 8110–14
Frequency: As Required
Respondents: Aviation specialists in five work areas
Need/Use: Information collected is used to determine eligibility of applicants leading to appointment as a parachute rigger, mechanic examiner, engineering representative, inspector, airworthiness representative

DOT No: 2150
OMB No: 2126–0008
By: National Highway Traffic Safety Administration
Title: Vehicle Owner's Questionnaire Survey, Interviews
Forms: None
Frequency: On Occasion
Respondents: Individuals or households
Need/Use: Solicits information from certain vehicle owners to determine whether a safety defect exists in motor vehicles/equipment or tires.

DOT No: 2151
OMB No: 2127–0042
By: National Highway Traffic Safety Administration
Title: 49 CFR Part 576, Record Retention
Forms: None
Frequency: On Occasion
Respondents: Motor Vehicle Manufacturers
Need/Use: Manufacturers retain complaints, reports and other records or motor vehicle malfunctioning that may be related to safety, and may be used to investigate reported defects or noncompliances.

DOT No: 2152
OMB No: 2125–0076
By: Federal Highway Administration
Title: Written Notice of Death After Filing Accident Report
Forms: Form MCS–5OT or 50B
Frequency: On Occasion
Respondents: Motor carriers operating in interstate or foreign commerce
Need/Use: Motor carriers must give written notice of death to the Federal Highway Administration, if death occurs within 30 days as a result of a reported accident.

DOT No: 2153
OMB No: 2127–0051
By: National Highway Traffic Safety Administration
Title: Vehicle Identification Number, Standard 115 Report
Forms: None
Frequency: On Occasion
Respondents: Manufacturers of autos, buses and trucks
Need/Use: To standardize identification of each motor vehicle in event there is a recall for defect or noncompliance.

DOT No: 2154
OMB No: 2120–0098
By: Federal Aviation Administration
Title: Airplane Operator Security—FAR 108
Forms: FAA Form 1650–17, X-ray Systems Radiation Leakage Report (Baggage Inspection)
Frequency: As required
Respondents: Holders of FAA operating certificates for scheduled or charter passenger operations of over 30-seat capacity
Need/Use: Civil Aviation Security Programs require X-ray systems for baggage. Radiation surveys are needed to ensure that X-ray systems used in the security screening of baggage meet applicable performance standards without excessive X-ray leakage.

DOT No: 2155
OMB No: 2115–0051
By: United States Coast Guard
Title: Operation and Recordkeeping Requirements for Cranes and Drilling Rigs Offshore
Forms: None
Frequency: On Occasion
Respondents: Oil companies, drilling contractors, and construction companies operating facilities with cranes on the outer continental shelf.
Need/Use: These information requirements serve as a source for verification of plans, maintenance, testing, and operator qualifications for cranes on the Outer Continental Shelf (OCS), facilities, Mobile Offshore Drilling Units (MODUs), and a few industrial vessels. Information requirements to become effective with publication of the final rule, estimate publication October 1984.

DOT No: 2156
OMB No: 2137–0029
By: Research and Special Programs Administration
Title: Application for Exemption
Forms: None
Frequency: Nonrecurring
Respondents: State and local governments; shippers and carriers of hazardous materials; manufacturers of containers for hazardous materials
Need/Use: To obtain information from entities wishing to obtain an exemption from the hazardous materials regulations. Information is used by the office of Hazardous Materials' staff to evaluate requests to determine if they must be granted or denied.

DOT No: 2157
OMB No: None
By: United States Coast Guard
Title: Subchapter Q—Manufacturers Test Reports (46 CFR), Safety Valves, Fusible Plugs, and Flame Arrestors
Forms: None
Frequency: On Occasion
Respondents: Manufacturers of safety valves, fusible plugs, and flame arrestors
Need/Use: Requirements imposed upon the manufacturers of the specified safety devices for submission of drawings and tests reports are necessary to determine whether the items meet minimum levels of safety and performance, and also serve to identify approved items.

DOT No: 2158
OMB No: 2127–0050
By: National Highway Traffic Safety Administration
Title: 49 CFR Part 574, Tire Identification and Recordkeeping
Forms: 2 formats are permitted
Frequency: On Occasion
Respondents: Manufacturers of tires, tire dealers and purchasers
Need/Use: This regulation requires tire manufacturers' outlets to secure and record names and addresses of purchasers of new tires so that the purchasers can be notified in case of a safety recall; independent tire dealers will no longer be required to maintain records but will provide a postcard to be forwarded to the manufacturer by the purchaser of the tire.

DOT No: 2159
OMB No: 2127–0049
By: National Highway Traffic Safety Administration
Title: 49 CFR Part 575, Consumer Information Regulations
Forms: None
Frequency: On Occasion
Respondents: Manufacturers of motor vehicles/equipment/tires
Need/Use: Regulation establishes a system by which information on the performance and safety of new motor vehicles and new tires is made available to prospective purchasers directly, and by compiled reports available to consumers to comparison shop.

Issued in Washington, D.C., on May 4, 1983.

Karen S. Lee,

Deputy Assistant Secretary for Administration.

VETERANS ADMINISTRATION

Scientific Review and Evaluation Board For Rehabilitation Research and Development; Meeting

In accordance with Public Law 92–463, the Veterans Administration gives notice of a meeting of the Scientific

VOL 48 ISS 93 MY 12 1983 UMI

Review and Evaluation Board for Rehabilitation Research and Development. This meeting will convene at the Marriott Hotel, 1221 22nd Street, N.W., Washington, DC 20037, July 6 and 7, 1983, beginning at 9 a.m. on Wednesday and 9 a.m. on Thursday. The purpose of the meeting is to review rehabilitation research and development applications for scientific and technical merit and to make recommendations to the Director, Rehabilitation Research and Development Service regarding their funding.

The meeting will be open to the public (to the seating capacity of the room) at the start of the July 6th session for approximately one hour to cover administrative matters and to discuss the general status of the program. During the closed session, the Board will be reviewing research and development applications. This review involves oral review and discussion of site visits, staff and consultant critiques of research protocols, and similar documents that necessitate the consideration of personnel qualifications and the performance and competence of individual investigator. Disclosure of such information would constitute a clearly unwarranted invasion of personal privacy. Proprietary data from contractors and private firms will also be presented and this information should not be disclosed in a public session. Premature disclosure of Board recommendations would be likely to significantly frustrate implementation of final proposed actions. Thus, the closing is in accordance with Section 552b, Subsections (c)(4), (c)(6), and (c)(9)(B), Title 5, United States Code and the determination of the Administrator of Veterans Affairs under Section 10(d) of Public Law 92-463 as amended by Section 5(c) of Public Law 94-409.

Due to the limited seating capacity of the room those who plan to attend the open session should contact Dr. Larry P. Turner, Administrative Officer, Rehabilitation Research and Development Service, Veterans Administration Central Office, 810 Vermont Avenue, N.W., Washington, DC 20420 (Phone: (202) 389-5177), at least 5 days before the meeting.

Dated: May 5, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

Scientific Review and Evaluation Board for Health Services Research and Development; Meeting

The Veterans Administration gives notice under the provisions of Public Law 92-463 that a meeting of the Scientific Review and Evaluation Board for Health Services Research and Development will be held at Executive House, 1515 Rhode Island Ave. NW. (at Scott Circle), Washington, DC on June 3, 1983. The meeting will open at 8:30 a.m. and adjourn at 3 p.m. The purpose of the meeting will be to develop general advice to the Director, Health Services Research and Development Service regarding the administration of that Service's research program.

The meeting will be open to the public to the seating capacity of the room. Members of the public may submit written statements or questions to the Chairman, David Levine, M.D., for consideration by the Committee. Such members of the public may be asked to clarify submitted material prior to its consideration by the Committee.

Dated: May 5, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: 9:30 a.m. (eastern time), May 17, 1983.

PLACE: Commission Conference Room No. 200, second floor, Columbia Plaza Office Building, 2401 E Street NW., Washington, D.C. 20506.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

1. Ratification of Notation Vote/s.
2. A Report on Commission Operations (Optional).
3. Freedom of Information Act Appeal No. 83-4-FOIA-51-SE, concerning a request for documents from a closed age discrimination charge file.
4. Freedom of Information Act Appeal No. 83-02-FOIA-031-MK, concerning a request for documents from a case file.
5. Regulations Implementing Section 4(g) of the Age Discrimination in Employment Act (TEFRA).

CLOSED:

1. Litigation Authorization; General Counsel Recommendations.
2. Proposed Withdrawal of prior Commissioners Charges.

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the **Federal Register**, the Commission also provides recorded announcements a full week in advance on future Commission sessions. Please telephone (202) 634-6748 at all times for information on these meetings).

CONTRACT PERSON FOR MORE INFORMATION: Treava McCall, Executive Secretary to the Commission at (202) 634-6748.

This Notice Issued May 10, 1983.

FEDERAL COMMUNICATIONS COMMISSION

Deletion of Agenda Item From May 12th Open Meeting

May 9, 1983.

The following item has been delted at the request of the Office of the Chairman from the list of agenda items scheduled for consideration at the May 12, 1983, Open Meeting and previously listed in the Commission's Notice of May 5, 1983.

Agenda, Item No., and Subject

Policy—2—*Title:* Amendment of FM Table of Assignments regarding Helena, Montana (BC Docket No. 80-523). *Summary:* The Commission will review a Broadcast Bureau decision which assigned four Class C FM channels to Helena, Montana and will review a petition for stay.

Issued: May 9, 1983.

William J. Tricarico,

Secretary, Federal Communications Commission.

[S-675-83 Filed 5-10-83; 10:11 am]

BILLING CODE 6712-01-M

3

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, May 17, 1983 at 10 a.m.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Compliance. Personnel. Litigation. Audits.

* * * * *

DATE AND TIME: Thursday, May 19, 1983 at 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C. (fifth floor).

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of dates for future meetings
Correction and approval of minutes
Eligibility reports for candidates to receive Presidential Primary Matching Payments
Explanation and justification governing collecting agents and joint fundraising
Proposed revisions to Presidential Election Campaign Fund Regulations
Procedures for processing of civil penalties received by the FEC
Finance Committee report
Routine Administrative matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, Telephone: 202-523-4065.

Marjorie W. Emmons,

Secretary of the Commission.

5

FEDERAL MARITIME COMMISSION

TIME AND DATE: 9 a.m., May 18, 1983.

PLACE: Hearing Room One, 1100 L Street NW., Washington, D.C. 20573.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Docket No. 82-58: Actions to Adjust or Meet Conditions Unfavorable to Shipping in the United States/Venezuela Trade—Consideration of status of proceeding and petition of Sea-Land Service to intervene.
2. Petition of the Drug and Toilet Preparation Traffic Conference, Inc. for Clarification of the Refund Order issued in Docket No. 81-10.
3. Docket No. 80-22: International Paper Company v. Seatrain Pacific Services, S.A., et al.—Consideration of request for oral argument and possible consideration of the record.

CONTACT PERSON FOR MORE INFORMATION: Francis C. Hurney, Secretary (202) 523-5725.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 716, 779, 783, 785, and 823

Surface Coal Mining and Reclamation Operations; Initial and Permanent Program Regulations: Prime Farmland

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is amending the special initial and permanent program permit application and performance standard rules for surface coal mining and reclamation operations on prime farmland. These rules will reduce the burden of previous rules, minimize duplication, comply with court orders, and provide for internal consistency by: (1) Combining the reconnaissance-inspection requirements with the permit-application requirements, (2) providing a limited exemption for lands occupied by coal-preparation plants and support facilities, (3) modifying provisions for soil removal and stockpiling, and (4) establishing new procedures for determining success in the restoration of soil productivity. In addition, in response to a court directive, OSM is removing the April 3, 1983, prime farmland "grandfather" exemption cutoff date from the initial and permanent regulatory programs.

EFFECTIVE DATE: June 13, 1983.

FOR FURTHER INFORMATION CONTACT: Donald F. Smith, Division of Engineering Analysis, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240; 202–343–5954.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Discussion of Rules Adopted and Responses to Comments.
III. Procedural Matters.

I. Background

The Surface Mining Control and Reclamation Act of 1977 (the Act), 30 U.S.C. 1201 *et seq.*, contains special permitting and performance standards governing mining on prime farmland as defined in Section 701(20) of the Act. Permit-application information, and approval requirements are contained in Sections 507(b)(16), 508(a)(2)(C), 508(a)(5), and 510(d) of the Act.

Section 507(b)(16) of the Act requires permit applications to contain a soil survey for those lands in the application which a reconnaissance inspection suggests may be prime farmland. Section 508(a)(2)(C) of the Act requires permit applications to contain a statement of the productivity of the land prior to mining, including the appropriate classification as prime farmland. Section 508(a)(5) of the Act requires that the reclamation plan submitted as part of the permit application include a plan for soil reconstruction, replacement, and stablization, pursuant to Section 515(b)(7) of the Act. Furthermore, Section 510(d)(1) of the Act provides that the regulatory authority, after consultation with the Secretary of Agriculture, shall grant a permit to mine on prime farmland if it finds in writing that the operator has the technological capability to restore such mined areas, within a reasonable time, to levels of yield equivalent to, or higher than, those of nonmined prime farmland in the surrounding area under equivalent levels of management and can meet the soil-reconstruction standards in Section 515(b)(7) of the Act.

Statutory performance standards specifically for prime farmland are found in Sections 515(b)(7) and 519(c)(2) of the Act. Section 515(b)(7) of the Act sets forth minimum requirements for soil removal, storage, replacement, and reconstruction. In addition, Section 519(c)(2) of the Act states that performance bonds shall not be released until soil productivity for prime farmland has returned to levels of yield equivalent to those of nonmined land of the same soil type in the surrounding area under equivalent management practices as determined from the soil survey performed pursuant to Section 507(b)(16) of the Act.

These rules revise OSM's special permit-application requirements and performance standards for surface coal mining operations on prime farmland as previously set forth in 30 CFR 716.7, 779.27, 783.27, and 785.17 and 30 CFR Part 823. The proposed rules were published at 47 FR 19076 on May 3, 1982. The preamble to the proposed rules explained many of the changes in detail and is incorporated as part of this preamble.

Throughout the development of these rules, OSM has solicited public comments and recommendations. A preproposal draft of these rules was provided to State regulatory authorities and other interested parties. Several interagency meetings were held with the Soil Conservation Service (SCS) of the U.S. Department of Agriculture (USDA) relative to its role in providing soil-survey standards, permit-review procedures, and soil-reconstruction specifications for prime farmland soils as required by Sections 507(b)(16), 510(d)(1), and 515(b)(7) of the Act. OSM made provisions to hold, upon request, public hearings and public meetings. OSM convened public hearings in Denver, Colorado, on June 16, 1982, and in Springfield, Illinois, on June 23, 1982.

The public comment period closed on August 25, 1982. It was subsequently reopened again on September 7, 1982, and closed on September 10, 1982, in response to congressional interest on the proposed rules.

More than 50 individuals and organizations representing State regulatory authorities, conservation agencies, educational institutions, Federal agencies, private industry, environmental interests, and private citizens offered in excess of 200 individual comments which were carefully considered in developing these final rules.

These final rules include changes to both the permit-application requirements and the performance standards for prime farmland.

II. Discussion of Rules Adopted and Responses to Comments

Deletion of §§ 779.27 and 783.27

The previous rules had three sections (§§ 779.27, 783.27, and 785.17) that contained information and permit-application requirements for prime farmland. Previous §§ 779.27 and 783.27 contained nearly identical procedures for surface and underground mining activities to identify prime farmlands through a pre-application investigation. Section 785.17 established permit application requirements for prime farmland. These final rules amend § 785.17 to incorporate the requirements of §§ 779.27 and 783.27. Sections 779.27 and 783.27 have been deleted. This reorganization relieves regulatory authorities and operators of the unnecessary burden of searching several rules to determine their permit requirements on prime farmland.

Two commenters objected to the proposal to consolidate previous §§ 779.27 and 783.27 under § 785.17(b). One of these commenters stated that the proposed changes and consolidation would significantly weaken the Federal rules by allowing the State regulatory authority to require much fewer data than presently required by the SCS for prime farmland indentification. The commenter also objected that the advisory role of the SCS to the regulatory authority is not mandatory, thus allowing the State regulatory authority alone to determine what constitutes an appropriate

reconnaissance inspection. By allowing this, the commenter felt the proposed rule failed to establish minimum national standards.

Close coordination between the SCS and the regulatory authority within each State is necessary in order to have an effective prime farmland reclamation program. OSM intends that the administrative and technical process of the reconnaissance inspection developed by the regulatory authority in consultation with the SCS will become part of the State regulatory program and will be set forth in sufficient detail to describe the reconnaissance-inspection requirement. Section 785.17(b) requires the regulatory authority to consult with the SCS in determining the nature and extent of the required reconnaissance inspection. Thus, the advisory role of the SCS is mandatory in keeping with Section 510(d)(1) of the Act. However, the regulatory authority is required to make the final determination.

The rules will not be weakened through the collection of fewer data because the permit application must contain sufficient information to support the findings regarding the identification of prime farmland. The standards for identifying prime farmland have not been softened. Moreover, the SCS monitors the results of reconnaissance inspections.

The preservation of prime farmland requires criteria which allow State programs to reflect differences among the eastern, midwestern, and western coal areas. Extreme differences in prime farmland size, configuration, and management exist between these coal areas; therefore, personnel within each State who are most familiar with the region are best qualified to protect prime farmland. OSM and SCS will maintain close review of State regulatory programs and provide appropriate guidance where necessary.

OSM has generally adopted the proposed rules as the new final rules for the reasons described in this preamble and the preamble to the proposed rules at 47 FR 19076 (May 3, 1982).

Where changes have been made from the proposal, these changes are explained in the discussion that follows:

A. Section 785.17(b) Application contents: Reconnaissance inspection

Final § 785.17(b)(1) requires that every permit application contain the results of a reconnaissance inspection to determine if prime farmland soils exist. This reconnaissance inspection could be a review of an existing soil survey or, if none is available, an onsite field survey. The nature and extent of the reconnaissance inspection will be determined by the regulatory authority and the SCS within each State. These requirements are necessary to comply with Section 507(b)(16) of the Act. OSM has adopted § 785.17(b)(1) as proposed, except that the word "State" has been deleted because the term "regulatory authority" is proper and more inclusive.

One commenter felt that the proposed rule would weaken the process for identifying prime farmland by eliminating reconnaissance inspections. OSM has not eliminated the requirement for reconnaissance inspections but rather has transferred this requirement from §§ 779.27 and 783.27 to § 785.17.

Two commenters supported the concept of a State-by-State determination of prime farmland soils and soil-reconstruction standards and the proposed coordination between the States and SCS in defining the nature and extent of the reconnaissance inspection. They felt this would eliminate the burden of applying general, nationwide criteria and would allow the States to consider local conditions more accurately. These rules do not eliminate nationwide criteria as the commenter suggests, but they do allow necessary consideration of local conditions.

Another commenter felt that the SCS and the regulatory authority must obtain public input when they determine the nature and extent of the reconnaissance inspection. This commenter stated that any reconnaissance-inspection requirement imposed by the regulatory authority should be based upon facts which clearly demonstrate the necessity for the standard and which give all parties an opportunity to contribute to the decision-making process.

Public input into each permit application is provided for in the permitting process. This input can include comments on the appropriate nature and extent of reconnaissance inspections. Additionally, public input can be provided in the development and amendment of State programs, and any additional standards that may be deemed necessary by the regulatory authority based on local conditions can be included as an aspect of the State program.

Final § 785.17(b)(2) as adopted is unchanged from the proposed rule and simply requires the applicant to submit a statement to the effect that no prime farmland historically used for cropland was found during the reconnaissance inspection and to include the basis upon which such a conclusion was reached.

One commenter supported the requirement that only a statement and the basis for conclusion by the operator is needed to verify that no prime farmland soils exist. Other commenters suggested that OSM delete the last sentence of proposed Paragraph (b)(2) and replace it with the negative-determination requirements of previous § 779.27(b), amended to allow a negative conclusion if the area of prime farmland soil is an economically unusable farming unit because of size, shape, or location. One commenter asserted that: (1) The previous criteria provide valuable guidance to operators in attempting to ascertain the presence or absence of prime farmland; (2) the circumstances for small areas, odd shapes, or isolated locations of prime farmland are recognized by the Secretary of Agriculture in the description of prime farmland at 7 CFR 657.5; (3) the approved North Dakota State program recognizes that a "viable economic unit" is an integral component of prime farmland identification; and (4) Congress was concerned that those prime farmland acreages that do not comprise more than 10 percent of the surface area should not be considered prime farmland for the purposes of the permitting requirements and performance standards.

OSM recognizes that the criteria in previous § 779.27(b) provide guidance in describing the nature and extent of the reconnaissance inspection. However, the level of detail in establishing criteria for the existence of prime farmland must be developed within each State because of the variety of soil surveys that may be used in any one prime farmland region, the progress of completion of soil surveys within each State, and the type of prime farmland soils found. The previous soil-survey negative-determination criteria were merely limits of the National Cooperative Soil Survey (NCSS) in describing and mapping prime farmland soils. These limits still apply, but the SCS will tailor these NCSS limits to the prime farmland soils found in each State. Therefore, the guidance will not only be available but will in fact be specifically tailored for each State.

OSM and SCS are aware of the general reference to the economics of prime farmland contained in 7 CFR 657.5(a)(1), which states that prime farmland "* * * has the soil quality, growing season, and moisture supply needed to economically produce sustained high yields of crops when treated and managed * * *." This is a general statement about prime farmland and is not specifically related to size. More specific physical and chemical qualities of prime farmland soils, set forth in 7 CFR 657.5(a)(2), are utilized to locate prime farmland soils. Soils with

VOL
48
ISS
93
MAY
12
1983
UMI

these physical and chemical soil qualities in areas with an adequate growing season and moisture supply consistently produce sustained high yields of crops and are one principal measure in the identification of prime farmland.

The State of North Dakota has included the concept of a viable economic unit in its State surface mining law (N.D. Cent. Code § 38–14.1–02, 22. "Prime farmland") and regulations (N.D. Admin. Code § 69–05.2–01–02, 100. "Prime farmlands") and regulation amendment I, July 30, 1982, (N.D. Admin. Code § 69–05.2–01–01., 114. "Viable economic unit"). However, this is not the basis upon which the SCS identifies and maps prime farmland soils. The North Dakota State regulatory program, including the above-mentioned provisions concerning viable economic units, was approved by the Secretary with the caveat that the determination of whether land constitutes prime farmland would be made by the State Conservationist of the SCS (45 FR 82220, Dec. 15, 1980). The Secretary approved the program because the State regulations provide for SCS determination of prime farmlands. Complexes of prime farmland soils exist in North Dakota which are difficult to delineate from an agronomic standpoint. The SCS and the regulatory authority in North Dakota have agreed upon a method of soil handling for both prime farmland and non-prime farmland soils. OSM and SCS are aware of the special prime farmland conditions within North Dakota and are satisfied that North Dakota regulations will result in the restoration of the productive capacity of prime farmland soils and should be consistent with the regulations adopted today.

The Conference Report to the Act notes that the Senate bill contained a provision that "[a]ny mine application whose area in prime farmlands exceeded 10 percent of the total area included in the application would have to demonstrate that such lands would be restored to full productivity" (House Report No. 95–493, July 12, 1977, p. 105). The House bill contained no such provision and the conferees did not include the 10-percent provision in the Act. OSM believes an across-the-board exemption for small areas of prime farmland soils is not warranted because of the vast differences in prime farmland value, crops, and farmland uses throughout the country. For instance, 10 acres of tobacco land in Indiana, 200 acres of corn in Illinois, and 640 acres of wheat in North Dakota represent considerably different prime farmland uses and values. These differences can best be described by agriculturalists and the regulatory authority within each State. Soil surveys used for operational conservation planning will be the basis for locating and sizing small prime farmland units. This is discussed more fully below in reference to § 785.17(b)(3).

The permit-application and approval process for any particular proposed operation will likely be reviewed by the SCS because the SCS has the major responsibility for the conservation of prime farmland soils and has local offices in nearly every county of the United States. Also, the USDA, in cooperation with other Federal agencies, is identifying the effects of Federal programs on the conversion of prime farmland to nonagricultural uses as required by Subtitle I of the Farmland Protection Policy Act of 1981, Pub. L. 97–98. OSM is taking full advantage of the location and responsibilities of the SCS to be assured that prime farmland soils are preserved in accordance with the Act.

Final § 785.17(b)(3) requires that where the reconnaissance inspection indicates that there may be prime farmland, the applicant must determine if a soil survey used for operational conservation planning, as defined by the SCS, exists for these lands and whether soil-mapping units within the proposed permit area have been designated as prime farmland. Where no soil survey exists, the applicant is responsible for providing a soil survey of the proposed permit area.

One commenter believed that the SCS soil surveys are not of adequate scale and suggested using a scale of 1:6,000. OSM and SCS cannot accept the use of a scale of 1:6,000 or other alternative scale for soil surveys when identifying and locating prime farmland soils. Soil surveys used by the SCS for operational conservation planning have been identified by the SCS as the soil survey needed to identify and locate prime farmland soils. the scale of these soil surveys ranges between 1:15,840 (4 inches per mile) and 1:24,000 and is in accordance with the standards of the NCSS.

Two commenters suggested that § 785.17(b)(3) be placed ahead of § 785.17(b)(1) because it is easier to check SCS soil-survey maps for prime farmland soils and then to check only those areas for historical cropland use, rather than the reverse.

The adopted order of these paragraphs is appropriate because the soil-survey information will likely be more readily available than data on historical cropland use. The rule adopted would not preclude the method of investigation described by the commenter. A determination that prime farmland does not exist for the purposes of the Act can be based upon either historical cropland use or a soil survey. One commenter also stated that the requirement to conduct a soil survey should be clarified to apply only to the permit area and include only prime farmland soil. OSM agrees with this comment and has modified the rule language accordingly. To be consistent with the opinion in *In re: Permanent Surface Coal Mining Regulation Litigation*, Civ. No. 79–1144, Mem. opin. at 39 (February 26, 1980), the language has been changed to require that a soil survey be made "If no soil survey exists, * * * of the lands within the permit area which the reconnaissance inspection indicates could be prime farmland."

Final § 785.17(b)(3) (i) and (ii), respectively, direct applicants to submit a statement that no prime farmland exists if none is found or to comply with the permit-application provisions where prime farmland soils are present. No comments were received on these sections and they are unchanged from the proposed rule.

B. Section § 785.17(c) Application contents

Final § 785.17(c) sets forth the permit-application requirements if prime farmland soils are located within the proposed permit area.

One commenter asked that before any future mining is approved, all soil surveys be available and that up-to-date production levels for crops be established. This commenter did not want any prime farmland surface mined unless each acre will be returned to its present capability. OSM and SCS agree with this commenter and continue to require soil surveys and crop yields for prime farmland that is to be disturbed.

Final § 785.17(c)(1) specifies that soil surveys used in permit applications must meet the standards of the NCSS. The SCS has the primary national responsibility in maintaining soil-survey standards, and OSM and SCS have clarified the requirements of the NCSS by referencing the SCS National Soils Handbook (U.S. Soil Conservation Service, 1962) in the rule as an acceptable guide to the NCSS. This handbook maintains current procedures for conducting soil surveys to the standards of the NCSS and is available in all SCS area and State offices. Its inclusion in the rule is to provide notice of easily accessible information to clarify the standards of the NCSS.

Final § 785.17(c)(1)(i) incorporates by reference USDA Handbooks 18 and 436 (U.S. Soil Conservation Service, 1951, 1975) that contain procedures to the standards of the NCSS. OSM and SCS have clarified SCS's responsibilities with respect to the NCSS by stating that the SCS established NCSS standards as well as maintains updated procedures for conducting these soil surveys through the National Soils Handbook. OSM does not consider this a substantive change to these rules. Two commenters pointed out that the Director's approval within this section needs to be updated. The date of the Director's approval for incorporation by reference has been updated.

One commenter wanted § 785.17(c)(1)(i) deleted because the commenter felt it unnecessary for OSM to commit itself to publishing notices in the **Federal Register** of changes to the NCSS. OSM and SCS find it desirable to maintain one standard for soil surveys as required by Section 507(b)(16) of the Act. These standards are those of the NCSS. All materials submitted to the **Federal Register** under "incorporation by reference" must be updated periodically as required by 1 CFR Part 51.

Final § 785.17(c)(1)(ii) delineates more specifically the requirements for soil surveys. This section lists soil properties which must always be described for each prime farmland soil within the permit area and makes it clear that the SCS is to determine the content of representative soil-profile descriptions including, but not limited to, soil-horizon depth, pH, and soil densities. The applicants may use other soil-profile descriptions from the local area if approved by the SCS.

One commenter requested additional language in § 785.17(c)(1)(ii) to assure that the regulatory authority has authority to require additional information on other physical and chemical properties of the soil to establish that the operator has technological capability to restore the permit area to the soil-reconstruction standards. OSM has added the following sentence to provide this clarification: "The regulatory authority may request the operator to provide information on other physical and chemical soil properties as needed to make a determination that the operator has the technological capability to restore the prime farmland within the permit area to the soil-reconstruction standards of Part 823 of this chapter."

One commenter wanted the regulatory authority, rather than the SCS, to have responsibility for approving soil-profile descriptions. OSM believes that such approval is the proper responsibility of the Secretary of Agriculture. The SCS is the lead agency for the NCSS and as such has the responsibility to maintain soil-survey criteria for prime farmland soils. These criteria, in the form of physical and chemical properties of soil, are to be given to the regulatory authority by the SCS. This is in keeping with the Secretary of Agriculture's responsibilities under Sections 507(b)(16) and 510(d)(1) of the Act. The regulatory authority, in cooperation with the SCS, will use these soil-survey specifications in determining if the soil surveys submitted by applicants are adequate and, ultimately, in approving permits for areas containing prime farmland.

Another commenter pointed out that the proposed rule would require more stringent soil descriptions than the previous rule. OSM does not agree that these rules are more stringent, because the standards of the NCSS have always been the standards for soil surveys. The term "soil survey" was, and continues to be, defined in terms of the NCSS. (See the definition of "soil survey" in 30 CFR 701.5.)

Another commenter requested using "average densities" rather than "range of densities" in determining soil profiles. This commenter also pointed out the need to prepare new soil descriptions because the SCS does not routinely collect soil-density information with representative soil-profile descriptions. OSM and SCS believe that the "range of soil densities" required in the final rule provides better information for use by the regulatory authority than "average densities" would, because soil densities are reported in ranges in the soil survey. Also, a range is more realistic and makes more technical sense than an average, which is a single number. OSM and SCS agree with the commenter that at times some additional information on soil densities will have to be collected by the operator to supplement existing soil surveys.

Three comments requested deletion of properties associated with the soil description such as pH and soil densities because: (1) The operator would probably gather this data anyway, (2) these data are not mentioned in the Act or in USDA Handbook 18, (3) there is no need for these data if an equal or higher productivity standard is met, and (4) the procedures undertaken by operators to achieve the requirement would be expensive and time consuming. The final rule retains this listing of soil properties. The three elements of the soil profile—soil-horizon depths, pH, and soil densities—have been added as a requirement to the previous rules because OSM and SCS believe such information is essential for determining the adequacy of all proposed soil-reconstruction plans. One of these commenters felt that OSM has wrongly assumed that soil density is an important soil property, stating that there is no accurate way to define soil density and that there are no studies or technical justification to support OSM's approach. OSM and SCS do not agree with this commenter and point out that density data are required because it is well established that increased soil densities result in decreased crop yields, thereby guaranteeing failure when measured against the "equal or higher level of yield" standard of Section 510(d)(1) of the Act. (Guernsey and others, 1978, pp. 69–79).

Final § 785.17(c)(2) requires the operator to submit a plan which gives soil-reconstruction, replacement, and stabilization methods to be used on prime farmland soils. This plan is required by Section 508(a)(5) of the Act. The purpose of this plan is to assist the regulatory authority and the SCS in evaluating the technological capability of the operator to reconstruct prime farmland soils to the specifications of Part 823. This new final rule is unchanged from the proposed rule.

One commenter supported the proposed rule change in § 785.17(c)(2) by stating that to demonstrate the capacity to comply with the performance standards would be less burdensome and more flexible and practical than attempting to specifically identify all the detailed requirements given in Part 823. Another commenter felt that more information should be required to judge the technological capability of an operator to return prime farmland to its original capability. This commenter wanted OSM to require information such as the proposed method and type of equipment to be used for removal, storage, and replacement of prime farmland soils. The commenter believed the deletion from previous § 785.17(b)(2) of the method and equipment to be used violated Section 507(b)(7) of the Act.

Previous § 785.17(b)(2) duplicates § 780.11(a) and is therefore unnecessary. The operation plan under § 780.11 must include a description of the method of coal mining, engineering techniques, and equipment to be used for all operations. This section fully implements Section 507(b)(7) of the Act, and there is no need to duplicate it in the special permit-application rules for prime farmland which supplement the general requirements. The regulatory authority in consultation with the SCS can require

VOL 48 ISS 93 MY 12 1983 UMI

more detailed information on the proposed method and type of equipment as needed on a site-by-site basis.

Final § 785.17(c)(3) requires that the applicant provide agricultural-school studies or other scientific data to demonstrate that the proposed method of reclamation will be successful. These studies and data are to be applicable to the prime farmland soil under investigation. Where soil mixing is a proposed reclamation technique, data must be provided to demonstrate that the proposed mix of soil will achieve levels of yield equal to, or higher than, those on nonmined prime farmland in the surrounding area.

Several commenters suggested that crop yields required in proposed § 785.17(c)(3) be modified by the phrase "in the surrounding area" rather than by the phrase "as existed before mining" in order to conform with the language used in Section 510(d)(1) of the Act. OSM agrees that this change is appropriate as it removes ambiguity and makes clear that applicants must demonstrate the ability to meet the standard of Section 510(d)(1) of the Act. This clarification does not otherwise alter the interpretation of § 785.17(c)(3).

Another commenter felt that a permit should not be approved until there is documentation, through field trials conducted since passage of the Act, to establish that equivalent crop yields can be achieved. Another commenter felt that conclusive proof that the required crop yields will be met must be specified and that the burden of proof should lie with the SCS. OSM agrees that documented field trials will more than likely be used for the demonstration required by § 785.17(c)(3). Because of the many variables involved in describing the adequacy of research plots and the duration of applicable research efforts, the regulatory authority and the SCS must review and evaluate the conditions under which agricultural-school studies or other scientific data were made. However, the operator is responsible for making the required demonstration.

One commenter opposed deletion of the parenthetical reference to water management from this section because this kind of documentation is the only basis upon which approval of mining of prime farmland can be made.

OSM does not agree with the commenter's assertion that this change was either significant or substantive. The term "management" under the previous rule and the rule as adopted includes water management, pesticide management, proper use of fertilizers, use of appropriate crop varieties and rotations, and whatever other management practices are commonly accepted for the locality. OSM has deleted the parenthetical reference to water management to eliminate redundancy and to avoid listing all the applicable forms of management.

Final § 785.17(c)(4) is a new section that requires that the applicant include in the reclamation plan the established productivity under high levels of management of each prime farmland soil to be mined. This prime farmland soil productivity is routinely documented within the SCS soil surveys and is readily available from SCS offices.

Originally, § 785.17(b)(8) required a permit application for prime farmlands to include in the reclamation plan current estimated yields under a high level of management for each soil to be mined. The rule further set these estimated yields as the target yields by which reclamation success on prime farmland was to be judged. This use of high levels of management to set reclamation standards was remanded to the Secretary in *In re: Permanent Surface Mining Regulation Litigation*, Civ. No. 79-1144, Mem. opin. at 5 (D.D.C., May 16, 1980). The court held that permit approval and bond release depend upon a showing of revegetation success based only on equivalent levels of management and that the Secretary could only require the high levels of management standard in the reclamation-plan information rule. On August 4, 1980 (45 FR 51549), OSM suspended § 785.17(b)(8) insofar as it requires a demonstration in the permit application of current estimated yields under a high level of management. The proposed rule would have deleted all reference to high levels of management in either the reclamation plan or as a standard for permit approval or bond release (47 FR 19076, May 3, 1982).

One commenter supported the deletion of the "high levels of management" information requirement of previous § 785.17(b)(8), because that langauge went too far in establishing high management yields as a reclamation target. However, this commenter pointed out that Section 508(a)(2)(C) of the Act requires that reclamation plans provide information on the productivity of land prior to mining, including average yields under high levels of management. The commenter suggested that this requirement should be retained for informational purposes relative to Section 508(a)(2)(C) only. OSM agrees with this commenter and is retaining the informational requirements of Section 508(a)(2)(C) of the Act by establishing a new final § 785.17(c)(4) patterned after the language of the Act.

C. Omission of previous § 785.17 (b)(4) and (b)(6)

One commenter opposed the deletion of previous § 785.17(b)(4) because without it the regulatory authority's ability to locate and monitor separate soil stockpiles as required in Section 515(b)(7)(B) of the Act would be inhibited. OSM is deleting this paragraph because it repeats the minimum requirements for reclamation and operation plans under 30 CFR Parts 780 and 784. These parts require that the reclamation-plan portion of the permit application show the location of each topsoil and subsoil storage area. Since § 823.12 (c)(1) and(c)(2) require the operator to store the topsoil separately from the B and C horizons, and both separately from other soil, the general permit-application rules are sufficient to provide the regulatory authority with all the information it needs to monitor separate soil stockpiles. Redundancy is eliminated by removing this section.

Previous § 785.17(b)(6), which required plans for seeding or cropping the final-graded prime farmland soils, was proposed to be deleted in its entirety. One commenter opposed the deletion of § 785.17(b)(6) on the grounds that it would weaken the regulatory authority's ability to evaluate whether plans for seeding or cropping are consistent with reconstruction plan which will apply equivalent levels of management. OSM has deleted this section because it duplicated other reclamation- and operation-plan requirements of Parts 780 and 784. Because the standard for determining revegetation success on prime farmland is to achieve levels of yield equivalent to yields on nonmined land of the same soil type in the surrounding area under equivalent levels of management, the reclamation plan submitted under § 780.18 or § 784.13 will have to show how the applicant plans to meet that standard. Therefore, previous § 785.17(b)(6) is not needed to ensure that the standards of Section 510(d)(1) of the Act are met.

D. Section 785.17 (d) and (e) Consultation With the Secretary of Agriculture and Issuance of Permit

Final § 785.17(d) has been reorganized to clarify the responsibilities of the Secretary of Agriculture under this section. This paragraph is consistent with the previous interpretation of the responsibilities of the USDA and the SCS regarding prime farmland matters.

Final § 785.17(d)(1) recognizes that the Secretary of Agriculture has certain responsibilities with respect to prime farmland soils and that these responsibilities have been assigned to the SCS State Conservationist within each State. The title "Administrator" in the proposal was changed to "Chief" to be consistent with the current SCS position title.

Final § 785.17(d)(2) requires that the State Conservationist provide to the regulatory authority a list of prime farmland soils and their locations, physical and chemical characteristics, crop yields, and other data that are necessary to adequately support prime farmland soil descriptions. OSM has added this paragraph, with SCS concurrence, to clarify the responsibilities of the State Conservationist in providing prime farmland soil-survey information to the regulatory authority.

Final § 785.17(d)(3) requires that the State Conservationist assist the regulatory authority in describing the nature and extent of the reconnaissance inspection. This is the same requirement as § 785.17(b)(1) and is repeated here to consolidate and clarify the responsibilities of the State Conservationist.

Final § 785.17(d)(4) requires that the regulatory authority consult with the SCS State Conservationist before approving any permits concerning prime farmland. The State Conservationist will provide review and comment on the proposed method of soil reconstruction. Where the State Conservationist considers the soil-reconstruction methods inadequate, he or she will suggest revisions which will result in more complete and adequate reconstruction.

Two commenters supported the expanded role of the SCS, while another commenter suggested that OSM further strengthen the SCS role with the regulatory authority. One of these commenters felt that there may be a timing problem because this rule will be finalized before the SCS and regulatory authority can establish soil-reconstruction specifications and determine the nature and extent of the reconnaissance inspection. This commenter felt these rules should have an extended effective date that will provide time for coordination between the SCS and the regulatory authority. OSM recognizes that this coordination will take time. However, OSM and SCS have already begun discussions of how the rules would be implemented and believe that there is no need to postpone the effective date. Furthermore, the Secretary of Agriculture's role is clear in this section and no modification is necessary.

Another commenter requested deletion of Paragraphs (d) and (e) and their replacement by a new Paragraph (d) which would incorporate the requirements of Section 510(d)(1) of the Act. This commenter also objected to requiring the applicant to negotiate with both the regulatory authority and the SCS. Section 515(b)(7) of the Act requires the Secretary of Agriculture to establish soil-reconstruction specifications. The Secretary of Agriculture has assigned this responsibility to the Chief of the SCS. Section 785.17(d) requires the regulatory authority, not the applicant, to consult with the SCS for review of prime farmland reclamation plans. Implementation of the soil-reconstruction specifications is the responsibility of the regulatory authority in consultation with the SCS. Although this rule does not preclude the applicant from dealing directly with the SCS, the applicant is not required to negotiate with the SCS. The final rule retains paragraphs (d) and (e).

One commenter requested language to make it clear that this section applies only to areas to be mined and reclaimed and does not apply to underground mines. Section 510(d)(1) of the Act requires that the special prime farmland permit-approval standards, including consultation with the Secretary of Agriculture, apply whenever the area proposed to be mined contains prime farmland. The language of the proposed rule has been retained because it is consistent with this statutory language. Contrary to the commenter's assertion, the prime farmland provisions of the Act do apply to disturbed areas associated with underground mining. The permit requirements of Sections 506, 507, 508, and 510 of the Act apply to any surface coal mining operation, which, as defined by Section 701(28) of the Act, includes the surface effects of underground mining. Likewise, the performance standards of Section 515 of the Act (through the operation of Section 516(b)(10) of the Act) and bond-release provisions of Section 519 of the Act apply to any surface coal mining operation, including the surface effects of underground mining. The U.S. District Court for the District of Columbia also held that the Secretary does have the authority to apply the prime farmland rules to the surface effects of underground mining. *In re: Permanent Surface Mining Regulation Litigation*, Civ. No. 79-1144, Mem. Opin. at 3, (D.D.C., May 16, 1980). The language of the proposed rule has not been removed as suggested by the commenter.

Final § 785.17(e)(2) requires that, before a permit is issued, the regulatory authority must find that, the permit incorporates the contents of the soil-reclamation plan submitted by the applicant under § 785.17(c) after consideration of revisions as suggested by the SCS State Conservationist. OSM has changed the reference from the Secretary of Agriculture to the State Conservationist in keeping with § 785.17(d)(1). This is not a substantive change from the proposed rule.

E. Part 823 Special Permanent Program Performance Standards

Part 823 sets forth soil-removal, storage, and replacement specifications, as well as specifications for revegetation and restoration of soil productivity for prime farmland soils that are disturbed. Some prime farmland soils do not need to be restored according to these special performance standards because of exemptions in § 823.11 that are based upon historical use, grandfather rights, construction of an approved water body, or the existence of a long-term preparation plant or support facility. However, the general performance standards and bond-release provisions do apply to those areas or facilities that qualify for the exemption.

One commenter felt that the prime farmland performance standards should be as exacting (or more so) as the standards for designating lands as unsuitable for surface coal mining.

Section 522 of the Act sets forth the State planning process for the designation of lands as unsuitable for surface coal mining. Under this section, the regulatory authority determines whether any lands are unsuitable for certain types of surface coal mining operations based upon a technical and economic feasibility study of achieving the reclamation requirements of the Act or based upon other criteria in Section 522(a)(3) of the Act. Sections 515(b)(7) and 519(c)(2) of the Act provide explicit performance standards for the mining and reclamation of prime farmland. In addition, the permitting sections, as discussed previously, clearly condition approval of a prime farmland permit on a demonstration that the performance standards can and will be met. These prime farmland standards are independent of the unsuitability provisions and should not be confused with that separate process. OSM has therefore rejected the commenter's suggestion.

Final § 823.1 delineates the scope and purpose of Part 823 and provides that the special environmental protection

VOL 48 ISS 93 MY 12 1983 UMI

performance standards, reclamation standards, and design standards apply to surface coal mining and reclamation operations on prime farmland. No comments were received on this section. This final rule is not changed from the proposed rule.

F. Section 823.4 Responsibilities

Final § 823.4 is a new section which sets forth the responsibilities of the SCS and the regulatory authority with respect to the establishment and regulation of specifications for removal, storage, replacement, and reconstruction of prime farmland soils. The responsibilities outlined in this section have been consolidated here for clarity and are not new.

Final § 823.4(a) requires that the SCS within each State establish specifications for prime farmland soil removal, storage, replacement, and reconstruction. This was proposed as § 823.14(a) and has been moved to § 823.4(a) to clarify the responsibilities of the USDA as required by Section 515(b)(7) of the Act.

Final §823.4(b) requires that the regulatory authority within each State utilize the soil-reconstruction specifications established by the SCS to carry out its responsibilities regarding the prime farmland soil-removal, storage, replacement, and reconstruction provisions of § 785.17 and the criteria and schedule for release of performance bonds under 30 CFR Subchapter J. This new paragraph consolidates and clarifies the responsibilities of the regulatory authority required by Sections 510(d)(1) and 519(c) of the Act.

Several commenters expressed concern with respect to the requirement that the SCS establish soil-reconstruction specifications. Two commenters supported this requirement, while five commenters objected. Two of the latter group felt that it would be confusing if the SCS set these specifications and that the role of the SCS and regulatory authority must be clarified. Two other commenters felt that to have the SCS set these specifications was not within the spirit or intent of the concept of State primacy. Another commenter felt that the proposed rules place an inappropriate amount of responsibility on the SCS for levels of crop yield. This commenter felt that any appropriate USDA agency would provide greater flexibility in the development of the reclamation plan. Another commenter questioned whether the SCS could maintain the responsibility for these specifications.

OSM and SCS point out that Sections 507(b)(16) and 515(b)(7) of the Act require the Secretary of Agriculture to establish soil-survey standards and soil-removal, storage, replacement, and reconstruction specifications for prime farmlands to be mined and reclaimed. In order to best meet the special needs of each State with respect to prime farmland soil-reconstruction and mining methods, OSM and SCS have agreed that detailed soil-reconstruction specifications must be determined on a State-by-State basis, whereas the permanent program rules, which are national in scope, should be limited to identifying general elements of concern in soil reconstruction. The SCS is primarily responsible for locating, describing, and establishing standards and specifications and otherwise identifying prime farmland soils. It has had many years of experience and is best qualified to establish and maintain the prime farmland soil-reconstruction specifications on a State-by-State basis. Also, SCS maintains data on crop yields for prime farmland soils, OSM is adding § 823.4(a) as a result of comments received requesting clarification of the role of the SCS in establishing the performance standards under Part 823.

G. Section 823.11 Applicability

Final § 823.11 sets forth exclusions from the prime farmland performance standards for: (1) Coal preparation plants, support facilities, and roads actively used over long periods of time which affect a minimal amount of land, (2) approved water bodies, and (3) prime farmland not historically used as cropland and "grandfathered" prime farmland.

One commenter objected to giving States greater flexibility to grant variances from the prime farmland soil-reconstruction specifications. This commenter felt that the new rules would increase the likelihood that inadequate soil-reconstruction practices would be used and thereby jeopardize a successful restoration of prime farmland productivity. OSM disagrees with this commenter. More flexibility at the State level is needed to incorporate the specific requirements of local conditions and thereby ensure successful restoration of each particular prime farmland soil.

Final § 823.11(a) excludes from the special prime farmland performance standards land occupied by coal preparation plants, support facilities, and roads associated with surface and underground mines, in accordance with the decision in *In re: Permanent Surface Mining Regulation Litigation*, No. 79–1144 (D.D.C., May 16, 1980), pp. 1–3. The Court evaluated the preservation of the A and B or C soil horizons with respect to compacted soil horizons and the ability of the operator to alleviate this compacted condition with deep tillage. The District Court ruled that the prime farmland performance standards of the Act do apply to the surface effects of underground mining operations but suggested that a limited exemption be made for surface facilities which are actively used for extended periods of time and which affect a minimal amount of land. OSM has extended this exclusion to preparation plants, support facilities, and roads of surface mines which will be actively used over long periods of time because of the similarity of such long-term uses and their effects for both types of mining.

The Court pointed out that the Act's reclamation standards technically apply where construction of roads and support facilities removes the topsoil of prime farmland. The Court also noted, however, that an operator may need only to engage in deep tilling to restore the soil productivity of the prime farmland where support facilities have compacted the B or C soil horizons. The Court recognized that the chief surface intrusions from underground mining activities stem from support facilities such as roads, loading structures, coal-processing plants, and stockpiles.

The Court also noted that one difference between surface and underground mines is the extended period of time that most underground mines are in operation. The extended period of time which support facilities must be actively used in order to qualify for this exemption was discussed by the Court as being 20 to 40 years. The Court indicated, without elaboration, that support facilities utilizing a minimal amount of land should be allowed an exemption. The Court further noted (footnote 4, p. 3) that the operator would still be required to engage in a preapplication investigation (reconnaissance inspection) and comply with the applicable permit and bonding requirements.

The general topsoil rules require that all topsoils be removed from areas to be disturbed in mining and reclamation including areas utilized by support facilities (§§ 816.22 and 817.22). OSM generally agrees that it is better to leave the B and C soil horizons in place and alleviate a compacted condition with deep tillage or other methods. However, some support facilities such as waste areas, machine repair areas, and coal processing areas may chemically alter the B or C soil horizons drastically, thus decreasing or eliminating the soil productive capacity. The B or C soil horizons should be protected from chemical contamination if necessary to

achieve the applicable vegetative cover and productivity required by §§ 816.116 and 817.116. The operator may choose to remove and store the B or C soil horizons and replace them at a future date, or the operator may choose to place a protective barrier between the support facility causing chemical contamination and the B or C soil horizons. In addition, under final § 816.22(a)(3), the regulatory authority may require that the B and C horizons be separately removed, segregated, stockpiled, and replaced to ensure retention of soil capabilities. Thus, where the exemption of § 823.11(a) applies, OSM is requiring that the operator protect the productive capacity of the soils in accordance with §§ 816.22 or 817.22 where the permanent retention of these facilities or roads has not been included as part of the approved postmining land use.

One commenter suggested that the surface-facility exemption should also apply to the investigative aspects (preapplication investigation) of the rules. OSM has not accepted the suggestion. The District Court specifically held that the operator must comply with the investigative aspects of these rules.

Five commenters supported extending the exemption to both surface and underground mining activities. They felt that this was a logical extension and provided adequate flexibility. Two commenters opposed the exemption for surface mining support facilities. They felt that: (1) The soil horizons could be removed and utilized elsewhere in the permit area, whereas this is not possible with underground mines because there is little other disturbed area, and (2) this extension of the exemption was illegal because it exceeded the limited exemption suggested by the District Court.

OSM has evaluated the criteria for determining when a surface facility associated with an underground mine should be exempted and has concluded that the criteria apply equally well to such facilities associated with surface mines. Surface mines often use the same types of facilities as underground mines and for comparable periods of time. OSM has decided, therefore, to extend the exemption to surface mines, not just because of the Court order but because a reasonable construction of the prime farmland sections of the Act does not require that they be applied to "areas" where their special protections would be to no avail. The commenter also objected that such an exemption was not needed for surface mine support facilities because they are not actively used over an extended period of time. The commenter has misconstrued the limiting elements of the exemption. All coal preparation plants, support facilities, or roads are not exempted under § 823.11(a); only those that are actively used over extended periods of time and which affect a minimal amount of land are exempted. If these conditions are not met, then the prime farmland rules do apply to the preparation plant, support facility, or road. Furthermore, it is irrelevant to the applicability of soil-reconstruction standards at a particular location that the soil horizons at that location could be used elsewhere.

Two commenters felt that the provisions of Part 823 for prime farmland soil reconstruction, revegetation, and restoration of soil productivity should apply to "areas to be mined" as stated in Section 510(d)(1) of the Act or areas to be "mined and reclaimed" as stated in Section 515(b)(7) of the Act. One of these commenters would have liked to exclude underground mining activities and surface facilities and surface mining activities that do not involve drilling, blasting, or mining unless expressly indicated or required by the regulatory authority in a permit. Another commenter wished to ensure that Part 823 does apply where mining will result in the removal of overburden. OSM reasserts its long-standing position that Part 823 applies to all surface coal mining operations on prime farmland, including surface impacts incident to underground mining, except for those situations set forth in § 823.11. Even if an operation would qualify for an exemption under § 823.11, the permit-application requirements of § 785.17 and the general bond-release requirements of Subchapter J apply. See *In re: Permanent Surface Mining Regulation Litigation, supra*, at 3 N.4.

OSM specifically requested comment on the proposed prime framland rules with respect to the type of support facilities which should be exempt, the duration of their use, and the maximum size of the land area that could be affected. OSM received more than 25 comments regarding this request.

Many commenters suggested that one or more of the following be included in the definition of support facilities: Air shafts, adits, bath houses, battery storage and recharge sheds, coal storage areas (clean and raw coal), disposal and storage areas for waste, equipment storage areas, fan sites, garage areas, hoist buildings, loading docks, office buildings, access roads, main haul roads, water treatment plants, parking lots, power substations, preparation plants, refuse sites, repair sheds, shafts, shop areas, shipping areas, processing and loading facilities, supply yards, tipples, and minor facilities.

Two commenters felt that such an exemption is appropriate for life-of-the-mine support facilities, including roads, because these facilities disturb a minimal amount of land and there is no other area to which the disturbed soil horizons can be transferred. Another commenter suggested that long-term as well as secondary support facilities be included in the exemption. Another commenter felt that only minor support facilities should be exempted and that the area disturbed by these minor facilities should be accommodated and assigned a crop productivity index to be compared to the crop-productivity index of the entire area.

The term "support facilities" is defined in proposed § 701.5 (47 FR 27693, June 25, 1982) to mean those facilities resulting from, or incident to, surface coal mining operations. This term and the terms "coal preparation plants" and "roads" describe those surface facilities which are exempted under § 823.11(a) from the special prime farmland performance standards. The term "coal preparation plant" will be defined in § 701.5 rather than "coal processing plant." It will mean a facility where coal is processed to separate coal from its impurities. In its May 16, 1980, opinion, the Court included coal processing plants in the same category as support facilities. *Id* at p. 2. The two definitions in § 701.5 include nonexclusive lists of facilities that may qualify. Such facilities are exempted only if they affect a minimal amount of land and are actively used over an extended period of time. Facilities such as coal and waste storage areas, tipples, and processing facilities may be considered support facilities but may not be exempt under § 823.11(a) if they are used for a short period of time or cover a large area. The determination of these limits has been left to the regulatory authority, which can better evaluate these time and area factors on the basis of local conditions.

OSM has added roads to the exemption because the District Court referred to roads as deserving treatment similar to support facilities. Since the definition of support facilities in § 701.5 does not include roads, they must be listed separately in the rule. To be exempted, roads must meet the same conditions as support facilities.

OSM does not believe that a crop-productivity index is appropriate for defining the class of exempt facilities, because the suggested method is too cumbersome to be an effective national

1983
UMI

rule. Regulatory authorities may choose to use such an index to determine whether a particular facility affects a minimal amount of prime farmland.

Two commenters suggested that the duration of active use to qualify for this exemption should be 10 or more years. One of these commenters added that long-term support facilities could easily be in use for this period of time. The District Court ruled that OSM's rules were arbitrary where they commanded operators to segregate the topsoil and the underlying soil horizons for 20 to 40 years in situations where reclamation will affect a minimal amount of land. OSM recognizes that many different kinds of support facilities are utilized regionally over differing lengths of time, depending upon mining methods. The regulatory authority should use its discretion in selecting the duration of time for actively used support facilities to qualify for this exemption, keeping in mind the context in which the court created the exemption.

Many commenters asked for clarification of the phrase "minimal amount of land." It was suggested variously that 2 acres, 5 acres, and 20 acres or less be the size exempted. Another commenter felt that the aggregate productive potential of prime farmland in the permit area should not be reduced by more than 2 percent.

One commenter felt that a minimal amount of prime farmland for siting and construction of support facilities should be exempt, whereas another commenter felt that the size of the area to be exempted should be determined by the regulatory authority using such factors as: (1) The practicality of locating the facilities in areas other than prime farmland, (2) the nature of the facilities, (3) the extent to which the operator's plans minimize the use of prime farmland, and (4) the impact on surrounding prime farmland.

Another commenter reported that the ratio of the area mined to the area of surface facilities for three large underground mines in Illinois varied between 33 to 1 and 44 to 1. Another commenter reported that support facilities and water bodies could take up as much as one third of coal mine sites. No supporting data were provided by either commenter.

As pointed out by these commenters, the acreage used for support facilities could vary considerably between the type of facility under consideration, location, and mining method utilized. For example, a comprehensive review of Illinois lands affected by underground coal mining was published in 1977 (Nawrot and others, 1977). Disturbance from past underground coal mining activity totaling 6,955.9 acres was present at 700 abandoned underground coal mine sites in 55 Illinois counties. Affected acreage included gob, slurry, tipple, water impoundments, and offsite affected areas and was unequally distributed among the 55 counties, depending upon the size and kind of mining operation. Eleven counties accounted for 80 percent of the affected acreage, with an average of 21.4 acres for 263 mine sites. In contrast, 44 counties accounted for 19.2 percent of the affected acreage, with an average of 3.0 disturbed acres for 437 mine sites.

Because site locations, mining methods, and kinds of support facilities are highly variable, OSM believes that the regulatory authority should establish the maximum area which may be exempted. The factors suggested by commenters should be helpful in making the required determinations. If in practice the exemption provided by § 823.11(a) leads to abuse or is inconsistently applied by different States, OSM will provide further guidance.

Final § 823.11(b) provides an exemption from Part 823 where water bodies have been approved as an alternative postmining land use by the regulatory authority. These water bodies must meet the requirements for construction of permanent and temporary impoundments of §§ 816.49 and 817.49 of this chapter and must be designed and constructed to minimize the loss of prime farmland.

Three commenters were opposed to the exemption for water bodies as an alternative land use after mining. They felt that this exemption was in direct conflict with § 785.17(e)(1), which requires that the postmining land use be cropland. One commenter claimed that exempting approved water bodies from the prime farmland performance standards would violate the Act. The commenter relied on the statement by the U.S. Supreme Court that "Congress presumably concluded that allowing variances from the prime farmland provisions would undermine the effort to preserve the productivity of such lands." *Hodel v. Indiana*, 101 S. Ct. 2376, 2387 (1981). The commenter believed that this statement shows that the Supreme Court determined that Congress intended that there be no variances from the prime farmland restoration standards of the Act.

OSM remains unconvinced that the *Hodel* opinion is dispositive of the issue. The Court held that the plantiffs had not clearly shown that the prime farmland provisions were not rationally related to a legitimate governmental purpose. *Id.* at 2386. The statement quoted by the commenter was not made in the context of a challenge to a narrowly prescribed variance established by OSM under a related statutory provision. It was not essential to the holding that the prime farmland provisions were not unconstitutional on their face.

As noted by the commenter, the assertion that no variances from the prime farmland standards are allowed is not precisely correct. For example, the U.S. District Court for the District of Columbia has held that there should be an exception in the rules for certain surface facilities. *In Re: Permanent Surface Mining Regulation Litigation*, Civ. No. 79-1144, (D.D.C. May 16, 1980) at 3. By implication there must also be an implied exception to the standards of the Act for such support facilities.

The prime farmland provisions of the Act are not completely independent of the other performance standards of the Act. In fact, all of the other performance standards apply to prime farmland except the general topsoil and revegetation standards, which are replaced by the more specific prime farmland standards. Among these other performance standards which apply to prime farmland is Section 515(b)(8) of the Act, which allows the operator to create permanent impoundments if certain standards are met. The so-called exemption to the prime farmland soil-reconstruction standards is really just a recognition that if the impoundment performance standards are met, then there is no need to reconstruct the soil on the area which will be inundated. OSM has added the requirement that the regulatory authority determine that any water body approved must be designed and constructed to minimize loss of prime farmland to ensure that construction of such water bodies does not become merely a means to avoid application of the prime farmland standards.

Final § 823.11(c) sets forth prime farmland exemptions based upon the "historical use" clause and the "grandfather" clause of § 785.17(a). Four commenters supported the establishment of a cutoff date for grandfathered prime farmlands. No comments were received relative to the proposed language of this section, and the proposed rule has been adopted with minor change.

On July 30, 1982, OSM adopted an interim final rule establishing April 3, 1983, as the termination date for all so-called "grandfather" exemptions to the prime farmland performance standards. 47 FR 32939, July 30, 1982. On September 10, 1982, the U.S. District Court for the District of Columbia issued an order in *Peabody Coal Company et al. v. Watt*, Civ. Nos. 81-0645, 81-0693, 81-2875 and 81-0706, declaring the grandfather cutoff date rule to be unlawful and void and enjoining the Secretary from implementing the rule. (See 47 FR 44116, October 6, 1982.) In compliance with that order and the Memorandum Opinion filed by the Court on December 3, 1982, OSM has deleted the grandfather cutoff date at § 716.7(a)(2) of the initial program rules and § 785.17(a)(5) of the permanent program rules.

H. Section 832.12 Soil Removal and Stockpiling

Final § 823.12 has been reorganized from the proposed rule, a new paragraph (a) has been added, and the other paragraphs have been redesignated.

Final § 823.12(a) requires prime farmland soils to be removed from the areas to be disturbed before drilling, blasting, or mining.

Two commenters suggested that the introductory paragraph of § 823.12 point out that prime farmland soils must be removed only where overburden is excavated for the mining of coal. One of these commenters referenced a previous OSM brief which stated that the Part 823 soil-removal requirements applied only to areas to be affected by operations that involve removal of the soil horizons. This commenter stated that unless this change is made, the rule would require removal of soil horizons from unmined lands within the permit area. OSM has clarified the final rule by addition of new Paragraph (a) which requires that soil be removed from all disturbed areas. In this respect, the prime farmland rules are no different from the general topsoil rules, under which the topsoil must be removed from areas to be disturbed.

Final § 823.12(b) references the requirements of § 823.14(b) in determining the depth of soil and soil materials to be used and stored for later soil reconstruction.

Final § 823.12(c)(1) requires the removal of the topsoil or substitute material and, if not utilized immediately, the stockpiling of this soil separately from spoil and other excavated materials including the other soil horizons.

The proposal used the phrase "entire A horizon" rather than the word "topsoil." The Illinois Department of Mines and Minerals suggested that OSM modify its use of soil horizon terms to conform to the new classification established by the SCS. The original definition of topsoil in § 701.5 included the A horizon only. The A horizon contained a number of subclassifications including the A1 and A2 subhorizons. The use of the term "A horizon" in Section 515(b)(7) of the Act encompasses both the A1 and A2 subhorizons. Recently, the SCS has redesignated the A2 subhorizon as a separate master horizon identified as the E horizon. Thus, to ensure consistency between the two agencies, OSM will revise the topsoil definition to specifically include both the A and E horizons, when the final topsoil rules are published. To avoid confusion as to which horizons should be removed and stored separately, OSM has changed all references in these prime farmland rules from the term "A horizon" to the word "topsoil" to clarify that those soil materials which Congress intended to be removed as the A horizon will continue to be removed, stored, and replaced as the surface soil layer on prime farmland. This change in terminology has no substantive effect.

OSM proposed to allow use of substitute soil materials if such materials would "create a final soil having an equal or greater productive capacity than that which existed prior to mining."

One commenter supported the wording "equal or greater productive capacity." Another commenter suggested that the rule limit the use of substitute material to that which will have a "greater productive capacity" in keeping with the statutory language of Section 515(b)(7)(A) of the Act. OSM has accepted this comment and has revised the final rule accordingly.

Final § 823.12(c)(2) requires the removal of the B or C horizons or other suitable soil material. If not utilized immediately, this material must be stockpiled separately from spoil and other excavated materials, including the topsoil. Combinations of such materials are allowed where they have been shown to be equally or more favorable for plant growth then the B horizon.

One commenter requested changing the proposed reference to "B and C" horizons to "B or C" horizon to conform to Section 515(b)(7)(B) of the Act, which requires that the operator "segregate the B horizon of the natural soil, or underlying C horizons * * *." OSM agrees that the suggested language is consistent with the Act, and the final rule reflects this change. Another commenter stated that a mix of B and C soil horizons should not be allowed until actual proof is provided that the mix will produce equal or greater yields. A second commenter pointed out that mixing of B and C soil horizons is common practice in the State of Illinois, yet there is no verification that the mixed soil horizons will achieve equal or greater productivity. Another commenter reported crop yields of 129 bushels of corn per acre on a 100-acre experimental plot in Illinois through the mixing of the B and C soil horizons. Another commenter suggested regulatory language that quoted Section 515(b)(7)(B) of the Act. A final commenter supported the proposed rule and stated it would be less burdensome in actual practice and more beneficial to the environment of a greater productive capacity can be proven with soil-horizon mixing. OSM and SCS are aware of soil-mixing studies in Illinois which are showing promising results. (McSweeney and others, 1981; Fehrenbacher and others, 1982; Jansen, 1982). The final rule adopts language from Section 515(b)(7)(B) of the Act and allows mixing of soil materials where the combinations have been shown to be equally or more favorable for plant growth than the B horizon.

Final § 823.12(d) requires that soil stockpiles be placed within the permit area where they will not be disturbed or subject to excessive erosion. When stockpiles are left in place for more than 30 days, the general topsoil-storage performance standards of §§ 816.22 or 817.22 of this chapter apply. No comments were received on proposed § 823.12(c) (which is the corresponding provision of the proposed rule), and the language of final § 823.12(d) is essentially the same as proposed.

I. Section 823.14 Soil Replacement

Final § 823.14(a) requires that the SCS establish soil-reconstruction specifications within each State on the basis of standards of the NCSS. These specifications must include, at a minimum, physical and chemical characteristics of reconstructed soils, soil descriptions containing soil-horizon depths, soil densities, soil pH, and any other specifications set by the SCS. These specifications must be sufficient to create a final soil capable of achieving yields equal to or higher than those of nonmined prime farmland in the surrounding area.

One commenter asked OSM to encourage the Secretary of Agriculture to publish specifications for prime farmland soil reconstruction in the **Federal Register**. OSM has recommended to the SCS that they publish these specifications for public review.

One commenter wanted to include provisions for draining ponded water within 24 hours after a maximum rainfall event of 10-year frequency. Another commenter proposed a new paragraph that would provide detailed

VOL

1983
UMI

requirements that the operator restore the following soil parameters to premining conditions: density, texture, porosity, permeability, pH, exchange capacity, and water-holding capacity. This commenter stated that such standards were necessary if OSM intended to remove the moist-bulk-density standard. OSM and SCS believe that, where appopriate, specifications for the listed parameters should be part of the soil-reconstruction specifications established within each State by the SCS and the regulatory authority. Thus, they need not be part of this rule. The same commenter requested OSM to spell out more closely how the soil-reconstruction standards would be applied in practice, in lieu of the bulk-density standard. This commenter pointed out that where soil-horizon replacement is practiced in soil reconstruction, the standards can be fairly easily applied since the postmining soil should be similar to the premining soil. However, where mixing of profiles is done in soil reconstruction, OSM should spell out more specifically how the premining soil characteristics will be used as a standard for soil reconstruction.

OSM and SCS agree that where soil mixing is appoved, the quantity of various soil materials and methods utilized in mixing is important and must be spelled out in detail in the reclamation plan so that equal or higher levels of productivity may be achieved. However, the specific details of utilizing substitute materials and mixing of soil materials must be evaluated on each site by the regulatory authority and the SCS. National rules attempting to set the means for achieving the performance standard would serve no useful purpose because of the diversity of soils and reconstruction methods that may be utilized.

One commenter wanted to make sure that the regulatory authority has input into the formulation of these specifications so that they address the concerns of the regulatory authority. Section 515(b)(7) of the Act requires that the Secretary of Agriculture develop specifications for removal, storage, replacement, and reconstruction of prime farmland soils. The SCS, acting for the Secretary of Agriculture, recognizes that close coordination with the regulatory authority is necessary in order that a sound prime farmland restoration program is developed. The SCS is taking positive action within each State to assure that the regulatory authority has ample input into the soil-reconstruction specifications.

Another commenter pointed out that soil-description data should not be referenced as "standards," stating that the parameters listed are useful guidelines for assuring soil quality. This commenter also stated that postimining soil will never be precisely the same immediatley following mining as it was before mining and that the optimum conditions for postmining soils are best determined on a site-specific basis. OSM and SCS agree that the use of the word "standard" in this instance is not appropriate and have changed the word "standard" to "specification" for soil reconstruction to be consistent with Section 515(b)(7) of the Act. Also, OSM and SCS are aware that the postmining soil condition will never be precisely the same as the premining soil condition. However, this should not prevent the operator from achieving equivalent levels of yield as nonmined prime farmland in the surrounding area, as required by Section 519(c)(2) of the Act.

One commenter did not believe that studies show consistent relationships between soil density and productivity, and thus, thought soil density should not be used as a soil-reconstruction criterion. This commenter felt that a rigid set of standards for various soil parameters will not provide for the necessary trade-offs among physical and chemical soil properties when evaluating a soil-reconstruction plan. For these reasons, this commenter suggested that premining soil parameters be informational material for the regulatory authority to use in evaluating prime farmland reconstruction plans and for evaluation of soil reconstruction in the field.

OSM and SCS do not agree with this commenter with respect to his evaluation of consistent relationships between soil density and productivity. One established consistent relationship between soil density and productivity of the soil is that, given like soils, soil productivity decreases as soil density increases. (Guernsey and others, 1979; Smith, 1981) OSM and SCS agree, however, that a rigid set of national specifications for soil parameters will not provide for the necessary trade-offs among physical and chemical soil properties. This is why OSM and SCS have required, in § 785.17(c)(1)(ii), a "range of soil densities" to be reported in the soil survey.

Under § 823.14(a), the SCS will establish the soil-reconstruction specifications within each State to be consistent with the standards of the NCSS. These premining prime farmland soil specifications are to be used before issuing a permit in evaluating the technological capability of the operator to return prime farmland soils to their premining capability and for evaluation of prime farmland soil reconstruction after mining has taken place for release of the performance bond under Subchapter J.

Another commenter wanted to delete references to "or greater productive capacity" in proposed Part 823 because: (1) The operator should not be required to reclaim the land to a higher productive capacity and (2) returning the land to equal productivity meets the intent of the Act.

Section 510(d)(1) of the Act requires that the regulatory authority make a finding prior to issuing a permit to mine prime farmland that: (1) The operator has the technological capability to restore the mined land to levels of yield equivalent to, or higher than, those of nonmined prime farmland in the surrounding area and (2) he or she can meet the soil-reconstruction specifications of Section 515(b)(7) of the Act. Because the finding under Section 510(d)(1) of the Act ties the achievement of equal or higher levels of yield to meeting the soil-reconstruction specifications, achievement of such yields is the goal of § 823.14(a). However, operators are not required to achieve higher levels of yield because the standard is equal *or* higher levels of yield. However, for prime farmland topsoil-substitute materials to be approved under § 823.12(c)(1), the operator must show that the topsoil substitute materials will have a greater productive capacity.

Final § 823.14(b) requires, in general, that the depth of reconstructed prime farmland soils be 48 inches. Specifications for greater or lesser depths will be provided to the regulatory authority by the SCS based upon the soil survey and established crop yields to assure the restoration of soil productivity. The reference in the proposed rule to specification of soil-horizon depths by the SCS to the regulatory authority has been removed from this paragraph and placed in new §§ 823.4(a) and 785.17(d)(2) as a general requirement of soil-reconstruction specifications.

Three commenters expressed concern with respect to the root-inhibiting layers found in prime farmland soils. These commenters felt that where root-inhibiting layers are found at less than 48 inches of soil depth, a 48-inch depth of soil material should be replaced regardless, because: (1) The degree of inhibition of roots and the resulting effect on crop productivity is highly variable, (2) the disturbance of prime

farmland soils in the mining and reclamation process requires that a greater depth of soil be replaced, (3) the literature does not support reconstructed soil depths of less than 48 inches, (4) unless a soil layer actually prevents root penetration, there is no justification to limit the reconstructed depth to the top of that restrictive layer, and (5) the use of the proposed language will result in sharply different reclamation work among the States.

OSM and SCS recognize the fact that root-inhibiting layers exist in soils and are highly variable with respect to their physical and chemical makeup and their effect on crop yields. Because of this high degree of variability, OSM and SCS agree that the SCS within each State must determine the soil-horizon depths to be utilized in prime farmland soil reconstruction. In this manner, site-specific variables can best be addressed. Also, coordination across State lines is currently done with SCS soil surveys, thus reducing drastic differences in soil-reconstruction specifications between States. OSM and SCS have further clarified the concept of root-inhibiting layers by specifying in the rule that soil horizons which restrict or prevent roots from further penetration and have little or no beneficial effect on soil productive capacity will be considered inhibiting. In keeping with the preamble of the proposed rule (47 FR 19079, May 3, 1982), the depth requirement of this section is a general requirement, to be delineated more specifically by the SCS on the basis of the soil survey.

OSM and SCS agree that a depth of at least 48 inches of soil is normally necessary to assure that the required soil productivity is restored; however, root-inhibiting soil layers do occur in a few prime farmland soils at lesser depths and must be recognized. Where these restrictive soil layers exist at depths of less than 48 inches, the process of excavating and stockpiling horizons and reconstructing the soils can create a soil that has better characteristics because it lacks these natural restrictive layers.

Another commenter wanted "48 inches" changed to "40 inches" to conform to the prime farmland definition in 7 CFR 657.5. The 40-inch depth of prime farmland soil referred to in 7 CFR 657.5 is the basic depth that SCS uses to evaluate the physical and chemical properties of the soil to determine if the soil qualifies as prime farmland. The 48-inch depth of soil specified in these rules reflects the depth of soil needed to sustain high crop yields found for prime farmland soils and also reflects soil-reconstruction experiences of two major agricultural States, Illinois and North Dakota (see their State programs, which are listed under "Reference Materials") which have many years of experience in reconstructing mined agricultural lands. Researchers in Iowa found that a depth of at least 48 inches is required to attain county average yield levels. (Drake and Ririe, 1981) Other commenters supported the 48-inch standard and noted that: (1) At least 48 inches is required for adequate water retention, (2) at least that much soil is needed to assure an acceptable soil depth after erosion losses, and (3) 48 inches of soil is needed to assure that operators achieve the required restoration of soil productivity in a reasonably prompt manner.

Two commenters objected to the proposal to delete the scarification requirement of previous § 823.14(b). They felt that: (1) It has proven beneficial in the past to provide a physical transition between soil horizons in order to promote root penetration and water retention and percolation, and (2) scarification is just one method used to reduce compaction and it would be appropriate to allow other methods of loosening the soil. Another commenter supported the proposed deletion because the rule was unnecessary and burdensome.

OSM and SCS recognize that confusion exists with respect to the distinction between scarification of spoil material before replacement of soils for root growth and soil tillage to alleviate compaction. Previous § 823.14(b) required that scarification take place in a manner consistent with §§ 816.102(e) and 817.102(e) before any soil material was placed on graded spoil. This requirement was intended specifically to minimize erosion and topsoil instability. Previous § 823.14(c) required the placement of soils in a manner that avoided excessive compaction. One method of accomplishing this is soil tillage. This requirement applied to prime farmland soils placed upon scarified spoil materials. Under these final rules, the operator must still replace prime farmland soils with proper compaction, as determined by the SCS from the soil survey. However, the requirement for scarification of the interface between spoil and prime farmland soils has been eliminated, because slippage control is not always necessary on relatively level prime farmland.

Final § 823.14(c) requires that the operator replace and regrade the soil horizons with proper compaction and uniform depth. Tillage can continue to be performed to alleviate compacted soil conditions. This final rule is unchanged from the proposed rule.

One commenter stated that in § 823.14(c) OSM has presented a common-sense approach to the compaction problem. Two other commenters felt that the use of bulk density in measuring soil compaction should not be deleted from the rules. One commenter felt that "proper compaction" was not well enough defined. Another commenter noted that: (1) Compaction had a detrimental physical effect on vegetative growth and crop yields and (2) the single most useful and reliable quantitative measure of compaction is bulk density. The commenter added that bulk density should be measured for the entire depth to which plant roots extend and that there is no optimal bulk density for all soils, because of the variability of silt, sand, clay, and organic matter. For these reasons, this commenter felt that it is critical that bulk density be measured before mining.

OSM and SCS agree that compaction of soil horizons does decrease vegetative growth and crop yields (Guernsey and others, 1979, pp. 69–79) and that there is no optimal bulk density for all soils because of the differences in the makeup of soils (Smith, 1981). For these reasons, soil density has been retained as a soil-reconstruction specification to be specified by the SCS within each State. The SCS within each State will determine what constitutes "proper compaction" and whether or not bulk density will be the measure of soil density.

Final § 823.14(d) requires that the operator replace the B horizon, C horizon, or other suitable material which must be removed to the thickness which meets the minimum depth requirements to restore soil productivity. Comments received relative to B or C soil-horizon mixing are answered earlier in this preamble in the discussion of § 823.12(c)(2). Final § 823.14(d) is unchanged from the proposed rule.

Final § 823.14(e) requires that the operator replace the topsoil materials to a thickness equal to, or exceeding that of, the original surface soil layer. This final rule is unchanged from the proposed rule.

One commenter wanted to change the term "equal or exceed" to the term "not less than." This commenter stated that the operator should not be required to exceed the thickness of the original surface. OSM agrees with this comment but is not changing the language because the phrase "equal or exceed"

VOL 48 ISS 93 MY 12 1983 UMI

does not require the final surface soil layer to exceed the original thickness.

J. Section 823.15 Revegetation and Restoration of Soil Productivity

Final § 823.15 provides special ground-cover and cropping requirements which apply to surface coal mining operations on prime farmland. The heading of previous § 823.15 has been changed to include "restoration of soil productivity," which more accurately identifies the content of the section. The introductory paragraph of the previous section has not been adopted because the requirements in the remainder of the section are self-explanatory.

On commenter wanted a sentence added clearly stating that the burden of proof is on the operator to prove that the land has been restored.

Section 823.15 applies to all surface coal mining and reclamation operations on prime farmland, except for that exempted under § 823.11. It is the operator's responsibility to meet all of the applicable performance standards in Chapter VII, including the ground-cover and cropping requirements. In addition, the operator cannot obtain the complete release of the performance bond until he or she demonstrates compliance with § 823.15 and the corresponding requirement in Subchapter J.

Final § 823.15(a) requires that the soil surface be stabilized with a vegetative cover or other means to control soil loss through erosion following soil replacement. This final rule is unchanged from the proposed rule.

One commenter wanted a soil-erosion control system added. Another commenter suggested adding a sentence requiring the regulatory authority to approve erosion-control plans before final grading. Further specificity in this regard is not necessary. Section 823.15(a) provides a performance standard that requires erosion control. In addition, the reconstruction plan required under § 785.17(c)(2) adequately covers erosion control and provides the regulatory authority and operator with a planning tool for alleviating potential problems.

Final § 823.15(b) imposes a general requirement that prime farmland soil productivity be restored. It contains eight paragraphs specifying how the operator must comply with that requirement, including an average-yield requirement. These eight paragraphs contain the requirements that were proposed in § 823.15 (b) and (c).

Three commenters agreed that crops should be grown to prove restoration of soil productivity and stated that this is the only way to meet the requirements of the Act. Several commenters quoted the District Court's opinion of February 26, 1980, which held that the Act did not require operators to actually farm the land. *In re: Permanent Surface Mining Regulation Litigation*, Mem. opin. at 59, (D.D.C. Feb. 28, 1980). Two of these commenters wanted to change the language so that cropping is an optional method of showing that the restored land has been returned to the capability of achieving levels of yield equivalent to those of surrounding unmined land within a reasonable time. Three of these commenters proposed the use of a soil survey as acceptable for bond-release purposes. One commenter asked that ground cover or cropping be deleted because such a requirement was too narrow a standard on the basis of the Court's opinion.

Although the District Court's decision of February 26, 1980, appears to prohibit OSM from requiring that actual crop yields be used as the means for determining the success of soil reconstruction, the May 16, 1980, decision appears to support such a requirement. See *In re: Permanent Surface Mining Regulation Litigation, Mem. opin.* at 5–6, (D.D.C. May 16, 1980). In light of these apparent conflicting decisions, OSM has adopted the guidance provided in the later May 16, 1980, decision. Therefore, § 823.15(b) requires that crops be grown to demonstrate the restoration of soil productivity. OSM has determined that cropping is the only method currently available to test the restoration of the productivity of prime farmland soils because insufficient research has been published that demonstrates the reliability of any other method.

One commenter was concerned that the proposed rule increased the likelihood that inadequate soil-reconstruction practices will be used and therefore will jeopardize the successful restoration of prime farmland productivity. Another commenter expressed concern that reference areas can be easily mismanaged so that the lowest amount of yield is realized on the reference areas and that management levels and crop-yield data can easily be manipulated so that the crop record used will be substantially lowered. The regulatory authority and the SCS will be able to detect inadequate soil-reconstruction practices and prevent any mismanagement and manipulation of yields. Moreover, the performance standards of § 823.15 are sufficiently detailed and explicit to ensure restoration of premining productivity. In addition, the requirements to demonstrate soil productivity and the criteria for bond release also ensure successful restoration.

Another commenter pointed out that mining and reclamation methods which would optimize restoration are still to be developed. This commenter's understanding was that an agronomist at the University of Illinois has predicted a dim future for crop productivity on surface mined lands where B and C horizon mixing is allowed.

The commenter's conclusion about yields of reclaimed lands where B and C soil horizons are mixed cannot be fully supported by the agronomist's data. These data show that yields for some of the reconstructed soil plots are nearly the same as for similar soils in adjoining areas that have not been mined. (Jansen, 1982.) Of course, § 823.12(c)(2) does not allow the mixing of the B and C horizons unless the operator can demonstrate that such a mixture will be equally or more favorable for plant growth than the B horizon. The referenced studies would certainly be relevant to the evaluation of any proposal to mix horizons, as would any additional studies or information submitted by the operator.

Final § 823.15(b)(1) requires that the period for measuring soil productivity of the reconstructed soil that is necessary for bond release be initiated within 10 years after completion of soil replacement.

One commenter asked that a time limit of 18 months be established between final grading and soil replacement so that the operator will perform soil replacement concurrently with reclamation. OSM does not agree with this proposed change. The purpose of § 823.15(b)(1) is to establish the latest date by which proof of soil productivity must begin. A time limit to assure timely reclamation is not needed because the soil-reconstruction plan required under § 785.17(c)(2) must be approved by the regulatory authority, and unreasonable delays in such a plan should not be approved. In addition, under §§ 816.100 and 817.100, all operators are required to proceed with reclamation efforts, including topsoil replacement, as contemporaneously as practicable with mining.

One commenter asked what would happen if, after 10 years had passed, the regulatory authority found that the soil productivity was not restored for a specific permit area.

Under § 823.15(b)(1) the period for measuring soil productivity is to begin within 10 years. If a crop-rotation sequence is followed, it could be as much as 15 or 16 years after soil replacement before the required minimum 3 crop-year measurement period is completed. If at that time the operator has failed to achieve equivalent or higher yields, alternative reclamation approaches could be used by the operator or, in some situations, the remaining portion of the bond could be forfeited to ensure reclamation completion.

Final § 823.15(b)(2) requires that for proof of soil productivity, a reference crop be grown on a representative sample or on all of the mined and reclaimed prime farmland area. Also, the measurement of soil productivity for bond release must utilize a statistically valid sampling technique at a 90-percent statistical confidence level as approved by the regulatory authority in consultation with the Soil Conservation Service.

The proposed rule would have required that crops be grown on any portion of the disturbed area that is prime farmland historically used as cropland. Eight commenters were concerned about the meaning of "any portion of" with respect to disturbed prime farmland historically used as cropland. Four commenters suggested that the use of sound statistical sampling methods be required for measuring the success of soil productivity.

The phrase "any portion of" is not being adopted. OSM and SCS have agreed that the amount of prime farmland area used to grow crops for proof of soil productivity could include the entire mined and reclaimed prime farmland area or a portion of the mined and reclaimed prime farmland area which would result in a statistically valid sample at a 90-percent confidence level. Because of the wide variation of acceptable crop sampling techniques which are utilized over coal-producing areas, OSM and SCS have left the selection of these statistically valid sampling techniques to the regulatory authority in consultation with the SCS. Also, this requirement for a statistically valid sample is needed to ensure that proof of successful reclamation is judged uniformly and is consistent with the general revegetation performance standards of §§ 816.116 and 817.116.

One commenter was concerned that the proposed rule will allow a lesser standard to be used to determine productivity because he feels it will not require test yields on a site-specific basis. OSM points out that the requirements of this section specify that site-specific tests of yield utilize a representative sample of the disturbed area or the entire disturbed area.

Final § 823.15(b)(3) specifies that the measurement period for determining the average annual crop production (yield) for proving soil productivity for bond release is a minimum of 3 crop years. The substance of this final rule is unchanged from the proposed rule.

Three commenters supported 3 nonconsecutive crop years for the 3-year period for proving soil productivity. One commenter was concerned about the meaning of "average annual crop production" and noted that this period of time is verb short and that yields during such short periods will fluctuate widely. Under final § 823.15(b)(3), the 3 crop years need not necessarily be consecutive years. They could be 3 crop years in a particular crop-rotation sequence. "Average annual crop production" means the average yield of the specified crop during the 3 crop years used for the test.

OSM and SCS realize that this time period is short and that yields could fluctuate widely. However, the reference yields on nonmined prime farmland in the surrounding area should also fluctuate accordingly, thus allowing a comparison of yields. Furthermore, possible adjustments based on other factors described below will allow meaningful comparisons of yields.

Section 823.15(b)(4) requires that the level of management utilized during the specified measurement period be the same as that used on nonmined prime farmland in the surrounding prime farmland area. OSM has imposed this requirement to be consistent with Section 519(c)(2) of the Act.

One commenter was concerned that this section does not adequately define standards for levels of management. The regulatory language that has been adopted implements and is consistent with Section 519(c)(2) of the Act, which requires management levels to be the same as those used on nonmined prime farmland in the surrounding area. Therefore, no additional language is needed. Another commenter wanted the level of management to be discretionary with the operator. Because Section 519(c)(2) requires equivalent management practices as a condition of bond release, use of the permissive "may" as suggested rather than the mandatory "shall" would be inconsistent with the Act.

Final § 823.15(b)(5) requires that proof of soil productivity for bond release be based upon achieving levels of yield equal to, or higher than, those of the reference crop established for the same period. This section has been changed from the proposed rule to remove the obsolete term "soil type." In its place, the phrase "similar texture or slope phase of the soil series" is used. This is not a substantive change but more accurately describes the reference soils.

One commenter wanted to encourage States to adopt their own yield-measurement systems. OSM points out that this is the intent of the final rule, which specifies that the State regulatory authority in consultation with the SCS in each State will adopt yield-measurement systems.

Another commenter wanted clarification that averaging of different crop yields is not allowed. The final language precludes averaging the yields of different kinds of crops, by requiring comparison to the reference crop.

Two commenters pointed out that in some situations it may be impossible to find the same crop growing on the same soil type within close proximity for the purpose of comparison. One of these commenters felt that it would make more practical and technical sense to use a similar soil type for the sake of comparison. Another commenter requested updating the obsolete term "soil type." OSM agrees and the final rule reflects these changes.

Final § 823.15(b)(6) requires that the reference crop selected for proof of soil productivity be selected from the crops most commonly produced on the surrounding prime farmland. Where row crops are selected as the reference crop and two or more row crops are produced in the local area, the reference crop should be the row crop requiring the greatest rooting depth. This section has been changed from the previous rules to require at least one deep-rooted crop to be used as a reference crop in the 3-year period for proving soil productivity.

Several commenters wanted to delete the last sentence of this paragraph in order to allow crop rotations with alfalfa or other hay crops. OSM and SCS have determined that this sentence does not preclude the use of hay crops in rotation with row crops during the period for proving soil productivity. Also, OSM and SCS note that hay crops are included in the definition of cropland in § 701.5. Use of perennial plants for hay is within the regulatory authority's discretion if those kinds of crops are among the crops most commonly produced on surrounding prime farmland. One commenter wanted to delete this section, because there is sufficient authority in proposed § 823.15(c)(2) to require the demonstration of productivity using a management system which is at the same level of management used in the surrounding prime farmland areas. OSM and SCS do not agree. This section is needed to specify selection of reference crops. Three commenters supported the proposed rule, but one stated that more

VOL 48 ISS 93 MY 12 1983 UMI

than one reference crop could be used for the 3-year proof period. OSM and SCS agree that more than one reference row crop or hay crop could be used in the 3-year proof period. This would take advantage of existing crop rotations during the test period.

Final § 823.15 (b)(7) and (b)(8), pertaining to the determination of reference-crop yields, were proposed under § 823.15(c)(3) but have been separated and renumbered for clarity.

Final § 823.15(b)(7)(i) provides that current yield records of representative local farms may be utilized as one of the two means of establishing the reference crop yield standard for bond release. The SCS must concur in the use of the standard. OSM and SCS have clarified this paragraph to include only current yield records of farms in the surrounding area.

One commenter wanted the States to have the power to adopt measures which would utilize a site-specific system to measure productivity which reflected actual crop production of similar unmined soils. OSM and SCS believe that § 823.15(b) allows the use of such a system.

Final § 823.15(b)(7)(ii) provides that the average county yields for a crop year recognized by the USDA may be utilized as the other of the two means of establishing the crop-yield standard for bond release. The SCS will adjust these yields to reflect the productivity of individual prime farmland soils.

Thus, under final § 823.15(b)(7) (i) and (ii), the reference crop could be on a reference area of a surrounding area of prime farmland or the reference crop could be a statistical standard generated by the SCS from USDA county averages. OSM and SCS have broadened the USDA sources from which these yield standards may be taken, including average county yields established by sources other than the USDA Statistical Reporting Service (SRS) as proposed. The USDA and SCS remain an integral part of the determination of the reference-crop yield. This change was made on the basis of commenters' expressed concern that other sources of crop-yield data be recognized. Sources of crop data such as State Departments of Agriculture, universities, and all USDA agencies are appropriate for determining reference-crop yields as long as these sources of data are approved by the regulatory authority and adjusted by the SCS to reflect the productivity of individual prime farmland soils.

One commenter asked whether USDA SRS average yields are the same as those of the State Departments of Agriculture. Another commenter wanted to use the formula developed by the Illinois Department of Agriculture. USDA SRS yields are compiled in cooperation with the State Departments of Agriculture and both would be appropriate for use under § 823.15(b)(7). Two commenters objected to adjusted yields, while another commenter wanted the rule to make clear that adjustments to county average yields should take into account differences in yield within prime farmland soils. Section 823.15(b)(7)(i) provides the option to compare yields with similar adjacent lands. If this option is used, adjustments in USDA yields may not be needed. Yield data from surrounding prime farmland soils may not be readily available, and for this reason the option of using adjusted county average yields is provided.

Final § 823.15(b)(8) allows crop yields to be adjusted, with SCS concurrence, for disease, pest, and weather-induced seasonal variations and for specific differences in management practices where the overall management practices of the crops being compared are equivalent. This section has been modified from the proposed rule which would have included only seasonal variations caused by weather. Adjustments in reference yields for disease and pests could be needed to account for unusual conditions in the measurement period that are beyond an operator's control and that skew comparisons.

The allowance in § 823.15(c)(8)(ii) for differences in specific management practices recognizes that there are many individual crop-management variables, any one of which could appreciably change crop yields. Some of these practices include time and depth of planting; time, depth, and kind of tillage or whether tillage is needed at all; pesticide and fertilizer management; irrigation and drainage management; and time of harvest. Although Section 519(c)(2) of the Act requires that bond release for soil productivity be based upon "equivalent management practices," it would be difficult to find, no less compare, reference crops from which every management decision is identical with those for the crop on the reconstructed soil. Moreover, to require the monitoring of every management practice would not be technically sound from a regulatory standpoint because of the number of variables and uncertainties involved and the lack of methods and measures to compare these uncertainties. OSM has decided that the most practical solution is to require reference crops with overall equivalent management practices but to allow yield adjustments, if necessary, to account for differences in specific practices that could appreciably affect yield.

One commenter stated that this section is not needed because county average yields include adjustments for weather. OSM has determined that this section is needed to account for local management alternatives and variations of disease, pests, and weather that may affect an otherwise successful crop year.

Another commenter favored adjustments for disease and pest-induced variations because disease and pest infestations vary in impact and location in the same or similar ways that weather can. This change has been accepted because OSM and SCS agree that these factors potentially can have a large local effect on crop yields. Another commenter wanted "in consultation with the Soil Conservation Service" retained in this section. OSM has determined that this change is appropriate and is requiring SCS concurrence for such adjustments.

III. Procedural Matters

Executive Order 12291 and the Regulatory Flexibility Act

The Department of the Interior (DOI) has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act [5 U.S.C. 601 *et seq.*]

The reasons underlying this determination are as follows:

This rule would not have inimical effects on the competitive position, investment or productivity of United States coal operators, or on employment in the coal industry. The Department certifies that this rule would affect a proprtionately small number of operators and the impact would be correspondingly small.

National Environmental Policy Act

OSM has analyzed the impacts of these final rules in its "Final Environmental Impact Statement, OSM–EIS–1: Supplement," in accordance with Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)). The final EIS is available in OSM's Administrative Record in Room 5315, 1100 L Street, NW, Washington, D.C., or by mail request to Mark Boster, Chief, Branch of Environmental Analysis, Room 134, Interior South Building, U.S. Department of the Interior, Washington, DC 20240.

This preamble serves as the record of decision under NEPA. The following differences are noted between this final rule and the preferred alternative in Volume III of the EIS.

1. This rule removes the grandfather exemption cutoff date. Although the April 3, 1983, cutoff date was included in Volume III of the EIS, its removal is analyzed in the EIS text.

2. A number of editorial and minor substantive changes have been made for clarity including the reorganization of §§ 785.17(c)(3), 785.17(d)(4), 823.12, and 823.15. These changes are within the scope of the EIS analysis.

3. This final rule adds coal preparation plants affecting a minimal amount of land to the exemption from Part 823 for "support facilities" in § 823.11(a) that was included in the preferred alternative. The analysis of the exemption in the EIS was premised upon an expansive reading of the term "support facilities" and thus is only slightly affected by the inclusion of coal preparation plants.

4. The final rule clarifies when adjustments of reference crop yields for management variations under § 823.15 will be allowed. This change does not alter the EIS analysis.

Federal Paperwork Reduction Act

The information-collection requirements in § 785.17 were approved by the Office of Management and Budget (OMB) under 44 U.S.C. 3507 and assigned clearance number 1029–0040. OSM has codified the OMB approval under new § 785.10 (47 FR 33683, August 4, 1982) and has received new OMB approval of these information-collection requirements.

The information required by § 785.17 will be used by the regulatory authority to determine whether the applicant can meet the prime farmland performance standards of Part 823. The information required by § 785.17 is mandatory.

Approval of Other Agencies

Section 510(d)(1) of the Act states that, under regulations issued by the Secretary with the concurrence of the Secretary of Agriculture, the regulatory authority shall follow certain procedures in granting permits for surface coal mining operations on prime farmland. The regulations concerning issuance of permits on prime farmland have been developed in consultation with the Secretary of Agriculture in accordance with Section 510(d)(1). By letter dated April 11, 1983, the Secretary of Agriculture, through his authorized representative, Chief, Soil Conservation Service, concurred with the prime farmland provisions of the regulations.

Section 516(a) of the Act states that the Secretary shall promulgate rules and regulations directed toward the surface effects of underground mining activities and requires that such rules and regulations shall not conflict with or supersede any provision of the Federal Coal Mine Health and Safety Act of 1969 or any regulation issued pursuant thereto. The written concurrence of the head of the department which administers the Act is required before final rules may be promulgated. By letter dated April 5, 1983, concurrence has been obtained from the head of the Mine Safety and Health Administration, which administers the Federal Mine Safety and Health Act of 1977, the successor to the Federal Coal Mine and Safety Act of 1969.

List of Subjects

30 CFR Part 716

Coal mining, Environmental protection, Surface mining, Underground mining.

30 CFR Part 779

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Surface mining.

30 CFR Part 783

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Underground mining.

30 CFR Part 785

Coal mining, Reporting and recordkeeping requirements, Surface mining, Underground mining.

30 CFR Part 823

Agriculture, Coal mining, Environmental protection, Surface mining, Underground mining.

Accordingly, 30 CFR Parts 716, 779, 783, 785, and 823 are amended as set forth herein.

Dated: March 30, 1983.

Daniel N. Miller, Jr.,

Assistant Secretary, Energy and Minerals.

PART 716—SPECIAL PERFORMANCE STANDARDS

§ 716.7 [Amended]

1. In § 716.7, Paragraph (a)(2)(iv) is removed.

PART 779—SURFACE MINING PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR INFORMATION ON ENVIRONMENTAL RESOURCES

§ 779.27 [Removed]

2. Section 779.27 is removed.

PART 783—UNDERGROUND MINING PERMIT APPLICATIONS—MINIMUM REQUIREMENTS FOR INFORMATION ON ENVIRONMENTAL RESOURCES

§ 783.27 [Removed]

3. Section 783.27 is removed.

VOL 48 ISS 93 MAY 12 1983 UMI

PART 785—REQUIREMENTS FOR PERMITS FOR SPECIAL CATEGORIES OF MINING

§ 785.17 [Amended]

4. In § 785.17, paragraph (a)(5) is removed.

5. In § 785.17, Paragraph (b) is revised; Paragraphs (c) and (d) are redesignated as Paragraphs (d) and (e), respectively; new Paragraph (c) is added; and newly redesignated Paragraphs (d) and (e)(2) are revised to read as follows:

§ 785.17 Prime farmland.

* * * * *

(b) *Application contents: Reconnaissance inspection.*

(1) All permit applications, whether or not prime farmland is present, shall include the results of a reconnaissance inspection of the proposed permit area to indicate whether prime farmland exists. The regulatory authority in consultation with the U.S. Soil Conservation Service shall determine the nature and extent of the required reconnaissance inspection.

(2) If the reconnaissance inspection establishes that no land within the proposed permit area is prime farmland historically used for cropland, the applicant shall submit a statement that no prime farmland is present. The statement shall identify the basis upon which such a conclusion was reached.

(3) If the reconnaissance inspection indicates that land within the proposed permit area may be prime farmland historically used for cropland, the applicant shall determine if a soil survey exists for those lands and whether soil mapping units in the permit area have been designated as prime farmland. If no soil survey exists, the applicant shall have a soil survey made of the lands within the permit area which the reconnaissance inspection indicates could be prime farmland. Soil surveys of the detail used by the U.S. Soil Conservation Service for operational conservation planning shall be used to identify and locate prime farmland soils.

(i) If the soil survey indicates that no prime farmland soils are present within the proposed permit area, paragraph (b)(2) of this section shall apply.

(ii) If the soil survey indicates that prime farmland soils are present within the proposed permit area, paragraph (c) of this section shall apply.

(c) *Application contents: Prime farmland.* All permit applications for areas in which prime farmland has been identified within the proposed permit area shall include the following:

(1) A soil survey of the permit area according to the standards of the National Cooperative Soil Survey and in accordance with the procedures set forth in U.S. Department of Agriculture Handbooks 436 "Soil Taxonomy" (U.S. Soil Conservation Service, 1975) as amended on March 22, 1982 and October 5, 1982, and 18, "Soil Survey Manual" (U.S. Soil Conservation Service, 1951), as amended on December 18, 1979, May 7, 1980, May 9, 1980, September 11, 1980, June 9, 1981, June 29, 1981, November 16, 1982. The U.S. Soil Conservation Service establishes the standards of the National Cooperative Soil Survey and maintains a National Soils Handbook which gives current acceptable procedures for conducting soil surveys. This National Soils Handbook is available for review at area and State SCS offices.

(i) U.S. Department of Agriculture Handbooks 436 and 18 are incorporated by reference as they exist on the date of adoption of this section. Notices of changes made to these publications will be periodically published by OSM in the **Federal Register.** The handbooks are on file and available for inspection at the OSM Central Office, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, D.C., at each OSM Technical Center and Field Office, and at the central office of the applicable State regulatory authority, if any. Copies of these documents are also available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, Stock Nos. 001–000–02597–0 and 001–000–00688–6, respectively. In addition, these documents are available for inspection at the national, State, and area offices of the Soil Conservation Service, U.S. Department of Agriculture, and at the **Federal Register** library, 1100 L Street, NW., Washington, D.C. Incorporation by reference provisions were approved by the Director of the **Federal Register** on June 29, 1981.

(ii) The soil survey shall include a description of soil mapping units and a representative soil profile as determined by the U.S. Soil Conservation Service, including, but not limited to, soil-horizon depths, pH, and the range of soil densities for each prime farmland soil unit within the permit area. Other representative soil-profile descriptions from the locality, prepared according to the standards of the National Cooperative Soil Survey, may be used if their use is approved by the State Conservationist, U.S. Soil Conservation Service. The regulatory authority may request the operator to provide information on other physical and chemical soil properties as needed to make a determination that the operator has the technological capability to restore the prime farmland within the permit area to the soil-reconstruction standards of Part 823 of this chapter.

(2) A plan for soil reconstruction, replacement, and stabilization for the purpose of establishing the technological capability of the mine operator to comply with the requirements of Part 823 of this chapter.

(3) Scientific data, such as agricultural-school studies, for areas with comparable soils, climate, and management that demonstrate that the proposed method of reclamation, including the use of soil mixtures or substitutes, if any, will achieve, within a reasonable time, levels of yield equivalent to, or higher than, those of nonmined prime farmland in the surrounding area.

(4) The productivity prior to mining, including the average yield of food, fiber, forage, or wood products obtained under a high level of management.

(d) *Consultation with Secretary of Agriculture:*

(1) The Secretary of Agriculture has responsibilities with respect to prime farmland soils and has assigned the prime farmland responsibilities arising under the Act to the Chief of the U.S. Soil Conservation Service. The U.S. Soil Conservation Service shall carry out consultation and review through the State Conservationist located in each State.

(2) The State Conservationist shall provide to the regulatory authority a list of prime farmland soils, their location, physical and chemical characteristics, crop yields, and associated data necessary to support adequate prime farmland soil descriptions.

(3) The State Conservationist shall assist the regulatory authority in describing the nature and extent of the reconnaissance inspection required in paragraph (b)(1) of this section.

(4) Before any permit is issued for areas that include prime farmland, the regulatory authority shall consult with the State Conservationist. The State Conservationist shall provide for the review of, and comment on, the proposed method of soil reconstruction in the plan submitted under paragraph (c) of this section. If the State Conservationist considers those methods to be inadequate, he or she shall suggest revisions to the regulatory authority which result in more complete and adequate reconstruction.

(e) * * *

(2) The permit incorporates as specific conditions the contents of the plan submitted under paragraph (c) of this section, after consideration of any revisions to that plan suggested by the State Conservationist under paragraph (d)(4) of this section;

* * * * *

(Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*)

6. Part 823 is revised to read as follows:

PART 823—SPECIAL PERMANENT PROGRAM PERFORMANCE STANDARDS—OPERATIONS ON PRIME FARMLAND

Sec.

823.1 Scope and purpose.
823.4 Responsibilities.
823.11 Applicability.
823.12 Soil removal and stockpiling.
823.14 Soil replacement.
823.15 Revegetation and restoration of soil productivity.

Authority: Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*

§ 823.1 Scope and purpose.

This part sets forth special environmental protection performance, reclamation, and design standards for surface coal mining and reclamation operations on prime farmland.

§ 823.4 Responsibilities.

(a) The U.S. Soil Conservation Service within each State shall establish specifications for prime farmland soil removal, storage, replacement, and reconstruction.

(b) The regulatory authority within each State shall use the soil-reconstruction specifications of paragraph (a) of this section to carry out its responsibilities under § 785.17 and Subchapter J of this chapter.

§ 823.11 Applicability.

The requirements of this part shall not apply to—

(a) Coal preparation plants, support facilities, and roads of surface and underground mines that are actively used over extended periods of time and where such uses affect a minimal amount of land. Such uses shall meet the requirements of Part 816 of this chapter for surface mining activities and of Part 817 of this chapter for underground mining activities;

(b) Water bodies that have been approved by the regulatory authority as an alternative postmining land use in accordance with §§ 773.15, 780.23, 784.15, 816.133, and 817.133 of this chapter, as applicable, and where the regulatory authority has determined that the water bodies will be designed and constructed to minimize the loss of prime farmland. Such water bodies shall meet the requirements of §§ 816.49 and 817.49 of this chapter; or

(c) Prime farmland that has been excluded in accordance with § 785.17(a) of this chapter.

§ 823.12 Soil removal and stockpiling.

(a) Prime farmland soils shall be removed from the areas to be disturbed before drilling, blasting, or mining.

(b) The minimum depth of soil and soil materials to be removed and stored for use in the reconstruction of prime farmland shall be sufficient to meet the requirements of § 823.14(b).

(c) Soil removal and stockpiling operations on prime farmland shall be conducted to—

(1) Separately remove the topsoil, or remove other suitable soil materials where such other soil materials will create a final soil having a greater productive capacity than that which exist prior to mining. If not utilized immediately, this material shall be placed in stockpiles separate from the spoil and all other excavated materials; and

(2) Separately remove the B or C horizon or other suitable soil material to provide the thickness of suitable soil required by § 823.14(b). If not utilized immediately, each horizon or other material shall be stockpiled separately from the spoil and all other excavated materials. Where combinations of such soil materials created by mixing have been shown to be equally or more favorable for plant growth than the B horizon, separate handling is not necessary.

(d) Stockpiles shall be placed within the permit area where they will not be disturbed or be subject to excessive erosion. If left in place for more than 30 days, stockpiles shall meet the requirements of § 816.22 or 817.22 of this chapter.

§ 823.14 Soil replacement.

(a) Soil reconstruction specifications established by the U.S. Soil Conservation Service shall be based upon the standards of the National Cooperative Soil Survey and shall include, as a minimum, physical and chemical characteristics of reconstructed soils and soil descriptions containing soil-horizon depths, soil densities, soil pH, and other specifications such that reconstructed soils will have the capability of achieving levels of yield equal to, or higher than, those of nonmined prime farmland in the surrounding area.

(b) The minimum depth of soil and substitute soil material to be reconstructed shall be 48 inches, or a lesser depth equal to the depth to a subsurface horizon in the natural soil that inhibits or prevents root penetration, or a greater depth if determined necessary to restore the original soil productive capacity. Soil horizons shall be considered as inhibiting or preventing root penetration if their physical or chemical properties or water-supplying capacities cause them to restrict or prevent penetration by roots of plants common to the vicinity of the permit area and if these properties or capacities have little or no beneficial effect on soil productive capacity.

(c) The operator shall replace and regrade the soil horizons or other root-zone material with proper compaction and uniform depth.

(d) The operator shall replace the B horizon, C horizon, or other suitable material specified in § 823.12(c)(2) to the thickness needed to meet the requirements of Paragraph (b) of this section.

(e) The operator shall replace the topsoil or other suitable soil materials specified in § 823.12(c)(1) as the final surface soil layer. This surface soil layer shall equal or exceed the thickness of the original surface soil layer, as determined by the soil survey.

§ 823.15 Revegetation and restoration of soil productivity.

(a) Following prime farmland soil replacement, the soil surface shall be stabilized with a vegetative cover or other means that effectively controls soil loss by wind and water erosion.

(b) Prime farmland soil productivity shall be restored in accordance with the following provisions:

(1) Measurement of soil productivity shall be initiated within 10 years after completion of soil replacement.

(2) Soil productivity shall be measured on a representative sample or on all of the mined and reclaimed prime farmland area using the reference crop determined under Paragraph (b)(6) of this section. A statistically valid sampling technique at a 90-percent or greater statistical confidence level shall be used as approved by the regulatory authority in consultation with the U.S. Soil Conservation Service.

(3) The measurement period for determining average annual crop production (yield) shall be a minimum of 3 crop years prior to release of the operator's performance bond.

(4) The level of management applied during the measurement period shall be the same as the level of management used on nonmined prime farmland in the surrounding area.

(5) Restoration of soil productivity shall be considered achieved when the average yield during the measurement

VOL

MY
12
1983
UMI

period equals or exceeds the average yield of the reference crop established for the same period for nonmined soils of the same or similar texture or slope phase of the soil series in the surrounding area under equivalent management practices.

(6) The reference crop on which restoration of soil productivity is proven shall be selected from the crops most commonly produced on the surrounding prime farmland. Where row crops are the dominant crops grown on prime farmland in the area, the row crop requiring the greatest rooting depth shall be chosen as one of the reference crops.

(7) Reference crop yields for a given crop season are to be determined from—

(i) The current yield records of representative local farms in the surrounding area, with concurrence by the U.S. Soil Conservation Service; or

(ii) The average county yields recognized by the U.S. Department of Agriculture, which have been adjusted by the U.S. Soil Conservation Service for local yield variation within the county that is associated with differences between nonmined prime farmland soil and all other soils that produce the reference crop.

(8) Under either procedure in Paragraph (b)(7) of this section, the average reference crop yield may be adjusted, with the concurrence of the U.S. Soil Conservation Service, for—

(i) Disease, pest, and weather-induced seasonal variations; or

(ii) Differences in specific management practices where the overall management practices of the crops being compared are equivalent.

Proposal to Amend Permit Regulations for Controlling Certain Activities in Waters of the United States

VOL 48 ISS 93 MY 12 1983 UMI

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Parts 320, 322, 323, 325, 327, 328 and 330

Proposal To Amend Permit Regulations for Controlling Certain Activities in Waters of the United States

AGENCY: Army Corps of Engineers, DOD.

ACTION: Proposed rule.

SUMMARY: The Department of the Army is proposing to amend the Corps of Engineers permit regulations for controlling certain activities in the waters of the United States. These amendments are being proposed to bring about more efficient, effective operation of the Corps' regulatory program and to implement the May 7, 1982, decisions of the Presidential Task Force on Regulatory Relief, while still carrying out fully the statutory requirements. The Task Force directed the Army to reduce uncertainty and delay, give the states more authority and responsibility reduce conflicting and overlapping policies, expand the use of general permits and redefine and clarify the scope of the permit program. The nationwide permits issued on July 22, 1982 (47 FR 31794) would be modified by adding additional conditions to address special water quality and coastal zone management concerns and to highlight any regional modifications made by division engineers. The headwaters and isolated waters nationwide permit would be modified to reimpose the 10-acre lake limitation as existed prior to July 22, 1982. Two new nationwide permits are being proposed to reduce duplication with other Federal agency programs and to authorize certain activities considered in the authorization of Federal expenditures for Corps of Engineers projects. The modification to the existing permits and the two new permits would become effective only after public comment and opportunity to request a public hearing and determination that these proposals are in the public interest. The existing nationwide permits at 33 CFR 330 continue in effect until July 22, 1987. However, based on public comment, some of those permits may be modified or revoked if analysis required by 33 CFR 325.7 so indicates. In that connection, states are being given the opportunity to update the certification of all the nationwide permits at 33 CFR 330 pursuant to Section 401 of the Clean Water Act and Section 307(c) of the Coastal Zone Management Act.

DATE: Written comments must be received by July 11, 1983.

ADDRESS: Office of the Chief of Engineers, ATTN: DAEN–CWO–N, Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Sam Collinson or Mr. Bernie Goode, Regulatory Branch, (202) 272–0199.

SUPPLEMENTARY INFORMATION:

Why Revisions to the Regulations Are Being Proposed

Executive Order 12291, signed by the President on February 17, 1981, established the Presidential Task Force on Regulatory Relief to advise the Federal agencies in reducing unnecessary regulatory burdens.

During the summer of 1981 the Presidential Task Force identified the Corps Regulatory Program as one requiring review. On August 1, 1981, an interagency working group headed jointly by the Office of Management and budget and the Department of the Army began an intensive review of the sections 10 and 404 permit programs for the Presidential Task Force. On May 7, 1982, the Presidential Task Force completed its review of these programs and announced the initiation of administrative reforms. A synopsis of the administrative reforms follows:

Deciding most permit applications within 60 days; streamlining the existing agreements between the Corps and other Federal agencies to minimize the number of applications elevated for higher review and to allow differences of opinion on applications that raise major issues to be resolved within 90 days; and increasing the number and type of activities covered by general permits.

Strengthening the Federal-state partnership by speeding up each State's responses to Corps permit applications, issuing state program general permits in those cases where existing state or local regulatory programs generally accomplish the same results as the Corps' program, and deferring to states and local governments on those issues that are properly their concern.

Reducing conflicting and overlapping policies by recognizing documentation and decisions made by other agencies within their areas of responsibility, reducing complexity within our own regulations which may tend to impede the reform measures and, clarifying the scope of the section 404 permit program.

Implementation of Final Regulations

Final Regulations will be issued following receipt of comments on these proposed rules. Appropriate consideration will be given to comments received on both these proposed rules and the Interim Final Regulations, issued on 22 July 1982.

The Proposed Changes

Part 320—General Regulatory Policies

Section 320.4(a)(1): "Considerations of property ownership" would be explicitly expressed as a factor of the public interest. This has always been a basic tenet of Corps policy and has been implicit in previous regulations. The statement that "No permit will be granted unless its issuance is found to be in the public interest", would be changed to "A permit will be granted unless its issuance is found to be contrary to the public interest." The intent of this change is to recognize that within the context of the public interest review, an applicant's proposal is presumed to be acceptable unless demonstrated by the government not to be. However, particular note must be made of Section 404 permit applications and the evaluation under the 404(b)(1) guidelines, 40 CFR 230, which carries the statutory presumption that a discharge of dredged or fill material is environmentally harmful unless the applicant can demonstrate otherwise. Failure to rebut that 404(b)(1) presumption is cause for the district engineer to find that the proposal is contrary to the public interest. However, if that presumption is successfully rebutted, or if the activity does not involve Section 404 or Section 103 of the Ocean Dumping Act, it will be presumed to be in the public interest unless demonstrated to be otherwise, subparagraph (2)(iii) of 320.4(a) on the extent and permanence of beneficial or detrimental effects would also be changed to require a likelihood of occurrence rather than a speculative analysis.

Section 320.4(g): The policy statement currently titled, "Interference with adjacent properties or water resource projects, would be renamed, "Consideration of property ownership," and subparagraph (1) added to reinforce our policy on reasonable use of private property. If this new subparagraph is adopted, existing subparagraphs (1) through (4) would be renumbered (2) through (5), respectively.

Section 320.4(b)(5)(c), (m), (n) and (o): All references to "great weight" and other language that would prejudge the significance of a particular factor of the public interest in any given case would be deleted. Section 320.4(a)(1) discusses the general public interest balancing process which requires that all factors which may be relevant must be considered. The "weight" of each factor is determined by its importance and relevance to the particular proposal. Thus, a factor may be given great weight on one proposal while it may not be as important on another.

Section 320.4(j)(2): This section would be revised to emphasize that state and local government decisions on state and local matters will be supported unless there are specific issues of overriding national importance.

Section 320.4(p), (q), and (r): Policy statements would be added to recognize that environmental and economic benefits must be considered in a public interest balance when they are present; a statement expressing (for the first time) the Corps' mitigation policy would also be added.

Part 322—Structures and Work and

Part 323—Permits for Discharges of Dredged or Fill Material Into Waters of the United States

Sections 322.2(f)(2) and 323.2(n)(2): Both sections deal with the definition of general permits. A change is proposed to revise and clarify the definition to respond to concerns raised in comments on the interim final regulations published on July 22, 1982 (47 FR 31794). The change involves the requirements of Section 404(e) for general permit activities to be similar and have minimal individual and cumulative effects. Several questions were raised also about how the general permit would affect EPA's potential transfer of the Section 404 program to the states. At this point, it should be noted that both concerns, i.e., 404(e) compliance and state transfer, are derived from Clean Water Act requirements and, as such, do not affect the definition at Section 322.2(f) which is for Section 10 actions under the River and Harbor Act of 1899. However, we have decided for consistency and clarity in the program to use the same definition for both Section 10 and Section 404 authorities. As to compliance with Section 404(e), we intend that any general permit which is designed to avoid unnecessary duplication should be issued only in those instances where regulation by the Corps is duplicative of regulation by another agency and where reduction of intensity of Corps regulation from individual case review to general permit would result in essentially no difference in the ultimate decision on the project. Hence, the effect of removing the more intensive review by the Corps would result in only minimal impacts individually and cumulatively. Certain requirements would have to be met with respect to how the programs duplicate each other and any general permits issued would be subject to appropriate conditions, the discretionary authority to override the general permit and require individual review when necessary and also to the Corps' and EPA's enforcement authorities. Therein lies the response to the question of whether this would be a de facto transfer to the states. Federal jurisdiction would not be removed or turned over to the states or to other agency programs. The level of intensity of Corps regulation would be reduced in those situations adequately controlled by others, and the full level of intensity would be maintained where necessary. Full enforcement authority at the Federal level would be continued in all instances.

Section 323.2(a): In response to the many public concerns and the Presidential Task Force directives, we are proposing to clarify the scope of the Section 404 permit program. In approaching this task, we recognize the legal restraints against *changing* the scope of our jurisdiction and we therefore, restricted our consideration to alternative ways of *clarification* of the overall definition of "Waters of the United States." We looked particulatly at numerous ways to redefine/clarify the definition of "wetlands." One suggestion was to use the presence of water covering the wetland for a duration of 15% of the time. Another involved the use of the so-called multi-parameter approach which places emphasis on the presence of the three parameters of hydrology, vegetation, and soils. We concludedthat such added dimensions to the existing definition would not provide clarification in the sense that the Task Force intended. Our intense search for clarification, involving these and several other alternatives, has caused us to take another hard look at our current definition of Waters of the United States and to propose at this time that we clarify it simply by setting the definition apart in a separate and distinct Part 328 of the regulation and including in that part all of the definitions of terms related to the scope of the Section 404 permit program. Additionally, we have provided a new mechanism and a new subsection (328.7) within which we would place future clarification of the jurisdictional scope of the program for unusual areas such as the Arctic Tundra which don't fit neatly into a generic definition. We believe that this new Part 328 is a positive response to the Task Force mandate. Part 328 incoroprates the definitions previously found in 323.3(a) thru (d), (g), and (h). Those sections would be deleted if Part 328 promulgated. The current EPA Section 404(b)(1) guidelines contain a different definition of waters of the United States and of discharges of fill material. We have reached agreement with EPA that the definitions should be identical and will ensure that future regulations will be consistent.

Part 325—Permit Processing

Several minor changes would be made to address what and when additional information is requested of the applicant, to provide for a reasonable comment period, to allow combining permit documentation and to require documentation of overriding significant national issues. In addition to these changes, the following changes would be made to this Part:

Section 325.1f): No change to the fee structure itself is proposed, but we would eliminate the requirement that the applicant sign the permit before the district engineer does in order to reduce existing unnecessary delays.

Section 325.2(b)(1)(ii): This would provide that normally 30 days from the date of the public notice would be a reasonable time for the states to act on the Sectin 401 water quality certification. However, reasonable consideration would be given to time extensions on the individual case or class of activity at the request of the certifying agency.

Section 325.2(b)(2)(ii): This would provide for agreements between the Corps and state coastal zone agencies which would reduce delays caused by undertainties of the status of the Coastal Zone Management Certification at the end of the comment period.

Section 325.2(d)(4): This section which allows the district engineer to act prior to actions of other regulatory agencies would be revised to make the timing of the district engineer's decision consistent with other requirements of these regulations.

Sections 325.2(e)(1) and 325.5(b)(2): This would establish a procedure whereby minor Section 404 discharges could be authorized by a Letter of Permission (LOP) in the same manner as has existed for minor Section 10 activities. We would add another limitation on all LOP's requiring the activities to be of a nature that would qualify for a "categorical exclusion" under the NEPA regulations. This publication of proposed rules provides the notice and opportunity for hearing under Section 404(a)(1) for those section 404 actions meeting the LOP criteria.

VOL
48
ISS
93
MY
12
1983
UMI

Section 325.4: We are proposing to expand the authority to condition permits to provide for the first time, for either on-site or off-site mitigation under certain circumstances. We are also specifying in this Section that the district engineer would not require bonds that are duplicated by other agencies.

Section 325.9: This new section would clarify the district engineer's authority to determine the area defined by the term "navigable waters of the United States" and "waters of the United States". This authority would not include determinations of navigability pursuant to Part 329 which remain under the division engineer's authority, nor would it include Section 404 jurisdictional determinations made by the EPA under its authority. Division engineers will determine if the degradation of destruction of isolated waters would affect interstate commerce and thereby qualify as waters of the United States, based on a report of findings prepared by the district engineer.

Part 327—Public Hearing

Sections 327.4(b) and 327.11(a): These sections would be revised to allow the acknowledgement of form letters or petitions by a single letter to the person or organization responsible for initiating the from letter or petition.

Part 328—Definition of Waters of the United States

We propose to add this new part as discussed in Part 323.2 above.

Part 330—Nationwide Permits

Since a few states have indicated they may choose to deny Section 401 certification for some of the nationwide permits, we would add a condition to all of the nationwide permits requiring that if the state denies the 401 certification for the nationwide permit, an individual 401 state water quality certification or waiver must be obtained before the activity is authorized by the nationwide permit. We would also add a condition to the nationwide permits that requires compliance with regional conditions developed by the division engineer in accordance with § 330.7 and one that requires a coastal zone management consistency certification if a state does not concur with the Corps' finding that the nationwide permit is consistent with the approved state coastal zone program and desires to make individual consistency determinations. District engineers would be required to keep the public informed of those states which have denied water quality certification and/or coastal zone consistency and where additional regional conditions are applied.

Section 330.2(c): A definition of natural lakes larger than 10 acres would be added because of the change proposed in § 330.4 below.

Sections 330.4(a) (1) and (2): Since we published the Interim Final Rules on July 22, 1982, there have been concerns raised regarding the inclusion of natural lakes larger than 10 acres within the nationwide permits for certain waters. In response to that concern, we are considering reinstating the 10-acre lake limit for areas covered by these nationwide permits. In other words, 404 discharge activities in lakes less than 10 acres would, under this proposal, continue to be permitted (subject to certain conditions), but 404 discharges in lakes larger than 10 acres would not be covered by these nationwide permits.

Sections 330.5(a) (26) and (27): We are proposing two new nationwide permits, (26) to reduce unnecessary duplication with other Federal agencies and (27) to reduce duplication within the Corps of Engineers for non-Corps activities when those activities have been considered during the project planning and must be constructed in order to provide the public benefits for which the project has been justified. The proposed permits are similar in that during the planning, review and authorization for other Federal Activities and for Corps projects, all Federal statutes apply. NEPA documentation is developed, Fish and Wildlife Coordination Act requirements are met, and endangered species, wild and scenic rivers, cultural resources and other matters of national interest are addressed. These permits would eliminate that review taking place a second time. We would, however, require a specific review under Section 404(b)(1) guidelines for each case as that review is not necessarily provided for under other agency programs or for the non-Federal development adjacent to Corps projects.

Section 330.7(a): This new sub-section would provide division engineers with discretionary authority to add individual conditions to nationwide permits on a case-by-case basis when there is mutual agreement between the permittee and the division engineer or when determined necessary based on conditions of a state's 401 certification.

Section 330.9—This new section would provide a procedure to handle state water quality certification of activities covered by a nationwide permit if a state initially denies the water quality certification for the nationwide permit but later certifies it for specific individual cases or classes of activities. If this section is adopted, we would delete footnotes 1 and 7 in the July 22, 1982, regulation and renumber the remaining footnotes.

Section 330.10: This new section provides clarification that in order to activate the nationwide permit, in some states, the applicant must provide the district engineer with a coastal zone management consistency certification, and the state must concur with the certification.

Public Comments

We welcome public comment on the two new nationwide permits, the reinstatement of the 10-acre lake limitation on the nationwide permits at Section 330.4, and proposed modifications to all of the nationwide permits. However, it is not necessary to repeat any comments that were submitted in response to the July 22, 1982, interim final regulations as they will be considered prior to publication of final regulations. Public comment will help us decide whether to issue the two nationwide permits and to modify or revoke any of the existing nationwide permits.

401 Certification of the Nationwide Permits

Prior to publication on July 22, 1982, of the Corps' interim final regulations on the permit program, only the State of Wisconsin had denied Section 401 certification of some of the nationwide permits involving discharges. All other states waived certification. In response to the July 22, 1982 interim final regulations, several states which had waived certification indicated that they may now wish to deny 401 certification for some of the nationwide permits. Although we continue to believe that most states will confirm waiver of 401 certification or will provide new certification, we are allowing all states to reconsider 401 certification of the nationwide permits. Only those 401 certifications denied or issued before publication of the final regulations will be accepted. Upon publication of the final regulations, all other certifications will be considered to be waived.

Coastal Zone Management

Several states have indicated in response to the July 22, 1982, publication that some or all of the nationwide permits are inconsistent with or require an individual determination to verify consistency with their state-approved coastal zone management programs. While all states had waived consistency certification in connection with those July regulations and we continue to believe that the nationwide permits appropriately administered are consistent with CZM plans, we are allowing all states to reevaluate their consistency determinations and to advise us of their conclusions prior to publication of the final regulations in mid 1983. Consistency will be presumed for all states which do no indicate to the contrary.

Assessment of Cumulative Impacts (Reporting)

Concerns have been raised that the nationwide permit system lacks adequate monitoring capability, particularly with regard to cumulative impacts. In publishing the interim final regulations on July 22, 1982, we decided not to impose a case-by-case reporting requirement as some people had suggested because we believe that in most locations, there are other, more efficient and effective means of tracking any potential cumulative impacts. That does not preclude division engineers from including case-by-case reporting as a regional condition of any of the nationwide permits where it is found to be necessary and appropriate. Nevertheless, we solicit further views on the need for a reporting requirement, whether there is a threshold size of fill below which reporting would not be necessary, and whether other management mechanisms such as statistical surveys, periodic reports from state or local agencies with similar programs, or other measures may provide more appropriate controls.

Public Hearing Requests

Any person may request a public hearing on the two proposed nationwide permits, proposed modifications to the existing nationwide permits, or the proposal to allow letters of permission to be issued for minor 404 activities. If the Corps determines that a public hearing or hearings would assist in making a decision on either of the nationwide permits, proposed modifications to the existing nationwide permits, or the 404 letter of permission proposal, a 30 day advance notice will be published in the **Federal Register** advising interested parties of the date(s) and location(s) for the hearing(s).

Nationwide Permits Documentation

The Corps will prepare findings of fact and environmental documentation before issuing either of the nationwide permits. The documentation will include that required by the EPA guidelines adopted under Section 404(b)(1) of the CWA. The Corps will issue these permits only if they are found to be in the public interest and in compliance with the 404(b)(1) guidelines.

Note 1.—The Department of the Army has determined that the proposed regulation revisions do not contain a major proposal requiring the preparation of a regulatory analysis under E.O. 12291.

Note 2.—The term "he" and its derivatives used in these regulations is generic and should be considered as applying to both male and female.

Dated: May 6, 1983.

Approved:

Robert K. Dawson,

Deputy, Assistant Secretary of the Army (Civil Works).

Accordingly, the Department of the Army proposes to amend 33 CFR Parts 320, 322, 323, 325, 327, 330 and add Part 328 as set forth below:

Authority: 33 U.S.C. 401 et seq., 33 U.S.C. 1344, 33 U.S.C. 1413.

PART 320—GENERAL REGULATORY POLICIES

1. Section 320.4 is amended by revising paragraphs (a)(1), (a)(2)(iii), (b)(5), (c), the title and introductory text of (g), (g)(1), (j)(2), (m), (n), and (o)(3) and by adding paragraphs (p), (q), and (r) to read as follows:

§ 320.4 General policies for evaluating permit applications.

* * * * *

(a) *Public interest review.* (1) The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity and its intended use on the public interest. Evaluation of the probable impact which the proposed activity may have on the public interest requires a careful weighing of all those factors which become relevant in each particular case. The benefits which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. The decision whether to authorize a proposal, and if so, the conditions under which it will be allowed to occur, are therefore determined by the outcome of the general balancing process. That decision should reflect the national concern for both protection and utilization of important resources. All factors which may be relevant to the proposal must be considered including the cumulative effects thereof: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership, and, in general, the needs and welfare of the people. A permit will be granted unless its issuance is found to be contrary to the public interest.

(2) * * *

(iii) The extent and permanence of beneficial and/or detrimental effects which the proposed structure or work is likely to have on the public and private uses to which the area is suited.

(b) *Effect on wetlands.* * * *

(5) In addition to the policies expressed in this subpart, the Congressional policy expressed in the Estuary Protection Act, Pub. L. 90–454, and state regulatory laws or programs for classification and protection of wetlands will be considered.

(c) *Fish and wildlife.* In accordance with the Fish and Wildlife Coordination Act (§ 320.3(e) of this section) Corps of Engineers officials will consult with the Regional Director, U.S. Fish and Wildlife Service, the Regional Director, National Marine Fisheries Service, and the head of the agency responsible for fish and wildlife for the state in which is to be performed, with a view to the conservation of wildlife resources by prevention of their direct and indirect loss and damage due to the activity proposed in a permit application.

* * * * * * *

VOL 48 ISS 93 MY 12 1983 UMI

(g) *Consideration of property ownership.* Authorization of work or structures by the Department of the Army does not convey a property right, nor authorize any injury to property or invasion of other rights.

(1) An inherent aspect of property ownership is a right to reasonable private use and development. This principle will be recognized as a factor in the public interest review process.

* * * * *

(j) *Other Federal, state, or local requirements.* * * *

(2) The primary responsibility for determining local matters such as zoning and land use reats with state, local, and tribal governments. The district engineer will normally accept decisions by such governments on those matters unless there are significant issues of overriding national importance. Such issues would include but are not necessarily limited to national security, navigation, national economic development, water quality, and national energy needs. Whether a factor has overriding importance will depend on the degree of impact in an individual case.

* * * * *

(m) *Water supply and conservation.* Water is an essential resource, basic to human survival, economic growth, and the natural environment. Water conservation requires the efficient use of water resources in all actions which involve the significant use of water or that significantly affect the availability of water for alternative uses, including opportunities to reduce demand and improve efficiency in order to minimize new supply requirements. Action affecting water quantities are subject to Congressional policy stated in Section 101(g) of the Clean Water Act that the authority of states to allocate water quantities shall not be superseded, abrogated, or otherwise impaired.

(n) *Energy conservation and development.* Energy conservation and development are major national objectives. District engineers will give high priority to permit actions involving energy projects.

(o) *Navigation.* * * *

(3) Protection of navigation in all navigable waters of the United States continues to be a primary concern of the Federal government.

* * * * *

(p) *Environmental benefits.* Some activities that require Department of the Army permits result in beneficial effects to the quality of the enviornment. The district engineer will weigh these benefits as well as environmental detriments along with other factors of the public interest.

(q) *Economics.* When private enterprise makes application for a permit, it will generally be assumed that appropriate economic evaluations have been completed and, therefore, the proposal is economically viable and there is a need for it in the marketplace. The economic benefits of many projects are important to the local community and contribute to needed improvements in the local economic base, affecting such factors as employment, tax revenues, community cohesion, community services, and property values. Many projects also contribute to the National Economic Development (NED) which are increases in the net value of the national output of goods and sevices.

(r) *Mitigation.* (1) Inherent in the Corps' decisionmaking process is the requirement to consider measures to mitigate adverse impacts of a proposed activity. When reviewing permit applications district engineers will consider practicable mitigation measures that are not inconsistent with the accomplishment of the applicant's basic purpose.

(2) Mitigation measures identified by the district engineer will be considered as part of the public interest balancing process. District engineers are authorized to condition permits for appropriate mitigation in accordance with 33 CFR Part 325.4. If mitigation is found to be necessary in order for a proposal to be in the public interest but cannot be accomplished either through another program outside the scope of the Corps' regulatory program or cannot be required under 33 CFR Part 325.4, then the permit should be denied.

PART 322—PERMITS FOR STRUCTURES OR WORK IN OR AFFECTING NAVIGABLE WATERS OF THE UNITED STATES

2. Section 322.2 is amended by revising paragraph (f) (2) to read:

§ 322.2 Definitions.

* * * * *

(f) * * *

(2) The general permit would promote government efficiency by reducing duplication of effort with other local, state, and Federal programs where the following comparisons are shown between the Corps regulatory program and the other agency program:

(i) The environmental effects of the difference between the Corps decision and the other agency decision are likely to be individually and cumulatively minimal.

(ii) The programs are similar in the following respects:

(A) Scope of jurisdiction.

(B) Types of activities involved.

(C) Standards of review.

(D) Enforcement capability.

(E) Public involvement.

(iii) Such permits may also be issued for other agency programs which have some dissimilarities where reasonable and manageable conditions can be developed to insure that the substantive requirements of paragraph (f)(2) (i) and (ii) of this section are met.

* * * * *

PART 323—PERMITS FOR DISCHARGES OF DREDGED OR FILL MATERIAL INTO WATERS OF THE UNITED STATES

3. Section 323.2 is amended by revising pragraphs (a) and (n)(2) to read:

§ 323.2 Definitions.

* * * * *

(a) The term "waters of the United States" [1] means:

(1) The Territorial Seas;

(2) All waters that are part of a surface tributary system to and including navigable waters of the United States; and

(3) Isolated waters and their tributaries, the degradation or destruction of which could affect interstate or foreign commerce.

See 33 CFR Part 328 for a more complete definition of this term.

(n) * * *

(2) The general permit would promote government efficiency by reducing duplication of effort with other local, state, and Federal programs where the following comparisons are shown between the Corps regulatory program and the other agency program:

(i) The environmental effects of the differences between the Corps decision and the other agency decision are likely to be individually and cumulatively minimal.

(ii) The programs are similar in the following respects:

(A) Scope of jurisdiction.

(B) Types of activities involved.

(C) Standards of review.

(D) Enforcement capability.

(E) Public involvement.

(iii) Such permits may also be issued for other agency programs which have some dissimilarities where reasonable and manageable conditions can be developed to insure that the substantive

[1] The terminology used by the CWA is "navigable waters" which is defined in Section 502(7) of the Act as "waters of the United States including the territorial seas." For purposes of clarity, and to avoid confusion with other Corps of Engineers regulatory programs, the term "waters of the United States" is used throughout this regulation.

requirements of paragraph (n)(2) (i) and (ii) of this section are met.

* * * * *

PART 325—PROCESSING OF DEPARTMENT OF THE ARMY PERMITS

4. Section 325.1 is amended by revising paragraphs (d)(1), (e), and (f) to read:

§ 325.1 Application for permits.

* * * * *

(d) *Content of application.* (1) Generally, the application must include a complete description of the proposed activity including necessary drawings, sketches or plans sufficient for public notice (the applicant is not expected to submit detailed engineering plans and specifications); the location, purpose and intended use of the proposed activity; scheduling of the activity; the names and addresses of adjoining property owners; the location and dimensions of adjacent structures; and a list of authorizations required by other Federal, interstate, state or local agencies for the work, including all approvals received or denials already made. See also § 325.3 for information required to be in public notices. District and division engineers are not authorized to develop additional information forms but may request specific information on a case-by-case basis (See § 325.1(e)).

* * * * *

(e) *Additional information.* In addition to the information indicated in paragraph (d), of this section, the applicant will be required to furnish only such additional information as the district engineer deems essential to make a public interest determination. Such additional information may include environmental data and information on alternate methods and sites as may be necesary for the preparation of the required environmental documentation.

(f) *Fees.* Fees are required for permits under Section 404 of the Clean Water Act, Section 103 of the Marine Protection, Research and Sanctuaries Act of 1972, as amended, and Sections 9 and 10 of the River and Harbor Act of 1899. A fee of $100.00 will be charged when the planned or ultimate purpose of the project is commercial or industrial in nature and is in support of operations that charge for the production, distribution or sale of goods or services. A $10.00 fee will be charge for permit applications when the proposed work is non-commercial in nature and would provide personal benefits that have no connection with a commercial enterprise. The final decision as to the basis for a fee (commercial vs. non-commercial) shall be solely the responsibility of the district engineer. No fee will be charged if the applicant withdraws the application at any time prior to issuance of the permit or if the permit is denied. Collection of the fee will be deferred until the proposed activity has been determined to be in the public interest. Multiple fees are not to be charged if more than one law is applicable. Any modification significant enough to require publication of a public notice will also require a fee. No fee will be assessed when a permit is transferred from one property owner to another. No fees will be charged for time extensions, general permits or letter of permission. Agencies on instrumentalities of Federal, state, or local governments will not be required to pay any fee in connection with permits.

5. Section 325.2 is amended by revising paragraph (a)(3), (a)(6), (b)(1)(ii), (b)(2)(ii), (d)(2)—(d)(5), and (e)(1) to read:

§ 325.2 Processing of applications.

(a) *Standard procedures.* * * *

(3) The district engineer will consider all comments received in response to the public notice in his subsequent actions on the permit application. Receipt of the comments will be acknowledged, and they will be made a part of the administrative record of the application. Comments received as form letters or petitions may be acknowledged as a group to the person or organization responsible for the form letter or petition. If comments relate to matters within the special expertise of another Federal agency, the district engineer may seek the advice of that agency. All substantive comments must be furnished the applicant for his information and any resolution or rebuttal he may propose. The applicant may voluntarily elect to contact objectors in an attempt to resolve objections but will not be required to do so. The district engineer will not delay processing of the application unless the applicant requests a reasonable delay, not to exceed 30 days, to provide additional information or comments. If the district engineer determines, based on comments received, that he must have the views of the applicant to make a public interest determination, the applicant will be given the opportunity to furnish his views to the district engineer (see § 325.2(d)(3)).

* * * * *

(6) After all above actions have been completed, the district engineer will determine, in accordance with the record and applicable regulations, whether or not the permit should be issued. He shall prepare a statement of findings (SOF) or, where an EIS has been prepared, a record of decision (ROD), on all permit decisions. The SOF or ROD shall include the district engineer's views on the probable effect of the proposed work on the public interest including conformity with the guidelines published for the discharge of dredged or fill material in waters of the United States (40 CFR Part 230) or with the criteria for dumping of dredged material in ocean waters (40 CFR Parts 220 to 229), if applicable, and the conclusions of the district engineer. The SOF or ROD shall be dated, signed, and included in the record prior to final action n the application. Where the district engineer has delegated authority to sign permits for and in his behalf, he may similarly delegate the signing of the SOF or ROD. If a district engineer makes a decision on a permit aplication which is contrary to state or local decisions (33 CFR Part 320.4(j)(2)), the district engineer will document in the SOF or ROD the significant national issues and explain how they are overriding in importance. If a permit is warranted, the district engineer will determine the special conditions, if any, and duration which should be incorporated into the permit. In accordance with the authorities specified in § 325.8 of this Part, the district engineer will take final action or forward the application with all pertinent comments, records, and studies, including the final EIS or environmental assessment, through channels to the official authorized to make the final decision. The report forwarding the application for decision will be in the format prescribed by the Chief of Engineers. District and division engineers will notify the applicant and interested Federal and state agencies that the application has been forwarded to higher headquarters. The district or division engineer may, at his option, disclose his recommendation to the news media and other interested parties, with the caution that it is only a recommendation and not a final decision. Such disclosure is encouraged in permit cases which have become controversial and have been the subject of stories in the media or have generated strong public interest. In those cases where the application is forwarded for decision in the format prescribed by the Chief of Engineers, the report will serve as the SOF or ROD. District engineers may, and are encouraged to, combine the SOF, environmental assessment, and findings of no significant impact (FONSI), 404(b)(1) guideline analysis,

VOL 48 ISS 93 MAY 12 1983

and/or the criteria for dumping of dredged material in ocean waters into one or more documents.

(b) *Procedures for particular types of permit situations.*

(1) * * *

(ii) No permit will be granted until required certification has been obtained or has been waived. Waiver may be explicit, or will be deemed to occur if the certifying agency fails or refuses to act on a request for certification within thirty days after receipt of such a request unless the district engineer determines a shorter or longer period is reasonable for the state to act. In determining whether or not a waiver period has commenced or waiver has occurred, the district engineer will verify that the certifying agency has received a valid request for certification. If, however, special circumstances identified by the district engineer require that action on an application be taken within a more limited period of time, the district engineer shall determine a reasonable lesser period of time, advise the certifying agency of the need for action by a particular date and that, if certification is not received by that date, it will be considered that the requirement or certification has been waived. Similarly, if it appears that circumstances may reasonably require a period of time longer than thirty days, the district engineer, based on information provided by the certifying agency, will determine a longer reasonable period of time, not to exceed one year, at which time a waiver will be deemed to occur.

(2) * * *

(ii) If the applicant is not a Federal agency and the application involves an activity affecting the coastal zone, the district engineer shall obtain from the applicant a certification that his proposed activity complies with and will be conducted in a manner that is consistent with the approved state coastal zone management program. Upon receipt of the certification, the district engineer will forward a copy of the public notice (which will include the applicant's certification statement) to the state coastal zone agency and request its concurrence or objection. If the state agency objects to the certification or issues a decision indicating that the proposed activity requires further review, the district engineer shall not issue the permit until the state concurs with the certification statement or the Secretary of Commerce determines that the proposed activity is consistent with the purposes of the Coastal Zone Management Act or is necessary in the interest of national security. If the state agency fails to concur or object to a certification statement within six months of the state agency's receipt of the certification statement, state agency concurrence with the certification statement shall be conclusively presumed. District engineers will seek agreements with state CZM agencies that no comment by the agency during the public notice comment period will be considered as a concurrence with the certification.

* * * * *

(d) *Timing of processing of applications.* * * *

(2) The comment period on the public notice should be for a reasonable period of time within which interested parties may express their views concerning the permit. The comment period should not be more than 30 days nor less than 15 days from the date of the notice. The comment period will vary depending on the routine or non-controversial nature of the proposed activity, communication opportunities, and the district engineer's experience. However, if circumstances warrant, the district engineer may extend the comment period up to an additional 30 days. When a district engineer anticipates that a comment period less than 30 days will not aid in a processing time of less than the normal 60 days because of constraints beyond his control (see § 325.2(d)(3) below), he will normally provide a 30-day comment period.

(3) District engineers will decide on all applications not later than 60 days after receipt of a complete application unless: (i) Precluded as a matter of law or procedures required by law (see below), (ii) the case must be referred to higher authority (see § 325.8 of this Part), (iii) the comment period is extended, (iv) a timely submittal of information or comments is not received from the applicant, (v) the processing is suspended at the request of the applicant, or (vi) information needed by the district engineer for a decision on the application cannot reasonably be obtained within the 60-day period. Once the cause for preventing the decision from being made within the normal 60-day period has been satisfied or eliminated, the 60-day clock will start running again from where it was suspended. For example, if the comment period is extended by 30 days, the district engineer will, absent other restraints, decide on the application within 90 days of receipt of a complete application. Certain laws (e.g., the Clean Water Act, the Coastal Zone Management Act, the National Environmental Policy Act, the National Historic Preservation Act, the Preservation of Historical and Archeological Data Act, the Endangered Species Act, the Wild and Scenic Rivers Act, and the Marine Protection, Research and Sanctuaries Act) require procedures such as state or other Federal agency certifications, public hearings, environmental impact statements, consultation, special studies and testing which may prevent district engineers from being able to decide certain applications within 60 days.

(4) Once the district engineer has sufficient information to make his public interest determination, he should decide the permit application even though other agencies which may have regulatory jurisdiction have not yet granted their authorizations except where such authorizations are, by Federal Law, a prerequisite to making a decision on the Army permit application. Permits granted prior to other (non-prerequisite) authorizations by other agencies should, where appropriate, be conditioned in such manner as to give those other authorities an opportunity to undertake their review without the applicant biasing such review by making substantial resource commitments on the basis of the Army permit. In unusual cases, the district engineer may decide that due to the nature or scope of a specific proposal, it would be prudent to defer taking final action until another agency has acted on its authorization. In such cases, he may advise the other agency of his position on the Army permit while deferring his final decision.

(5) The applicant will be given a reasonable time, not to exceed 30 days, to repond to requests of the district engineer. The district engineer may make such requests by certified letter and clearly inform the applicant that if he does not respond with the requested information or a justification why additional time is necessary, then his application will be considered withdrawn or a final decision will be made whichever is appropriate. If additional time is requested, the district engineer will either grant the time, make a final decision, or consider the application as withdrawn.

(e) *Alternative procedures.* Division and district engineers are authorized to use alternative procedures as follows:

(1) *Letters of permission.* In those cases subject to Section 10 of the River and Harbor Act of 1899 and Section 404 of the Clean Water Act in which, in the opinion of the district engineer, the proposed work would be minor, would not have significant individual or cumulative impact on environmental values, should encounter no appreciable opposition, and would qualify as a "categorical exculusion" (see 33 CFR 230, Appendix B), the district engineer may omit the publishing of a public notice and authorize the work by a letter of permission. However, he will coordinate the proposal with all concerned fish and wildlife agencies, Federal and state, as required by the Fish and Wildlife Coordination Act. The letter of permission will not be used to authorize the transportation of dredged material for purposes of dumping it in ocean waters. The letter of permission form is specified in § 325.5 of this part.

* * * * *

6. Section 325.3 is amended by revising paragraph (a)(14) to read:

§325.3 Public Notice.

(a) *General.* * * *

(14) The comment period based on § 325.2(d)(2).

* * * * *

7. Section 325.4 is revised to read:

§ 325.4 Conditioning of permits.

(a) District engineers are authorized to add special conditions to permits when those conditions meet all of the following requirements:

(1) Are necessary to satisfy a legal requirement, necessary to protect the public interest, or practicable and justifiable to avoid or mitigate other than minor adverse effects on fish and wildlife resources which occur within waters of the United States;

(2) Are directly related to the impacts of the proposal and are appropriate to the scope and degree of the impacts of concern;

(3) (i) Can be accomplished on site or;

(ii) May be accomplished off-site for mitigation of significant losses which are specifically identifiable, reasonably certain to occur, and of importance to the human environment;

(4) Do not duplicate local, state, or Federal programs or authorities which are established to achieve the objective of the desired condition;

(5) Are reasonably enforceable; and

(6) An agreement, enforceable at law, between the applicant and the party (ies) concerned with the resource use is not practicable.

(b) District engineers may add conditions, exclusive of paragraph (a) of this section, at the applicant's requests or to clarify the applicant's proposal.

(c) *Bonds.* If the district engineer has reason to consider that the permittee might be prevented from completing work which is necessary to protect the public interest, he may require the permittee to post a bond of sufficient amount to indemnify the government aganist any loss as a result of corrective action it might take. District engineers will not require bonds which duplicate local, state, or other Federal bonds.

8. Section 325.5 is amended by revising paragraph (b)(2) to reed:

§ 325.5 Forms of permits.

* * * * *

(b) * * *

(2) *Letters of permission.* A letter of permission will be issued where procedures of § 325.2(e)(1) have been followed. It will be in letter form and will identify the permittee, the authorized work and location of the work, the statutory authority, any limitations on the work, a construction time limit and a requirement for a report of completed work. A copy of the general conditions form, ENG Form 1721, will be attached and will be incorporated by reference into the letter of permission. For Section 404 activities, the letter of permission will, in appropriate cases, include a special condition indicating that the letter of permission will be effective when issuance or waiver of 401 certification has occurred. District engineers will seek from the states, where appropriate, generic issuance of waiver of 401 certification for classes of activities and/or waterbodies which may be subject to letter of permission procedures.

* * * * *

9. Section 325.9 is added to read:

§ 325.9 Authority to determine jurisdiction.

District engineers are authorized to determine the area defined by the terms "navigable waters of the United States" and "waters of the United States" except:

(a) When a determination of navigability is made pursuant to 33 CFR Part 329.14 (division engineers have this authority);

(b) When EPA makes a Section 404 jurisdiction determination under its authority; or

(c) When a determination must be made that an isolated waterbody is a water of the United States. Division engineers will determine if the degradation or destruction of such waters would affect interstate commerce based on a report of findings prepared by the district engineer.

PART 327—PUBLIC HEARINGS

10. Section 327.4 is amended by revising paragraph (b) to read:

§ 327.4 General policies.

* * * * *

(b) Unless the public notice specifies that a public hearing will be held, any person may request, in writing, within the comment period specified in the public notice on a Department of the Army permit application or on a Federal project, that a public hearing be held to consider the material matters in issue in the permit application or Federal Project. Upon receipt of any such request, stating with particularity the reasons for holding a public hearing, the district engineer may expeditiously attempt to resolve the issues informally. Otherwise, he shall promptly set a time and place for the public hearing, and give due notice thereof, as prescribed in § 327.11 of this Part below. Requests for a public hearing under this paragraph shall be granted unless the district engineer determines that the issues raised are insubstantial or there is otherwise no valid interest to be served by a hearing. The district engineer will make such a determination in writing and communicate his reasons therefor to all requesting parties. Comments received as form letters or petitions may be acknowledged as a group to the person or organization responsible for the form letter or petition.

* * * * *

11. Section 327.11 is amended by revising paragraph (a) to read:

§ 327.11 Public notice.

(a) Public notice shall be given of any public hearing to be held pursuant to this regulation. Such notice should normally provide for a periodd of not less than 30 days following the date of public notice during which time interested parties may prepare themselves for the hearing. Notice shall also be given to all Federal agencies affected by the proposed action and to state and local agencies and other parties having an interest in the subject matter of the hearing. Notice shall be sent to all persons requesting a hearing and shall be posted in appropriate government buildings and published in newspapers of general circulation. Comments received as form letters or petitions may be acknowledged as a group to the person or organization responsible for the form letter or petition.

* * * * *

12. Part 328 is added to read:

PART 328—DEFINITION OF WATERS OF THE UNITED STATES

Sec.

328.1 Purpose.
328.2 General definition.
328.3 Definitions.
328.4 Territorial seas.
328.5 Navigable waters of the United States and their surface tributaries.
328.6 Isolated waters.

1983 UMI

VOL 48 ISS 93 MY 12 1983 UMI

Sec.
328.7 Supplemental clarifications.

Authority: 33 U.S.C. 1344.

§ 328.1 Purpose.

The terminology used by Section 404 of the Clean Water Act is "navigable waters" which is defined in Section 502(7) of the Act as "waters of the United States including the territorial seas." For purposes of clarity and to avoid confusion with other Corps of Engineers regulatory programs, the term "waters of the United States" is used throughout 33 CFR Parts 320–330. This regulation defines the term "waters of the United States" as it is used to define authorities of the Corps of Engineers under the Clean Water Act. It also prescribes the policy, practice, and procedures to be used in determining the extent of the jurisdiction of the Corps of Engineers and in answering inquiries concerning "waters of the United States." This definition does not apply to authorities under the River and Harbor Act of 1899 (see CFR Parts 322 and 329).

§ 328.2 General definition.

(a) Waters of the United States are:

(1) The Territorial Seas;

(2) All waters that are part of a surface tributary system to and including navigable waters of the United States; and

(3) Isolated waters and their tributaries, the degradation or destruction of which could affect interstate or foreign commerce.

(b) Waters of the United States do not include the following man-made waters:

(1) Non-tidal drainage and irrigation ditches excavated on dry land.

(2) Irrigated areas which would revert to upland if the irrigation ceased.

(3) Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of the Clean Water Act (other than cooling ponds as defined in 40 CFR 123.11(m)).

(4) Artificial lakes or ponds created by excavation and/or diking dry land to collect and retain water for such purposes as stock watering, irrigation, settling basins, cooling, or rice growing.

(c) *Natural changes in lateral limits of Waters of the United States.* Permanent changes of the shoreline configuration result in similar alterations of the boundaries of the waters of the United States. Thus, gradual changes which are due to natural causes and are perceptible only over some period of time constitute changes in the bed of a waterbody which also change the boundaries of the waters of the United States. For example, changing sea levels or subsidance of land may cause some areas to become waters of the United States while siltation or a change in drainage may remove an area from waters of the United States.

§ 328.3 Definitions.

For the purpose of this regulation, the following terms are defined:

(a) The term "navigable waters of the United States" mean those waters that are subject to the ebb and flow of the tide shoreward to the mean high water mark and/or are presently used, or have been used in the past, or may be susceptible to use to transport interstate or foreign commerce. (See 33 CFR Part 329 for a more complete definition of this term.)

(b) The term "adjacent" means bordering, contiguous, or immediately neighboring and having a resonably perceptable surface or subsurface hyrodologic connection to a water of the United States.

(c) The term "ordinary high water mark" means the line on the shore established by the fluctuations of water and indicated by physical characteristics such as a clear, natural line impressed on the the bank; shelving; changes in the character of soil; destruction of terrestrial vegetation; the presence of liter and debris; or other appropriate means that consider the characteristics of the surrounding areas.

(d) The term "high tide line" means the line of intersection of the land with the water's surface at the maximum height reached by a rising tide.

(e) The term "wetlands" means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas.

(f) The term "inundation" means a condition in which water temporarily or permanently covers a land surface.

(g) The term "saturated" means a condition in which all voids (pores) between soil particles are temporarily or permanently filled with water to the soil surface.

(h) The term "prevalence of vegetation" means those rooted emergent plants that comprise at least 50% of the dominant species within a plan community.

(i) The term "typically adapted" means normally or commonly suited to a given set of environmental conditions.

§ 328.4 Territorial seas.

Territorial seas for the purposes of the Clean Water Act are measured from the line of ordinary low water along that portion of the coast which is in direct contact with the open sea and the line marking the seaward limit of inland waters extending seaward a distance of three nautical miles.

§ 328.5 Navigable waters of the United States and their surface tributaries.

(a) Tidal Waters of the United States include all waters subject to the ebb and flow of the tide landward to the high tide line and seaward to the outer limit of the territorial seas. (Non-tidal coastal wetlands are included in paragraph (b) of this section. The lateral limits of jurisdiction in tidal waters extends to the high tide line which may be determined, in the absence of actual data, by a line of oil or scum along shore objects, a more or less continuous deposit of fine shell or debris on the foreshore or berm, other physical markings or characteristics, vegetation lines, tidal gages, or other suitable means that delineate the general height reached by a rising tide. The line encompasses spring high tides and other high tides that occur with periodic frequency but does not include storm surges in which there is a departure from the normal or predicted reach of the tide due to the piling up of water against a coast by strong winds such as those accompanying a hurricane or other intense storm.

(b) Non-tidal Waters of the United States includes all non-tidal navigable waters of the United States as defined in 33 CFR Part 329, all surface tributaries to those wates, and tributaries to tidal wates. (This includes non-tidal coastal wetlands.) The lateral limits of jurisdiciton:

(1) In the absence of adjacent wetlands, the jurisdiction extends to the ordinary high water mark, or

(2) When adjacent wetlands are present, the jurisdiction includes those wetlands.

§ 328.6 Isolated waters.

Isolated waters includes waters such as lakes, rivers, streams (including intermittent streams) mudflats, sandflats, lakes, or natural ponds that are not part of a surface tributary system to or themselves determined to be navigable waters of the United States where the use, degradation or destruction of the waterbody could affect interstate or foreign commerce.

(a) This definition includes any such waters:

(1) Which are interstate waters including interstate wetlands; or

(2) Which are used by interstate of foreign travelers for recreational or other purposes; or

(3) From which fish or shellfish are taken and sold in interstate or foreign commerce; or

(4) Which are used for industrial purposes by industries in interstate commerce.

(b) *Lateral limits of jurisdiction.* (1) In the absence of adjacent wetlands, the jurisdiction extends to the ordinary high water mark.

(2) In the case of wetlands themselves or wetlands adjacent to other isolated waters, the jurisdiction includes those wetlands.

§ 328.7 Supplemental clarifications.

The District Engineer may recommend to the Chief of Engineers that certain unique areas be more fully described in the Federal Regulations. Such descriptions would be published in the **Federal Register** for comment and, if appropriate, added as subsections to this section.

PART 330—NATIONWIDE PERMITS

13. Section 330.2 is amended by adding paragraph (c) to read:

§ 330.2 Definitions.

* * * * *

(c) Natural lakes larger than 10 acres means those naturally occurring waterbodies with a minimum of 5 acres of open water which including contiguous wetlands comprise a minimum of 10 acres.

14. Section 330.4 is amended by revising paragraphs (a) (1) and (2) and by adding paragraphs (b) (7)–(9) and (c) to read:

§ 330.4 Nationwide permits for discharges into certain waters.

(a) *Authorized discharges.* * * *

(1) Non-tidal rivers, streams and their impoundments including adjacent wetlands, but excluding natural lakes larger than 10 acres that are located above the headwaters.

(2) Other non-tidal waters of the United States that are not part of a surface tributary system to interstate waters or to navigable waters of the United States excluding natural lakes greater than 10 acres in surface area.

(b) *Conditions.* * * *

(7) In certain instances, an individual state water quality certification must be obtained or waived (See 330.9).

(8) Compliance with regional conditions which may have been added by division engineers (See Section 330.7(a)).

(9) In certain instances, an individual state coastal zone management consistency certification must be concurred in by a state (See Section 330.10).

(c) Natural lakes larger than 10 acres are not included in the nationwide permits identified in paragraph (a) of this seciton. Discharges of dredged or fill material into such lakes must be authorized by individual or regional permits unless covered by one or more of the nationwide permits listed in § 330.5 or exemption under 33 CFR Part 323.4.

15. Section 330.5. is amended by adding paragraphs (a)(26), (a)(27), and (b) (10)–(12) to read:

§ 330.5. Nationwide permits for specific activities.

(a) *Authorized activities.* * * *

(26) Structures, work, and discharges of dredged or fill material associated with projects undertaken, funded or authorized by another Federal agency or department where that agency or department determines that the structure, work, or discharge will not cause significant degradation of the waters of the United States through application of the 404(b)(1) guidelines, the appropriate district engineer has been furnished a copy of the agency's determination of no significant degradation, and the district engineer has made a determination that the proposal conforms to 404(b)(1) guidelines. (Sections 10 and 404)

(27) Structures, work, and discharges for facilities adjacent to Corps of Engineers civil works projects where justification for the Federal expenditure was based on construction of specific adjacent facilities, those facilities are constructed within a reasonable time of completion of the Federal project, and the district engineer conducts a case-by-case Section 404 (b)(1) guidelines analysis. (Sections 10 and 404.)

(b) *Conditions.* * * * * *

(10) In certain instances, an individual state water quality certification must be obtained or waived. (See § 330.9)

(11) Compliance with regional conditions which may have been added by division engineer. (See § 330.7(a))

(12) In certain instances, an individual state coastal zone management consistency certification must be concurred in by a state. (See § 330.10)

16. Section 330.7 is revised to read as follows:

§ 330.7 Discretionary authority.

Except as provided in paragraph (c)(ii) of this section division engineers, on their own initiative or upon recommendation of a district engineeer, are authorized to modify nationwide permits by adding individual or regional conditions or to override nationwide permits by requiring individual permit applications. Discretionary authority will be based on concerns for the aquatic environment as expressed in the guidelines published by EPA pursuant to section 404(b)(1). (40 CFR Part 230)

(a) *Individual conditions.* Division engineers ae authorized to modify nationwide permits by adding individual conditions on a case-by-case basis applicable to certain activities within their division. Individual conditions may be added either:

(1) In instances where there is mutual agreement between the district and the permittee or

(2) When the state requires individual 401 certification and the district or division engineer determines, consistent with Sections 325.4 and 330.9, that the conditions in the certification should be applied to the nationwide permit. A copy of the written notice of modification will be forwarded to the Office of the Chief of Engineers, ATTN: DAEN-CWO-N.

(b) *Regional conditions.* Division engineers are authorized to modify nationwide permits by adding conditions on a generic basis applicable to certain activities or specific geographic areas within their divisions. In developing regional conditions, division and district engineeers will follow standard permit processing procedures as prescribed in 33 CFR Part 325 applying the evaluation criteria of 33 CFR Part 320 and appropriate parts of 33 CFR Parts 321, 322, 323, and 324. A copy of the statement of findings will be forwarded to the Office of the Chief of Engineers, ATTN: DAEN-CWO-N. Division and district engineers will take appropriate measures to inform the public at large of the additional conditions.

(c) *Individual permits.* In nationwide permit cases where additional individual or regional conditioning may not be sufficient to protect the aquatic environment or where there is not sufficient time to develop such conditions under paragraphs (a) or (b) of this section, the division engineeer may require individual permit applications on a case-by-case basis. Where time is of the essence, the district engineer may telephonically recommend that the division engineer assert discretionary authority to require an individual permit application for a specific activity. If the division engineer concurs, he may verbally authorize the district engineer to implement that authority. Both actions will be followed by written confirmation with copy to the Chief of Engineers (DAEN-CWO-N). Additionally, after notice and opportunity for public hearing, division engineers may recommend to the Chief

VOL 48 ISS 93 MY 12 1983 UMI

of Engineers that individual permit applications be required for categories of activities, or in specific geographic areas. The division engineeer will announce the decision to persons affected by the action. The district engineer will then regulate the activity or activities by processing an application(s) for individual permit(s) pursuant to 33 CFR Part 325.

17. Section 3309 is added to read:

§ 330.9 State water quality certification.

In certain instances where a state has denied the 401 water quality certification for a particular nationwide permit, that permit does not authorize the activity until an individual state water quality certification has been obtained or waived for that activity. In such instances, the applicant must furnish the district engineer with a copy of the 401 certification or a copy of the application to the state for a 401 certification. If a state fails to act on an application for a 401 certification within 30 days of receipt of the application, then a waiver will be presumed. If the state issues a conditioned 401 certification, the district engineer should review such conditions in light of Section 325.4. While the district engineer is not required to automatically adopt conditions in a 401 certification, those conditions found to be in compliance with Section 325.4 should be cited as individual conditions in a letter sent to the applicant, with the explanation that authority for the proposed activity is subject to those individual conditions. Upon receipt of the 401 certification (or waiver) and after determining whether individual conditions should be imposed on the proposed activity, the district engineer will notify the applicant that the requirement for certification has been complied with and work may proceed as long as the permittee complies with all of the conditions of the nationwide permit. District engineers will take appropriate measures to inform the public of which states or waterbodies and for which nationwide permits such individual certification is required.

18. Section 330.10 is added to read:

§ 330.10 Coastal zone management consistency determination.

In certain instances where a state has not concurred in a particular nationwide permit as being consistent with its coastal zone management plan, that permit does not authorize the activity until the applicant has furnished to the district engineer a coastal zone management consistency certification pursuant to Section 307 of the Coastal Zone Management Act and the state has concurred with it. District engineers will take appropriate measures to inform the public of which states or waterbodies and for which nationwide permits such individual certification is required. If a state does not act on an applicant's consistency statement within six months after receipt by the state, consistency shall be presumed.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 73 and 74

[BC Docket No. 78-253; RM-2846; RM-3109; FCC 83-129]

The Future Role of Low Power Television Broadcasting and Television Translators in the National Telecommunications System

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Action taken herein denies the bulk of the petitions for reconsideration filed with respect to the Commission's Report and Order in BC Docket No. 78-253—the Commission's low power television proceeding. However, the instant action also grants limited reconsideration with regard to certain aspects of the Report and Order, clarifies portions of that Order, and changes several Commission rules primarily in order to shorten and simplify the renewal and transfer forms for low power and translator stations and to facilitate the rapid implementation of the low power service.

DATE: Rules changes will become effective on June 13, 1983; FCC Forms changes will become effective upon approval by the Office of Management and Budget.

FOR FURTHER INFORMATION CONTACT: Barbara Kreisman, Mass Media Bureau (202) 632-3894.

Television.

Memorandum Opinion and Order

In the matter of an inquiry into the future role of low power television broadcasting and television translators in the National Telecommunications System, BC Docket No. 78-253, RM-2846, RM-3109.

Adopted: March 31, 1983.

Released: May 6, 1983.

By the Commission.

1. The Commission has before it for consideration various petitions seeking reconsideration and/or clarification of our *Report and Order* authorizing the low power television service.[1] *Report and Order*, FCC 82-107, 47 FR 21468 (published May 18, 1982) (hereinafter referred to as "*Report and Order*"). Also before the Commission are various oppositions, comments and replies concerning those petitions.[2]

Background

2. Proposed on September 9, 1980, the rule changes adopted in the *Report and Order* permit TV translator stations to originate programming and operate on a subscription basis. During the pendency of this proceeding, the Commission continued to accept and process translator applications, including applications accompanied by waiver requests to include low power features. However, in April 1981, the Commission had to stop accepting most new translator applications due to the volume of interim applications filed. In July 1981, the Commission issued a *Further Notice of Proposed Rule Making* in this docket, requesting comments on prohibited overlap standards that would facilitate automated processing of the pending applications.

3. The rules adopted in the *Report and Order* limit low power stations to ten watts power on VHF channels and 1,000 watts on UHF channels. Stations may operate on any VHF or UHF channel meeting the desired-to-undesired signal ratios specified in the new rules. These contour overlap engineering standards are designed to ensure that the secondary spectrum priority of low power stations is strictly maintained. Secondary status means that low power stations may not create objectionable interference to full service television stations nor to land mobile radio stations operating on UHF Channels 14 through 20 pursuant to the Commission's sharing scheme. A low power station causing interference to a full service station or a protected land mobile station must correct the problem or cease operation. The Commission also adopted automated engineering standards for low power applications processing.

4. The low power service, as established in the *Report and Order*, is subject to minimum regulation. There are no ownership restrictions, ascertainment or program log requirements, minimum hours of operation or program regulations, other than those imposed by statute. The Commission also declined to impose a requirement that cable systems carry the signals of low power stations. The cable carriage requirement had been imposed for certain traditional translator stations, because they were considered to be extensions of full power local stations in their area. However, mandatory cable carriage would not be warranted for low power stations, since they have no local programming requirement. To authorize new stations in this service, the Commission established a curtailed paper hearing process. Only minority ownership and diversity of control of the media were to be considered in the comparative hearing.[3]

5. The petitions for reconsideration and/or clarification of the *Report and Order* raise a broad range of issues concerning the implementation of the low power television service. Petitioners take issue with the establishment of comparative criteria to resolve mutually exclusive applications for low power stations. Various petitioners argue for the addition and/or deletion of comparative criteria established in the *Report and Order*. Noncommerical broadcasting petitioners request the reservation of channels for public television stations and an interference priority for public broadcasters on reserved channels that are available for low power use.

6. Some petitioners request changes in the Commission's allocation criteria for the service, including consideration of terrain shielding, changes in channel spacing requirements, power limits and methods of calculating contours. The petitions also raise the issue of sharing low power spectrum with land mobile communcations uses. Other technical matters raised in various pleadings include the imposition of operator requirements on low power stations and limitations on interference caused to cable systems and Multipoint Distribution Service (MDS) stations. Issues of retransmission consent and mandatory cable carriage were also raised. With regard to the processing of low power applications, petitioners raised questions concerning the freeze on applications and the interim processing of those requests. Petitioners also asked for changes in the handling of amendments to low power applications that constitute major modifications, and they make suggestions on the format of new and renewal application forms for the low power service.

7. The various petitions, oppositions, comments and replies will be treated herein on an issue-by-issue basis. Moreover, as appropriate, this *Order* will effectuate various rule and form changes that are warranted, as a result of the pleadings before us and our own review of and experience with the *Report and Order*.

Comparative Criteria

8. The *Report and Order* stated that we hoped to have statutory authorization to use a lottery procedure in lieu of comparative hearings to resolve mutually exclusive low power TV applications. However, at the time, we had no lottery procedures, and the *Report and Order* devised hearing procedures and comparative preferences for use in low power TV cases. Lotteries were not yet authorized at the time the Petitions for Reconsideration were filed, but such procedures are now permitted, and the Commission has today concluded a rule making to implement them.[4] In this context, we need only briefly describe the comparative procedures established in the *Report and Order* and the related arguments on reconsideration.

9. When necessary, the hearings contemplated in the *Report and Order* were to be conducted largely on paper, with prehearing discovery conducted or oral testimony taken only when the Administrative Law Judge deemed it necessary. The comparative criteria adopted in the *Report and Order* were (1) diversification of control of the media of mass communications and (2) over fifty percent minority ownership.

10. NAB argues that the *Notice of Proposed Rule Making*, 45 FR 69178 (October 17, 1980), did not give adequate notice that diversification of control was being considered as a comparative factor or that encouraging new entrants was a primary goal of the authorization process. CPB and IBN argue that the *Notice* indicated that the Commission would award a preference for noncommerical applicants, but the Commission failed to alert parties that it might retreat from that position, as we did in the *Report and Order*. AWRT requests inclusion of a comparative preference for applicants that are over 50 percent female owned, and Dick Dowart requests inclusion of a preference for the handicapped.

11. The Administrative Procedure Act requires notice of "the terms or substance of the proposed rule or a description of the subjects and issues involved." 5 U.S.C. 553(b)(3). Notice need only be sufficient to apprise interested parties fairly of the issues involved, and promulgation of a rule different from an original proposal does not necessitate the opportunity for further comment, so long as the rule is a logical outgrowth of the notice and comments. *Consolidation Coal Co.* v. *Costle*, 604 F. 2d 239, 248 (4th Cir. 1979); *BASF Wyandotte Corp.* v. *Costle*, 598 F. 2d 637 (1st Cir. 1979). In our *Notice of Proposed Rule Making, supra*, at 69189, we stated:

> We note that our staff recommended the three criteria as a 'first draft' set of preferences, and propose them in that spirit. We shall carefully consider comments that advance other approaches to the comparative process.

Thus, our actions with regard to comparative preferences were within the scope of the *Notice* or a logical outgrowth of the *Notice*.

12. The petitions requesting the inclusion or exclusion of individual comparative preferences are affected by the legislation authorizing the lottery.[5] Congress expressed its "intention and expectation" that the lottery be used for low power television and specified that the two preferences of diversification and minority ownership be used. *See* H. Rep. No. 97-765. Furthermore, Congress in 309(1)(3)(c)(ii) defines "minority group" as "Blacks, Hispanics, American Indians, Alaska Natives, Asians and Pacific Islanders." We have adopted rules to implement a lottery procedure for LPTV in our action today in Gen. Docket No. 81-768. See *Report and Order* in Gen. Docket 81-768, adopted March 9, 1983, 48 FR —. Thus, AWRT's petition advocating a preference for female ownership, Dick Dowart's petition advocating a preference for the handicapped, NAB's petition objecting to the diversity preference, those portions of the CPB and IBN petitions advocating a noncommercial preference and IBN's request that we clarify the definition of minority ownership in the case of a non-profit entity will be denied. Comparative preferences and definitions have been established in the lottery proceeding.[6]

Noncommercial Channel Reservation

13. Low power channels are allocated on a demand basis. There is no table of allotments, and no channels are reserved for noncommercial low power use. Applicants simply select a vacant channel and provide an engineering showing that the proposed facility will not cause objectionable interference. In the *Report and Order* we eliminated the preference for educational rebroadcast on reserved channels which previously had given noncommericial translators an absolute priority over commercial translators on channels reserved for full power noncommercial applicants.

14. CPB requests that the Commission reconsider and reserve channels for noncommercial applicants in the top 100 markets. CPB claims that the Commission's records do not support the conclusion that there are adequate vacant noncommercial channels in these markets. Rather a table would provide noncommercial educational applicants sufficient time to prepare their applications. CPB proposes that the table self-retiring after 3 or 4 years. In the alternative, CPB suggests that the Commission suspend all "A" list cut-off dates set during the proceeding to provide potential noncommercial licensees with the opportunity to organize and prepare applications for filing.

15. NAPTS and Rocky Mountain request a priority with respect to interference protection for noncommercial operators on channels listed in the Television Table of Assignments reserved for noncommercial use. NAPTS alleges that a commercial operator can preclude a low power noncommercial operator on a reserved channel. NAPTS claims this

---

[1] The petitions are as follows: (1) Petition for Partial Reconsideration filed by American Women in Radio and Television, Inc. (AWRT); (2) Petition for Partial Reconsideration filed by Bogner Broadcast Equipment Corp. (Bogner); (3) Petition for Reconsideration filed by the Corporation for Public Broadcasting (CPB); (4) Petition for Reconsideration filed by Dick Dowart; (5) International Broadcasting Network's (IBN) Petition for Reconsideration; (6) A document entitled "Comments of Law Enforcement Administrators Telecommunications Advisory Committee" (LEATAC); (7) Los Angeles County Sheriff Department's Petition for Reconsideration (LA Sheriff) and "Additional Comments to the Previously filed Petition for Reconsideration" filed by the LA Sheriff; (8) Petition for Reconsideration filed by Microband Corporation of America (Microband); (9) Petition for Partial Reconsideration filed by the National Association of Broadcasters (NAB); (10) Petition for Reconsideration filed by the National Association of Public Television Stations (NAPTS); (11) Petition for Reconsideration filed by Neighborhood TV Company; (12) Petition for Reconsideration filed by the National Translator Association (NTA); (13) Petition for Reconsideration filed by the Rocky Mountain Corporation for Public Broadcasting; and (14) Petition for Reconsideration filed by the Television Center, Inc. (TV Center).

[2] A list of all such pleadings is attached as Appendix A.

[3] The Commission also indicated its intention to utilize a lottery for low power proceedings if such a procedure was permitted by amendment to the Communications Act. The Communications Amendments Act of 1982 (Pub. L. 97-259), enacted September 13, 1982, included authority to utilize lotteries with preferences for minority ownership and diversity. To implement this legislation, the Commission adopted a *Second Notice of Proposed Rule Making* in Gen. Docket No. 81-768, FCC 82-420, adopted September 23, 1982, released October 7, 1982.

[4] *Report and Order* in Gen. Docket No. 81-768, FCC 83—, adopted March 9, 1983.

[5] The Communications Amendments Act of 1982, Pub. L. 97-259, Section 115, enacted September 13, 1982, amended Section 309(i) of the Communications Act of 1934, as amended, 47 U.S.C. 309(i).

[6] The IBN petition correctly points out that an applicant that has received a grant through the lottery procedure would suffer a diversity disadvantage in all subsequent lotteries. Thus, it may be possible that an applicant would be at at disadvantage for its first choice facility by virtue of succeeding in the lottery for some other lower choice station. Of course, the applicant could resolve this dilemma by withdrawing its application from consideration in the "less desirable" lottery.

VOL 48 ISS 93 MY 12 1983 UMI

frustrates the Congressional mandate to make public telecommunications services available to all citizens of the United States, in that it will make it more difficult for public television operators to expand service to remote areas through the use of translators. NAPTS also complains that the Commission's action will inhibit the use of existing reserved channels to initiate service with low power stations and develop them into full service stations as additional support becomes available. Rocky Mountain argues that unless the Commission affords noncommercial translators and low power stations a priority on channels reserved for noncommercial use, they will not be able to get funding. It takes exception to the Commission's reasoning, *i.e.*, that noncommercial channels are still reserved for full service use and that noncommercial stations can engage in revenue producing activities. Rocky Mountain asserts that there is no justification or support for fulltime noncommercial stations in Rocky Mountain's area, and many noncommercial licensees choose not to engage in revenue producing activities.

16. We continue to believe that channel reservation is not feasible in a demand service such as low power television. Furthermore, the reasoning that channels must be reserved in order to give noncommercial applicants time to get financing overlooks the relatively low cost of the stations. Therefore, we reject CPB's suggestion that we create reserved noncommercial low power television channels in the top 100 markets. We similarly are not persuaded that it would be in the public interest to give an interference protection priority to educational translators or low power stations that use unoccupied channels reserved for full power noncommercial operation. Such a priority would unnecessarily complicate the engineering determinations that have to be made in the processing of low power and translator applications. More importantly, it would put commercial low power applicants at a distinct disadvantage, having to protect noncommercial operators on reserved channels, but accepting interference from such operations under certain circumstances. We can think of no public interest benefit that would justify the added work to the Commission and the cost to commercial operators. Of course, all low power and translator operations on reserved or unreserved channels remain secondary to and must protect full service operations on those channels.[6]

17. The Commission has previously denied a petition for reconsideration [7] and a Motion for Stay of Interim Processing [8] relating to CPB's suggestion that, as an alternative to reserved channels, we suspend all "A" list cut-off dates set during the proceeding to provide noncommercial applicants an opportunity to organize and prepare applications for filing. In our *Order* denying the Motion for Stay, we noted that our application procedures required only that a financial proposal be submitted, not that an actual funding grant be approved. Therefore, we did not believe that noncommercial applicants were so disadvantaged as to require suspension of the "A" cut-off dates. As previously indicated, the relatively low cost of effectuating the low power service would indicate that any special considerations for noncommerical operations were unnecessary. Indeed, as we have previously pointed out, several noncommercial applicants managed to meet the cut-off date indicating that noncommercial applicants had sufficient time.

Technical Issues

18. Petitioners raised various technical questions ranging from the allocation of spectrum for LPTV on a shared basis to the requirements for technical expertise in the operation of LPTV stations. Those issues will be considered herein seriatim.

Spectrum Sharing

19. Low power and translator applicants may select any channel between 2 and 69, subject to our technical rules including protection to land mobile stations that share frequencies with broadcast users. The LA Sheriff's Department has filed a rule making petition (RM–3975) requesting creation of a public safety band between 470 and 512 MHz (UHF Channels 14–20). Presently, Channels 14–20 are shared by broadcasting and land mobile radio services. *Second Report and Order*, Docket No. 18261, 30 F.C.C. 2d 221 (1971); *Fifth Report and Order*, Docket No. 18261, 48 F.C.C. 2d 360 (1974).

20. The LA sheriff requests that we defer any licensing on television Channels 14 through 20 until the study period set forth in PR Docket No. 82–10 is completed and its recommendations acted upon.[9] The Sheriff states there is a significant need for land mobile frequencies as evidenced by current applications and the rapid depletion of the 800 MHz allocation and claims that if low power television stations are granted on Channels 14–20, it will be difficult to reallocate this portion of the spectrum to land mobile. APCO urges that the Commission amend the rules in the low power proceeding to prohibit licensing of low power stations until full consideration is given to the issues raised in RM–3975 and PR Docket No. 82–10. APCO states that the Commission's primary obligation to promote safety of life and property through the use of wire and radio communications requires this action.

21. We are not persuaded that we should withhold Channels 14–20 from low power television at this time. The *Interim Report* did predict increasing spectrum needs for land mobile uses. It noted, however, that new technologies exist that may alleviate this scarcity. The Commission will continue to study land mobile needs and the Sheriff's petition for rule making (RM–3975) noted *supra*. The question in RM–3975 is how the spectrum should be allocated as between broadcasting (including full power as well as low power stations) and land mobile. If those channels are allocated to land mobile, the allocation of new full power as well as new and existing low power stations would be affected. Low power stations, being secondary, are on notice that their use may be preempted by that action. Licensing low power stations on these channels will not prejudice the rule making or the studies in Docket No. 82–10. Therefore, we will deny the Sheriff's petition. Similarly, we do not believe this is the proper forum to act on NTA's suggestion that land mobile should be removed from this portion of the spectrum entirely. Eliminating such sharing would involve spectrum allocation decisions beyond the scope of this proceeding. However, it is our intention to continue the procedure, instituted in the *Report and Order*, whereby all low power TV grants within 100 miles of the ten largest U.S. cities (120 miles in California) are coordinated by the Mass Media Bureau and the Private Radio Bureau. In this manner, we can assure that new low power stations will not unduly foreclose the Commission's options in Gen. Docket No. 82–10. This course of action will be revisited, as appropriate, after Commission action in that proceeding. In the interim, we do not believe that the coordination process will unduly impede low power TV service.

[7] *Memorandum Opinion and Order*, FCC 81–15, 47 FR 28714, released January 15, 1981.

[8] *Order* denying motion for stay, FCC 81–52, released February 6, 1981; see also *Little Rock Television Company* v. *FCC*, 646 F. 2d 1271 (8th Cir. 1981) (*per curiam*).

[9] In September, 1982, the Planning Staff of the Private Radio Bureau released its *Interim Report on Future Private Land Mobile Telecommunications Requirements (Interim Report)*. This report was the culmination of a proceeding, instituted by a January 20, 1982, *Notice of Inquiry*, designated PR Docket No. 82–10. Also the Commission's staff has completed another study announced in our *Report and Order* to determine the possibility of broadcast-land mobile sharing in major urban markets. *Report and Order* at 21479.

Power, Protected Contours and Terrain Shielding

22. Low power stations and translators must protect existing stations from interference. They are limited in transmitter power output to 10 watts VHF and 1,000 watts UHF. VHF stations operating on channels in the Television Table of Assignments may use 100 watts. Applicants must make a showing that their proposed facility will not cause objectionable interference. The potential for such interference is predicted using desired-to-undesired (D/U) field strength ratios set forth in the *Report and Order*. We therein declined to consider terrain shielding in determining interference protection.

23. IBN claims that the protected contour values set forth in the rules are too high and that the power limits, particularly the limitation on the output power of VHF transmitters, are too low. NTA asks that we consider terrain shielding. NTA claims that the Commission staff would not be overburdened if it: (1) Required the applicant to make a terain shielding showing and notify other licensees or applicants that terrain shielding is a factor in interference protection and (2) conditioned the grant on the accuracy of the shielding study.

24. IBN has provided no information to establish that our protected contour values are too high or that the power limits are too low. Rather, IBN has simply expressed disagreement with our judgment. The power limits and protected contours established in the *Report and Order* were designed to provide low power stations with service areas that would be large enough to provide a potentially adequate economic base for the station's viability, but not so large as to overly restrict the number of stations we could authorize. Thus, the limits were set to provide the opportunity for the best and most diverse service to the public with the minimum of delays occassioned by the need to resolve mutual exclusivities. IBN has failed to allege any facts which would alter the balance thus struck in the *Report and Order*.

25. As to protection to full service stations, the *Report and Order* stated that if we were to "receive a well documented complaint that an authorized low power station impairs regular reception of a full service signal outside the full service station's Grade B contour, this could be a ground for corrective action against the low power licensee, depending upon an evaluation of the situation." *Report and Order, supra* at 21497. However, we also indicated that, generally, we would use the Grade B contour as the standard for protected service. Thus, interference beyond the protected contour would not constitute an indirect modification of license of the full service station, entitling it to a hearing under Section 316 of the Communications Act.[10] Nevertheless, a full service station complaining of interference would be a party in interest under Section 309 of the Communications Act [11] entitled to file a Petition to Deny substantiating the alleged harm.

26. We do not believe that we can consider terrain shielding in evaluating low power applications. Initially, we note that there is no universally accepted method of predicting the effects of terrain shielding. It would be beyond the scope of this proceeding to adopt a general terrain correction factor, even if we had sufficient information to enable us to do so. Under these circumstances, any attempt to allow for terrain shielding would embroil us in disputes that may not be susceptible to resolution by accepted standards and would therefore frustrate our efforts to expedite grant of low power licenses. Accordingly, we will not consider terrain shielding in the processing of low power TV applications at this time.

Fourteen Channel Spacing.

27. In our *Report and Order* we prohibited pairs of co-located translators or low power television stations from operating with fourteen channel spacing. NTA argues that the Commission should allow fourteen channel spacing between low power stations and asserts that a number of translators operate on such spacing. We are not persuaded that the prohibition of fourteen channel spacing shoud be eliminated. To avoid interference, fourteen channel spacing requires not only that the stations are authorized to radiate essentially the same field strength, but also that the stations must be maintained equally. If stations are commonly owned, they are likely to interfere only with each other. Nevertheless, we believe it more appropriate to prohibit fourteen channel spacing at this time. Our experience with low power TV indicates that efficient authorization of new service to the public requires automated processing. Fourteen channel spacing for co-owned stations would be incompatible with out automated technical processing. Of course, such applications could be processed by hand, but we do not believe that the benefits of fourteen channel spacing outweigh the cost of hand processing in terms of delays in authorization of service to the public. Therefore, at this time, we will not permit operation of new translators or low power stations at fourteen channel spacing.

Operator Requirements

28. In our *Report and Order*, at 21490, we stated that we believe that Section 318 of the Communication Act requires that all originating stations have an operator holding at least a Restricted Radio Telephone Operator's Permit in continuous attendance during local originations. The operator must be at the transmitter site, remote control point or program source. During retransmissions via microwave, the operator requirement can be fulfilled by observing the low power station signal on a conventional receiver for fourteen continuous minutes each day. See § 74.734(b). IBN seeks clarification of the requirement, arguing that the rules should not require the presence of a licensed operator during retransmission of microwave fed signals, including those received via satellite, or during the insertion of a brief station identification or public service announcement.

29. *The Report and Order in Docket No. 20539*, 67 F.C.C. 2d 209 (1977) made it clear that television translator stations could use a satellite or terrestrial common carrier microwave feed provided that the translator station remained a rebroadcast device. Therefore, using such a feed would not, under our current rules, constitute program origination if the receiving station merely used the feed to enable it to rebroadcast simultaneously a television broadcast station. Section 74.784(a) and (c). Any programming received from microwave fed signals (including signals from a satellite) other than simultaneous rebroadcast of a television broadcast station would be

[10] Section 316 of the Communications Act requires the Commission to notify and to provide the opportunity for a hearing to any station the license of which is being modified directly or indirectly. See *NBC* v. *FCC (KOA)*, 132 F 2d 545 (1942), *aff'd*. 319 U.S. 239 (1943); *L.B. Wilson, Inc.* v. *FCC*, 170 F. 2d 793 (1948).

[11] Section 309 of the Communications Act allows parties in interest to file petitions to deny. Such petitions must contain specific allegations of fact sufficient to show that the petitioner is a party in interest and that grant of the application would not be in the public interest.

VOL

UMI

considered local origination under our current rules. However, we do not believe it should be considered local origination for purposes of the operator requirements. We do not consider it necessary for an operator to be in attendance unless the program source signal is under the control of the licensee. Therefore, we are amending § 74.701 to define local origination as those types of program origination in which the parameters of the program source signal are under the control of the low power television station licensee. Examples of local origination are transmission of signals generated at the transmitter site and transmission of programs reaching the transmitter site by television studio transmitter link (STL) stations. However, "origination" does not include signals obtained from terrestrial or satellite common carrier microwave feeds or signals rebroadcast from other low power television stations. See Appendix B.

30. Moreover, according to § 74.731(f), station identification announcements, emergency messages or requests for funds are not considered originated programs, provided such inserts meet the requirements of § 74.731(f) (in the case of requests for funds or emergency messages), or § 74.783 (in the case of station identification). Furthermore, we believe that public service announcements should not constitute local origination within the scope of § 74.701(g), so long as such announcements conform to the requirements of § 74.731(f). Therefore, we shall amend the rules accordingly.

Interference Protection

31. Various petitions have raised issues concerning the potential interference from low power stations to cable television systems and Multipoint Distribution Systems (MDS). With regard to cable systems, § 74.703(d) of the Commission's rules establishes a "first in time, first in right" policy. NTA urges elimination of the prohibition imposed by § 74.703(d). Petitioner argues that the requirement that low power television stations provide protection to CATV systems using a VHF channel as the input from a set-top converter to the TV set is unexpected and is in conflict with the Commission's policy of permitting cable's use of the spectrum based on non-preclusion of broadcast use. NTA also asserts that the policy is unnecessary since the prohibition on adjacent channel over the air transmissions would always leave a channel open for CATV use.

32. NTA has failed to provide any reason that the Commission should reconsider the "first in time, first in right" policy in cases of interference at the input channel of a cable system using a converter. Contrary to NTA's assertion, this rule should not have been unexpected and does not conflict with the Commission's policy of permitting cable's use of the spectrum based on its non-preclusion of broadcast use. Based on that policy, we denied requests from cable operators that we limit low power television to the UHF frequencies and, in general, denied formal protection to cable systems. *Report and Order*, paragraphs 43 and 45. We noted, however, that in the case of the input channel of a cable system using a converter, the preclusive effect would be minimal ("foreclosing at most one VHF channel from local use by translators or low power stations" *Report and Order*, at 21479). We stated that it is in the public interest to protect the expectation of continued service instead of permitting its degradation by a later applicant. *Id.* Moreover, the issue of cable/low power interference was raised in our *Notice of Proposed Rule Making*. Thus, the adopted rule stems logically from the *Notice*. *See BASF Wyandotte Corp.* v. *Costle, supra*. In view of the above, the portion of NTA's petition requesting reconsideration of § 74.703(d) is denied.

33. MDS stations also use a VHF channel input from their converter to a subscriber's set, but the *Report and Order* accorded no protection from LPTV stations. Microband requests that the Commission provide MDS the same "first in time, first in right" protection from interference from low power television that it provides for cable. We believe that MDS operators, like cable operators, should settle most interference disputes privately. However, in the case of an input channel already in use by an MDS operator, it would be in the public interest to protect the expectation of continued service rather than allow degradation by a later applicant. This would be consistent with the protection afforded cable. Therefore, we will grant Microband's petition and amend § 74.703(d) to include this protection. Moreover, the same situation could exist with regard to an input channel used by stations in the Instructional Television Fixed Service (ITFS), and we will afford similar protection to those licensees. See Appendix B.

Retransmission Consent and Cable Carriage

34. Low power stations are permitted to originate programming to an unlimited degree, but are not required to originate any programming. Thus, LPTV stations may retransmit the programming of other stations, provided they have consent to do so. IBN and NTA ask that we specifically permit translator stations to retransmit the programming of low power stations. Since translator stations have no programming requirements, they are free to retransmit a low power station's programming provided they have the appropriate consent to do so.[13] However, any TV translator rebroadcasting the signal of a low power TV station would itself be considered a low power station for the purposes of the rules.

35. Under the present rules, cable systems must carry certain local full service stations, commercial translators over 100 watts and educational translators over 5 watts within a 35-mile radius of the cable system. *See* §§ 76.55(c) (1) and (2); 76.57(a)(2); 76.59(a)(5); and 76.61(a)(3). In our *Report and Order* we declined to extend the mandatory carriage to low power television stations. IBN and NTA request that the Commission apply its cable "must carry" rules to low power television claiming that unless cable carries low power stations they will not be able to compete with those stations that are carried. The rules which require the mandatory carriage of local stations by cable systems were designed to further the goals of our allocation plan, which, in turn, was designed to provide local television service to the entire country. *Cable Television Report and Order*, 36 F.C.C. 2d 143, 173 (1972). At that time, translators were considered extensions of local stations in the same area. Thus, certain translators were entitled to mandatory carriage. On the other hand, low power stations are not extensions of nearby full service stations; they are not part of the allocations plan, and they have no programming requirements. Thus, there is no reason to require carriage by cable systems. Under these circumstances, we believe the marketplace is the appropriate vehicle for determining whether a cable system would select a low power station for carriage.

Processing Issues

36. In September, 1980, the Commission established procedures for handling translator and low power television applications pending the outcome of the rule making. *Notice of Interim Processing*, 45 FR 62004 (published September 17, 1980). In April of 1981, with approximately 5,000 applications on file; and with insufficient staff and computer capability to handle them, the Commission stopped accepting new applications except: existing translators seeking to leave channels 70 through 83; existing translators seeking to change channels to eliminate interference to full service stations; or new proposals to serve areas currently receiving fewer than two full service stations. *Order Imposing Freeze*, 46 FR 26062 (published May 11, 1981).

[13] We are simultaneously amending our operator requirements to make clear that retransmission of low power stations will not be considered local origination for purposes of the rules.

37. When we adopted the *Report and Order*, we did not lift the freeze, but we did change the freeze exemptions slightly. Applications were grouped into categories by market size. Those applicants proposing to locate their transmitting antennas more than 55 miles from any of the 212 FCC-ranked television market were placed in Tier I and are now freeze exempt. The freeze exemption for proposals to serve areas currently receiving fewer than two full service stations was eliminated. Applicants other than those in Tier I were grouped in Tiers II and III by market size. Under the tiered system, processing of the first tier must be completed before processing of the second tier begins, and so on.[14] The freeze would be lifted only for the limited purpose of receiving competing applications to the applications published on cut-off lists.

38. NTA argues that the Commission should reconsider its decision to use the three-tier processing plan. NTA proposes that we permit the continued filing and processing of applications which propose to serve areas that receive fewer than two full-service stations. Our tiered processing is designed to minimize the impact of low power applications on Commission resources and speed implementation of new service. The "less than two station" exemption had the potential to strain our resources and delay authorizations because it required an individualized engineering judgment for each application claiming this exemption. Our new standard identifies the most rural markets, which include most underserved areas. This standard can be handled by computer, thus minimizing delays in authorization. Therefore, we will deny that portion of NTA's request to reinstate our freeze exemption for areas with fewer than two full service stations.[15]

[14] However, applications that were accepted before the freeze and were cut off, will be processed with Tier I applications, even though they may now be classified as Tier II or III.

[15] In the *Report and Order* we stated that we did not intend to issue any further cut-off lists until we processed all pending applications for low power stations. However, completion of the processing of the pending applications will require the services of a sophisticated computer system which we are in the process of implementing. In the interim, we will be issuing new cut-off lists as appropriate.

Interim Processing

39. The interim processing rules provided for the consideration and grant of low power applications during the pendency of the rule making. Neighborhood urges the Commission to reject the principle of interim processing and declare that only those low power applications filed after the effective date of the new rules will be accepted against a translator application that would ordinarily have been granted before the authorization of low power service. Neighborhood claims that the practice of accepting applications before adoption of the *Report and Order* prejudged the issue and delayed grant of Neighborhood's applications for translator stations to be interconnected by satellite.

40. The Commission has previously considered petitions for reconsideration of the interim processing procedure. *Memorandum Opinion and Order*, 84 F.C.C. 2d 713 (1981). There, we thoroughly discussed the propriety of our interim processing standards. We concluded that a freeze on translator applications would deprive the public of needed service, but to accept only conventional translator applications with no waiver requests would invite abuse in that applicants desiring low power service could apply for a translator and upgrade later. We also noted that the exposure to the interim applications would enhance our ability to respond to the issues raised in the low power proceeding, and similar interim procedures had been approved. *Kessler* v. *F.C.C.*, 326 F. 2d 673 (D.C. Cir. 1963), *Buckeye Cablevision* v. *F.C.C.*, 438 F. 2d 948 (6th Cir. 1971), and *Meredith Broadcasting* v. *F.C.C.*, 365 F. 2d 912 (D.C. Cir. 1966).

41. Neighborhood claims the low power interim policy differed from other interim procedures in other services. We do not find this argument persuasive. Interim procedures must differ somewhat due to many factors, including differences in the service involved. Neighborhood also complains about our refusal to reconsider the 15 station limit in our *Memorandum Opinion and Order*, FCC 81–175, released June 25, 1981. Petitioner claims this limit was imposed to stall its attempt to form a new network. The 15 station limit was necessary to maintain our flexibility during the pendency of the rule making. The interim standard would permit the possible adoption of ownership limits without substantial grandfathering problems engendered by interim processing without ownership limits. Thus, the interim limit was eliminated when we determined not to impose ownership rules.

42. Neighborhood also argues that the Commission wrongfully prejudged low power, and the Commission should help Neighborhood create its new network of "family" programming. However, it is clear that this proceeding was not prejudged. The *Report and Order* provides ample reason for creation of the serice and is not dependent on the existence of low power stations authorized under the interim process, and the *Notice* clearly alerted applicants that their grants were conditioned upon final authorization of low power television. Moreover, there is no basis for preferring Neighborhood's programming proposals over any others. The *Report and Order*, imposed minimum of program content regulations on low power television stations so that they may be responsive to marketplace conditions. *Report and Order*, at 21490. Since we favor no particular programming, we cannot favor Neighborhood's plan over other proposals.

Major Modifications

43. The *Report and Order* classified any change in frequency, transmitting antenna system, antenna height, antenna location exceeding 200 meters, authorized power, or community or area to be served as a major change for translators or low power television stations. Moreover, the *Report and Order* indicated that an ownership change would not constitute a major modification. A major change sends an application back to the beginning of the processing line where it is again subject to competing applications.

44. Several petitioners, including Bogner, NTA and Television Center, request reconsideration of the criteria for a major change. Television Center claims that the criteria encompass many routine changes that will not affect other parties, and they will prevent settlements by penalizing small technical changes. Television Center argues that the major modification standard will not motivate applicants to make small changes to correct mutual exclusivities. Bogner claims that unless the major change definition is changed, petitions to deny will be filed against maintenance type changes. Bogner argues that existing translator stations which fall within Tiers II and III would be precluded from making such improvements for a lengthy period. NTA

VOL 48 ISS 93 MY 12 1983 UMI

also argues that the definition should be changed to accommodate those with a legitimate need to make a change.

45. NTA suggests that the following not be major changes: any change to resolve interference, a change in location because of non-availability of the specified site, a reduction in antenna height or effective radiated power (ERP), or an increase in ERP if protection standards are met. Television Center proposes that the Commission treat as major only modifications in the transmitter location greater than three kilometers. According to Television Center's plan, minor changes could be approved only after 30 days notice and the opportunity for petitions to deny. Bogner suggests that we treat modifications of facilities that would not increase the signal range of the station in any horizontal direction as minor.

46. Upon reconsideration, we believe that classification of modifications that would not increase the signal range in any horizontal direction as minor would facilitate maintenance type changes and changes to eliminate interference without creating new interference or preclusion. Therefore, we are adopting Bogner's suggestion. Section 73.3572 of the Commission's Rules is amended accordingly. The remaining requested changes might permit additional preclusion or cause actual interference, due to local factors, even though applications for such changes might meet our general protection standards. *See Report and Order, Supra* at 21475. Although Television Center's suggested 30 day notice provision would deal with the problem of actual interference, it would also delay changes that wouldn't create a problem. Accordingly, we will deny those requests for reconsideration.

47. We also believe that the implementation of the lottery requires alteration of our view of ownership changes. We can no longer ignore changes of more than 50% of an applicant's ownership, Particularly where such changes could affect the applicants' lottery preference. Thus § 73.3572(b) of the rules will govern ownership changes for low power applicants. We are also amending § 74.732(d) of the rules to make it clear that major modifications will require a new cut-off list and afford an opportunity for the filing of competing applications. See Appendix B.

Renewal Form

48. The *Report and Order* indicated the Commission's intent to use an abbreviated license renewal application form for translator and low power television licensees. To this end, the current translator renewal form (FCC Form 348) has been streamlined in conformity with the Commission's actions regarding full service stations. See *Revision of Applications for Renewal of License of Commercial and Noncommercial AM, FM, and Television Licensees,* FCC 81–146, 46 FR 26236, published May 11, 1981, reconsideration denied, 87 F.C.C. 2d 1127. A sample of the revised FCC Form 348 is attached as Appendix C. We have decided not to include any engineering questions in the revised form. Rather than routinely requiring the submission of engineering data at renewal time, the Commission believes—as in the case of full service stations—that operation in full compliance with our engineering requirements can be ensured through the on-site monitoring program administered by the Field Operations Bureau and through reliance upon the participation of the public and affected licensees in promptly bringing serious infractions of our technical rules to the Commission's attention. Moreover, certain questions that have yielded only marginally useful information have been deleted. These include, Question 6, Section I and Questions 7, 8, 10 and 11, Section II of former Form 348. Pursuant to our earlier decision not to impose restraints on cable/translator cross ownership, former Question 9, Section I, is no longer necessary. Finally, former Questions 1 and 9 of Section II have been combined into a single, optional question and Questions 3, 7 and 8 of Section I have been revised to parallel the litigation and citizenship questions asked of renewal applicants of full service stations, *e.g.,* Questions 2 and 3, Section II, FCC Form 303–C. See Appendix C.

Voluntary Assignment or Transfer of Control Application

49. To minimize the number of forms necessary to the new service, we have revised the present FCC Form 345 "Assignment of Translator Stations" to include applications for transfer of control, which are presently filed on FCC Form 315 "Transfer of Control. See Appendix D. The retitled Form 345, "Application for Transfer of Control of a Corporate Licensee or Permittee, or Assignment of License or Permit, for an FM or TV Translator Station or a Low Power Television Station," should also be used for any associated auxiliary stations, such as translator microwave relay stations and UHF translator booster stations. Revised FCC Form 345 should not be used to request approval of the assignment or transfer of any other type of broadcast station. If a licensee or permittee of a full service station is also selling its translator or auxiliary authorizations along with its primary station, it should utilize the FCC Form 314, 315 or 316 filed for the primary station. In the case of an involuntary assignment or transfer of control of a translator or low power television station, FCC Form 316 may still be used. We have made editorial changes to § 73.3540, Application for voluntary assignment or transfer of control, to reflect the revision of Form 345. See Appendix B.

Other Matters

50. Our consideration of the petitions dealt with herein caused us to carefully review our *Report and Order* establishing the low power TV service. As a result of that review, our experiences in processing low power applications and the problems encountered in setting up the automated system for future processing, we have determined that several modifications to the low power rules are necessary. These modifications, based on the entire record to date, will facilitate the rapid implementation of the low power service and the ability of low power stations to provide television service to the public. The rule changes discussed below are reflected, as appropriate, in Appendix B.

51. At paragraph 47 of the *Report and Order,* we addressed the eligibility of low power TV licensees for licenses in the various classes of auxiliary stations used to originate and/or relay programs from remote sites. However, § 74.632 of the rules was not amended to reflect the eligibility of low power licensees as discussed in paragraph 47. This oversight is corrected herein by appropriate amendments to § 74.632 (a) and (e) to reflect the eligibility of low power licensees. See Appendix B.

52. Pursuant to our review of the comments, we discovered that various of the Commission's administrative "housekeeping" rules, included in subpart H of Part 73 of our rules, and presently applicable to all conventional broadcast services, are also relevant to the low power television service. The subjects of these rules range from where to file applications (§ 73.3572) to the requirements for special field test authorizations (§ 73.1515). Application of these rules to the low power TV service would add no regulatory burden to applicants or licensees but merely would formally apply practices and procedures to the low power service that are presently being followed in broadcast practice and rules. Some rules only partially apply to the low power service and, consequently, only the relevant subsections of those rules have been made applicable.[15] Additionally, we have made applicable § 73.653, Operation of TV aural and visual transmitters, which provides that TV aural and visual transmitters shall not be operated separately except in limited situations.

53. We also have found that other existing full service and low power TV rules are inadequate to resolve specific conditions or situations unique to the newer service and, therefore, some rules must be amended. For example, we believe that the protection criterion for full service television, the Grade B contour as defined in § 73.683 and applied to the low power service in § 74.705, is inadequate to forestall the potential interference to full service TV from the new service. Rather than establishing a new contour value for protection of full service television, a more realistic protection contour could be established by using the maximum radiation value and the horizontal radiation pattern in calculating the Grade B contour instead of taking into account the depression angle corrections as specified in § 73.684 of Part 73. This should help ensure that no interference should occur from low power to areas receiving the prescribed signal level for Grade B. (Ch 2–6, 47 dbu; Ch 7–13, 56 dbu; and Ch 14–69, 64 dbu). Therefore, we are amending § 74.705 to reflect the new protection standard.[16]

54. Further, prior to the adoption of the protected contour concept for LPTV and TV translators, our interference determinations were made on a case-by-case basis. However, with the adoption of the new rules, and considering that we currently have over 8000 applications pending, we can no longer use this technique. Instead, we must perform detailed studies that involve determinations of the exact locations of predicted protected and interfering contours. In our work since the *Report and Order* was adopted, we have discovered that we have particular problems in acquiring sufficient data for those existing and proposed conventional translator and low power television operations with directional antennas. We have concluded that the existing rules [subsections (e) and (f) of § 73.685] are not sufficient for these new requirements, although they have served admirably in the context of minimum distance separations and the Table of Assignments. Therefore, we are adopting specific requirements concerning the information which must be submitted by applicants proposing directional antennas. These requirements apply to full service applicants as well, because we need to determine the location of the protected contours of full service stations as well as those for LPTV and TV translator operations. We note that we are in the process of requesting this information from many existing licensees and permittees. Therefore, we are amending § 73.685 for full service and § 74.735 to specify that the required data be properly filed.

55. Finally, despite two previous concerted attempts, we have encountered serious difficulty in obtaining necessary technical data pertaining to existing translator licensees and permittees. This information, required to ascertain the protected contours of existing licensees, is an essential, preliminary step to the further allocation by computer processing of new low power and television translator stations. Due to the absolute necessity of determining protected contours for existing licensees and permittees, we have amended § 74.707(a)(1) of the Rules by adding a note establishing specified mileage contours, relating to authorized power, for translator licensees and permittees which have not heretofore submitted this data in response to our repeated requests.

Conclusion

56. Accordingly, it is ordered, That the Motion of CPBC to accept its late filed reply is granted.

57. It is further ordered, That the petition filed by LEATAC is dismissed for failure to comply with § 1.429(h) of the Commission's rules.[17]

58. It is also ordered, That the petitions of AWRT, Dowart, NAB, CPB, NTA, The Television Center, The L.A. Sheriff's Department, Neighborhood, NAPTS and Rocky Mountain are denied.

59. It is further ordered, That the petitions of Bogner and Microband are granted.

60. It is also ordered, That the petition of IBN is granted as to operator requirements but otherwise denied.[18]

61. It is further ordered, That §§ 73.685(f), 73.3540(c) and (e), 73.3572(a)(1), 74.632, 74.701, 74.703(d), 74.705(a), 74.707(a), 74.731(f), 74.732(d), 74.734(a), 74.735(c), 74.766(e) and 74.780 of the Commission's Rules are amended as set forth in Appendix B, effective June 13, 1983; and FCC Forms 348 and 345 are amended as set forth in Appendices C and D, effective upon approval by the Office of Management and Budget.

62. Finally, it is ordered, That parties to this proceeding and all low power television applicants are referred to our *Report and Order* in the lottery proceeding (Gen. Docket 81–768) which establishes significant application processing procedures for low power television.

63. Authority for these actions is contained in §§ 1, 4(i), 303 (b), (c), (g) and (r) and 403 of the Communications Act of 1934, as amended, and §§ 1.3, 1.412 and 1.429 of the Commission's Rules.

64. For further information concerning this proceeding, contact Barbara Kreisman, Mass Media Bureau, (202) 632–3894.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

The following comments on the petitions for reconsideration were filed:

"Opposition to Petitions for Reconsideration" filed by the National Association of Broadcasters;

"Statement in Support of Partial Reconsideration" filed by McKenna, Wilkinson & Kittner (MWK);

"Opposition to Petitions for Reconsideration" filed by National Cable Television Association (NCTA);

"Comments in support of Petition for Reconsideration" filed by the University of North Carolina (The University);

"Comments" filed by W. L. McIver, Jr.;

"Statement of the Association of Maximum Service Telecasters, Inc.";

"Comments in Support of Reconsideration of National Association of Business and Educational Radio, Inc." (NABER); and

[15] For example, § 73.3525(c) provides specific procedures where there are two or more mutually exclusive applications pending involving a determination pursuant to Section 307(b) of the Communications Act and a settlement agreement is filed by the applicants. Since we determined that Section 307(b) will not apply to this service, subsection (c) of § 73.3525 is not made applicable.

[16] Although this approach is adequate to protect the great majority of full service stations, there will be circumstances in which the results will not fully protect a station utilizing mechanical beam tilt. Low power applicants are cautioned to consider the standards set forth in § 73.683 in calculating the necessary protection of full service stations. Failure to do so could result in a complaint of interference from the full service station.

[17] The arguments presented by LEATAC also were presented in properly filed petitions for reconsideration, and have therefore been discussed herein.

[18] IBN states that it objects to the Commission's failure to adopt rules encouraging the growth of new networks. It also states that it objects to these Commission rules which delay service to urban areas and to the delays in processing applications. IBN does not state which rules it would like to see instituted or abolished in this respect. Therefore, this portion of IBN's petition is denied due to lack of specificity.

Appendix B

PART 73—[AMENDED]

1. Section 73.685 is amended by revising paragraph (f) to read as follows:

§ 73.685 Transmitter location and antenna systems.

* * * * *

(f) Applications proposing the use of directional antenna systems must be accompanied by the following:

(1) Complete description of the proposed antenna system, including the manufacturer and model number of the proposed directional antenna.

(2) Relative field horizontal plane pattern (horizontal polarization only) of the proposed directional antenna. A value of 1.0 should be used for the maximum radiation. The plot of the pattern should be oriented so that 0° corresponds to true North. Where mechanical beam tilt is intended, the amount of tilt in degrees of the antenna vertical axis and the orientation of the downward tilt with respect to true North must be specified, and the horizontal plane pattern must reflect the use of mechanical beam tilt.

(3) A tabulation of the relative field pattern required in (2), above. The tabulation should use the same zero degree reference as the plotted pattern, and be tabulated at least every 10°. In addition, tabulated values of all maxima and minima, with their corresponding azimuths, should be submitted.

(4) Horizontal and vertical plane radiation patterns showing the effective radiated power, in dBk, for each direction. Sufficient vertical plane patterns must be included to indicate clearly the radiation characteristics of the antenna above and below the horizontal plane. In cases where the angles at which the maximum vertical radiation varies with azimuth, a separate vertical radiation pattern must be provided for each pertinent radial direction.

(5) All horizontal plane patterns must be plotted to the largest scale possible on unglazed letter-size polar coordinate paper (main engraving approximately 7" x 10") using only scale divisions and subdivisions of 1, 2, 2.5, or 5 times 10-nth. All vertical plane patterns must be plotted on unglazed letter-size rectangular coordinate paper. Values of field strength on any pattern less than 10% of the maximum field strength plotted on that pattern must be shown on an enlarged scale.

(6) The horizontal and vertical plane patterns that are required are the patterns for the complete directional antenna system. In the case of a composite antenna composed of two or more individual antennas, this means that the patterns for the composite antenna, not the patterns for each of the individual antennas, must be submitted.

* * * * *

2. Section 73.3540 is amended by revising paragraph (c), removing existing subparagraph (d)(1), redesignating existing paragraph (e) as paragraph (f) and adding new paragraph (e) to read as follows:

§ 73.3540 Application for voluntary assignment or transfer of control.

* * * * *

(c) Application for consent to the assignment of construction permit or license must be filed on FCC Form 314 "Assignment of License" or FCC Form 316 "Short Form" (See paragraph (f) below).

(d) * * *

(e) Application for consent to the assignment of construction permit or license or to the transfer of control of a corporate licensee or permittee for an FM or TV translator station, a low power TV station and any associated auxiliary stations, such as translator microwave relay stations and UHF translator booster stations, only must be filed on FCC Form 345 "Application for Transfer of Control of Corporate Licensee or Permittee, or Assignment of License or Permit for an FM or TV translator Station, or a Low Power TV Station."

3. Section 73.3572 of the FCC Rules is amended by revising subparagraph (a)(1) to read:

§ 73.3572 Processing of TV broadcast, low power TV, translator station applications.

(a) * * *

(1) In the first group are applications for new stations or major changes in the facilities of authorized stations. A major change for TV broadcast stations authorized under this part is any change in frequency or station location, or any change in the power or antenna location or height above average terrain (or combination thereof) that would result in a change of 50% or more of the area within the Grade B contour of the station. (A change in area is defined as the sum of the area gained and the area lost as a percentage of the original area.) In the case of low power TV and TV translator stations authorized under Part 74, it is any change in:

(i) Frequency (output channel) assignment;

(ii) Transmitting antenna system including the direction of the radiation, directive antenna pattern or transmission line;

(iii) Antenna height;

(iv) Antenna location exceeding 200 meters;

(v) Authorized operating power; or

(vi) Community or area to be served. However, if the proposed modification of facilities, other than a change in frequency, will not increase the signal range of the station in any horizontal direction, the modification will not be considered a major change. Provided further that the FCC may, within 15 days after the acceptance of any other application for modification of facilities advise the applicant that such application is considered to be one for a major change and therefore subject to the provisions of §§ 73.3580 and 1.1111 pertaining to major changes.

* * * * *

§ 74.632 [Amended]

4. a. The first sentence in paragraph (a) of § 74.632 is revised to read as follows:

"A license for a TV pickup, TV STL, or TV relay station will be issued only to licensees of TV broadcast stations and, on a secondary basis, licensees of low power TV stations."

b. The first sentence in paragraph (e) of § 74.632 is revised to read as follows:

"A license for a TV translator relay station will be issued only to licensees of low power TV and TV translator stations."

5. Section 74.701 is amended by adding new paragraph (h) to read as follows:

§ 74.701 Definitions

* * * * *

(h) *Local origination:* Program origination if the parameters of the program source signal, as it reaches the transmitter site, are under the control of the low power TV station licensee. Transmission of television program signals generated at the transmitter site constitutes local origination. Local origination also includes transmission or programs reaching the transmitter site via television STL stations, but does not include transmission of signals obtained from either terrestrial or satellite common carrier microwave feeds or low power stations.

6. Section 74.703 is amended by revising paragraph (d) to read:

§ 74.703 Interference.

* * * * *

(d) When a low power TV or TV translator station causes interference to a CATV system by radiations within its assigned channel at the cable headend or on the output channel of any system converter located at a receiver, the earlier user, whether cable system or low power TV or TV translator station, will be given priority on the channel, and the later user will be responsible for correction of the interference. When a low power TV or TV translator station causes interference to an MDS of ITFS system by radiations within its assigned channel on the output channel of any system converter located at a receiver, the earlier user, whether MDS system or low power TV or TV translator station, will be given priority on the channel, and the later user will be responsible for correction of the interference.

* * * * *

7. Section 74.705 is amended by revising paragraph (a) to read as follows:

§ 74.705 TV broadcast station protection.

(a) The TV broadcast station protected contour will be its Grade B contour signal level as defined in § 73.683 and calculated from the authorized maximum radiated power (without depression angle correction), the horizontal radiation pattern, height above average terrain in the pertinent direction, and the appropriate chart from § 73.699.

* * * * *

8. Section 74.707 is amended by inserting the following text after paragraph (a)(1)(iii) to preceed paragraph (b):

§ 74.707 Low power TV and TV translator station protection.

(a) * * *

(1) * * *

(iii) * * *

Existing licensees and permittees that did not furnish sufficient data required to calculate the above contours by April 15, 1983 are assigned protected contours having the following radii:

Up to 0.001 kW VHF/UHF—1 mile (1.6 km) from transmitter site

Up to 0.01 kW VHF; up to 0.1 k/W UHF—2 miles (3.2 km) from transmitter site

Up to 0.1 kW VHF; up to 1 kW UHF—4 miles (6.4 km) from transmitter site

New applicants must submit the required information: they cannot rely on this table.

* * * * *

9. Section 74.731 is amended by revising paragraph (f) to read as follows:

§ 74.731 Purpose and permissible service.

* * * * *

(f) A locally generated radio frequency signal similar to that of a TV broadcast station and modulated with visual and aural information may be connected to the input terminals of a television broadcast translator or low power station for the purposes of transmitting still photographs, slides and voice announcements. The radio frequency signals shall be on the same channel as the normally used off-the-air signal being rebroadcast. When transmitting originations concerning financial support or public service announcements, connection of the locally generated signals shall be made automatically either by means of a time switch or upon receipt of a control signal from the TV station being rebroadcast designed to actuate the switching circuit. The switching circuit will be so designed that the input circuit will be returned to the off-the-air signal within 30 seconds. The connection for emergency transmissions may be made manually. The apparatus used to generate the local signal which is used to modulate the translator or low power station must be capable of producing a visual or aural signal or both which will provide acceptable reception on television receivers designed for the transmission standards employed by TV broadcast stations. The visual and aural materials so transmitted shall be limited to emergency warnings of imminent danger, to local public service announcements and to seeking or acknowledging financial support deemed necessary to the continued operation of the station. Accordingly, the originations concerning financial support and PSAs are limited to 30 seconds each, no more than once per hour. Acknowledgements of financial support may include identification of the contributors, the size and nature of the contribution and advertising messages of contributors. Emergency transmissions shall be no longer or more frequent than necessary to protect life and property.

10. Section 74.732 is amended by revising paragraph (d) to read as follows:

§ 74.732 Eligibility and licensing requirements.

* * * * *

(d) The FCC will not act on applications for new low power TV or TV translator stations or for changes in facilities of existing stations when such changes will result in a major change until at least 30 days have elapsed since the date of which "Public Notice" is given by the FCC of acceptance for filing of such application, in order to afford an opportunity for competing applications to be filed.

* * * * *

11. Section 74.734 is amended by revising the introduction of paragraph (a) to read:

§ 74.734 Attended and unattended operation.

(a) In all circumstances other than during local origination (see § 74.701(h)), during which the operator must be in continuous attendance at the transmitter site, at a remote control point or at the program source, low power TV and TV translator stations may be operated without a licensed radio operator in attendance if the following requirements are met:

* * * * *

12. Section 74.735 is amended by revising paragraph (c) to read as follows:

§ 74.735 Power limitations.

* * * * *

(c) No limit is placed upon the effective radiated power that may be obtained by the use of horizontally or vertically polarized directive transmitting antennas, providing the provisions of §§ 74.705, 74.707 and 74.709 are met. Applications proposing the use of directional antenna systems must be accompanied by the following:

(1) Complete description of the proposed antenna system, including the manufacturer and model number of the proposed directional antenna. It is *not* acceptable to label the antenna with only a generic term such as "Yagi" or "Dipole". A specific model number must be provided. In the case of individually designed antennas with no model number, or in the case of a composite antenna composed of two or more individual antennas, the antenna should be described as a "custom" or "composite" antenna, as appropriate. A full description of the design of the antenna should also be submitted.

(2) Relative field horizontal plane pattern (horizontal polarization only) of the proposed directional antenna. A value of 1.0 should be used for the maximum radiation. The plot of the pattern should be oriented so that 0° corresponds to the maximum radiation of the directional antenna or, alternatively in the case of a symmetrical pattern, to the line of symmetry. The 0° on the plot should be referenced to the actual azimuth with respect to true North.

VOL
48
ISS
93
MY
12
1983
UMI

(3) A tabulation of the relative field pattern required in (2), above. The tabulation should use the same zero degree reference as the plotted pattern, and be tabulated at least every 10°. In addition, tabulated values of all maximas and minimas, with their corresponding azimuths, should be submitted.

(4) Horizontal plane radiation pattern showing the effective radiated power, in dBk, for each direction.

(5) All horizontal plane patterns must be plotted to the largest scale possible on unglazed letter-size polar coordinate paper (main engraving approximately 7" x 10") using only scale divisions and subdivisions of 1, 2, 2.5, or 5 times 10-nth. Values of field strength on any pattern less than 10% of the maximum field strength plotted on that pattern must be shown on an enlarged scale.

(6) The horizontal plane patterns that are required are the patterns for the complete directional antenna system. In the case of a composite antenna composed of two or more individual antennas, this means that the patterns for the composite antenna composed of two or more individual antennas, not the patterns for each of the individual antennas, must be submitted.

* * * * *

13. Section 74.766 is amended by revising paragraph (e) to read as follows:

§ 74.766 Low power TV and TV translator operator requirements.

* * * * *

(e) An operator holding any class of FCC operator license or permit, except the Marine Operator Permit, must be on duty in charge of the transmitting apparatus of a low power TV station during all period of local origination as defined in § 74.701(g).

14. Section 74.780 is revised to read as follows:

§ 74.780 Broadcast regulations applicable to translators and low power stations.

The following rules are applicable to TV translator stations and low power TV stations:

Section 73.653—Operation of TV aural and visual transmitters.
Section 73.658—Affiliation agreements and network program practices; territorial exclusivity in nonnetwork program arrangements.
Part 73, Subpart G—Emergency Broadcast System
Section 73.1201—Station identification.
Section 73.1205—Fraudulent billing practices.
Section 73.1206—Broadcast of telephone conversations.
Section 73.1207—Rebroadcasts.
Section 73.1208—Broadcast of taped, filmed or recorded material.
Section 73.1211—Broadcast of lottery information.
Section 73.1212—Sponsorship identification; list retention; related requirements.
Section 73.1216—Licensee conducted contests.
Section 73.1510—Experimental authorizations.
Section 73.1515—Special field test authorizations.
Section 73.1615—Operation during modifications of facilities.
Section 73.1635—Special temporary authorizations (STA).
Section 73.1650—International broadcasting agreements.
Section 73.1680—Emergency antennas.
Section 73.1940—Broadcasts by candidates for public office.
Section 73.2080—Equal employment opportunities (for low power television stations only).
Section 73.3511—Applications required.
Section 73.3512—Where to file; number of copies.
Section 73.3513—Signing of applications.
Section 73.3514—Content of applications.
Section 73.3517—Contingent applications.
Section 73.3518—Inconsistent or conflicting applications.
Section 73.3519—Repetitious applications.
Section 73.3525(a), (b), (d), (f), (g), (h) and (i)—Agreements for removing applications conflicts.
Section 73.3538(a)(1)(3)(4), (b)(2)—Applications to make changes in existing station.
Section 73.3541—Application for involuntary assignment or transfer of control.
Section 73.3542—Application for temporary authorization.
Section 73.3544—Application to obtain a modified station license.
Section 73.3545—Application for permit to deliver programs to foreign stations.
Section 73.3561—Staff consideration of applications requiring Commission action.
Section 73.3562—Staff consideration of applications not requiring action by the Commission.
Section 73.3568—Dismissal of applications.
Section 73.3572—Application processing.
Section 73.3587—Informal objections.
Section 73.3593—Designation for hearing.
Section 73.3599—Forfeiture of construction permit.
Section 73.3601—Simultaneous modification and renewal of license.
Section 73.3603—Special waiver procedure applicable to applications.
Section 73.3612—Annual employment report (for low power television stations only).

Appendix C

United States of America, Federal Communications Commission, Washington, D.C. 20554

Application for Renewal of License for Translator or Low Power Television Broadcast Station

1. Name of applicant

Street Address

Call Letters
City
State
Zip Code

2. This application is for: —— FM Translator —— TV Translator —— LPTV—

3. Have the Annual Employment Reports (FCC Form 395) of the LPTV applicant been filed with the Commission as required by Section 73.3612 of the rules?
—— Yes —— No
If No, attach as Exhibit No. and explanation.

4. Is the applicant in compliance with the provisions of Section 310 of the Communications Act of 1934, as amended, relating to interests of aliens and foreign governments?
—— Yes —— No
If No, attach as Exhibit No. and explanation.

5. Since the filing of the applicant's last renewal application for this station or other major application, has an adverse finding been made, a consent decree been entered or final action been approved by any court or administrative body with respect to the applicant or parties to the application concerning any civil or criminal suit, action or proceeding brought under the provisions of any federal, state, territorial or local law relating to the following: any felony; lotteries; unlawful restraints or monopolies; unlawful combinations; contracts or agreements in restraint of trade; the use of unfair methods of competition; fraud; unfair labor practices; or discrimination?
—— Yes —— No
If Yes, attach as Exhibit No. —— a full description, including identification of the court or administrative body, proceeding by file number, the person and matters involved, and the disposition of litigation.

6. If the applicant is rebroadcasting the signals of another TV or FM station,
(a) Identify the station being broadcast by:
—— Call Sign —— Channel No. —— Location
(b) Has the required retransmission consent been obtained?
—— Yes —— No
If No, attach as Exhibit No. an explanation.

The Applicant hereby waives any claim to the use of any particular frequency or of the ether as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. (See Section 304 of the Communications Act of 1934, as amended.)

The Applicant acknowledges that all the statements made in this application and attached exhibits are considered material representations and that all the exhibits are a material part hereof and are incorporated herein as set out in full in the application.

CERTIFICATION

I certify that the statements in this application are true, complete and correct to the best of my knowledge and belief, and are made in good faith.

Signed and dated this —— day of ——— 19—

Name of Applicant
By Signature
Title

WILLFUL FALSE STATEMENTS MADE ON THIS FORM ARE PUNISHABLE BY FINE AND IMPRISONMENT, U.S. CODE, TITLE 18, SECTION 1001

Question-by-Question Guidelines (FCC Form 348)

1. The name of the applicant should be stated exactly as it appears on the station's existing license. The current street address or post office box used by the applicant for receipt of Commission correspondence should be set forth.

2. The applicant should specifically indicate the nature of the station for which renewal is requested. See Rules 74.1201(a), 74.701(a), and 74.701(f) for the definitions of a FM translator, TV translator, and LPTV broadcast station, respectively.

3. Every LPTV station with five or more full-time employees must file an employment report on or before May 31 of each year.

4. Aliens, foreign governments and corporations, and corporations of which any officer or director is an alien or of which less than 80% of the capital stock is owned or voted by U.S. citizens, are prohibited from holding a broadcast station license. Where a corporate licensee is directly or indirectly controlled by another corporation, of which any officer or more than 25% of the directors are aliens or of which less than 75% of that corporation's stock is owned or voted by U.S. citizens, the Commission must consider whether denial or renewal would serve the public interest. Licensees are expected to employ reasonable, good faith methods to ensure the accuracy and completeness of their citizenship representations.

5. This question is limited to adverse actions and judgments adjudicated or entered into within the preceding license term. Reportable activities consist of judgments or decrees, including settlement, consent, and like agreements, where the misconduct occurred either in the operation of the station for which renewal is requested or in the conduct of the other broadcast and non-broadcast activities of the renewal applicant and parties to that application, such as all partners and all corporate officers, directors, and stockholders with a 10% or more ownership interest in the applicant.

6. Section 325(a) of the Communications Act of 1934, as amended, prohibits any broadcast station from rebroadcasting the program (or any part thereof) of another broadcasting station without the express authority of the originating station.

****FCC NOTICE TO INDIVIDUALS REQUIRED BY THE PRIVACY ACT****

The solicitation of personal information requested in this application is authorized by the Communications Act of 1934, as amended. The principal purpose for which the information will be used is to determine if the benefit requested is consistent with the public interest. The staff, consisting variously of attorneys, accountants, engineers, and application examiners, will use the information to determine whether the application should be granted, denied, dismissed, or designated for hearing. If all the information requested is not provided, the application may be returned without action having been taken upon it or its processing may be delayed while a request is made to provide the missing information. Accordingly, every effort should be made to provide all necessary information.

THE FOREGOING NOTICE IS REQUIRED BY THE PRIVACY ACT OF 1974, PUB. L. 93-579, DECEMBER 31, 1974, 5 U.S.C. 552a(e)(3).

Appendix D

Federal Communications Commission,
Washington, D.C. 20554

Instructions for FCC Form 345

Application for Transfer of Control of a Corporate Licensee or Permittee, or Assignment of License or Permit, for an FM or TV Translator Station, or a Low Power Television Station

(FCC Form 345 Attached)

Instructions and Information

1. This form is to be used to apply for a transfer of control of a corporate licensee or permittee, or assignment of license or permit, for an FM or TV translator station, or a low power television station. It should also be used for any associated auxiliary stations, such as translator microwave relay stations (see § 74.602) and UHF translator booster stations (see § 74.733). DO NOT USE THIS FORM if a commonly owned or controlled primary station is filing an application for transfer of control or an assignment of a permit or license. In that case, the application of the licensee or permittee of the primary station will include all translator/auxiliary authorizations when filing its application on FCC Form 314, 315 or 316, whichever is applicable.

2. Prepare and file three copies of the attached form with the Federal Communications Commission, Washington, D.C. 20554.

3. Number any exhibits serially in the spaces provided in the body of the form. Each exhibit must be dated and clearly indicate whether it was prepared by the assignor/transferor (seller) or the assignee/transferee (buyer).

4. Information requested in the attached form already on file with the Commission need not be refiled in this application, provided (1) the information was submitted by or on behalf of the parties to this application; (2) the information is identified fully by reference to the file number (if any), the FCC form number, and the filing date of the application or other form, along with the page or paragraph referred to; and (3) the party states, "No change since date of filing." The material so identified will be considered incorporated in the attached application. The incorporated application or other form will thereafter be open to public inspection in its entirety.

5. The name of the assignor/transferor must be stated exactly as it appears on the authorization to be transferred or assigned.

6. For a corporation or government entity, the name of the assignee/transferee must be set out as the full, official name; for a partnership, the names of all partners and the name under which the partnership does business; for an unincorporated association, the name of the association, the name of an executive officer and the office held.

7. BOTH PARTIES TO THE TRANSACTION MUST SIGN THE APPLICATION in the spaces provided. Depending on the nature of the applicant, the application should be signed as indicated: for a sole proprietor, personally; for a partnership, by a general partner; for a corporation, by an officer; for an unincorporated association, by a member who is an officer; for a government entity, by such duly elected or appointed official as is competent under the laws of the particular jurisdiction. Counsel may sign the application for his or her client, but only in case of the applicant's disability or absence from the United States. In such cases, counsel must separately set forth why the application is not signed by the client. In addition, as to any matter stated on the basis of belief instead of personal knowleige, counsel shall separately set forth the reasons for believing that such statements are true.

8. Before filling out this application, the assignee/transferee should familiarize itself with the Communications Act of 1934, and with Parts 1 and 74 of the Commission's Rules.

9. Parties to the application. *If the applicant is an individual,* that person is a party to this application. *If the applicant is a partnership,* each general and limited partner (including "silent" partners) having an interest of one percent or more in profits is a party to the application. *If the applicant is a corporation,* all officers and directors, and all persons or entities who are the beneficial or record owners or have the right to vote any capital stock, membership or ownership interests of one percent or more, or subscribers to such interests, shall be considered parties to this application. If any corporation or other legal entity owns stock in the applicant, its officers, directors and persons or entities who are the beneficial or record owners or have the right to vote capital stock, membership or ownership interests of one percent or more, or subscribers to such interest, of that entity shall also be considered parties to this application. *For any other applicant,* all executive officers, members of the governing board and owners or subscribers to membership or ownership interests of one percent or more in the applicant.

10. United States Citizenship. Section 310 of the Communications Act requires that United States citizens must control broadcast stations, including FM and TV translator

VOL 48 ISS 93 MY 12 1983 UMI

stations, and low power television stations. Specifically, the FCC cannot assign or transfer a license or construction permit to an alien or the representative of an alien, to a foreign government or a representative of a foreign government, or to a corporation organized under the laws of a foreign government. Similarly, the FCC cannot transfer a license or construction permit to a corporate applicant that has any alien officers or directors, or that has more than 20 percent of its capital stock owned or voted by aliens or their representatives, foreign governments or their representatives, or by a corporation organized under the laws of a foreign country. Finally, if the corporate applicant is directly or indirectly controlled by another corporation, the FCC cannot grant a transfer or assignment application if the other corporation has any officer who is an alien, or more than 25 percent of the directors are aliens, or more than 25 percent of its stock is owned or voted by aliens or their representatives, foreign governments or their representatives, or a corporation organized under the laws of a foreign country. The applicant must determine the citizenship of each officer and director. It must also determine the citizenship of each person who owns or votes shares. For large corporations, a sample survey using a recognized statistical method is acceptable for determining the citizenship of those who own or vote shares.

11. Applicants seeking to acquire a low power television station, whether by assignment of license or permit, or by transfer of control, are required to afford equal employment opportunity to all qualified persons and to refrain from discriminating in employment and related benefits on the basis of race, color, religion, national origin or sex. See Section 73.2080 of the Commission's Rules. Pursuant to these requirements, an applicant that proposes to employ five or more full-time station employees must establish a program designed to assure equal employment opportunity for women and minority groups (that is, Blacks not of Hispanic origin, Asian or Pacific Islanders, American Indians or Alaskan Natives and Hispanics.) This is submitted to the Commission as the Model EEO Program Form. If minority group representation in the available labor force is less that five percent in the aggregate, a program for minority group members is not required. A program must be filed, however, for women because they comprise a significant percentage of virtually all labor forces. If an applicant proposes to employ less than five full-time employees, no EEO program for women or minorities need be filed. Guidelines for developing an Equal Employment Opportunity program are set forth as a separate Model EEO Program.

12. Public Notice Requirement:

(1) Section 73.3580 of the Commission's Rules requires that applicants for assignment or transfer of a construction permit or license give local notice in a newspaper of general circulation in the community in which the station is located. Local notice is also required to be broadcast over the station, if it is capable of originating such an announcement. However, if the station is the only operating station in its broadcast service which is located in the community involved, publication of the notice in a newspaper is not required, if the announcement can be broadcast. This public notice requirement also applies with respect to major amendments, as defined in Section 73.3578(b) of the Rules.

(2) Completion of publication may occur within 30 days before or after tendering of the application. Compliance or intent to comply with the public notice requirements must be *certified* in this application. The information that must be contained in the notice of filing is described in Paragraph (g) of Section 73.3580 of the Rules. Proof of publication need not be filed with this application.

13. Be sure all necessary information is furnished and all paragraphs are fully answered. If any portions of the application are not applicable, state so specifically. Defective or Incomplete Applications May Be Returned Without Consideration.

14. Do not file this information and instruction sheet with the application.

FCC Notice to Individuals Required by the Privacy Act

The solicitation of personal information requested in this application is authorized by the Communications Act of 1934, as amended. The principal purpose(s) for which the information will be used is to determine if the benefit requested is consistent with the public interest.

The staff, consisting variously of attorneys, accountants, engineers, and application examiners, will use the information to determine whether the application should be granted, denied, dismissed, or designated for hearing.

If all the information requested is not provided, the application may be returned without action having been taken upon it or its processing may be delayed while a request is made to provide the missing information. Accordingly, every effort should be made to provide all necessary information.

The Foregoing Notice is Required by the Privacy Act of 1974, Pub. L. 93–579, December 31, 1974, 5 U.S.C. 552a(e)(3).

United States of America, Federal Communications Commission, Washington, D.C. 20554

Application for Transfer of Control of a Corporate Licensee or Permittee, or Assignment or License or Permit, for an FM or TV Translator Station, or a Low Power Television Station

(Carefully read the instructions before filling out the form. Do not file the instructions)

Section I–Assignor/Transferor

1. Application for:

A. ☐ Consent to assignment or ☐ Consent to transfer of control

B. For a ☐ television translator, ☐ FM translator, or ☐ a low power television station.

2. Name of Assignor/Transferor:

Street Address ——————
City ——————
State ——————
Zip Code ——————
Telephone No. ——————
(include area code)

3. Authorization which is proposed to be assigned or transferred

(a) Call letters

(b) Location

4. Note.—Where licensee or permits have been granted to entities claiming preferences in the lottery selection process, the license or permit must ordinarily be held for a period of at least one year from the beginning of program tests. Is the assignor or transferor in compliance with this requirement? Yes—— No——. If no, submit as Exhibit —— an appropriate showing. See section 73.3597 of the Commission's Rules.

5. Call letters of any auxiliary stations which are to be assigned:

6. Attach as Exhibit No. —— a copy of the contract or agreement to assign the property and facilities of the station. If there is only an oral agreement, reduce the terms to writing and attach. The material submitted must include the complete agreement between the parties.

7. State in Exhibit No. —— whether the assignor, or any partner, officer, director, member of the assignor's governing board or any stockholder owning 10% or more of the assignor's stock has had any interest in or connection with any dismissed and/or denied application; or any FCC license that has been revoked.

The Exhibit should include the following information: (i) name of party with such interest; (ii) nature of interest or connection, giving dates; (iii) call letters or file number of applications; or docket number; (iv) location.

8. Since the filing of the assignor's/transferor's last renewal application for the authorization being assigned or transferred, or other major application, has an adverse finding been made, a consent decree been entered or adverse final action been approved by any court or administrative body with respect to the assignor/transferor or any partner, officer, director, member of the assignor's governing board or any stockholder owning 10% or more of assignor's/transferor's stock, concerning any civil or criminal suit, action or proceeding brought under the provisions of any federal, state, territorial or local law relating to the following: any felony; lotteries; unlawful restraints or monoplies; unlawful combinations, contracts or agreements in restraint of trade; the use of unfair methods of competition; fraud; unfair labor practices: or discrimination? —— Yes —— No

If Yes attach as Exhibit No. —— a full description, including identification of the court or administrative body, proceeding by file number, the person and matters involved, and the disposition or current status of the matter.

Section II—Assignee/Transferee

1. Name of Assignee/Transferee
Street Address ——————
(or other identification)
City ——————
State ——————
Zip Code ——————
Telephone No. ——————
(include area code)

2. Assignee/Transferee is:

. —— an individual; —— a general partnership; —— a limited partnership; —— a corporation; —— other.

3. If the applicant is an unincorporated association or a legal entity other than an individual, partnership or corporation, describe in Exhibit No.—— the nature of the applicant.

4. (a) Is the applicant in compliance with the provisions of Section 310 of the Communications Act of 1934, as amended, relating to interests of aliens and foreign governments? —— Yes —— No

(b) Will any funds, credit, or other consideration for construction, purchase or operation of the station be provided by aliens, foreign entities, domestic entities controlled by aliens, or their agents? —— Yes —— No

If Yes, provide particulars as Exhibit No. ——.

5. (a) Has an adverse finding been made, adverse final action taken or consent decree approved by any court or administrative body as to the applicant or any party to the application in any civil or criminal proceeding brought under the provisions of any law related to the following: any felony; lotteries; unlawful restraints or monopolies; unlawful combinations, contracts or agreements in restraint of trade; the use of unfair methods of competition; fraud; unfair labor practices; or discrimination? (See instruction 9 for the definition of a "party" to this application.) —— Yes —— No

(b) Is there now pending in any court or administrative body any proceeding involving any of the matters referred to in 5.(a)? —— Yes —— No

If the answer to (a) or (b) above is YES, attach as Exhibit No. —— a full disclosure concerning the persons and matters involved, identifying the court or administrative body and the proceeding (by dates and file numbers), stating the facts upon which the proceeding was based or the nature of the offense committed, and disposition or current status of the matter.

6. The applicant certifies that sufficient net liquid assets are on hand or available from committed sources to consummate the transaction and operate the facilities for three months. —— Yes —— No

7. The applicant certifies that: (a) it has a reasonable assurance of present commitments from each donor, from each party agreeing to furnish capital, from each bank, financial institution or others agreeing to lend funds, and from each equipment supplier agreeing to extend credit; (b) it has determined that a reasonable assurance exists that all such sources (excluding banks, financial institutions and equipment suppliers) have sufficient net liquid assets to meet these commitments; and (c) it can and will meet all contractual requirements as to collateral, guarantees, and capital investment or donations: —— Yes —— No

For Low Power Television Applicants Only.

8. Low power television stations must offer a broadcast program service: a nonprogram service is not permitted. Therefore, submit as Exhibit No. —— a brief description, in narrative form, of the proposed program service.

9. Does the low power television applicant propose to employ five or more fulltime employees? —— Yes —— No

If the answer is YES, the applicant must include an EEO program called for in the separate Five Point Model EEO Program.

Assignee's/Transferee's Certification

The Assignee/Transferee hereby waives any claim to the use of any particular frequency as against the regulatory power of the United States because of the previous use of the same, whether by license or otherwise, and requests an authorization in accordance with this application. (See Section 304 of the Communications Act of 1934, as amended.)

The Assignee/Transferee acknowledges that all its statements made in this application and attached exhibits are considered material representations, and that all of its exhibits are a material part hereof and are incorporated herein.

The Assignee/Transferee represents that this application is not filed by it for the purpose of impeding, obstructing or delaying determination on any other application with which it may be in conflict.

In accordance with Section 1.65 of the Commission's Rules, the Assignee/Transferee has a continuing obligation to advise the Commission, through amendments, of any substantial and significant changes in the information furnished.

Willful False Statements Made on This Form Are Punishable by Fine and Imprisonment

U.S. CODE, TITLE 18, SECTION 1001

I certify that the assignee's/transferee's statements in this application are true, complete, and correct to the best of my knowledge and belief, and are made in good faith.

State ——————

(☐) Service: AM ☐ FM ☐ TV ☐ Other (Specify) ☐

Instructions

Applicants seeking authority to construct a new low power television broadcast station, applicants seeking authority to obtain assignment of the construction permit or license of such a station, and applicants seeking authority to acquire control of an entity holding such construction permit or license are required to afford equal employment opportunity to all qualified persons and to refrain from discriminating in employment and related benefits on the basis of race, color, religion, national origin or sex. See Section 73.2080 of the Commission's Rules. Pursuant to these requirements, and applicant who proposes to employ five or more fulltime station employees must establish a program designed to assure equal employment opportunity for women and minority groups (that is, Blacks not of Hispanic origin, Asians or Pacific Islanders, American Indians or Alaskan Natives and Hispanics.) This is submitted to the Commission as the Model EEO Program. If minority group representation in the available labor force is less than five percent *(in the aggregate)*, a program for minority group members is not required. In such cases, a statement so indicating must be set forth in the EEO model program. However, a program must be filed for women since they comprise a significant percentage of virtually all area labor forces. If an applicant proposes to employ less than five fulltime employees, no EEO program for women or minorities need be filed.

Guidelines for a Model EEO Program and a Model EEO Program are attached.

Note.—Check appropriate box, sign the certification below and retun to FCC.

☐ Station will employ less than 5 fulltime employees; therefore no written program is being submitted.

☐ Station will employ 5 or more fulltime employees. Our 5 point program is attached.

FCC Notice to Individuals Required by the Privacy Act

The solicitation of personal information requested in this application is authorized by the Communications Act of 1934, as amended. The principal purpose for which the information will be used is to determine if the benefit requested is consistent with the public interest. The staff, consisting variously of attorneys, accountants, engineers and application examiners, will use the information to determine whether the application should be granted, denied, dismissed, or designated for hearing. If all the information requested is not provided, the application may be returned without action having been taken upon it or its processing may be delayed while a request is made to provide the missing information. Accordingly, every effort should be made to provide all necessary information.

The foregoing notice is required by the Privacy Act of 1974, Pub. L. 93–579, December 31, 1974, 5 U.S.C. 552a(e)(3).

Guidelines to the Model EEO Program

The model EEO program adopted by the Commission for construction permit applicants, assignees and transferees contains five sections designed to assist the applicant in establishing an effective EEO program or its station. The specific elements which should be addressed are as follows:

I. General Policy

The first section of the program should contain a statement by the applicant that it will afford equal employment opportunity in all personnel actions without regard to race, color, religion, national origin or sex, and that it has adopted an EEO program which is designed to fully utilize the skills of minorities and women in the relevant available labor force.

II. Responsibility for Implementation

This section calls for the name (if known) and title of the official who will be designated by the applicant to have responsibility for implementing the station's program.

III. Policy Dissemination

The purpose of this section is to disclose the manner in which the station's EEO policy will be communicated to employees and prospective employees. The applicant's program should indicate whether it: (a) intends to utilize an employment application form which contains a notice informing job applicants that discrimination is prohibited and that persons who believe that they have been discriminated against may notify appropriate governmental agencies; (b) will post a notice which informs job applicants and employees that the applicant is an equal opportunity employer and that they may notify appropriate governmental authorities if they believe that they have been discriminated against; and (c) will seek the cooperation of labor unions, if represented at the station, in the implementation of its EEO program and in the inclusion of nondiscrimination provisions in union contracts. The applicant should also set forth any other methods it proposes to utilize in conveying its EEO policy (e.g., orientation materials, on-air announcements, station newsletter) to employees and prospective employees.

IV. Recruitment

The applicant should specify the recruitment sources and other techniques it proposes to use to attract minority and female job applicants. Not all of the categories of recruitment sources need be utilized. The purpose of the listing is to assist the applicant in developing specialized referral sources to establish a pool of minorities and women who can be contacted as job opportunities occur. Sources which subsequently prove to be nonproductive should not be relied on and new sources should be sought.

V. Training

Training programs are not mandatory. Each applicant is expected to decide, depending upon its own individual situation, whether a training program is feasible and would assist it in its effort to increase the pool of available minority and female applicants. Additionally, the applicant may set forth any other assistance it proposes to give to students, schools or colleges which is designed to be of benefit to minorities and women interested in entering the broadcasting field. The beneficiary of such assistance should be listed, as well as the form of assistance, such as contributions to scholarships, participation in work study programs, and the like.

Model Equal Employment Opportunity Program

I. General Policy

It will be our policy to provide equal employment opportunity to all qualified individuals without regard to their race, color, religion, national origin or sex in all personnel actions including recruitment, evaluation, selection, promotion, compensation, training and termination.

It will also be our policy to promote the realization of equal employment opportunity through a positive, continuing program of specific practices designed to ensure the full realization of equal employment opportunity without regard to race, color, religion, national origin or sex.

To make this policy effective, and to ensure conformance with the Rules and Regulations of the Federal Communications Commission, we have adopted an Equal Employment Opportunity Program which includes the following elements:

II. Responsibility for Implementation

(Name/Title) ———, will be responsible for the administration and implementation of our Equal Employment Opportunity Program. It will also be the responsibility of all persons making employment decisions with respect to recruitment, evaluation, selection, promotion, compensation, training and termination of employees to ensure that our policy and program is adhered to and that no person is discriminated against in employment because of race, color, religion, national origin or sex.

III. Policy Dissemination

To assure that all members of the staff are cognizant of our equal employment opportunity policy and their individual responsibilities in carrying out this policy, the following communication efforts will be made:

( ) The station's employment application form will contain a notice informing prospective employees that discrimination because of race, color, religion, national origin or sex is prohibited and that they may notify the appropriate local, State or Federal agency if they believe they have been the victims of discrimination.

( ) Appropriate notices will be posted informing applicants and employees that the station is an Equal Opportunity Employer and of their right to notify an appropriate local, State, or Federal agency if they believe they have been the victims of discrimination.

( ) We will seek the cooperation of unions, if represented at the station, to help implement our EEO program and all union contracts will contain a nondiscrimination clause.

( ) Other (specify)

IV. Recruitment

To ensure nondiscrimination in relation to minorities and women, and to foster their full consideration in filling job vacancies, we propose to utilize the following recruitment procedures:

( ) We will attempt to maintain systematic communication, both orally and in writing, with a variety of minority and women's organizations to encourage the referral of qualified minority and female applicants. Examples of organizations we intend to contact are:

———

———

( ) In addition to the organizations noted above, which specialize in minority and female candidates, we will deal only with employment services, including State employment agencies, which refer job candidates without regard to their race, color, religion, national origin or sex. Examples of these employment referral services are:

———

———

( ) When we recruit prospective employees from educational institutions such recruitment efforts will include area schools and colleges with significant minority and female enrollments. Educational institutions to be contacted for recruitment purposes are:

———

———

( ) When utilizing media for recruitment purposes, help-wanted advertisements will always include a notice that we are an Equal Opportunity Employer and will contain no indication, either explicit or implied, of a preference for one sex over another.

( ) When we place employment advertisements in printed media some of such advertisements will be placed in media which have significant circulation or are of particular interest to minorities and women. Examples of publications to be utilized are:

———

———

( ) We will encourage employees, particularly minority and female employees, to refer minority and female candidates for existing and future job openings.

V. Training

( ) Station resources and/or needs will be such that we will be unable or do not choose to institute specific programs for upgrading the skills of employees.

( ) We will provide on-the-job training to upgrade the skills of employees.

( ) We will provide assistance to students, schools or colleges in programs designed to enable minorities and women to compete in the broadcast employment market on an equitable basis:

School or Other Beneficiary

Department of Transportation

Research and Special Programs Administration

Nuclear Assurance Corporation; Application for Inconsistency Ruling; Public Notice and Invitation To Comment

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

[Docket Nos. IRA-20 through IRA-27]

Nuclear Assurance Corporation; Application for Inconsistency Ruling; Public Notice and Invitation To Comment

AGENCY: Research and Special Programs Administration, Materials Transportation Bureau (MTB), DOT.

ACTION: Public notice and invitation to comment.

SUMMARY: Nuclear Assurance Corporation (NAC), as an agent of Atomic Energy of Canada, Ltd., arranges for the transportation of spent nuclear fuel from Chalk River, Ontario, to a United States Department of Energy facility at Savannah River, South Carolina. In doing so, NAC is subject to radioactive materials transportation safety regulations issued by the Federal government as well as by the States of Michigan, New York and Vermont and certain political subdivisions thereof. NAC has petitioned DOT for administrative rulings as to whether certain of these non-Federal requirements are inconsistent with, and thus preempted by, the Hazardous Materials Transportation Act (HMTA) and the regulations issued thereunder. Since the Department is on notice of additional transportation requirements affecting radioactive materials routing options, the decision has been made in accordance with 49 CFR 107.209(b) to subject these to the same analysis as those for which NAC submitted inconsistency ruling applications.

DATES: Comments received on or before July 8, 1983, will be considered before an inconsistency ruling is issued.

ADDRESSES: The applications and any comments received may be reviewed in the Dockets Branch, Materials Transportation Bureau, Room 8426, 400 Seventh Street, S.W., Washington, D.C. 20590. Comments on any of the docketed items described in this Notice may be submitted to the Dockets Branch at the above address. The correct Docket Number (IRA–) must be indicated in your submission. A signed original and three copies of each submission are required. A copy of each comment must also be sent in accordance with the following:

Comments Re:	Send copy to:

IRA-27	Mr. Edward E. Cobb Chairman, Planning Committee The County of Jefferson 175 Arsenal Street Watertown, NY 13601

The fact of submission of copies to the appropriate parties is to be certified at the time the comment is submitted to the Dockets Branch. (The following format is suggested: "I hereby certify that copies of this comment regarding Docket No. have been sent to Mr. Larry Danese and at the addresses noted in the **Federal Register** publication.")

FOR FURTHER INFORMATION CONTACT: Elaine Economides, Office of the Chief Counsel, Research and Special Programs Administration, 400 Seventh Street SW., Washington, D.C. 20590, (Tel: 202/755–4972)

SUPPLEMENTARY INFORMATION:

1. Preemption Under the HMTA

The HMTA (49 U.S.C. 1801–1812) at section 112(a) (49 U.S.C. 1811(a)) expressly preempts "any requirement, of a State or political subdivision thereof, which is inconsistent with any requirement set forth in (the HMTA) or in a regulation issued under (the HMTA)." However, section 112(b) (49 U.S.C. 1811(b)) provides that an inconsistent requirement of a State or political subdivision thereof ceases to be preempted if, upon the application of an appropriate State agency, the Secretary of Transportation determines that such requirement (1) provides an equal or greater level of protection to the public than the HMTA or regulations issued thereunder and (2) does not unreasonably burden commerce.

Procedural regulations implementing section 112 of the HMTA are codified at 49 CFR 107.201–107.225. These regulations provide for the issuance of inconsistency rulings and non-preemption determinations. Briefly, an inconsistency ruling is an administrative opinion as to the relationship between a requirement of a State or political subdivision thereof and a requirement of the HMTA or regulations issued under the HMTA. The determination of whether a State of political subdivision requirement is inconsistent is based on consideration of the factors set forth at 49 CFR 107.209(c):

(1) Whether compliance with both the State or political subdivision requirement and the Act or the regulations issued under the Act is possible; and

(2) The extent to which the State or political subdivision requirement is an obstacle to the accomplishement and execution of the Act and the regulations issued under the Act.

If the State or local requirement is found to be inconsistent with a Federal requirement, the State or locality may seek a non-preemption determination, i.e., waiver of preemption pursuant to section 112(b) of the HMTA (49 U.S.C. 1811(b)).

2. Federal Routing Regulations

On January 19, 1981, the Department issued a final rule entitled, "Radioactive Materials; Routing and Driver Training Requirements," commonly known by its docket number, "HM–164." In relevant part, the rule provided that highway carriers of large quantity radioactive materials (including spent nuclear fuel) are required to use "preferred routes," which are defined as Interstate System highways or alternative highway routes designated by the States that provide an equal or greater level of safety as compared with the Interstate System (49 CFR 177.825(b)).

The rulemaking had been initiated largely in response to a proliferation of State and local restrictions on the transportation of radioactive materials. The final rule was based on the Department's general conclusions that "the public risks in transporting these materials by highway are too low to justify the unilateral imposition by local governments of bans and other severe restrictions on the highway mode of transportation"; and "public safety can

be improved through a nationally uniform rule that ensures the use of available highway routes that are known to be safe for large quantity radioactive materials."

As described above, under the preemptive scheme of the HMTA, State and local requirements that are inconsistent with the HMTA and the regulations issued under it, are preempted. In order to assist the public in interpreting and applying this preemptive scheme in the context of HM–164, the final rule included an appendix to 49 CFR Part 177 setting forth the Department's views regarding the preemptive effects of the rule (46 FR 5317). This appendix provides that the Department generally regards State and local requirements to be inconsistent if they:

- prohibit the highway transport of large quantity radioactive materials without providing for an alternative highway route for the duration of the prohibition;
- require additional or special personnel, equipmernt, or escort;
- require additional or different shipping paper entries, placards, or other hazard warning devices;
- require filing route plans or other documents containing informaiton that is specific to individual shipments;
- require prenotification;
- require acident or incident reporting other than as immediately necessary for emergency assistance; or
- unnecessarily delay transportation.

3. Background

Nuclear Assurance Corporation (NAC), as an agent of Atomic Energy of Canada, Ltd. (AECL), arranges for the transportation of spent nuclear fuel from Chalk River, Ontario, to a U.S. Department of Energy (DOE) facility at Savannah River, South Carolina. AECL has a contract with DOE for reprocessing nuclear fuel which is part of an overall agreement between the United States and Canada for the assured supply of enriched uranium for the Canadian research reactors. In the process of arranging for the transportation of spent fuel, NAC has encountered a variety of State and local transportation regulations which have impacted its routing options. NAC's description of these regulations and their impacts is as follows.

Until 1979, the spent fuel was shipped to the DOE reprocessing facility by truck entering the U.S. by way of the Ogdensburg (NY) Bridge across the St. Lawrence River. In 1980, the Ogdensburg Bridge and Port Authority adopted rules and regulations which banned shipments of radioactive materials. Concurrently, St. Lawrence County, at the foot of the bridge, enacted a ban on commercial spent fuel shipments. The bridge authority has since amended its rules to incorporate the provisions of the St. Lawrence County law.

Subsequently, in 1981 and 1982, NAC requested and received Nuclear Regulatory Commission (NRC) approval for five routes entering the U.S. in Michigan, New York and Vermont. After the Michigan route was approved, rules governing the transportation of radioactive materials were adopted by both the Michigan Fire Safety Board and Department of Health. NAC alleges that the rules established packaging, planning, information and equipment requirments more stringent than those required by Federal agencies for spent fuel shipments. Moreover, NAC asserts that the net effect of the Michigan requirements was to prevent spent fuel shipments from entering Michigan by way of the approved routes.

As a result of the Michigan requirements, a ban by the New York Thruway Authority, and a permit requirement based on substantial insurance coverage imposed by the Thousand Islands Bridge Authority and incorporated in a Jefferson County (NY) Resolution on regulating the transport of radioactive materials, NAC turned to the use of a land crossing in Vermont. This route was used without incident for eight of eleven planned shipments. However, when confidential information regarding transport schedules was released, the Governor of Vermont called upon NAC to interrupt the series of shipments in order to preclude possible civil action. Shortly thereafter, NAC was notified by the Governor that Vermont did not intend to permit further through shipments of spent fuel until such time as the responsible Federal agencies established and enforced a uniform national policy regarding such shipments.

Following the prohibition in Vermont, NAC established a sixth route through New York. This route was intended to accomplish the remaining three shipments in the series. Prior to NAC's use of this route, however, the Governor of New York directed his representative to send a notice advising NAC to suspend spent fuel shipments through New York "pending development of a policy applied uniformly, nationwide, covering transportation of radioactive materials."

Docket No. IRA–20 (New York State)

1. Facts

By letter dated October 8, 1982, Nuclear Assurance Corporation (NAC) applied for an administrative ruling on the question of whether an order issued by the State of New York is inconsistent with and thus preempted by the Hazardous Materials Transportation Act (HMTA) and the regulations issued thereunder. The complete text of the order is as follows:

October 7, 1982
Nuclear Assurance Corporation
24 Executive Park West
Atlanta, Georgia 30329

You are hereby advised to suspend proposed shipments of spent fuel rods through New York State from Chalk River, Canada via two non-interstate routes in the urban areas of Albany-Schenectady-Troy and Binghamton pending development of a policy applied uniformly, nationwide, covering transportation of radioactive materials.

[Signed]
Donald A. DeVito
Governor's Designated Representative

NAC contends that the requirements imposed by the order are inconsistent with the intent and the language of both the HMTA and the Hazardous Materials Regulations (HMR) issued thereunder. Specific reference is made to certain sections of the HMR which deal with highway routing of radioactive materials. In support of the proposed use of non-interstate routes, NAC cites 49 CFR 177.825(a) (which states that the requirement for operating on routes that minimize radiological risk does not apply when there is only one practicable highway route available) and 49 CFR 177.825(b) (which allows a motor vehicle to deviate from a preferred route to pick up, deliver or transfer a large quantity package of radioactive materials). As further argument that the New York order is inconsistent, NAC cites Appendix A to 49 CFR Part 177 (which states that a State routing rule is inconsistent with Part 177 if it prohibits transportation of large quantity radioactive materials by highway between two points without providing an alternate route for the duration of the prohibition).

Pursuant to 49 CFR 107.205(a), the Governor's Designated Representative submitted comments on behalf of the State of New York regarding the application for an inconsistency ruling. The State contends that its order is fully consistent with the HMTA and the regulations issued thereunder. In support of this contention, the State cites 49 CFR 177.285(b)(1) (which requires a motor vehicle carrying a large quantity package of radioactive materials to operate over a "preferred route", i.e., an Interstate System highway or a State-designated alternate

VOL 48 ISS 93 MAY 12 1983 UMI

route). Pointing out that there are no State-designated alternate routes selected by New York, the State contends that the "preferred route" in New York is the Interstate System of highways. Moreover, the State contends that NAC's proposed use of non-interstate routes does not constitute an allowable deviation under any of the conditions set forth under 49 CFR 177.285(b). Finally, the State contends that there is a route available to NAC which is entirely interstate and is, thus, a "preferred route" under the terms of the HMR. That route involves transport through Vermont and across New York on Interstate Route 84. The State concluded its comments on the application by asserting that NAC is not relieved of the regulatory requirement of using preferred routes in New York merely because the actions of another State have created difficulties in the use of preferred routes.

2. Public Comment

Comments should be restricted to the following issue: Whether the letter sent to NAC on October 7, 1982, constitutes a State requirement which is inconsistent with the HMTA and the regulations issued thereunder.

Since the application is for an inconsistency ruling and not for a non-preemption determination, comments regarding the effect of the order on interstate commerce as the effect relates to a waiver of preemption under 49 U.S.C. 1811(b) are inappropriate at this time and will not be considered.

Persons intending to comment on the application (Docket No. IRA–20) should examine the HMTA (49 U.S.C. 1801–1812); the DOT Hazardous Materials Regulations (49 CFR Parts 171–179); the inconsistency rulings at 43 FR 16952, 44 FR 75566 (Appeals at 45 FR 71881), 46 FR 18918 (Appeal at 47 FR 18457), 47 FR 1231, 47 FR 51991, and 48 FR 760; and the procedures governing the Department's consideration of applications for inconsistency rulings (49 CFR 107.201–107.211).

Commenters are reminded to indicate Docket No. IRA–20 on their submissions and to comply with the distribution and certification requirements described in the section entitled **ADDRESSES** supra.

Docket No. IRA–21 (Michigan)

1. Facts

By letter dated October 13, 1982, Nuclear Assurance Corporation (NAC) applied for an administrative ruling on the question of whether the State of Michigan Radioactive Materials Transportation Rules (Sections R29.551–29.560 of the State Fire Safety Board (SFSB) Rules and Sections R325.5801–325.5810 Michigan Department of Public Health (DPH) Rules) are inconsistent with and thus preempted by the Hazardous Materials Transportation Act (HMTA) or the regulations issued thereunder.

Pursuant to 49 CFR 107.205(a), the State of Michigan submitted comments regarding the application for an inconsistency ruling. The State asserted, inter alia, that the application was invalid with regard to the DPH rules, since the rules referenced by NAC were only draft rules. The State provided copies of the DPH rules which had become effective on July 14, 1982, and the Department determined that there were insufficient differences between the draft and final rules to void NAC's application. Accordingly, the effective SFSB and DPH rules are appended to this notice as Appendices A and B respectively.

NAC contends that the SFSB and DPH rules are inconsistent with the intent and language of both the HMTA and the Hazardous Materials Regulations (HMR) issued thereunder. Specific reference is made to 49 CFR Parts 173 and 177. NAC contends that the State rules are inconsistent because they require, among other things: prenotification; the filing of route plans, contingency plans and other documents; the use of additional special communications equipment; and the performance of packaging tests in addition to those required by the Nuclear Regulatory Commission and the Department of Transportation. The requirements for plan and document filing, it is contended, are in addition to those prescribed in the HMR.

In its comments on the application, the State contends that the rules are reasonable and necessary to ensure compliance with Federal and State safety regulations and to ensure adequate and timely emergency response. With regard to its requirements for the filing of emergency plans and the performance of packaging tests, Michigan contends that its "major bridges" pose a unique local safety problem which justifies the more stringent State requirements.

2. Public Comment

Comments should be restricted to the following issue: Whether the State of Michigan Radioactive Materials Transportation Rules are inconsistent with the HMTA or the regulations issued thereunder.

Since the application is for an inconsistency ruling and not for a non-preemption determination, comments regarding the effect of the Michigan rules on interstate commerce as the effect relates to a waiver of preemption under 49 U.S.C. 1811(b) are inappropriate at this time and will not be considered.

Persons intending to comment on the application (Docket No. IRA–21) should examine the HMTA (49 U.S.C. 1801–1812); the DOT Hazardous Materials Regulations (49 CFR Parts 171–179); the inconsistency rulings at 43 FR 16954, 44 FR 75566 (Appeals at 45 FR 71881), 46 FR 18918 (Appeal at 47 FR 18457), 47 FR 1231, 47 FR 51991, and 48 FR 760; the procedures governing the Department's consideration of applications for inconsistency rulings (49 CFR 107.201–107.211); and the SFSB and DPH rules which are provided as Appendices A and B to this notice.

Commenters are reminded to indicate Docket No. IRA–21 on their submissions and to comply with the distribution and certification requirements described in the section entitled **ADDRESSES** supra.

Docket No. IRA–22 (Vermont)

1. Facts

By letter dated October 14, 1982, Nuclear Assurance Corporation (NAC) applied for an administrative ruling on the question of whether an order issued by the Governor of Vermont is inconsistent with and thus preempted by the Hazardous Materials Transportation Act (HMTA) or the regulations issued thereunder. The complete text of the order is as follows:

October 8, 1982.
Nuclear Assurance Corporation,
24 Executive Park West,
Atlanta, Georgia 30329

This is to advise you that the State of Vermont does not intend to permit any further shipments of spent fuel through Vermont until such time as the responsible federal agencies establish and enforce a uniform national policy regarding such shipments. Vermont will not be placed at a disadvantage because of actions in other states which ban or have the effect of banning shipments in violation of applicable federal law. More specifically, Vermont may not be used as a route until the federal Department of Transportation and the Nuclear Regulatory Commission fulfill their legal responsibilities with respect to any statutes, regulations or ordinances in the states of Michigan and New York that are inconsistent with preemptive federal law and have the effect of forcing shipments through this state.

Since you stopped shipments through Vermont on September 3, 1982, Vermont Secretary of Transportation Tom Evslin has written Drew Lewis, Secretary of the U.S. Department of Transportation, expressing our strong concerns regarding the unfair impact on Vermont resulting from the actions of these other states. We are confident now that Mr. Lewis and other responsible federal officials understand the serious nature of the issue and plan to take necessary action to remedy the inequities that now exist.

I must advise you that if you were to plan shipments through Vermont in the meantime, I would seek all legal remedies available to me to stop the shipments, including an immediate injunction.

I hope I have clearly stated my position on this matter. If you should have any questions, I would expect to hear from you immediately.

Sincerely,
[Signed]
Richard A. Snelling,
Governor

NAC contends that the requirements imposed by the order are inconsistent with the intent and language of both the HMTA and the Hazardous Materials Regulations (HMR) issued thereunder. Specific reference is made to certain sections of the HMR which deal with highway routing of radioactive materials. In support of its proposed use of Interstate Route 91, NAC cites 49 CFR 177.825(b) which requires a motor vehicle containing a package of large quantity radioactive material to operate over "preferred routes" (i.e. an Interstate System highway or a State-designated alternate route). As further support of its contention that the Vermont order is inconsistent, NAC cites Appendix A to 49 CFR Part 177 which articulates the DOT policy that a State routing rule is inconsistent with Part 177 if it prohibits transportation of large quantity packages of radioactive material by highway between two points without providing an alternate route for the duration of the prohibition.

Pursuant to 49 CFR 107.205(a), the State of Vermont submitted comments regarding NAC's application for an inconsistency ruling. The State contends that: (1) the letter to NAC dated October 8, 1982, does not constitute a state routing rule; (2) Vermont's rules regarding the shipment of nuclear wastes are fully consistent with Federal requirements; and, (3) the letter is merely a statement of intent to seek equitable relief to avoid bearing the brunt of radioactive materials transportation "until such time as the federal government resolves the problems created by the regulations in New York and Michigan which seem clearly inconsistent with DOT regulations."

2. Public Comments

Comments should be restricted to the following issue: Whether the letter sent to NAC on October 8, 1982, constitutes a State requirement which is inconsistent with the HMTA or the regulations issued thereunder.

Since the application is for an inconsistency ruling and not for a non-preemption determination, comments regarding the effect of the Vermont letter on interstate commerce as the effect relates to a waiver of preemption under 49 U.S.C. 1811(b) are inappropriate at this time and will not be considered.

Persons intending to comment on the application (Docket No. IRA–22) should examine the HMTA (49 U.S.C. 1801–1812); the DOT Hazardous Materials Regulations (49 CFR Parts 171–179); the inconsistency rulings at 43 FR 16954, 44 FR 75566 (Appeal at 45 FR 71881), 46 FR 18918 (Appeal at 47 FR 18457), 47 FR 1231, 47 FR 51991, and 48 FR 760; and the procedures governing the Department's consideration of applications for inconsistency rulings (49 CFR 107.201–107.211).

Commenters are reminded to indicate Docket No. IRA–22 on their submissions and to comply with the distribution and certification requirements described in the section **ADDRESSES** supra.

Docket No. IRA–23 (New York State Thruway)

1. Facts

By letter dated October 20, 1982, Nuclear Assurance Corporation (NAC) applied for an administrative ruling on the question of whether the prohibition on irradiated reactor fuel shipments over facilities operated by the New York State Thruway Authority is inconsistent with and thus preempted by the Hazardous Materials Transportation Act (HMTA) or the regulations issued thereunder. The prohibition is contained in Section 102.1(q) of Chapter III, Title 21, Official Compilation of Codes, Rules and Regulations of the State of New York:

Part 102. Limitations on Use of the Thruway System

102.1 Prohibited uses of the Thruway.
Use of the Thruway system and entry thereon is prohibited at all times, with the noted exceptions:

* * * * *

(q) Vehicles carrying radioactive materials except under such procedures as may be adopted by the authority board, and as thereafter amended, from time to time, by the department of operations with the approval of the chairman.

NAC contends that the prohibition is inconsistent with the intent and language of both the HMTA and the Hazardous Materials Regulations (HMR) issued thereunder. Specific reference is made to 49 CFR 177.825(b) which requires a motor vehicle carrying a large quantity package of radioactive material to operate on a "preferred route", i.e., an Interstate System highway or a State-designated alternate route. NAC asserts that the Thruway System is a part of the Interstate System, that the State has not designated a preferred route, and that the prohibition therefore conflicts directly with 49 CFR 177.825(b). NAC further contends that the prohibition is inconsistent with the terms of the DOT policy statement which appears as Appendix A to 49 CFR Part 177. Appendix A states, inter alia, that a State or local routing rule is inconsistent with 49 CFR Part 177 if it prohibits or otherwise restricts transportation of large quantity radioactive materials on routes authorized by Part 177.

Pursuant to 49 CFR 107.205, NAC mailed a copy of the application to the New York State Thruway Authority. At this time, no comments regarding the application have been received from the Thruway Authority.

2. Public Comment

Comments should be restricted to the following issue: Whether the prohibition set forth in Section 102.1(q) of the regulations of the New York State Thruway Authority is inconsistent with the HMTA or the regulations issued thereunder.

Since the application is for an inconsistency ruling and not for a non-preemption determination, comments regarding the effect of the prohibition on interstate commerce as the effect relates to a waiver of preemption under 49 U.S.C. 1811(b) are inappropriare at this time and will not be considered.

Persons intending to comment on the application (Docket No. IRA–23) should examine the HMTA (49 U.S.C. 1801–1812); the DOT Hazardous Materials Regulations (49 CFR Parts 171–179); the inconsistency rulings at 43 FR 16954, 44 FR 75566 (Appeal at 45 FR 71881), 46 FR 18918 (Appeal at 47 FR 18457), 47 FR 1231, 47 FR 51991, and 48 FR 760; and the procedures governing the Department's consideration of applications for inconsistency rulings (49 CFR 107.201–107.211).

Commenters are reminded to indicate Docket No. IRA–23 on their submissions and to comply with the distribution and certification requirements described in the section entitled "ADDRESSES" supra.

Docket No. IRA–24 (Ogdensburg Bridge)

1. Facts

The Ogdensburg Bridge and Port Authority (OBPA) is a public benefit corporation of the State of New York which operates a number of transportation facilities including the

VOL 48 ISS 93 MY 12 1983 UMI

Ogdensburg-Prescott International Bridge (Ogdensburg, New York-Prescott, Ontario). The OBPA performs as an independent, self-supporting agency in administering and developing its facilities.

In 1980 the OBPA unanimously adopted rules and regulations governing the Ogdensburg Bridge which included a prohibition on shipments of radioactive materials. The rules went into effect on August 29, 1980, following receipt by the New York Secretary of State for inclusion as Chapter LXV, Sections 5700–5799 of the New York Code of Rules and Regulations (NYCRR).

Before the rules became effective, the U.S. Department of State submitted comments urging the OBPA not to adopt the proposed rules on the basis of the detrimental impact the proposed prohibition of radioactive material shipments would have on U.S. foreign policy and nuclear non-proliferation policy. At the time the Department of State submitted its comments, the Ogdensburg Bridge was used for shipments of highly enriched uranium to Canada for use in its research program and for the return of spent fuel to the U.S. for reprocessing. Pointing out that the return of spent fuel was integral to U.S. policy, as it enabled the U.S. to control the supply of this material and thereby prevent the proliferation of nuclear explosive devices, the Department of State asserted that transportation restrictions such as that proposed (and ultimately adopted) by the OBPA would seriously impede this policy. Recognizing that the proposed rules arose from a concern about potential health and safety impacts of radioactive materials transportation, the Department of State urged the OBPA to continue to work with the U.S. Department of Transportation and the Nuclear Regulatory Commission to resolve any concerns about these shipments.

In proposing the prohibition on radioactive materials transportation, OBPA had expressed concerns not only about safety, but also about indemnification in the event of a transportation accident. In correspondence initiated before the prohibition was adopted as a final rule and continuing for some time thereafter, the State Department assured the OBPA that nuclear insurance coverage and U.S. and Canadian nuclear indemnification statutes adequately and specifically protected the OBPA properties and operations. According to the State Department, the Price-Anderson Act (42 U.S.C. 2014, 2210) and implementing indemnity agreements provided broad protection for the OBPA in the event of a nuclear incident arising out of the transportation of radioactive materials to and from Department of Energy (DOE) facilities such as the reprocessing plant in Savannah River, South Carolina. Consistent with Price-Anderson, DOE's contract with the operator of the Savannah River reprocessing facility contained nuclear hazards indemnity articles which provided up to $500 million in protection for public liability resulting from a nuclear incident arising from the transportation within the U.S. of source, special nuclear, or by-product material to or from the Savannah River Plant. The indemnity extended not only to the party with whom the contract was executed, but also to any other party (including the OBPA) who might be liable to the public in connection with an incident (42 U.S.C. 2014(t)).

In April of 1981, the OBPA informed the State Department that it was willing to reconsider the original request to remove the ban on the transport of radioactive materials, on condition that: (1) OBPA received definite assurances that nuclear insurance coverage and U.S. and Canadian nuclear indemnification statutes adequately and specifically protected its properties and operations; and (2) OBPA received verification that an application for a Certificate of Emergency Transport had been submitted to and approved by the St. Lawrence County Emergency Services Coordinator-Civil Defense Director. The State Department subsequently provided the required assurances concerning indemnification. However, due to time constraints, scheduled shipments had proceeded by alternate routes.

In September of 1981 the OBPA amended its rules by deleting the prohibition on radioactive materials transportation and establishing new regulations by which such transportation would be allowed. The new rules, as set forth in sections 5701.3 and 5702.1–5702.3 of Chapter LXV of the New York Code of Rules and Regulations, are provided as Appendix C to this notice. Essentially, the rules: incorporate the provisions of St. Lawrence County Local Law No. 10 (see Appendix D); require prior approval by the OBPA of insurance coverage and/or indemnification provisions; and reserve to the OBPA the right to specify the time of crossing, to provide any escort deemed necessary and to obtain full compensation for the costs associated with the clearance and crossing of radioactive materials.

Shortly after the OBPA adopted the amended rules, Federal regulations on highway transportation of radioactive materials became effective. As set forth in 49 CFR 177.825, carriers of large quantity radioactive material are required to operate over preferred routes", i.e., Interstate System Highways or alternate routes designated by a State routing agency in accordance with DOT guidelines. The Ogdensburg Bridge is not part of an Interstate System highway and the State of New York has not designated preferred routes. Therefore, at this time, use of the Ogdensburg Bridge for transportation of large quantity radioactive material would constitute a violation of the HMR. Nevertheless, the Ogdensburg Bridge is an international crossing which was used without incident in the past for transportation of large quantity radioactive material and which must therefore receive serious consideration as a possible preferred route at such time as New York chooses to designate preferred routes. Therefore in accordance with 49 CFR 107.209(b), notwithstanding that application for a ruling has not been filed, the Department has elected to issue an administrative ruling on the issue of whether or not the radioactive materials transportation rules of the OBPA would be inconsistent (with the HMTA or the regulations issued thereunder) if the Ogdensburg Bridge were designated as part of a preferred route.

2. Public Comment

Comments should be restricted to the following issue: Whether the radioactive materials transportation rules of the OBPA would be inconsistent (with the HMTA or the regulations issued thereunder) if the Ogdensburg Bridge were designated as part of a preferred route.

Since this proceeding involves an inconsistency ruling, not a non-preemption determination, comments regarding the effect of the OBPA rules on interstate commerce as the effect relates to a waiver of preemption under 49 U.S.C. 1811(b) are inappropriate at this time and will not be considered.

Persons intending to comment on this issue (Docket No. IRA–24) should examine the HMTA (49 U.S.C. 1801–1812); the DOT Hazardous Materials Regulations (49 CFR Parts 171–179); the inconsistency rulings at 43 FR 16954, 44 FR 75566 (Appeal at 45 FR 71881), 46 FR 18918 (Appeal at 47 FR 18457), 47 FR 1231, 47 FR 51991, and 48 FR 760; the Price-Anderson Act (42 U.S.C. 2014, 2210); the procedures governing the Department's issuance of inconsistency rulings (49 CFR 107.201–107.211); the radioactive materials transportation rules of the OBPA (Appendix C); and St. Lawrence County Local Law No. 10 (Appendix D).

Commenters are reminded to indicate Docket No. IRA–24 on their submissions and to comply with the distribution and certification requirements described in the section entitled "ADDRESSES" supra.

Docket No. IRA–25 (St. Lawrence County)

1. Facts

On August 11, 1980, the St. Lawrence County (NY) Board of Legislators adopted Local Law No. 10 for the year 1980, which was duly published in accordance with Section 24 of the County Law of the State of New York. Local Law No. 10 established the requirement that any party seeking to transport large quantity/high level radioactive materials within St. Lawrence County obtain a Certificate of Emergency Transport from the St. Lawrence County Emergency Services Coordinator-Civil Defense Director, which Certificate "will be issued for the most compelling reasons involving urgent public policy or national security interests transcending public health and safety concerns." (Local Law No. 10 is appended to this notice as Appendix D.)

St. Lawrence County lies at the foot of the international bridge linking Ogdensburg, New York, and Prescott, Ontario. Thus, any restriction on transportation in St. Lawrence County imposes an equal restriction on international transportation over the Ogdensburg Bridge. It appears that the effect of Local Law No. 10 has been to redirect shipments of radioactive materials to other routes.

The Department of Transportation issued regulations (49 CFR 177.825) regarding highway routing of large quantity radioactive materials which became effective on February 1, 1982. As set forth at 49 CFR 177.825, the regulations require carriers of large quantity radioactive material to operate over "preferred routes", i.e., Interstate System highways or alternate routes designated by a State routing agency in accordance with DOT guidelines. No Interstate System highways run through St. Lawrence County and the State of New York has not designated preferred routes. Therefore, at this time, transportation of large quantity radioactive material through St. Lawrence County would constitute a violation of the HMR. Nevertheless, transportation of large quantity radioactive material across the Ogdensburg Bridge and through St. Lawrence County occurred without incident in the past and this route must therefore receive serious consideration as a possible preferred route at such time as New York chooses to designate preferred routes. Therefore, in accordance with 49 CFR 107.209(b), notwithstanding that application for a ruling has not been filed, the Department has elected to issue an administrative ruling on the issue of whether or not Local Law No. 10 would be inconsistent (with the HMTA or the regulations issued thereunder) if non-Interstate System highways within St. Lawrence County were designated as part of a preferred route.

2. Public Comment

Comments shall be restricted to the following issue: Whether the requirements set forth in Local Law No. 10 would be inconsistent (with the HMTA or the regulations issued thereunder) if non-Interstate System highways within St. Lawrence County were designated as part of a preferred route.

Since this proceeding involves an inconsistency ruling, not a non-preemption determination, comments regarding the effect of Local Law No. 10 as the effect relates to a waiver of preemption under 49 U.S.C. 1811(b) are inappropriate at this time and will not be considered.

Persons intending to comment on this issue (Docket No. IRA–25) should examine the HMTA (49 U.S.C. 1801–1812); the DOT Hazardous Materials Regulations (49 CFR Parts 171–179); the inconsistency rulings at 43 FR 16954, 44 FR 75566 (Appeal at 45 FR 71881) 46 FR 18918 (Appeal at 47 FR 18457) 47 FR 1231, 47 FR 51991, and 48 FR 760; the procedures governing the Departments's issuance of inconsistency rulings (49 CFR 107.201–107.211); and St. Lawrence County Local Law No. 10 of 1980 which is provided as Appendix D to this notice.

Commenters are reminded to indicate Docket No. IRA–25 on their submissions and to comply with the distribution and certification requirements described in the section entitled "ADDRESSES" supra.

Docket No. IRA-236 (Thousand Islands Bridge)

1. Facts

The Thousand Islands Bridge Authority (TIBA) is responsible for the operation and maintenance of the Thousand Islands Bridge, an international crossing which links Collins Landing, New York, and Ivy Lea, Ontario. By letter dated March 22, 1982, the TIBA applied to the Department of Transportation for a non-preemption determination regarding its rules and regulations governing the shipment of radioactive material across the Thousand Islands Bridge. As set forth at 49 CFR 107.215(b)(4), any application for a non-preemption determination must contain an express acknowledgment by the applicant that the rule in question is inconsistent with the HMTA or the regulations issued thereunder. Such acknowledgment is not required if the rule has been determined inconsistent by a court of competent jurisdiction or in an inconsistency ruling issued under 49 CFR 107.209. Neither of these exceptions applied to the rules governing the Thousand Islands Bridge. Therefore, when the TIBA, upon direct request, declined to acknowledge the inconsistency of the rules for which it had requested a non-preemption determination, the Department suspended action on the matter.

The relevant sections of the TIBA regulations are contained in sections 5503.2 and 5503.3 of Chapter LXIII, Title 21, Official Compilation of Codes, Rules and Regulations of the State of New York:

5503.2 Types of vehicles excluded. Vehicles loaded in such a manner or with such materials or so constructed or equipped as possibly to endanger persons or property or likely to render the use of the facilities unsafe, shall be excluded from use of the facilities, and the transportation of any such vehicle is hereby prohibited. Without limiting the foregoing, the following types of vehicles come within the meaning of this section and shall be denied use of the facilities:

* * * * *

(n) vehicles which would be excluded from passage without a special permit or escort, under section 5503.3 of this Part, and for which no such permit has been issued or no such escort provided;

* * * * *

5503.3 Vehicles requiring special permits or escorts. (a) No vehicle falling within any of the following categories shall be permitted to use the facilities unless a special permit therefor is issued by the authority employee in charge and, if required as a condition of such permit, a special escort is provided and fees therefor paid, viz:

* * * * *

(6) vehicles transporting explosives, radioactive materials or other dangerous commodities; and

(7) vehicles which have recently carried explosives, radioactive materials or other dangerous commodities and show any evidence of residue of such materials or commodities.

(b) In determining whether or not such special permit should be issued or, if issued, what conditions should apply thereto, such authority employee in charge may confer

VOL 48 ISS 93 MY 12 1983 UMI

with the authority's consulting engineers, counsel and-or whatever other specialists or regulatory agencies he may consider appropriate in the circumstances, but such determination in any given situation shall be the sole and exclusive judgment of such authority employee in charge and final and binding upon all persons.

Specifc requirements are set forth in the "Application for Permit to Transport Nuclear Materials via the Thousand Islands Bridge" which is provided as Appendix E to this notice. The application requires shipment-specific information, establishes insurance requirements, and reserves to the TIBA, at its sole discretion, the right to accept or reject the application for transit.

The Department of Transportation issued regulations (49 CFR 177.825) regarding highway routing of large quantity radioactive materials which became effective on February 1, 1982. Essentially, the regulations require carriers of large quantity radioactive material to operate over "preferred routes", i.e., Interstate System highways or State-designated alternate routes. In Appendix A to 49 CFR Part 177, the Department articulated its policy concerning the relationship between State and local rules and the Federal routing rules contained in Part 177. Appendix A states, inter alia, that a State or local transportation rule is inconsistent with Part 177 in it requires filing route plans or other documents containing information that is specific to individual shipments or unnecessarily delays transportation.

The question of whether the rules governing radioactive materials transportation across the Thousand Islands Bridge are inconsistent resurfaced in October of 1982. In a letter to the Department, Nuclear Assurance Corporation cited "a permit requirement for an arbitrary, but substantial, insurance coverage at the Thousand Islands Bridge" as one of several factors restricting the availability of routes for transporting spent nuclear fuel from Chalk River, Ontario to a DOE reprocessing facility at Savannah River, South Carolina. Therefore, notwithstanding that application for an inconsistency ruling has not been filed, the Department has elected, in accordance with 49 CFR 107.209(b), to issue an adminstrative ruling on the question of whether or not the radioactive materials transportation rules of the TIBA are inconsistent with the HMTA or the regulations issued thereunder.

2. Public Comment

Comments shall be restricted to the following issue: Whether the radioactive materials transportation regulations of the TIBA are inconsistent with the HMTA or the regulations issued thereunder.

Since this proceeding involves an inconsistency ruling, not a non-preemption determination, comments regarding the effect of the TIBA regulations as the effect relates to a waiver of preemption under 49 U.S.C. 1811(b) are inappropriate at this time and will not be considered.

Persons intending to comment on the application (Docket No. IRA–26) should examine the HMTA (49 U.S.C. 1801–1812); the DOT Hazardous Materials Regulations (49 CFR Parts 171–179); the inconsistency rulings at 43 FR 16954, 44 FR 75566 (Appeal at 45 FR 71881), 46 FR 18918 (Appeal at 47 FR 18457), 47 FR 1231, 47 FR 51991, and 48 FR 760; the procedures governing the Department's issuance of inconsistency rulings (49 CFR 107.201–107.211); the regulations governing the transport of nuclear materials via the Thousand Islands Bridge (21 NYCRR 5503.2–5503.3); and the application for transit permit which is provided as Appendix E of this notice.

Commenters are reminded to indicate Docket No. IRA–26 on their submissions and to comply with the distribution and certification requirements described in the section entitled "ADDRESSES" supra.

Docket No. IRA–27 (Jefferson County)

1. Facts

By letter dated May 13, 1982, Jefferson County (NY), notified the Department of Transportation of its adoption of Resolution No. 81 "Regulating the Transport of Radioactive Materials Through Jefferson County". Resolution No. 81 (which is provided as Appendix F to this notice) established a number of conditions affecting radioactive materials transportation, including prenotification, prohibition during certain dates and weather conditions, escort requirements and adoption of the permit system promulgated by the Thousand Islands Bridge Authority.

Jefferson County lies at the foot of the international bridge linking Ivy Lea, Ontario with Collins Landing, New York, and connecting with Interstate Route 81. Thus, any restriction on transportation in Jefferson County imposes an equal restriction on international transportation which may operate over the Thousand Islands Bridge and Interstate Route 81.

The Department of Transportation issued regulations (49 CFR 177.825) regarding highway routing of large quantity radioactive material which became effective on February 1, 1982. Essentially, the regulations require carriers of large quantity radioactive material to operate over "preferred routes", i.e., Interstate System highways or State-designated alternate routes. In Appendix A to 49 CFR Part 177, the Department articulated its policy concerning the relationship between State and local rules and the Federal routing rules contained in Part 177. Appendix A states, inter alia, that a State or local transportation rule is inconsistent with Part 177 if it requires prenotification, escort or unnecessary delay.

Because the transportation regulations of Jefferson County could affect the use of an international bridge and an Interstate System highway, the Department has elected, in accordance with 49 CFR 107.209(b), to issue an administrative ruling on the question of whether or not Resolution No. 81 is inconsistent with the HMTA or the regulations issued thereunder.

2. Public Comment

Comments shall be restricted to the following issue: Whether the requirements set forth in Resolution No. 81 of Jefferson County constitute a local rule which is inconsistent with the HMTA or the regulations issued thereunder.

Since this proceeding involves an inconsistency ruling, not a non-preemption determination, comments regarding the effect of Resolution No. 81 as the effect relates to a waiver of preemption under 49 U.S.C. 1811(b) are inappropriate at this time and will not be considered.

Persons intending to comment on this issue (Docket No. IRA–27) should examine the HMTA (49 U.S.C. 1801–1812); the DOT Hazardous Materials Regulations (49 CFR Parts 171–179); the inconsistency rulings at 43 FR 16954, 44 FR 75566 (Appeal at 45 FR 71881), 46 FR 18918 (Appeal at 47 FR 18457), 47 FR1231, 47 FR 51991, and 48 FR 760; the procedures governing the Department's issuance of inconsistency rulings (49 CFR 107.201–107.211); and Jefferson County Resolution No. 81 which is provided as Appendix F to this notice.

Commenters are reminded to indicate Docket No. IRA–27 on their submissions and to comply with the distribution and certification requirements described in the section entitled **"ADDRESSES"** supra.

3. Public Comment

This notice invites public comment on any or all of eight separate dockets. Because of the number of issues raised, their complexity and the extent of their interrelatedness, it is imperative that commenters comply with the foregoing instructions concerning distribution, certification, and identification by docket number (IRA–20 through IRA–27). Submissions containing comments on more than one docket should clearly indicate, by the use of sub-headings or similar techniques, the number of the docket to which each comment refers.

Submissions which do not comply with the procedures described herein may not be considered.

Issued in Washington, D.C., on May 6, 1983.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

Appendix A.—Department of State Police; State Fire Safety Board; Radioactive Material Transportation

Filed with the Secretary of State on June 28, 1982. These rules take effect 15 days after filing with the Secretary of State.

(By authority conferred on the state fire safety board by section 3c of Act No. 207 of the Public Acts of 1941, as amended, being § 29.3c of the Michigan Compiled Laws).

R 29.551 Definitions.

Rule 1. As used in these rules:

(a) "Department of public health" means the state department of public health created by section 425 of Act No. 380 of the Public Acts of 1965, as amended, being § 16.525 of the Michigan Compiled Laws.

(b) "Major bridge" means a structure which has a span from shore to shore of more than 250 meters or which spans water which has a maximum depth of more than 15 meters.

(c) "NRC" means the United States nuclear regulatory commission.

(d) "Radioactive material" means irradiated reactor fuel and radioactive wastes that are large quantity radioactive materials as defined in 49 CFR § 173.389(b).

R 29.552 Modification.

Rule 2. The state fire marshal may modify the application of these rules upon a finding that the variation would not result in an undue hazard to life or property.

R 29.553 Application; procedure; content.

Rule 3. Application for approval to transport radioactive material in Michigan shall be submitted in duplicate to the operations division of the department of state police not less than 15 days before the date of the proposed shipment. Upon receipt, the operations division shall immediately forward the information to the fire marshal division and the department of public health. The application shall include all of the following, as applicable:

(a) The proposed route of travel, specifying all of the following:

(i) Each road or rail to be used by route number, name, or other identification.

(ii) Each major bridge to be traversed.

(iii) Each waterway to be traversed for transport by vessel.

(iv) The reasons for the choice of the proposed route of travel from the site of origin to the receiver of the radioactive material, including the designation of alternative routes and the reasons for the selection of the proposed route and the rejection of alternative routes.

(b) The proposed means of conveyance.

(c) The names, addresses, and emergency telephone numbers of the shipper, carrier, and receiver of the radioactive material, including the individual to contact for current shipment information.

(d) A description of the shipment as specified in the provisions of 49 CFR § 172.203(d).

(e) The estimated date and time of all of the following, as applicable:

(i) The departure of the radioactive material from the site of origin.

(ii) The arrival of the radioactive material at the Michigan boundary or at its final destination if the destination is within Michigan.

(iii) The departure of the radioactive material from Michigan.

(f) Attestation to the fact that the vehicle has been safety inspected within a period of 6 months prior to the date of the proposed shipment for compliance with 49 CFR § 396 or Act No. 300 of the Public Acts of 1949, as amended, the Michigan Vehicle Code, by a law enforcement agency acceptable to the state fire marshal and that evidence of such inspection shall be carried in the vehicle.

(g) Copies of any required NRC approval of the proposed route of travel, and any other NRC licensing action specific to the shipment, such as an import license or a license to transport.

(h) A copy of the emergency plan for the carrier which describes procedures to be taken in an emergency to eliminate or minimize the radiation exposure of the public. The plan shall include notification of the state police operations division upon implementation of the plan.

(i) For transport over a major bridge or on a vessel, provisions to submit the proposed recovery plan to the state fire marshal for approval before beginning recovery efforts.

(j) A certification that the shipment will be in compliance with these rules and all applicable state and federal statutes, rules, and regulations governing the shipment.

R 29.554 Communications.

Rule 4. (1) Radioactive material shall not be transported on a highway or over a major bridge in this state unless the transporting vehicle, or a vehicle accompanying the transporting vehicle, is equipped with continuous 2-way communications by radiotelephone or other means acceptable to the state fire marshal with land-based stations familiar with, and capable of assisting in the implementation of, the emergency plan required by R 29.553(h).

(2) Radioactive material shall not be transported by rail or waterway in this state unless the transporting vehicle or vessel is equipped with communications equipment acceptable to the state fire marshal. Such equipment shall be used for making appropriate notification of any incident which may occur.

R 29.555 Transportation approval; criteria.

Rule 5. Radioactive material shall not be transported in this state without the written approval of the state fire marshal. All of the following criteria shall be satisfied before approval is granted:

(a) The application requirements of R 29.553 have been fulfilled.

(b) The application has been approved in writing by the department of public health.

(c) Certification has been made by a person that the shipment is an will be in compliance with these rules and all applicable state and federal statutes, rules, and regulations governing the shipment.

(d) The plan required by R 29.553(h) is acceptable to the state fire marshal and the department of public health.

(e) A certificate of compliance for the container has been issued by the NRC, and the container has been tested and approved for hypothetical accident conditions pursuant to the provisions of 10 CFR 71.36.

(f) For transport over a major bridge, the container has been tested and certified, by an agency acceptable to the state fire marshal, to pass a puncture test as described in the provisions of 10 CFR 571.36, except that the free drop, as described in the provisions of 10 CFR part 71, appendix B2, shall equal or exceed the height of the bridge roadway from the water, and the puncture test shall be immediately followed by an immersion test at a depth of water equal to or exceeding the maximum depth of water under the major bridge and for a period of time at least as long as the planned time for recovery.

(g) For transport on a waterway, the container has been tested and certified, by an agency acceptable to the state fire marshal, to pass an immersion test at a depth of water equal to or in excess of the maximum depth of water along the route of travel and for a period of time at least as long as the planned time for recovery.

R 29.556 Approval notification.

Rule 6. Upon granting approval to transport, the state fire marshal shall notify the applicant, in writing, before the shipment of the radioactive material and shall include any conditions or limitations to the approval as determined necessary by the state fire marshal and the department of public health.

R 29.557 Transport notification of department of state police.

Rule 7. Unless otherwise specified in the approval notification, the carrier, driver, or operator transporting radioactive material shall notify the operations division of the department of state police as follows:

(a) Of any schedule change that differs by more than 6 hours from the schedule information previously furnished.

(b) Of any incident causing a delay in the transport of the radioactive material through Michigan.

(c) Of any implementation of the emergency plan submitted pursuant to R 29.553(h). A person implementing the emergency plan shall immediately notify the department of state police.

R 29.558 Schedule information; confidentiality.

Rule 8. Radioactive material shipment schedule information provided to the state fire marshal shall be confidential, except that

VOL 48 ISS 93 MAY 12 1983 UMI

the information may be shared with other governmental agencies as required by law or when deemed necessary to protect the public health and safety. The confidentiality requirement shall terminate 10 days after a shipment has entered or originated within the state for a single shipment whose schedule is not related to the schedule of any subsequent shipment or 10 days after the last shipment has entered or originated within the state for a series of shipments whose schedules are related.

R 29.559 Transport inspection.

Rule 9. Shipments of radioactive material may be inspected by the state fire marshal for compliance with applicable state and federal statutes, rules, and regulations.

R 29.560 Adoption of federal regulations.

Rule 10. (1) The following provisions of the Code of Federal Regulations are adopted by reference in these rules:

(a) 10 CFR § 71.36.

(b) 49 CFR § 172.203(d).

(c) 49 CFR § 173.389(b).

(2) The provisions specified in subrule (1) of this rule may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, at cost, or from the office of the State Fire Safety Board, 7150 Harris Drive, Lansing, Michigan 48913, at cost.

Appendix B.—Department of Public Health; Division of Radiological Health; Radioactive Material Transportation

Filed with the Secretary of State on June 29, 1982. These rules take effect 15 days after filing with the Secretary of State.

(By authority conferred on the department of public health by section 9 of Act No. 360 of the Public Acts of 1965, as amended, and sections 2226, 2233, and 13521 of Act No. 368 of the Public Acts of 1978, as amended, being §§ 16.109, 333.2226, 333.2233, and 333.13521 of the Michigan Compiled Laws)

R 325.5801 Definitions.

Rule 1. As used in these rules:

(a) "Department" means the department of public health.

(b) "Major bridge" means a structure which has a span from shore to shore of more than 250 meters or which spans water which has a maximum depth of more than 15 meters.

(c) "NRC" means the United States nuclear regulatory commission.

(d) "Person" means a person as defined in section 1106 of Act No. 368 of the Public Acts of 1978, as amended, being § 333.1106 of the Michigan Compiled Laws, or a governmental entity as defined in section 1104 of Act No. 368 of the Public Acts of 1978, as amended, being § 333.1104 of the Michigan Compiled Laws.

(e) "Radioactive material" means irradiated reactor fuel and radioactive wastes that are large quantity radioactive materials as defined in 49 C.F.R. § 173.389(b).

(f) "State fire marshal" means the state fire marshal of the department of state police as defined in Act No. 207 of the Public Acts of 1941, as amended, being § 29.1 et seq. of the Michigan Compiled Laws.

R 325.5802 Exemptions.

Rule 2. Upon application therefore or upon its own initiative, the department may grant such exemptions from the requirements of these rules as it determines are authorized by law and will not result in undue hazard to public health and safety or property.

R 325.5803 Application; procedure; content.

Rule 3. Application for approval to transport radioactive material in Michigan shall be submitted to the department through the operations division of the department of state police not less than 15 days before the date of the proposed shipment. An application shall include all the following, as applicable:

(a) The proposed route of travel, specifying all of the following:

(i) Each road or rail to be used by route number, name, or other identification.

(ii) Each major bridge to be traversed.

(iii) Each waterway to be traversed for transport by vessel.

(iv) The reasons for the choice of the proposed route of travel from the site of origin to the receiver of the radioactive material, including the designation of alternative routes and the reasons for the selection of the proposed route and the rejection of alternative routes.

(b) The proposed means of conveyance.

(c) The names, addresses, and emergency telephone numbers of the shipper, carrier, and receiver of the radioactive material, including the individual to contact for current shipment information.

(d) A description of the shipment as specified in the provisions of 49 C.F.R. § 172.203(d).

(e) The estimated date and time of all of the following, as applicable:

(i) The departure of the radioactive material from the site of origin.

(ii) The arrival of the radioactive material at the Michigan boundary or at its final destination if the destination is within Michigan.

(iii) The departure of the radioactive material from Michigan.

(f) Attestation to the fact that the vehicle has been inspected within a period of 6 months prior to the date of the proposed shipment for compliance with the provisions of 49 C.F.R. § 396 or Act No. 300 of the Public Acts of 1949, as amended, being § 257.1 et seq. of the Michigan Compiled Laws, by a law enforcement agency acceptable to the state fire marshal, and that evidence of such inspection shall be carried in the vehicle.

(g) Copies of any required NRC approval of the proposed route of travel and any other NRC licensing action specific to the shipment, such as an import license or a license to transport.

(h) A copy of the emergency plan for the carrier which describes procedures to be taken in an emergency to eliminate or minimize the radiation exposure of the public. The plan shall include a provision for notification of the state police operations division upon implementation of the plan.

(i) For transport over a major bridge or on a vessel, provisions to submit the proposed recovery plan to the department for approval before beginning recovery efforts.

(j) A certification that the shipment will be in compliance with these rules and all applicable state and federal statutes, rules, and regulations governing the shipment.

R 325.5804 Communications.

Rule 4. Communications capability shall be provided as specified in R 29.554.

R 325.5805 Transportation approval; criteria.

Rule 5. Radioactive material shall not be transported in this state without the written approval of the department. All of the following criteria shall be satisfied before approval is granted:

(a) The application requirements of R 325.5803 have been fulfilled.

(b) Certification has been made by a person that the shipment is and will be in compliance with these rules and all applicable state and federal statutes, rules, and regulations governing the shipment.

(c) A plan required by R 325.5803(h) has been determined to be acceptable to the department.

(d) A certificate of compliance for the container has been issued by the NRC, and the container has been tested and approved for hypothetical accident conditions pursuant to the provisions of 10 CFR 71.36.

(e) For transport over a major bridge, the container has been tested and certified, by an agency acceptable to the department, to pass a puncture test as described in the provisions of 10 CFR 71.36, except that the free drop as described in the provisions of 10 CFR part 71, appendix B2, shall equal or exceed the height of the bridge roadway from the water, and the puncture test shall be immediately followed by an immersion test at a depth of water equal to or exceeding the maximum depth of water under the major bridge and for a period of time at least as long as the planned time for recovery.

(f) For transport on a waterway, the container has been tested and certified, by an agency acceptable to the department, to pass an immersion test at a depth of water equal to or in excess of the maximum depth of water along the route of travel and for a period of time at least as long as the planned time for recovery.

R 325.5806 Approval notification.

Rule 6. Upon granting approval to transport, the department shall notify the applicant and the state fire marshal, in writing, before the shipment of the radioactive material and shall include any conditions or limitations to the approval as determined necessary by the department.

R 325.5807 Transport notification of department of state police.

Rule 7. Unless otherwise specified in the approval notification, the carrier, driver, or operator transporting radioactive material shall notify the operations division of the department of state police of all of the following:

(a) Any schedule change that differs by more than 6 hours from the schedule information previously furnished.

(b) Any incident causing a delay in the transport of the radioactive material through Michigan.

(c) Any implementation of the emergency plan submitted pursuant to R 325.5803(h). A person implementing the emergency plan shall immediately notify the department of state police, which shall notify the department.

R 325.5808 Schedule information; confidentiality.

Rule 8. Radioactive material shipment schedule information provided to the department shall be confidential, except that the information may be shared with other governmental agencies as requird by law or when deemed necessary to protect the public health and safety. The confidentiality requirement shall terminate 10 days after a shipment has entered or originated within the state for a single shipment whose schedule is not related to the schedule of any subsequent shipment or 10 days after the last shipment has entered or originated within the state for a series of shipments whose schedules are related.

R 325.5809 Transport inspection.

Rule 9. Shipments of radioactive material may be inspected by the department for compliance with applicable state and federal statutes, rules, and regulations.

R 325.5810 Adoption of federal regulations

Rule 10. (1) The following provisions of the Code of Federal Regulations are adopted by reference in these rules:

(a) 10 CFR 71.36.

(b) 49 CFR 172.203(d).

(c) 49 CFR 173.389(b).

(2) The provisions specified in subrule (1) of this rule may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, at cost, or from the Department of Public Health, 3500 N. Logan Street, Lansing, Michigan 48909, at cost.

Appendix C.—Radioactive Materials Transportation Rules of the Ogdensburg Bridge and Port Authority

Chapter LXV, New York Code of Rules and Regulations

§ 5701.3 Vehicles requiring special permits or escorts. No vehicle falling within any of the following categories shall be permitted to use the facilities unless a special permit therefor is issued by the Authority Employee in charge, and, if required as a condition of such permit, a special escort is provided and fees, including consulting engineering services if required, therefor paid, in advance, viz:

* * * * *

(f) Vehicles which are transporting or have recently carried explosives, radioactive materials or other dangerous commodities and show any evidence or residue of such materials or commodities.

* * * * *

In determining whether or not such special permits should be issued or, if issued, what conditions should apply thereto, such Authority Employee in charge may confer with the Authority's consulting engineers, counsel and/or whatever other specialists or regulatory agencies he may consider appropriate in the circumstances, but such determination in any given situation shall be the sole and exclusive judgment of such Authority Employee in charge and final and binding upon all persons. Application for a special permit shall be made at least 48 hours in advance of the proposed crossing. If permission is granted, the Authority shall specify the time of the crossing.

§ 5702.1 No vehicle transporting radioactive materials shall be permitted to use the facilities unless the provisions of the St. Lawrence County Local Law No. 10 Regulating the Transportation of Radioactive Materials Through St. Lawrence County shall be fully satisfied and a valid Certificate of Emergency Transport issued for the shipment, if applicable.

§ 5702.2 In addition to the Certificate of Emergency Transportation, responsible state or federal agencies and the carrier shall submit for Authority's prior approval evidence of proper insurance coverage and/or an acceptable indemnification and hold harmless agreement.

§ 5702.3 As a condition of the special permit or escort set forth in 5701.3, the Authority shall specify the time of crossing, provide escort if deemed necessary and be fully compensated for any and all costs associated with the clearance and crossing of the radioactive materials.

Appendix D.—St. Lawrence County Local Law No. 10 for the Year 1980; Local Law Regulating the Transportation of Radioactive Materials Through St. Lawrence County

Be it enacted by the Board of Legislators of the County of St. Lawrence as follows:

Section 1: The St. Lawrence County Legislature hereby regulates the transportation of nuclear materials specified below in or through St. Lawrence County for the purposes of protecting the health and safety of residents until such time as adequate information is made available by Federal and State agencies responsible for radioactive materials to prepare an adequate emergency response plan.

Section 2: A Certificate of Emergency Transport issued by the St. Lawrence County Emergency Services Coordinator-Civil Defense Director shall be required for each shipment of any of the following materials:

1. Plutonium isotopes in any quantity exceeding 2 grams, or 20 curies.

2. Uranium enriched in the isotope U235 exceeding 20 percent of the total uranium content in quantities where the U235 content exceeds one kilogram.

3. Any actinides (elements with atomic number 89 or greater) the activity of which exceeds 20 curies.

4. Spent reactor fuel elements or mixed fission products associated with such spent fuel elements whose activity exceeds 20 curies.

5. Any quantity of radioactive material specified as a "large quantity" by the Nuclear Regulatory Commission in 10 CFR Part 71 and as amended entitled "Packaging of Radioactive Materials for transport", with the exception of Co-60 used for medical radiation therapy or medical research.

Section 3: A Certificate of Emergency Transport may be issued by the Civil Defense Director-Emergency Services Coordinator in consultation with the County Sheriff upon submission of a written request at least five working days prior to the expected date of transport. The written request must include:

1. The nature of the material transported and the possible danger therefrom.

2. The route of transport.

3. The date and time of shipment through the County.

4. Specific emergency response procedures which would be required in case of an accident.

5. A non-refundable payment for one-hundred dollars, payable to St. Lawrence County Treasurer's Department.

Section 4: A Certificate of Emergency Transportation will be issued for the most compelling reasons involving urgent public policy or national security interests transcending public health and safety concerns. Economic considerations alone will not be acceptable as justification for the issuance of said certificate.

Section 5: Said Certificate of Emergency Transport will be valid for a period not to exceed 72 hours and must be in posession of the driver of the vehicle while travelling through St. Lawrence County, and must be presented upon request.

Section 6: Violators of any part of this law shall be subject to a fine of not less than one thousand dollars nor more than five thousand dollars.

Section 7: The provisions of this article shall not apply to radiation sources shipped by or for the United States government for military or national security purposes or which are related to national defense and nothing herein shall be construed to require the disclosure of any defense information or restricted data as defined in Atomic Energy Act of 1954 and the Energy Reorganization Act of 1974, as amended.

Appendix E.—Application for Permit To Transport Nuclear materials via the Thousand Islands Bridge

General Information

Your firm _____ has requested by letter dated _____ a permit to use the Thousand Islands Bridge System for the period of _____ to _____ for the purpose of transporting _____ materials.

In order for this Authority to consider the application, the information set forth below must be submitted by your firm.

In addition to the above, the Authority, at its sole discretion, has the right to accept or reject the application for transit.

REQUEST FOR PERMIT TO CROSS THE THOUSAND ISLANDS BRIDGE SYSTEM (check one)

☐ From Collins Landing, New York to Ivy Lea, Ontario

☐ From Ivy Lea, Ontario to Collins Landing, New York

Application Date _____

Name of Company _____

Street Address _____

VOL 48 ISS 93 MAY 12 1983 UMI

City ——— State or Province

The company set forth above acknowledges and certifies that with the knowledge of an escort requirement and associated fee that it hereby requests permission to transport the following product.

Product ———
Quantity (lbs.) ———

Note.—A Commodity Data Sheet must be submitted with this application by the Company which more fully describes the product. Failure to include an approved Commodity Data Sheet shall cause the application to be denied.

The Company has contracted to transport the commodity set forth in this application with the firm listed below. The Company submits as set forth below the vehicle data which is required in order for this application to be considered.

Name of Transport Company ———
Street Address ———
City ——— State or Province

Type of Vehicle ———
Gross Vehicle Weight ———
Number of Axles ——— Vehicle Length ———
Vehicle Width ——— Vehicle Height ———

The Company hereby acknowledges that the insurance requirements for the transport of nuclear materials as set forth below must be fully met prior to consideration of the application. In addition, an authorization of transit shall not be issued by the Authority unless the requirements set forth for both United States territory and Canadian territory have been satisfied.

General Information

Applicant shall provide a Certificate of Insurance which shall include not less than thirty (30) days written notice of cancellation of the certified insurance to the Thousand Islands Bridge Authority, Collins Landing, Alexandria Bay, New York 13607.

Insurance Requirements for United States Territory

The certificate holder shall be the Thousand Islands Bridge Authority.

Whichever of the following is applicable shall be certified:

(1) A U.S. Suppliers & Transporters Liability Policy with a limit of liability not less than $160,000,000 each occurrence. Such certificate of insurance shall certify that Amendatory Endorsement NY49 is part of the policy. The named insured shall be the permittee unless the permittee has a contract of haulage with the named insured, in which event the certificate of insurance shall include legal evidence of the contractual relationship. If the permittee has such a contractual arrangement with more than one shipper, such a certificate shall be required for each shipper.

(2) If the permittee has a contract of haulage with an operator of a nuclear facility licensed by the United States Nuclear Energy Commission, the certificate of insurance shall be for a U.S. Facilities Liability Policy with a limit of liability not less than $160,000,000 each occurrence. The named insured shall be the licensee and the certificate of insurance shall contain legal evidence of the contractual relationship between the permittee and the licensee. Such a certificate shall be required for each licensee with whom the permittee has a contract of haulage.

(3) In the event the permittee has a contract of haulage with an agency of the United States government exempt from the nuclear insurance requirements of U.S. federal statute, legal evidence of an indemnity agreement between such U.S. agency and the permittee shall be filed. Such evidence shall include the Thousand Islands Bridge Authority as an entity for indemnification by the U.S. government agency. Thirty days written prior notification of termination of the indemnification agreement shall be required by the Authority.

Ten days written prior notice of a shipment shall be required prior to issuance of an authorization of transit. Such notice shall include the owner or orginator of the shipment in order for the Authority to verify the documentation required in sections 1, 2 or 3 above is on file with the Authority.

The Company hereby submits the following and as attached as evidence of meeting the United States Insurance Requirements.

———
———
———

Insurance Requirements for Canadian Territory

The certificate holder shall be the Thousand Islands Bridge Authority, agent for, and the St. Lawrence Seaway Authority in right of Canada.

Whichever of the following is applicable shall be certified.

(1) A Canadian Suppliers & Transporters Liability Policy with a limit of liability of not less than $75,000,000 each occurrence. Amendatory Endorsement equivalent to U.S.—No. NY49 shall be certified as being part of the policy. The named insured shall be the permittee unless the permittee has a contract of haulage with the named insured in which event legal evidence of the contractual relationship shall be part of the certificate.

(2) In the event the permittee has a contract of haulage with a facility licensed under the Atomic Energy Control Act of Canada, with certificate of insurance shall certify a Canadian Facilities Liability Policy with the named insured being the licensee. The certificate shall include legal evidence of the contractual relationship between the named insured and the permittee. The limit of liability shall be not less than $75,000,000 each occurrence.

(3) In the event the permittee has a contract of haulage with an agency of the Canadian government exempt from the insurance requirements contained in the Nuclear Liability Act of Canada, in lieu of a certificate of insurance legal evidence of an indemnification agreement between the permittee shall be provided. Such evidence shall also include legal evidence that the indemnification agreement extends to include the Thousand Islands Bridge Authority as agent for, and the St. Lawrence Seaway Authority in right of Canada.

Ten days written prior notice of a shipment shall be required prior to issuance of an authorization of transit. Such notice shall include the owner or originator of the shipment in order for the Authority to verify the documentation required in sections 1, 2 or 3 above is on file with the Authority.

The Company hereby submits the following and as attached as evidence of meeting the Canadian Insurance Requirements.

Authority Notice

The Authority has reviewed your application for permit to cross the Thousands Islands Bridge System as outlined in this application and dated ———. Your application submitted under the name of ——— Company has been: (check one)

☐ Approved
☐ Denied

Reasons for denial: ———
———
———
———

This permit under #——— shall be valid from ——— to ——— 19—.

In notifying the Authority of a transcript request, please refer to the permit number set forth above in all correspondence. *A transit request must be submitted for each shipment.* The transit request must be received in the offices of the Authority ten (10) days prior to the scheduled shipment, so to allow a proper review of your general permit and to schedule the escort service.

The Authority shall in writing notify the Company representative as shown on the application within 48 hours after receipt of the date and time that transit will be permitted. In addition and at the same time the Company will be notified of the toll charge as well as the escort fee which must be paid at the time of transit. A copy of this notice must be delivered by the Company to the toll attendant at the time of the approved crossing. The determination as to the date and time of the crossing shall be made solely by the Thousands Islands Bridge Authority.

Russell Wilcox,

Executive Director, Thousand Islands Bridge Authority, Collins Landing, Alexandria Bay, New York 13607; phone: 315–482–2501.

Appendix F—Resolution No. 81; Regulating the Transport of Radioactive Materials Through Jefferson County

By Supervisor Edward E. Cobb, Chairman, Planning Committee

Whereas the Federal Hazardous Materials Transportation Act (HMTA) provides for over-the-road transport of radioactive materials; and

Whereas recent pronouncements by federal officials identify Interstate 81 as a route for the transport of said materials; and

Whereas Federal regulations make provision for the imposition of local controls which would enhance public safety and not unreasonably restrain or prohibit the transport of said materials: Now, therefore, be it

Resolved, That the Jefferson County Board of Supervisors does hereby put the United States Department of Transportation and Nuclear Regulating Commission on notice that the transport of radioactive waste through and within Jefferson County is conditioned on compliance with the following provisions: That 24 hour prior notification of said transport be duly given to appropriate Jefferson County officials; that front and rear escort service be provided; that said transport only be made during the six month period from May through October; that no movement of said material be made on holidays or during periods of inclement weather; and that the permit system as promulgated by the Thousand Islands Bridge Authority regulating the movement of radioactive materials through the Bridge System be recognized and fully adhered to by the Federal Government and/or agents thereof.

Further resolved, That the Clerk be directed to forward copies of this resolution to the United States Department of Transportation, the Nuclear Regulating Commission, the Nuclear Assurance Corporation, Congressman David O'B. Martin, Governor Hugh L. Carey, the New York State Department of Transportation, Senator H. Douglas Barclay, Assemblyman H. Robert Nortz, U.S. Senator Alfonso M. D'Amato, and U.S. Senator Daniel P. Moynihan.

Seconded by Supervisor:

John C. Kiechle

John Fiorentino

State of New York
County of Jefferson

Jennie M. Adsit

Mark Freeman

I, the undersigned, Clerk of the Board of Supervisors of the County of Jefferson, New York, do hereby certify that I have compared the foregoing copy of Resolution No. 81 of the Board of Supervisors of said County of Jefferson with the original thereof on file in my office and duly adopted by said Board at a meeting of said Board on the 4th day of May, 1982 and that the same is a true and correct copy of such Resolution and of the whole thereof.

In testimony whereof, I have hereunto set my hand and affixed the seal of said County this 4th day of May, 1982.

James Merritt,

Clerk, Board of Supervisors, Jefferson County.

Department of Energy

Federal Energy Regulatory Commission

Natural Gas Policy Act of 1978; Determinations by Jurisdictional Agencies

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 888]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 6, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission purusant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
102-2: New well (2.5 Mile rule)
102-3: New well (1000 Ft rule)
102-4: New onshore reservoir
102-5: New reservoir on old OCS lease
Section 107-DP: 15,000 feet or deeper
107-GB: Geopressured brine
107-CS: Coal Seams
107-DV: Devonian Shale
107-PE: Production enhancement
107-TF: New tight formation
107-RT: Recompletion tight formation
Section 108: Stripper well
108-SA: Seasonally affected
108-ER: Enhanced recovery
108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

DEPARTMENT OF ENERGY

[Volume 889]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 6, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after pubication of notice in the **Federal Register.**

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
102-2: New well (2.5 Mile rule)
102-3: New well (1000 ft rule)
102-4: New onshore reservoir
102-5: New reservoir on old OCS lease
Section 107-DP: 15,000 feet or deeper
107-GB: Geopressured brine
107-CS: Coal Seams
107-DV: Devonian Shale
107-PE: Production enhancement
107-TF: New tight formation
107-RT: Recompletion tight formation
Section 108: Stripper well
108-SA: Seasonally affected
108-ER: Enhanced recovery
108-PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

DEPARTMENT OF COMMERCE

International Trade Administration

Trade Fair Certification Program; Support of Privately-Organized Domestic and International Trade Events

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Trade Fair Certification Program.

SUMMARY: This notice sets forth objectives, circumstances and application review criteria associated with the Department's program to recognize and support privately organized trade fairs. This notice also describes procedures for organizers wishing to apply for consideration for certification or desiring further information or assistance.

DATE: These administrative procedures are effective May 1, 1983.

ADDRESSES: Office of Event Management and Support Services, International Trade Administration, U.S. Department of Commerce, 14th & Constitution Ave., NW., Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Mr. David Earle, Office of Event Management and Support Services, International Trade Administration, U.S. Department of Commerce, 14th and Constitution Ave., NW., Washington, D.C. 20230, (202/377-2525).

SUPPLEMENTARY INFORMATION: As part of its mission to foster, promote and develop U.S. commerce, the Department has for many years developed and managed trade exhibitions abroad, sponsored "U.S. Pavilions" in foreign-managed trade events, and assisted U.S. firms participating in domestic trade shows to meet with potential foreign buyers, agents and distributors. While this activity will continue as an important Department function, it is our policy to encourage the private sector to undertake the development and execution of trade fairs—both in the U.S. and abroad—to an extent consistent with ensuring quality opportunities for U.S. firms to obtain export market exposure for their products and services.

In keeping with this policy, the Department has recently implemented the Trade Fair Certification Program. Under the program, private sector trade show organizers are encouraged to apply for certification for overseas or domestic trade events (including the "U.S. Pavilion" or other designated United States section at exhibitions featuring the products or services of more than one nation). Certification of an event is one-time, e.g. an organizer seeking certification for a recurring event must submit a new application for certification for each occurrence of the event.

As part of its regular planning process, the Department's International Trade Administration develops a schedule of trade promotion events that it feels represents an annually balanced, worldwide trade promotion program. If certification is granted for a USDOC scheduled event, the Department transfers responsibility for that event to the organizer and agrees to provide various support services, in lieu of direct participation by the Department of Commerce. Events need not have been part of the Department's schedule of planned promotion events to be proposed for and receive certification. The Department will not certify an event if it appears that withdrawal of U.S. Government participation would be contrary to the public interest.

Because of limited resources available to support certified events, the Department must limit certification to those events, which in it judgment, most clearly and best meet the Department's program objectives and general selection criteria. For this reason, a decision not to certify a particular event should not be viewed as a finding that the event will not be successful and beneficial in promoting U.S. exports.

The Trade Fair Certification Program involves no transfer of funds to the private sector. Travel and per diem costs incurred by Departmental personnel in direct support of a certified event will, as a general rule, be borne by the organizer, as will the major costs for promotional and marketing assistance.

Certificate and Logo. Each successful applicant is provided a certificate designating the particular event as being certified by the U.S. Department of Commerce. The applicant is also provided copies of an official Trade Fair Certification Program logo for use in advertising and promotional materials. Certification is intended to indicate that the Department has found the event to be a leading international trade event worthy of the participation of U.S. exporting firms and patronage by foreign customers. Certification is not intended—nor may it be characterized—as a U.S. Government guarantee of the success of the event or the proper performance of the undertakings of the organizer as to participants or other persons or organizations. Nor does certification imply an official endorsement of one trade fair organizer over others.

Department of Commerce Support of Certified Events. The support provided for certified events will differ depending on the specific needs identified by the organizer and the Department. Services may include special overseas marketing efforts by staff of the Foreign Commercial Service (FCS), such as contacting key foreign government and private sales prospects, presence of FCS officers at overseas events; publicity in appropriate Departmental periodicals; and promotion of U.S. firms' participation in the event by Export Development (ED) industry specialists in Washington, and/or trade specialists in U.S. Commercial Service (USCS) District Offices.

General Criteria for Awarding Certification. Subject to Departmental budget and resource constraints, certification will be granted to those events which, in the judgment of the Department, most clearly and best meet the following criteria:

a. *The event must be a leading internationally-oriented trade show or exhibition in the industry it represents.* In applying this criterion, the Department may consider such factors as:

(i) The degree to which the event is recognized as a showplace for the latest technology or techniques in an industry or a commercially recognized category of goods or services;

(ii) Whether the event provides a unique opportunity for export promotion within a particular market;

(iii) Whether the event can attract substantial numbers of U.S. industry participants and overseas visitors; and

(iv) Whether such participants are likely to exhibit products or services adequately representing U.S. industry in the particular field involved—the theme should be sufficiently broad to represent the U.S. industry.

b. *The event must have outstanding potential for export promotion.* In applying this criterion, the Department will consider:

(i) Whether the industry or target market of the event promises to attract substantial numbers of foreign buyers of U.S. products or services; and

(ii) Whether the "marketability" of the products or services to be exhibited—the sale potential in the market area and suitability of the products or services to promotion by the exhibition technique—adequately justify U.S. Government support.

c. *The event must be one whose promotion and support would be consistent with the Department's overall export promotion program and its priorities for allocation of trade promotion resources.* In applying this criterion, the Department will consider such factors as the theme, timing and location of the event, and whether under the relevant circumstances, USDOC support would contribute to a balanced annual trade promotion program.

d. *The applicant for certification must demonstrate:*

(i) Financial capability and personnel resources sufficient to guarantee planning and implementation of a successful event, including, but not limited to having an established U.S. office for recruitment of participants;

(ii) Experience or other qualifications in trade fair management; and

(iii) A business commitment to develop and execute the trade event. In particular, the applicant must provide documentation showing a firm agreement committing both the applicant and the lessor of exhibit space at the event to lease and provide the space necessary to accommmodate a "U.S. Pavilion" to consist of a minimum of twenty (20) individual U.S. exhibits. Leasing arrangements for such space cannot be made contingent on certification of the event by the Department;

(iv) The ability and commitment to provide a comprehensive show management and marketing effort, including efforts to attract participation by small and medium-sized, or new-to-market companies; and

(v) The ability and commitment to satisfy U.S. exhibitors' needs by delivering exhibition services comparable to those provided at Department of Commerce organized trade exhibitions.

Specific Department of Commerce Actions and Responsibilities. For certified events, the Department of Commerce will:

a. Authorized the use of a Department of Commerce "Trade Fair Certification" logo and other USDOC approved references which indicate that the United States Government recognizes the show.

b. Designate an Export Development industry project officer to work with the organizer regarding marketing promotion. This project officer will assist the organizer and in the case of overseas events, work with the Export Development Office (EDO), to implement the organizer's market promotion program.

c. Advise all USCS District Offices, U.S. Embassies, Consulates and other interested organizations, including trade associations, Chambers of Commerce, etc., that the Department of Commerce has recognized the exhibition under the Certification Program.

d. Provide a letter accepting the show under the Certification Program and a suggested news release for the organizer to use in public relations campaigns/activities.

e. *For domestic exhibitions,* at the request of the organizer, (the ED industry officer) will assist in marketing the event through the following actions:

(i) Provide the organizer with mailing labels and an indication of quantity and foreign language requirements for organizer's dispatch of promotional brochures to interested posts; and

(ii) Obtain from the show producer "copy" for an advertisement that is sufficient for a one page (or less) free advertisement in Commercial News USA, and arrange for its placement in the publication.

f. *For overseas exhibitions,* at the request of the organizer, (the Department will) assist in marketing the event through the following actions:

(i) The EDO will furnish the organizer with a list of key local government entities, associations, distributors, agents, etc., prepared by the post;

(ii) Resources permitting, USFCS officers will assist marketing promotion meetings with local representatives of U.S. companies participating in the event, and make personal calls on key potential business contacts on behalf of U.S. companies participating in the event; and

(iii) The International Economic Policy (IEP) country desk officer will provide, on request, and to the extent available, pertinent market or other information requested by the organizer.

g. Encourage potential exhibitors, either in the normal course of their counseling of U.S. firms or through contacts with business or trade associations, to take advantage of the event, and respond to inquiries regarding opportunities afforded by the event.

h. Upon the request of the organizer, provide a Commerce representative or representatives for duty at the show. (A USDOC officer is required at all domestic events.) The period of time and nature of support required are to be specifically identified in the organizer's application. Commerce may at its discretion and expense provide an additional officer for domestic events and an officer for overseas events.

Specific Responsibilities of the Organizer. Subject to any specific agreement between the Department and the organizer, the responsibilities of the organizer of a certified event are as follows:

a. Designate an individual on the organizer's staff to work on all aspects of the show with Department of Commerce personnel assigned to coordinate activities for the exhibition.

b. Provide the following exhibitions services:

(i) Display space comparable with industry standards for trade events;

(ii) Overall exhibition design and fabrication, and individual display stand design and construction;

(iii) Forwarding and exhibit set-up services including, but not limited to: unloading participants' equipment at the exhibition site; delivery to the participants' booth, unpacking, placement in display area, storing packing crates, repacking and loading for onward shipment, customs clearance (overseas events only); and any other services required to assure the prompt and orderly receipt and dispatch of materials in and out of an exhibition site;

(iv) Installation of a display system, chairs, tables, standard company identification and standard agent identification signs;

(v) Normal utilities and hook-up services; and

(vi) Assistance in hiring interpreters, clerical personnel or booth attendants required by participants. All fees to be charged to participants for standard and supplementary services must be stated in the organizer's application.

c. Provide, for any overseas event, an identified "U.S. Pavilion" large enough to contain exhibits of at least 20 U.S. firms or 75% of the target number of participants stated in the application, whichever is larger.

d. Undertake, as appropriate, a comprehensive promotional campaign to include, at a minimum, but not be limited to: special trade showings, conferences and meetings to attract importers, distributors, agents, buyers and end-users to the exhibition. For domestic events, as appropriate, the organizer must produce multilingual promotion brochures or other literature and an Export Interest Directory (a published listing of exhibitors who have expressed an interest in meeting with foreign buyers which includes, but is not limited to the following information: firm name, product line and nature of business interest—joint venture, licensing, distributorship, direct sales) for distribution to overseas posts and end users.

e. For all events, provide at no cost to the U.S. Government, an International Business Center (IBC) (in foreign exhibitions, this center must be in the "U.S. Pavilion"). The IBC will be in a prominent and easily accessible location, where contracts between U.S. exhibitors and foreign customers can be

VOL 48 ISS 93 MY 12 1983 UMI

facilitated by a U.S. Government representative. At a minimum, this center must facilitate the receipt of messages and be conductive to "one-on-one" business meetings between participants and contacts. The organizer must also make available or assist in securing services (including translation services), foreign customer registration, and assist in arranging appointments between U.S. exhibitors and foreign customers.

f. Include small- and medium-sized U.S. firms in recruitment mailings and solicitations.

g. Subject to Departmental guidelines, pay per diem and travel-related expenses for U.S. Department of Commerce employees whom the organizer has agreed will be present.

h. Provide statistical or other information of a non-proprietary nature requested by the Department within 60 days of the event for use in evaluating the success of the event and the effectiveness of support provided by the Department. Such information may include, but not be limited to: number of visitors, off-the-floor sales, number of attendees at seminars, etc. Along with this information, the organizer will furnish three (3) copies of the Export Interest Directory to the Department (for domestic events only).

When, Where, and How to Apply for Trade Fair Certification. Applications for certification should be received by the Department at least one (1) year before the scheduled date of the event. To ensure the availability of Department resources and to fully anticipate workload associated with support provided to organizers, the Department may reject any application received later than that date. An application is not considered to have been received for purposes of this rule until it is complete in all material respects.

Brenda L. Ebeling

Acting Director, Office of Event Management and Support Services.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5060 of May 11, 1983

National Amateur Baseball Month, 1983

By The President of the United States of America

A Proclamation

The game of baseball originated in the United States of America approximately 150 years ago and quickly became a fixture of community life. Today baseball diamonds dot parks, playgrounds, and schoolyards across the land, and virtually every village, town, and neighborhood has its own team, or teams. No summer would be complete without its schedule of games and championship playoffs.

Baseball is affectionately known as the "national pastime" because of its popularity as both a participant and spectator sport. Some 19 million children, youths, and adults play amateur baseball in the United States, and many millions more attend amateur contests as spectators each year. This vast program is made possible by generous contributions of time, effort, and financial support by millions of individuals representing business, fraternal, civic, religious and service organizations.

Baseball has achieved its greatest popularity and highest level of perfection in the United States, but it is rapidly gaining acceptance elsewhere. In Europe, and in Japan and other Far Eastern countries, there is growing recognition of baseball's great entertainment value and its effectiveness as a means of instilling those qualities of teamwork and fair play that are essential to good citizenship. This recognition is reflected in the fact that baseball will be a part of the 1984 Olympic Games in Los Angeles.

Because amateur baseball plays such an important role in our lives, and because millions of Americans are involved in the game as players, fans, and supporters, it is fitting that we should celebrate this uniquely American activity.

In recognition of the wholesome recreation, good sportsmanship, competitiveness, and teamwork so necessary in developing good citizenship which the game of baseball affords, the Congress of the United States, by House Joint Resolution 175 (P.L. 98–16), has designated the month of May 1983 as "National Amateur Baseball Month" and has authorized and requested the President to issue a proclamation in observance of that month.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of May 1983 as National Amateur Baseball Month, and I call upon the people of the United States to observe such month with appropriate programs, ceremonies, and activities, so as to testify to the great and significant value of amateur baseball to the American way of life.

Executive Order 12420 of May 11, 1983

Incentive Pay for Hazardous Duty

By the authority vested in me as President of the United States of America by Public Law 97-60 and Section 301(a) of Title 37 of the United States Code, and in order to define the scope of two additional categories of hazardous duty, it is hereby ordered as follows:

Section 1. Executive Order No. 11157 of June 22, 1964, as amended, is further amended by adding the following new subsections to Section 109 of Part I:

"(h) The term "duty involving frequent and regular exposure to highly toxic pesticides" shall be construed to mean duty performed by members who, while under competent orders assigning such members to the entomology, pest control, pest management, or preventive medicine functions of a uniformed service for a period of 30 consecutive days or more, are required to perform in any calendar month a fumigation task utilizing (1) phosphine, sulfuryl fluoride, hydrogen cyanide, methyl bromide, or (2) a fumigant of comparable high acute toxicity and hazard potential.

"(i) The term "duty involving laboratory work that utilizes live dangerous viruses or bacteria" shall be construed to mean primary duty performed by members who work with micro-organisms (1) that cause disease (A) with a high potential for mortality, and (B) for which effective therapeutic procedures are not available, and (2) for which no effective prophylactic immunization exists, while such members are assigned by competent orders for a period of 30 consecutive days or more to participate in or conduct applied or basic research that is characterized by a changing variety of techniques, procedures, equipment, and experiments.".

Sec. 2. This Order shall be effective as of October 1, 1981.

Ronald Reagan

THE WHITE HOUSE,

Food and Nutrition Service

7 CFR Part 226

Child Care Food Program; Elimination of Cost as Factor for Reimbursement to Child Care Centers

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: Public law 97–35, the Omnibus Budget Reconciliation Act of 1981, enacted August 13, 1981, altered the Child Care Food Program (CCFP) and made several substantive changes. One major change was to eliminate the Federal requirement that reimbursement to institutions be limited to the cost of producing the meals served. This final rule will delete the following provisions of the May 11, 1982 (47 FR 20144), proposal: (1) Definition of net cash resources; (2) requirement to implement operating balances (net cash resources) into the CCFP; (3) requirement for State agencies (SA's) to establish and maintain an addition financial management system; (4) SA's responsibility to monitor and review the net cash resources of participating institutions; and (5) institutions' requirement to collect and maintain documentation of their net cash resources.

EFFECTIVE DATE: June 13, 1983.

ADDRESSES: The Final Impact Statement describing the options considered in developing this final rule and the impact of implementing each option is available on request from Ms. Beverly Walstrom, Child Care and Summer Programs Division, Food and Nutrition Service, U.S. Department of Agriculture, Room 416, 3101 Park Center Drive, Alexandria, Virginia 22302, or by telephone at (703) 756–3880.a

Copies of all written comments on the proposed rule are available for review during normal business hours at the same address.

FOR FURTHER INFORMATION CONTACT: Ms. Beverly Walstrom, Chief, Policy and Program Development Branch, at the above address or by telephone at (703) 756–3888.

SUPPLEMENTARY INFORMATION:

Classification

This final rulemaking has been reviewed in accordance with Executive Order 12291 and has not been classified as major because it will not have an annual effect on the economy of $100 million, will not cause a major increase in costs or prices, and will not have a significant economic impact on competition, employment, investment, productivity, innovation or on the ability of U.S. enterprises to compete. This rule has also been reviewed with regard to the requirements of Pub. L. 96–354. Robert E. Leard, Administrator of the Food and Nutrition Service, has certified that this final rule does not have significant economic impact on a substantial number of small entities.

Paperwork Reduction Act: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping provisions that are included in this final rule will be submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained.

Background

On May 11, 1982, the Department published a proposed rule in the **Federal Register** (47 FR 20144) to eliminate the Federal requirement that costs be considered as a factor in reimbursement to child care centers. The proposal was designed to implement Section 819(k) of Pub. L. 97–35, which eliminated the requirement that reimbursement to institutions be limited to the cost of producing the meals served in child care centers. However, State agencies could still elect to reimburse these institutions according to the lesser of costs or meals times rates. The method chosen by the State agency was to be applied to all institutions participating in the CCFP in that State.

To comply with the mandate of the law, the Department removed the references to costs as a limiting factor on payments in the proposed rule. The proposal also included definitions of net cash resources and nonprofit food service. The new definitions required participating institutions to maintain revenue and expenditure records to substantiate the nonprofit status of their food service. The proposal further required the State agencies to be responsible for reviewing and monitoring the institution's nonprofit food service and net cash resources to ensure that the resources do not exceed three months' normal operating cost. In addition, State agencies would have been required to establish and maintain financial management systems conforming to the standards enumerated in the Department regulations (7 CFR Part 3015, Subpart H), which remain in effect. Moreover, the Department eliminated the Federal requirement that centers report their operating costs on the monthly claim for reimbursement.

Effective January 1, 1982, States were able to determine which of the two methods of reimbursement they would apply to centers, either: (1) Meals by type times the appropriate rate of reimbursement or costs, whichever is lesser; or (2) meals by type times the appropriate rate of reimbursement. The Department has found in the past that centers have generally received maximum reimbursement rates for meals served. This optional requirement to report costs included in the proposal would not have posed an implementation problem. In response to the May 11 proposal, the Department received 35 comments from State agencies, FNS Regional Offices, sponsors, advocacy groups, and government agencies. All comments were analyzed, summarized, and catalogued according to the regulatory section to which they referred so that the comments could be systematically analyzed and considered during the development of the final rule.

An overwhelming majority of the commenters expressed their concerns with the inclusion of the National School Lunch Program (NSLP) definitions of operating balances (net cash resources) and nonprofit food service in the CCFP regulations. It was noted by the commenters that these terms were not relevant to the CCFP and that adopting them would pose a tremendous hardship on the CCFP institutions and administering agencies.

VOL
48
ISS
94
MY

1983
UMI

In addition, the majority of commenters agreed that these additional requirements involving operating balances and nonprofit food service would: (1) Definitely increase the administrative burden on the institutions to maintain records of net cash resources to justify nonprofit status; (2) require institutions to keep separate bank accounts for the food service operations; and (3) require institutions to monitor their net cash resources, ensuring that the three months' normal operating balance is not exceed.

More than half of the commenters recommended that all references related to the requirements to monitor and review for net cash resources be deleted in the final rule. The administrative burden to monitor and review the institutions' resources for excessive balances, along with yet another recordkeeping process, would also incease State agency staff time. Furthermore, the requirement to monitor and review the resources of an institution would require a more in-depth knowledge and understanding of cash balances and general accounting procedures. Such expertise is greater than what is currently required of a Program reviewer.

The Department received a number of comments that the provision in the proposed rule regarding net cash resources was in direct opposition to the intent of Congress, which was to simply remove cost as a limitation on reimbursement. The commenters also expressed concern that the proposed provision regarding net cash resources (operating balances) would increase the paperwork burden on both the institution and the State agency rather than decrease it, which is not the intent of the Paperwork Reduction Act of 1980. Moreover, many commenters believed that the proposed Program regulations on net cash resources appeared more complicated and complex than the existing CCFP regulations. Besides the proposed regulation being cumbersome, many commenters felt the rule was not cost effective.

Statutory and Other Program Changes

Although the proposed rule presented the discussion on the amendments by regulatory sections, the comments received were more primarily on the one area of defining net cash resources (operating balances) and the burdens this provision would place on administering agencies and participating institutions.

1. *Definition:* The Department received 20 comments concerning the various references throughout the proposed rule on net cash resources and nonprofit food services. Many commenters expressed opposition to the definition of net cash resources, specifically concerning advances. In general, they wanted to know what was to be considered available monies when establishing the level of net cash resources. The commenters indicated that advances are *loans* to the participating institutions. These advances could possibly cause the institutions to exceed the three months' operating balance required in the proposed rule.

Some commenters were also concerned that the operating balance would be affected by start-up monies. The Department wishes to point out that in the proposed definition of net cash resources, start-up monies were inadvertently included. While these monies can be considered as part of funds an institution can receive, only sponsoring organizations of day care homes receive such funds. Therefore, such comments were not valid as this rule will not affect those institutions which are sponsoring organizations of day care homes. Such institutions are the only ones eligible to receive start-up monies under the CCFP. The Department regrets any confusion that this definition may have caused.

2. *State agency requirements.* The Department received 28 comments discussing the potential problems with the States reviewing and monitoring the institutions' net cash resources. The proposed requirement was to ensure that the institutions' resources did not exceed the three months' normal operating balance limit, and, if such resources exceeded this limitation, corrective action might be deemed necessary by the SA's.

First, many commenters felt that Program reviewers do not have the expertise to determine if the net cash resources of participating institutions exceed a three months' normal operating balance. To evaluate and compare whether an institution has funds in excess of this limitation, the SA's would be forced to spend additional time determining whether there are excessive funds. This extra time would place a burden on States, in addition to their already limited resources and staff. Furthermore, it was suggested that this procedure should be performed by accountants or auditors, who are trained to make such an assessment.

Second, several commenters indicated that this requirement would increase their review burden. One commenter noted that the increase in burden would roughly triple the necessary man hours for the SA's to complete a review, increase training requirements, and require the development of additional materials for the institutions. Thus, the proposal would have a significant staffing impact with only minimal Program benefit. Furthermore, according to the commenters, the expenditures by both the SA's and the institutions in auditing and monitoring would be excessive nationwide when compared to the savings that would be garnered.

In addition to the review and monitoring requirement, the SA's would be reponsible for establishing and maintaining a financial management system which would incorparate net cash resources. Several of the commenters stated that this requirement would necessitate an increase in paperwork and recordkeeping which could not be justified by either cost effectiveness or benefit to the Program. Very few commenters indicated that they agreed with the level of flexibility given the SA's in determining when and how to monitor and review the net cash resources. Some commenters further suggested that the proposal was actually lacking in flexibility and wanted further clarification of their responsibility in this area. Many of the commenters indicated that the proposal on net cash resources appeared to be in direct opposition to the intent of Congress, which was to simply remove cost as a limitation on reimbursement. They also believed that the proposed requirements necessary to fulfill the provisions on net cash resources were not in compliance with the Paperwork Reduction Act of 1980.

Several commenters have pointed out that, although numerous references are made in the proposed preamble to allow the States the option to choose the type of reimbursement for their individual State, the actual provision was not in the proposed rule. This provision was inadvertently omitted from the proposed rule and has been inserted in this final rule.

3. *Institution requirements.* In addition to the concerns of the commenters regarding State agency requirements, the commenters were also concerned about the problems institutions would face in maintaining and documenting net cash resources.

The majority of the commenters agreed that the approach the proposed rule implements would significantly increase the institutions staff time and resources. At present, most institutions maintaining a general account from which all bills are paid, and they do not keep a separate bank account specifically earmarked for the CCFP food service. The proposed provision would indicate that a separate bank account would be necessary basically to assure the nonprofitability of the food service. The commenters pointed out that since most CCFP institutions purchase basic food staples somewhat irregularly, costs can vary greatly from one month to another. Further, since Food Service Equipment Assistance Funds have been eliminated from the Program, in those few instances where funds are accumulated, the institutions may use such funds to replace broken or inadequate pieces of small equipment. If their ability to accumulate funds is so severely curtailed, they will be unable to take advantage of wholesale food and equipment purchase opportunities.

Furthermore, according to the commenters, monitoring net cash resources in the CCFP would be a financial strain on the institution, since current food service reimbursements have been decreased. Generally, participating institutions use funds from other sources to cover those food costs not reimbursed by the CCFP. At present, institutions do not need to account for such non-Program funds under the CCFP. The institutions would have been forced to establish another recordkeeping system to identify all revenue and expenditures, which would create an increase in staff workloads and be extremely confusing for most institution staff.

Many sponsors indicated that their costs far exceeded the maximum reimbursement allowed for preparing a reimbursable meal. Considerable time and administrative money would be spent in monitoring. In most cases, the cost for implementing this additional requirement would not only take away from the quality of the meal, but also would result in the institution requiring and the administering agency providing additional technical assistance.

In response to the concerns mentioned above, the Department has either deleted or revised those proposed provisions that require the institutions to collect, maintain, and document their net cash resources. The provisions which have been changed are discussed below.

(a) *Definition of net cash resources.* The Department has considered the comments submitted in response to the proposed definitions and has decided to delete the definition of net cash resources in § 226.2. However, the definition of nonprofit food service has been retained. The Department believes that the institution must also ensure that all Program reimbursement funds are used solely for the conduct of the food service operation, or to improve the food service, principally for the benefit of the enrolled children.

(b) *State agency administrative responsibilities.* In the proposed rule, section 226.6(k) required State agencies, as part of their Program review of financial management standards, to also review the net cash resources of the institution. Since the Department is deleting the proposed definition of net cash resources, the proposed provision in this section no longer is applicable. Therefore, this section has been retained as stated in the final CCFP regulations published on August 20, 1982 (47 FR 36524).

(c) *State agency responsibilities for financial management.* The Department proposed to require the State agencies to be responsible for monitoring the net cash resources and the nonprofit status of the food service program of participating institutions. In the event such resources were in excess of the three months' normal operating cost, the State agencies would be required to take corrective actions.

Section 226.7(b) is not being revised as proposed but is being retained as stated in the final CCFP regulation August 20, 1982 (47 FR 36524) which requires the State agencies to adhere to the Uniform Federal Assistance Regulations, 7 CFR Part 3015. The Department has also included an additional sentence requiring the SA's to review the institutions' documentation to ensure that all Program reimbursement funds are used solely for the conduct of the food service, or to improve the food service, principally for the benefit of the enrolled children.

(d) *State agency adjustment of claims.* The Department proposed to eliminate section 226.9(c). The purpose of this section has been to allow State agencies to reassign payment rates for lunches and suppers claimed on an institution's final claim for the fiscal year. With the elimination of the Federal requirement that reimbursement include a comparison of costs to rates, it was felt that this purpose was no longer served. Deleting this provision did not allow States flexibility to adjust final claims under either reimbursement option. Also, it was determined that including an explanation of each reimbursement option would be helpful to States and institutions. Therefore, in § 226.9, a new paragraph (c) has been added which provides this explanation, and the old paragraph (c) has been revised and redesignated as paragraph (d). These changes should clarify each method of reimbursement and the adjustment of final claims under both reimbursement options.

(e) *Institution provision.* In the proposed rule, § 226.15(e) was amended to require the institutions, as part of their established recordkeeping procedures, to maintain documentation of their net cash resources to ensure that the level of resources does not exceed three months' normal operating cost for the nonprofit food service. However, this section has been revised to simply require the institutions, as part of their established recordkeeping procedures, to maintain documentation of their nonprofit food service to ensure that all Program reimbursement funds are used: (1) Solely for the conduct of the food service operation; or (2) to improve such food service operations, principally for the benefit of the enrolled children.

(f) *Sponsoring organization provisions.* The proposed rule amended § 226.16(h) by eliminating the references to Program costs as a limiting factor in reimbursing child care centers. While this provision is being retained, the Department has revised it in the final rule to allow for States to choose the optional method of reimbursement.

In addition, participating institutions will still be required to maintain records of Program reimbursement and expenditures for the food service operation for review and audit purposes, regardless of the manner in which the State agency elects to reimburse according to costs from requiring that related Program costs be entered on the claim for reimbursement. This information may be necessary to the States as a means of targeting technical assistance needs, planning audit activity, and monitoring the Programs' nonprofit status. Therefore, although the Department is revising the rule to eliminate some of the accountability procedures, it is not expected that this change will encourage waste or abuse of Program funds.

List of Subjects in 7 CFR Part 226

Child care centers, State agencies and Institutions.

PART 226—[AMENDED]

Accordingly, the Department is amending 7 CFR Part 226 as follows:

1. Section 226.2 is amended by adding the definition of "nonprofit food service" in alphabetical order, to read as follows:

§ 226.2 Definitions.

* * * * *

"Nonprofit Food Service" means all food service operations conducted by the institution principally for the benefit of enrolled children, from which all of the Program reimbursement funds are

VOL 48 ISS 94 MAY 13 1983 UMI

used solely for the operation or improvement of such food service.

* * * * *

2. Section 226.7, paragraph (b) is amended by adding a new sentence at the end to read as follows:

§ 226.7 [Amended]

* * * * *

(b) * * * State agencies or FNSRO's, where applicable, shall also have a system in place for monitoring and reviewing the institutions' documentation of their nonprofit status to ensure that all Program reimbursement funds are used: (1) solely for the conduct of the food service operation; or (2) to improve such food service operations, principally for the benefit of the enrolled children.

* * * * *

3. Section 226.9, paragraph (c) is redesignated paragraph (d) and revised and a new paragraph (c) is added to read as follows:

§ 226.9 Assignment to rates of reimbursement for centers.

* * * * *

(c) States have two methods of reimbursing institutions. The method chosen by the State agency must be applied to all institutions participating in the CCFP in that State. These methods are:

(1) Meals times rates payment, which involves reimbursing an institution for meals served at the assigned rate for each meal. This method entails no comparison to the costs incurred by the institution for the meal service; and,

(2) Meals times rates or actual costs, whichever is the lesser, which involves reimbursing an institution for meals served at the assigned rate for each meal or at the level of the costs actually incurred by the institution for the meal service. This method does entail a comparison of the costs incurred to the meal rates, with the costs being a limiting factor on the level of reimbursement an institution may receive.

(d) In those States where the State agency has chosen the option to implement a meals times rates payment system State-wide, the State agency may elect to pay an institution's final claim for reimbursement for the fiscal year at higher reassigned rates of reimbursement for lunches and suppers; however, the reassigned rates may not exceed the applicable maximum rates of reimbursement established under § 210.11(b) of the National School Lunch Program regulations. In those States which use the method of comparing meals times rates or actual costs, whichever is lesser, the total payments made to an institution shall not exceed the total net costs incurred for the fiscal year.

4. The first sentence of § 226.11(d) is revised to read as follows:

§ 226.11 Program payments for child care centers and outside-school-hours care centers.

* * * * *

(d) If the State agency elects to reimburse its institutions according to the lesser of rates or actual costs, total Program payments to an institution during any fiscal year, including any cash payments in lieu of commodities, shall not exceed allowable Program operating and administrative costs, less income to the Program. * * *

* * * * *

5. Section 226.15 is amended by removing the period at the end of paragraph (e)(10) adding a semi-colon and adding a new paragraph (e)(11), to read as follows:

§ 226.15 Institution provisions.

* * * * *

(e) Recordkeeping.* * *

(11) Maintain documentation of nonprofit food service to ensure that all Program reimbursement funds are used: (i) Solely for the conduct of the food service operation; or (ii) to improve such food service operations, principally for the benefit of the enrolled children.

* * * * *

6. Section 226.16, paragraph (h) is amended by removing the period at the end of the paragraph, adding a semi-colon, and inserting a new phrase to read as follows:

§ 226.16 Sponsoring organization provisions.

* * * * *

(h) * * * ; except in those States where the State agency has chosen the option to implement a meals times rates payment system. In those States which implement this optional method of reimbursement, such disbursements may not exceed the rates times the number of meals documented at each facility during any fiscal year.

* * * * *

BILLING CODE 3410-30-M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Regulation 411]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period May 15–21, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: May 15, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910; 47 FR 50196), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met again publicly on May 10, 1983, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons continues active.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

Section 910.711 is added as follows:

§ 910.711 Lemon Regulation 411.

The quantity of lemons grown in California and Arizona which may be handled during the period May 15, 1983, through May 21, 1983, is established at 300,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

BILLING CODE 3410-02-M

7 CFR Part 916

[Peach Regulation 2, Amdt. 1]

Fresh Peaches Grown in Georgia; Amendment of Quality and Size Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment of final rule.

SUMMARY: This amendment relaxes quality regulations for shipments of Georgia peaches to nonadjacent markets for the period May 9 through August 31, 1983 by suspending minimum grade requirements, which are essentially that such peaches grade at least 85 percent U.S. No. 1. The amendment continues the minimum size requirement of 1⅝ inches in diameter and requires that the peaches be mature. The amendment removes all such requirements with respect to shipments to adjacent markets. Such action recognizes the composition of the crop and current and prospective marketing conditions.

EFFECTIVE DATE: May 9, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the Georgia peach crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under the marketing agreement, as amended, an Order No. 916, as amended (7 CFR Part 916), regulating the handling of peaches grown in Georgia. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based on information submitted by the Industry Committee established under this marketing order, and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

Shipments of Georgia peaches, except peaches in bulk to adjacent markets (The States of Florida, Alabama, Tennessee, North Carolina, South Carolina, Mississippi, and that portion of Louisiana which is east of the Mississippi River) are currently required to grade at least 85 percent U.S. No. 1 quality with additional allowances for damage and decay, and be at least 1⅝ inches in diameter, as well as be inspected and certified as meeting such requirements. Sections 916.54 and 916.400 require that peach shipments be mature.

The committee met on April 12, 1983, to consider supply and market conditions and other factors affecting the need for and type of regulations suitable for the 1983 season Georgia peach crop. The committee recommended that for the 1983 season peaches shipped to other than adjacent markets be mature and measure at least 1⅝ inches in diameter. The committee also recommended that all shipments of peaches to adjacent markets be exempt from these requirements. The committee recommended these requirements based on an appraisal of the current and prospective growing and marketing conditions for this season's Georgia peach crop. The Georgia peach production area is one of the first each season to market an appreciable amount of fresh peaches. During the early weeks of the season there is a tendency to ship inmature and smaller size fruit. Shipment of such fruit at this time tends to adversely affect consumer demand, with resultant depressing effects on grower returns. Specification of minimum size and maturity requirements for shipments to other than adjacent markets is necessary to promote orderly marketing of shipments from the 1983 crop. Peach producing states surrounding Georgia do not have mandatory quality requirements for peaches shipped to fresh markets. Exemption of peach shipments to adjacent markets from grade, size and maturity requirements allows an additional outlet for fruit not meeting the requirements for nonadjacent markets. The committee unanimously adopted and has submitted to the Secretary a marketing policy for the 1983 season Georgia peach crop including an analysis of supply and demand factors having a bearing on the marketing of the crop.

The regulation currently in effect (Peach Regulation 2; 47 FR 32513; July 28, 1982) was issued July 23, 1983, on a continuing basis subject to modification, suspension, or termination upon recommendation by the committee and approval by the Secretary. Relaxation of current regulation for Georgia peaches is applicable to the 1983 season only. The committee will continue to meet prior to and during each season to consider recommendations for modification, suspension, or termination of the regulatory requirements for Georgia peaches. Prior to making any such recommendations, the committee would submit to the Secretary a marketing policy for the season including an analysis of supply and demand factors having a bearing on the marketing of the crop. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department will review committee recommendations and information submitted by the committee, and other available information, and determine whether modification, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy of the Act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice,

VOL

UMI

engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this final rule is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the revisions of the quality and size requirements at an open meeting, at which the committee, without opposition, recommended implementation of the requirements specified in this final rule. This final rule relieves restrictions on the handling of peaches, and handlers have been apprised of such provisions and the effective date.

List of Subjects in 7 CFR Part 918

Marketing Agreements and Order, Peaches, Georgia.

PART 918—[AMENDED]

Therefore, § 918.325 is amended by adding a new paragraph (e) to read as follows: (Paragraph (e) of § 918.325 expires August 31, 1983, and will not be published in the annual Code of Federal Regulations).

§ 918.325 Peach Regulation 2

* * * * *

(e) Notwithstanding the provisions in paragraphs (a), (b), and (c), of this section, during the period May 9, 1983, through August 31, 1983, no handler shall ship peaches to destinations, other than those in the adjacent markets, unless such peaches are mature as provided in § 918.400, and are not smaller than 1⅝ inches in diameter, except that not more than 10 percent, by count, of such peaches in any bulk lot or any lot of packages, and not more than 15 percent, by count, of such peaches in any container in such lot, may be smaller than 1⅝ inches in diameter.

(Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674))

Dated: May 9, 1983.

7 CFR Part 967

Celery Grown in Florida; Reestablishment and Reapportionment of Committee Membership

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule reduces the number of members serving on the Florida Celery Committee from sixteen to twelve, to reflect the declining number of celery producers and handlers in Florida. The reduction in committee size eliminates three positions in the South Florida District and one position in the Central Florida District.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Charles W. Porter, Chief, Vegetable Branch, Fruit and Vegetable Division, Washington, D.C. 20250 (202) 447–2615.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "nonmajor" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action relates to industry representation on the marketing order administrative committee and will not significantly affect costs for the handlers regulated under the program.

Marketing Agreement No. 149 and Order No. 967, both as amended (7 CFR Part 967), regulate the handling of celery grown in Florida. The program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Florida Celery Committee, established under the order, is responsible for its local administration.

The order currently provides for a committee of sixteen members and their alternates. One member represents the public, and the remaining fifteen are industry representatives. Due to a decline in the number of Florida celery growers and handlers, it has been difficult to fill all positions on the committee. For this reason, the order was recently amended to authorize the reestablishment of the number of industry members on the committee.

After careful consideration of all relevant factors, including the total number of growers and handlers currently active in the production area, the committee unanimously recommended that it be reestablished to consist of twelve members by reducing the number of industry representatives from 15 to 11. Such a change will result in more efficient administration of the program.

The committee further recommended that this reduction be accomplished by eliminating three positions in the South Florida District and one position in the Central Florida District. Representation of the other groups remains unchanged. The committee has determined that such a reapportionment will provide adequate and equitable industry representation in view of the current distribution of celery production and shipments among the five established groups.

Findings. After consideration of all relevant matters, including the proposal set forth in the notice, it is hereby found that the following reestablishment and reapportionment of committee membership will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that (1) this change in committee membership should become effective sufficiently in advance of nomination meetings for the 1983–84 Florida Celery Committee scheduled for mid-June; (2) it was unanimously recommended by the committee and its contents have been widely discussed within the celery industry; and (3) notice was given in the **Federal Register** allowing interested persons to file written comments and none was received.

List of Subjects in 7 CFR Part 967

Marketing agreements and orders, Celery, Florida.

PART 967—CELERY GROWN IN FLORIDA

Sections 967.135 and 967.136 are added to read as follows:

§ 967.135 Reestablishment of committee.

Pursuant to § 967.25(b), the Florida Celery Committee is reestablished to consist of 12 members, including eleven producer or handler members and one public member.

§ 967.136 Reapportionment of committee membership.

Pursuant to § 967.27(g), industry membership on the Florida Celery Committee shall be reapportioned among groups as follows:

(a) Group 1—Two members and their alternates.

(b) Group 2—Two members and their alternates.

(c) Group 3—Two members and their alternates.

(d) Group 4—Two members and their alternates.

(e) Group 5—Three members and their alternates.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: May 10, 1983, to become effective upon publication.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

Commodity Credit Corporation

7 CFR Part 1446

General Regulations Governing 1982 Through 1985 Crops Peanut Warehouse Storage Loans and Handler Operations

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: This Final Rule establishes the terms and conditions under which producers acting through area marketing associations may receive price support on eligible peanuts through warehouse storage loans for the 1982 through 1985 crops of peanuts. These regulations are necessary for the administration of the price support program for peanuts. The peanut program is conducted in accordance with the provisions of the Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended. The provisions of this final rule were addressed in an Interim Rule issued in June of 1982. With a few exceptions, the provisions of this final rule are the same as those contained in the Interim Rule. Changes which are made by this final rule principally involve the terms which must be contained or may be omitted in contracts for additional peanuts, the procedure of assessing penalties under the regulations, and a deletion of a provision of the Interim Rule concerning the substitution of additional peanuts or quota peanuts which had been crushed.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: David Kincannon (ASCS), 202–382–0154. The Final Regulatory Impact Analysis is available upon request.

SUPPLEMENTARY INFORMATION: This Final Rule has been reviewed under USDA procedures, Executive Order 12291, and Secretary's Memorandum No. 1512–1, and has been classified "not major." It has been determined that this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, industries, Federal, State or local governments, or geographical regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The information requirements contained in this regulation and information requests authorized by the regulation have been reviewed and approved under OMB Number 0560–0024.

The title and number of the Federal assistance program to which this rule applies are: Commodity Loans and Purchases, 10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this rule since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

An Interim Rule, which established regulations governing 1982 through 1985 Crop peanut warehouse storage loans and handler operations, was published in the **Federal Register** on June 29, 1982 (47 FR 28069). The 60-day comment period on the Interim Rule ended on August 30, 1982.

The regulations set forth in the Interim Rule and this Final Rule are essentially the same as those governing the 1981 and prior crop years which are codified at 7 CFR 1446.1 through 1446.17. Accordingly, the administration of warehouse storage loans and handler operations has been changed only slightly from the manner in which such matters were administered for previous crop years. However, the original Interim Rule and this Final Rule have implemented several modifications which have been made to reflect changes brought about by the Agriculture and Food Act of 1981, Pub. L. 97–98, 95 Stat. 1213, to improve the overall administration of the program, and to address recommendations received during the comment period.

The most significant changes which have been made in the regulations for warehouse storage loans and handler operations for the 1982 through 1985 crops of peanuts, as compared with those which governed previous crop years, are as follows:

1. *Definitions.* As compared to the regulations involving previous crop years, the regulations governing the 1982 through 1985 crop years have been revised to reflect the statutory amendments which were made by the 1981 Act which permit "additional peanuts" (non-quota peanuts) to be grown on non-traditional peanut producing farms and in non-traditional peanut producing areas, and which permit peanut-flaking (in some instances) to be considered as domestic crushing. In addition, the provisions of the regulations relating to the use of peanuts as seeds have in some instances been modified insofar as determining whether the retention of such peanuts on the farm for seed shall be considered as a domestic edible use for quota purposes. In addition, the following definitional changes were made in the interim rule.

(a) The term "additional peanuts" is defined in the regulations governing the 1982 through 1985 crop years to include all peanuts marketed from a farm for which no poundage quota has been established.

(b) For the 1982 through 1985 crops of peanuts, the definition of crushing includes, among other things, peanuts processed into flakes for uses other than traditional domestic edible uses.

(c) The definition of "domestic edible use" has been revised to exclude seed-uses of peanuts where the seeds are unique strains that are not commercially available and which are used to produce green peanuts. In this regard, the term "green peanuts" is specifically defined as those peanuts which are marketed exclusively for use as boiled peanuts.

2. *Completion date for contracting additional peanuts for crushing or export.* Section 359(j) of the 1938 Act, as amended, mandates that contracts between handlers and producers must be submitted for approval to the Secretary of Agriculture prior to April 15 of the year in which the crop is produced. That date is incorporated in this final rule.

3. *Availability of warehouse storage loans.* Section 106A(3)(A) of the 1949 Act requires that the Secretary make warehouse storage loans available in each of the three traditional producing areas through area marketing associations. This final rule specifies that loans for the 1982 through 1985 crop years will be made available in the following areas through the following associations:

(a) For the Southeastern area which includes the traditional peanut-producing areas encompassing the States of Alabama, Florida, Georgia, Mississippi, and that part of South Carolina south and west of the Santee-Congaree-Broad Rivers, loans will be made through the GFA Peanut Association of Camilla, Georgia.

(b) for the Southwestern area which includes the traditional peanut-producing areas encompassing the States of Arizona, Arkansas, California, Louisiana, New Mexico, Oklahoma, and Texas, loans will be made through the

VOL
48
ISS
94
MY
13
1983
UMI

Southwestern Peanut Growers Association of Gorman, Texas.

(c) For the Virginia-Carolina area which includes the traditional peanut areas encompassing the states of Missouri, North Carolina, Tennessee, Virginia, and that part of South Carolina north and east of the Santee/Congaree-Broad Rivers, loans will be made through the Peanut Growers Cooperative Marketing Association of Franklin, Virginia.

In view of the 1981 amendments to the 1949 Act, which had the effect of broadening the areas in which additional peanuts can be grown beyond traditional peanut-growing regions, warehouse storage loans will also be available to producers of additional peanuts which are grown outside the States named above. All peanuts submitted for loans must be delivered to an approved warehouse located in the marketing area where the peanuts were grown. The schedule which assigns all non-traditional growing regions to one of the three general marketing areas has been modified slightly from the schedule contained in the Interim Rule to cover all territories and possessions of the United States, and the District of Columbia. The modified schedule of assignments is as follows:

(a) Alaska, Colorado, Hawaii, Idaho, Iowa, Kansas, Minnesota, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, Wyoming and all territories and possessions of the United States not otherwise assigned are assigned to the Southwest marketing area;

(b) Connecticut, Delaware, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, West Virginia, Wisconsin and the District of Columbia are assigned to the Virginia-Carolina marketing area; and

(c) Puerto Rico and the U.S. Virgin Islands are assigned to the Southeast marketing area.

Regulations governing farm-stored loans for all areas of the country are contained in 7 CFR Part 1421.

4. *Immediate buyback of additional peanuts.* The regulations governing the 1981 crop and previous crops which are found at 7 CFR 1446.7, provided that for additional peanuts to be purchased under the "immediate buyback" procedure, the applicable Inspection Certificate and Sales Memorandum was required to be signed by the producer to indicate that the peanuts were available for immediate buyback. Experience has shown, however, that it is often an inconvenience for the producer to sign the Inspection Certificate and Sales Memorandum for each "buyback" purchase. To expedite the delivery of additional peanuts which are available for "immediate buyback" purchase, the regulations governing this procedure have been revised from those which were applicable for the 1981 and previous crop years. This final rule provides that eligibility for "immediate buyback" is established by the farm operator when an application is made for the marketing card (ASCS–1002). The stamp "eligible for buyback" will be placed on the marketing card when it is issued only with the approval of the farm operator, or with the approval of a properly authorized agent of the farm operator if a Power of Attorney (ASCS–211) is on file. Multiple marketing cards may be issued when producers wish only a portion of their additional peanuts to be available for "immediate buyback" purchase. Producers may also apply for supplemental cards if, after having been issued a marketing card, the producer decides to change the eligibility status of any remaining additional peanuts to be marketed.

5. *Procedures for the Assessment of Penalties Against Handlers.* Section 359 of the 1938 Act, as amended, requires that penalties be assessed against handlers who fail to comply with the statutory or regulatory requirements for the handling and disposition of additional peanuts. The procedures for the assessment and collection of such penalties, as well as the appeal rights of handlers, have been clarified in this final rule.

Summary of Comments and Analysis

1. *General.* A total of 72 comments were received from individuals, firms, and organizations. There were 19 comments from grower organizations, 11 from Members of Congress, 11 from individual producers, 8 from general farm organizations, 7 from handler organizations, 3 from individual handlers, and 13 from other entities. There were 5 respondents who supported the Interim Rule as it was issued and made no suggestions for changes. Of this group, 4 specifically supported the continuation of the Segregation 2 and 3 transfer provision contained in the Interim Rule.

2. *Segregation 2 and 3 transfer provision.* The Interim Rule allowed producers who are unable to fill their quota to transfer additional loan peanuts to the quota loan pool. This provision is helpful to producers when drought or other circumstances beyond the producers' control cause their peanuts to grade as Segregation 2 or 3, thus causing the peanuts to be ineligible for price support at the quota loan rate. The transfer allowance is also an effective mechanism for preventing Segregation 3 peanuts from illegally entering the domestic consumption market by encouraging such peanuts to be marketed through the loan program. A number of comments were received with respect to this provision prior to the issuance of the Interim Rule and have been included for consideration in the development of the Final Rule. There were 27 comments in support of the transfer provision as it was issued in the Interim Rule and this provision has been adopted in this final rule.

3. *Export restrictions to Mexico and Canada.* The Interim Rule continued regulations in force for previous crop years which defined Mexico and Canada as ineligible countries for the purpose of exporting contract additional peanuts in the form of peanut products. This regulation was promulgated to protect against the possibility of contract additional peanuts being processed into products in the United States, exported to Canada or Mexico, and then imported back into the U.S. in competition with quota peanuts for a share of the domestic market.

With the exception of those instances where additional peanuts may be substituted for quota peanuts which have been or will be exported, under the two-tiered price support program, additional peanuts may be used in the domestic market only if purchased from CCC loan stocks at the quota support level plus handling costs. This means that peanut products may be offered in the domestic market only if they are: (1) Processed from quota peanuts; (2) processed from additional peanuts loan stocks priced at the quota support level; or (3) processed from imported peanuts brought into the United States within applicable import quota levels. Contract additional peanuts and products made from such peanuts are required by section 359(j) of the 1938 Act, as amended, to be exported or crushed into peanut oil.

In recent years, the incentive for the reentry of peanuts made from restricted peanuts has become substantial. During the 1978 through 1981 crop years, prices for contract additional peanuts were near the quota loan rates, thereby making it relatively uneconomical to export, process, and import the products back into the domestic U.S. market. However, recent legislation and weak world market prices, together with the exclusion of peanut products from existing import quotas, now provide a substantial potential for the reimportation into the U.S. of peanut products made from contract peanuts purchased at prices lower than statutory minimum U.S. domestic edible prices.

Section 108A of the 1949 Act provides that the minimum quota support level is $550 per short ton for the 1982 crop of peanuts. In addition, the national average quota support rate for each of the 1983, 1984 and 1985 crops of quota peanuts shall be the national average quota support rate for the previous crop, adjusted to reflect any increase in the national average cost of production, excluding any increase in the cost of land. However, in no event can the national average quota support rate for any such crop exceed by more than 6 percent the national average quota support rate for the previous crop. The additional support level, however, continues to be based mainly on crushing value and was established at $200 per ton for 1982. For the 1983 crop, the Secretary has announced that the support level for additional peanuts will be $185 per short ton. Data collected by the Department has indicated that 1982 crop contract additional peanuts were purchased for export by handlers at prices ranging from $200 to $450 per ton. Those figures are $100 to $350 per ton below the quota loan rate and this price spread is substantially wider than the $20 to $50 per ton spread experienced during 1978–1981 crop years.

Seven respondents requested that the provisions of these regulations be revised to allow U.S. firms to export contract additional peanuts in the form of peanut products to Canada and Mexico. The respondents argue that removal of the restriction on the export of contract additional peanuts to these countries is warranted in order that the respondents can compete in foreign markets with foreign companies. However, the Department believes that these restrictions should be continued. First, these restrictions apply only to sales of peanut products to Canada and Mexico insofar as foreign markets are concerned. Second, these restrictions on the export of contract additional peanuts will be continued at this time because removal of the restrictions could entail serious harm to the quota price support program as a result of the displacement of quota peanuts with peanut products which had been purchased at prices which were below the level of quota price support. This raises the possibility of substantial interference with the quota price support program and creates the potential for material losses of public funds committed to the program. To the extent that quota peanuts are displaced, quota stocks may ultimately have to be crushed into oil and meal at prices substantially lower than the quota loan rate. Under the 1938 Act, as amended, the Secretary is required to control and regulate contracts for additional peanuts. The exercise of that power, for the reasons given, warrants, in the Department's view, that the restriction be continued at this time, as provided in this final rule. However, the Department believes that additional consideration of this issue is warranted. In order to highlight this issue and obtain additional public participation, the Department intends to issue a notice which will allow all parties an opportunity to comment on whether further action should be taken to retain, remove or expand the restriction to include other countries.

4. *Handler liability for liquidated damages.* Current regulations provide that liquidated damages will be assessed against a handler who exports additional peanuts and peanut products which are made from additional peanuts if such peanuts or products are reentered into the U.S. These liquidated damages will be assessed regardless of whether the handler was directly involved in the reentry of the peanuts or peanut products. Several handlers and handler organizations have recommended that handlers who exported peanuts or peanut products which are subsequently reentered into the U.S. should not be held liable for liquidated damages with respect to the reentry of such peanuts or products. The price differential that now exists between quota peanuts and contract additional peanuts, however, provides a strong economic incentive for importers to purchase additional peanuts on the international market and to reenter such peanuts or peanut products made from these peanuts into the domestic market. The respondents suggest that rather than assessing liquidated damages against the exporting handler, such damages should be assessed against the person or firm directly responsible for the reentry of the peanuts or peanut products. In this respect, the respondents argue that they lose control of the exported peanuts, have no means to control whether the buyer reenters such peanuts, and, therefore, should be free of liability. Nonetheless, the exporters have the responsibility to inform their customers of restrictions on contract additional peanuts and on peanut products made from additional peanuts and to take such measures as are necessary to ensure compliance. For that reason, it remains appropriate to continue to assert liability for liquidated damages against the handler contracting with the producers for the peanuts. Accordingly, these provisions have not been revised.

5. *Tolerance for screen size variations for the substitution of additional and quota peanuts.* Under the provisions of the Interim Rule, handlers are allowed to substitute additional peanuts into the domestic market for quota peanuts that have previously been exported. In addition, handlers are permitted to substitute additional peanuts into the domestic market against a letter of credit—to cover potential damages to CCC—and later export an equivalent quantity of quota peanuts. The major benefit of substitution is that it enables shellers or handlers to move quota peanuts into export markets before they are in a position to begin processing contract additional peanuts. When contract additional peanuts are subsequently processed, the shelled outturn of the peanuts is supervised by a representative of the Secretary to ensure that substitution involves peanuts of the same crop, type, area, an screen size as the peanuts for which the replacement is made.

Several handlers have suggested that shellers be allowed a 5 percent tolerance in screen size variation when substituting additional peanuts into the domestic market for previously exported quota peanuts or where substitution is made in those instances where a letter of credit is established as specified above. They further suggest that if a general 5 percent tolerance is not allowed, such an allowance should nonetheless be allowed where a larger screen size was exported (within the 5 percent tolerance range), the contention being that there should not be any damage in those instances to the price support program. To allow such tolerances as the respondents seek would, however, still permit the handler involved in such substitutions to exercise some selectivity in adjusting sales of contract additional peanuts and quota peanuts between the domestic and export markets. Even where smaller screen size peanuts are moved into the domestic market through the mechanism of substitution, this would produce an unfair competitive advantage for some handlers to the disadvantage of those handlers competing in the same markets and milling smaller screen size peanuts but with low or nonexistent contract additional peanut purchases. For this reason, the tolerance suggestion has not been adopted at this time.

6. *Supervision of contract additional peanuts.* Under the provisions of the Interim Rule, nonphysical supervision of

VOL
48
ISS
94
MY
13
1983
UMI

contract additional peanuts is no longer available. Nonphysical supervision was permitted for the 1981 crop of peanuts. However, experience with this method of supervision demonstrated several serious flaws. First, handlers have realized shelled outturn that differed substantially from the sample shellings made at the time of loadout. Particularly, more splits have resulted from the commercial shelling process which, in practice, produced substitutions of different qualities of peanuts between the domestic and export markets than would have been the case if nonphysical supervision had not been permitted. The consequent adjustments have required undue and otherwise unnecessary substitutions of peanuts between quota peanut stocks and additional peanut stocks, thereby producing an unwarranted complication in the administration of the program and unneeded adjustments in the actual marketings of peanuts to the possible competitive detriment of other handlers. In addition, the nonphysical supervision option effectively permitted handlers to designate shelled lots for export or crushing without regard to whether such lots were originally designated as quota or as contract additional peanuts. Thus, whenever shelled peanut lots, irrespective of their origin, failed quality standards or have been lost or damaged, handlers have designated these lots as meeting the disposition requirements of contract additional peanuts. This has made it impossible to actually verify with accuracy whether contract additional peanuts are, in fact, entering the domestic edible market through unwarranted substitutions.

Although several respondents favored retaining nonphysical supervision, the larger number of respondents addressing this issue favored the elimination of nonphysical supervision. Thus, the requirement in the Interim Rule that all phases of the handling and disposition of contract additional peanuts must be supervised by a representative of the association has been adopted in the final regulations without change. This leaves the program with the same method of supervision which was applicable for the 1980 crop and prior crop years.

In addition to other modifications already identified, several other minor changes from the provisions of the Interim Rule of June 29, 1982, have been made. They are as follows:

(1) *Contracts for additional peanuts for crushing or export.* Beginning with the 1983 crop year, the requirements for county committee approval of a contract for additional peanuts, Form CCC–1005, have been reduced to what is considered minimally necessary to qualify as a contract. Producers and handlers will be allowed, however, to incorporate previously required items as they mutually agree. The items no longer required for County committee approval include the producer's farm number, the clause on failure to deliver due to conditions beyond the control of the producer, the statement of liens or prior interests, a statement regarding the type of peanuts contracted, and the handler agreement to handle and dispose of the contracted peanuts in accordance with the regulations of 7 CFR Part 1446. These changes should simplify the actual contracting process, as well as simplifying the county committee approval of such contracts.

(2) *Substitution of quota and additional peanuts.* The Interim Rule permits, with the prior approval of the association, additional peanuts to be substituted into the domestic market for farmers stock quota peanuts of the same crop, type, quality, and area that had previously been exported or crushed. When nonphysical supervision was allowed, substitution into the domestic market of quota peanuts which had been crushed was permitted because of factors peculiar to nonphysical supervision. It has become apparent that it is not possible to adequately monitor the quality of quota peanuts which are crushed. This has meant that additional peanuts of edible quality could enter the domestic edible market replacing quota peanuts which had been previously crushed regardless of whether the crushed quota peanuts were themselves of edible quality. If a handler is permitted to crush quota peanuts which do not meet the edible quality standards instead of additional peanuts which are required to be exported or crushed, the handler has an unfair advantage in the marketplace over handlers who do not have access to additional peanuts since a handler executing a peanut marketing agreement must either crush or export for crushing any peanuts not meeting edible quality standards. Accordingly, this final rule provides that additional peanuts may be substituted only for quota peanuts which have been previously exported.

(3) *Procedure for Assessment of Penalties and liquidated damages against handlers.* The Interim Rule provided that any notice of assessment of a penalty or liquidated damages was to be issued by the Director, Tobacco and Peanuts Division. Since these provisions involve matters related to CCC support operations, it has been determined that the more appropriate official to assess such penalties and liquidated damages is a CCC Contracting Officer. Thus, this final rule assigns to CCC contracting officers the responsibility for assessing penalties and liquidated damages.

Likewise, this final rule provides that any administrative appeals involving the assessment or reduction of penalties or liquidated damages must be filed with the Executive Vice President of CCC rather than the Deputy Administrator, State and County Operations, ASCS.

Section 1446.59(e) of the Interim Rule contained a typographical error in setting forth the number of days within which a handler must submit a written appeal of a penalty assessment. That error has been corrected to provide for 15 days for submission of the appeal rather than 45 days.

In addition, a number of the provisions of the Interim Rule have been revised for clarity purposes only. Since these revisions affect a number of sections, it has been determined that the Interim Rule published at 47 FR 28069 should be revised and republished in its entirety, except for conforming changes made to the regulations governing the 1979–1981 crop years which have been adopted as a final rule as published.

Authority: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); Secs. 101, 106A, 401 *et seq.*, 63 Stat. 1051, as amended (7 U.S.C. 1441, 1421 *et seq.*); Sec. 359, 375, 52 Stat. 31, 64, as amended (7 U.S.C. 1358, 1375), unless otherwise noted.

Subpart—General Regulations Governing 1982 Through 1985 Crops Peanut Warehouse Storage Loans and Handler Operations

General

§ 1446.50 General statement.

(a) *Scope.* This subpart sets forth the terms and conditions under which producers and handlers may trade in the 1982 through 1985 crops of peanuts. This subpart also sets forth the terms and conditions under which eligible producers acting collectively through specified marketing associations (referred to severally in this subpart as "the association") may obtain price support on their 1982 through 1985 crops of farmers stock peanuts. Eligible farmers stock peanuts produced by eligible producers which are quota peanuts shall be eligible for price support at the quota support rate. Farmers stock peanuts which are not quota peanuts are considered additional peanuts and shall be eligible for price support at the additional support rate. Additional peanuts may only be marketed through contracts with handlers or by being pledged as collateral for price support loans under the terms of this subpart. Annual notice of determinations will specify support rates, and, where necessary, supplements to this subpart will specify other terms and conditions not contained in this subpart. Specific terms and conditions relating to contracts for sales of peanuts under loan will be set out in announcements issued by the Commodity Credit Corporation (CCC).

(b) *Price support advances.* Producers may obtain price support at the rates specified in the applicable annual Notice of Determination through the applicable association. Each association will make appropriate price support loan advances on peanuts delivered to it by producers at warehouses operating under peanut receiving and warehouse contracts with the association. CCC will make a loan (referred to in this subpart as a "warehouse storage loan") to the association. Such loans will be secured by peanuts received by the association.

(c) *Farm storage loans and purchases from producers.* Regulations setting forth the terms and conditions under which CCC will make farm storage loans directly to producers and purchases directly from producers for any crop of farmers stock peanuts will be published separately in the **Federal Register.**

§ 1446.51 Administration.

(a) *Responsibility.* Under the general direction and supervision of the Executive Vice President, CCC, the Tobacco and Peanuts Division, Agricultural Stabilization and Conservation Service (ASCS), will administer this subpart.

(b) *Limitation of authority.* State and county committees or their employees and the associations have no authority to modify or waive any of the provisions of this subpart or any amendment or supplement thereto.

(c) *Supervisory authority.* No delegation of authority in this subpart shall preclude the Executive Vice President, CCC, or the Executive Vice President's designee, from determining any questions arising under the regulations or from reversing or modifying any determinations made pursuant to such delegation.

§ 1446.52 Definitions.

As used in this subpart, and in instructions and documents in connection herewith, the words and phrases defined in this section shall have the meanings herein assigned to them by this section unless the context or subject matter otherwise requires.

(a) *Additional peanuts.* Any peanuts which are marketed from a farm other than peanuts marketed or considered marketed as quota peanuts.

(b) *Additional support rate.* The price support rate applicable to additional peanuts.

(c) *ASCS.* The Agricultural Stabilization and Conservation Service of the United States Department of Agriculture.

(d) *Association.* An area marketing association which is operated primarily for the purpose of conducting loan acitivites and which is selected and approved for such activities by the Secretary.

(e) *CCC.* The Commodity Credit Corporation, an agency and instrumentality of the United States, within the Department of Agriculture.

(f) *Compliance regulations.* The regulations in Part 718 of this title, issued by the Administrator, ASCS, and effective for the applicable crop.

(g) *Contract additional peanuts.* Additional peanuts for crushing or exportation, or both, for which a contract has been entered into between a handler and producer in accordance with § 1446.54.

(h) *County committee.* The body of persons elected within a county as the county committee under the regulations governing the selection and functions of Agricultural Stabilization and Conservation (ASC) county and community committees in Part 7 of subtitle A of this title of the Code of Federal Regulations, except that for Puerto Rico and the Virgin Islands, the Caribbean Area Agricultural Stabilization and Conservation Committee shall, insofar as applicable, perform the functions of the county committee. For other areas without a regular county committee available for handling such matters as would normally fall to a county committee, the functions of the county committee shall be performed by the Deputy Administrator for State and County Operations or the person or body to whom such functions shall be delegated by the Deputy Administrator.

(i) *County office.* The office of the county ASC committee where records for the farm are kept.

(j) *Crushing.* The processing of peanuts: (1) To extract oil for food uses and meal for feed uses; or (2) into flakes for domestic food uses other than peanut butter, candy, confections or other traditional domestic edible uses.

(k) *Domestic edible use.* Domestic edible use means, for the purpose of regulations found in this subpart: (1) Use of peanuts for milling to produce domestic food peanuts (including the processing of peanuts into flakes for traditional domestic edible uses); (2) use of peanuts for seed, exluding unique strains which are not commercially available and which are used for the production of green peanuts; and (3) use of peanuts on a farm.

(l) *Edible export standard for contract additional peanuts.* Raw shelled or inshell peanuts of any crop exported for human consumption meeting such U.S. grade requirements, or modifications thereof, or requirements as to wholesomeness, as are specified in the outgoing quality regulations for such crop set forth in the Marketing Agreement for Peanuts No. 146: *Provided,* That peanuts shown by the applicable Federal-State Inspection Certificate to deviate from these requirements shall be considered as meeting such requirements if the handler

VOL
48
ISS
94
MY
13
1983
UMI

certifies to the association that such deviations are: (i) Acceptable to the export buyer, and (ii) fall within the range of deviations allowable under the Marketing Agreement.

(m) *Effective farm poundage quota.* The effective farm poundage quota for the applicable crop of peanuts as defined in the poundage quota and marketing regulations, Part 729 of this title.

(n) *Eligible country.* Any destination outside the United States, except that, neither Canada nor Mexico shall be considered an eligible country for the purpose of exporting peanut products other than treated seed peanuts.

(o) *Export and exportation.* A shipment of peanuts or peanut products from the United States directed to a destination outside the United States and for which a statement, which is signed by the handler and specifies the name and address of the consignee, is made available to the association or CCC, or, upon request by the association or CCC, for which a consignee receipt is made available to the association or CCC.

(p) *Extra large kernels.* Shelled Virginia type peanuts which are "whole" and free from "foreign material", "damage", and "minor defects" as such terms are defined in the U.S. Standards for shelled Virginia type peanuts effective on the date of inspection and which will not pass through a screen having 20/64 by 1 inch openings.

(q) *Farm.* A farm, as defined in Part 719 of this title.

(r) *Farmers stock peanuts.* Picked or threshed peanuts produced in the United States which have not been changed (except for removal of foreign material, loose shelled kernels, and excess moisture) from the condition in which picked or threshed peanuts are customarily marketed by producers, plus any loose shelled kernels removed by producers from farmers stock peanuts.

(s) *Flaked peanuts.* Raw contract additional peanuts which are colloid milled (finely ground), stabilized to prevent rancidity, and drum dried into flake form. Flaked peanuts, to be considered as peanuts used for crushing under these rules, may only be used in approved products or uses, those being the processing of flakes for domestic food uses other than peanut butter, candy, confections or other traditional domestic edible uses. Products approved for use include, but are not limited to, bases for meat and cheese flavored sandwich spreads, meat analogs, extenders for certain types of luncheon meats, extenders for scrambled eggs, and other products as approved by CCC or the association.

(t) *Form ASCS–1007 and Form FV–95.*—(1) *Form ASCS–1007.* The Inspection Certificate and Sales Memorandum for farmers stock peanuts.

(2) *Form FV–95.* The Federal-State Inspection Service Peanut Inspection Notesheet.

(u) *Fragmented peanuts.* Peanuts not more than 20 percent of which are whole kernels which will not pass through the following openings, by type: Spanish 15/64 x 3/4 inch slot; Runner 16/64 x 3/4 inch slot, and Virginia 15/64 x 1 inch slot.

(v) *Green peanuts.* Peanuts which, before drying or removal of moisture from the peanuts either by natural or artificial means, are marketed by the producer for consumption exclusively as boiled peanuts.

(w) *Handler.* Any person or firm, or subdivision thereof, registered with ASCS for the purpose of acquiring peanuts for resale, domestic consumption, exportation, or crushing, through a business of buying and selling peanuts.

(x) *Inspector.* A Federal-State inspector authorized or licensed by the Secretary, U.S. Department of Agriculture.

(y) *Loan value.* The amount of the price support loan advance which may be obtained by a producer from the association under this subpart with respect to a lot of eligible farmers stock peanuts, computed for quota or additional peanuts, as applicable, on the basis of weight, quality, and the support values announced for such type.

(z) *Lot.* That quantity of farmers stock peanuts for which one ASCS–1007 or other inspection certificate is issued. For farmers stock peanuts delivered to the association for a price support loan advance, a lot shall consist of not more than the contents of one vehicle, or two or more vehicles containing a total of approximately 24,000 pounds.

(aa) *Marketing card.* Form ASCS–1002 issued each year in accordance with Part 729 of this title by ASCS county offices to producers for use in marketing peanuts of the applicable crop. Each Form ASCS–1002 shall indicate: (1) The farm operator's eligibility for quota price support; (2) the pounds that may be marketed as quota peanuts; (3) the pounds of additional peanuts contracted and the handler number of the contracting handler; and (4) the eligibility of additional peanuts for immediate buyback.

(bb) *Marketing penalties.* The penalties prescribed in the poundage quota and marketing regulations, Part 729 of this title, which shall be computed and collected in accordance with those regulations and are effective for the applicable crop.

(cc) *Marketing regulations.* Regulations in Part 729 of this title, effective for the applicable crop.

(dd) *Marketing year.* The period beginning on August 1 of the year in which the peanuts of the applicable crop are planted and ending on July 31 of the following year.

(ee) *Net weight.* That weight of farmers stock peanuts obtained by deducting from the gross scale weight of the peanuts: (1) Foreign material; and (2) moisture (i) in excess of seven percent in the traditional peanut-producing States of the Southwestern and Southeastern areas, those being Alabama, Arizona, Arkansas, California, Florida, Georgia, Louisiana, Mississippi, New Mexico, Oklahoma, that part of South Carolina in the southeastern area, and Texas; or (ii) in excess of eight percent for peanuts grown in any other location.

(ff) *Peanut meal.* Any meal, cake pellets, or other forms of residue remaining after extraction or expulsion of oil from peanut kernels, but not including pressed peanuts.

(gg) *Peanut products.* Any products, other than peanut oil and meal, manufactured or derived from peanuts such as, but not limited to, peanut candy, peanut butter, and peanut granules.

(hh) *Peanut receiving and warehouse contract.* Form CCC–1028 (Identity Preserved), Form CCC–1028–A (Commingled Storage), or any other form approved by CCC for the purpose of receiving and warehousing peanuts.

(ii) *Peanut segregations.*—(1) *Segregation 1.* Farmers stock peanuts which: (i) Have at least 99 percent peanuts of one type; (ii) have not more than two percent damaged kernels nor more than 1.00 percent concealed damage caused by rancidity, mold, or decay, nor more than 0.5 percent freeze damage; (iii) are free from any offensive odor; and (iv) are free from visible Aspergillus flavus mold.

(2) *Segregation 2.* Farmers stock peanuts which are free from visible Aspergillus flavus mold and which either: (i) Have less than 99 percent peanuts of one type; or (ii) have more than two percent damaged kernels or more than 1.00 percent concealed damage caused by rancidity, mold, or decay, or more than 0.5 percent freeze damage; or (iii) have an offensive odor. However, if such peanuts are placed under additional loan and purchased under the immediate buyback procedure, as provided in § 1446.56(a) of these regulations, such peanuts shall be considered Segregation 1 additional peanuts for loan pool accounting purposes.

(3) *Segregation 3.* Farmers stock peanuts which have visible Aspergillus flavus mold. However, if such peanuts are placed under additional loan and purchased under the immediate buyback procedure as provided in § 1446.56(a), such peanuts shall be considered Segregation 1 additional peanuts for loan pool accounting purposes.

(jj) *Pools.* Accounting pools established by the association and for which complete and accurate records are maintained by area, by type, and by segregation for quota peanuts and additional peanuts not under contract.

(kk) *Quota peanuts.* For purposes of the regulations found in this subpart, peanuts which are: (1) Eligible for domestic edible uses; and (2) marketed or considered marketed from a farm as quota peanuts, but not in excess of the farm poundage quota.

(ll) *Quota support rate.* The price support rate applicable to quota peanuts.

(mm) *Raw peanuts.* Inshell peanuts, shelled peanuts, or blanched peanuts which have not passed through any other processing operations.

(nn) *Sound mature kernels.* Kernels which are free from "damage" and "minor defects" as defined in the U.S. Standards for the applicable type of peanuts effective on the date of the inspection, and which will not pass through screens with the following openings:

Runner type: $^{15}/_{64}$ x $^{3}/_{4}$ inch slot;
Spanish type: $^{15}/_{64}$ x $^{3}/_{4}$ inch slot;
Virginia type: $^{15}/_{64}$ x 1 inch slot.

(oo) *Type.* The generally known types of peanuts (i.e., Runner, Spanish, Valencia, and Virginia), as defined in the poundage quota and marketing regulations, Part 729 of this title.

(pp) *United States.* The 50 States of the United States, Puerto Rico, the territories and possessions of the United States, and the District of Columbia.

(qq) *United States government agency.* Any corporation wholly owned by the Federal Government, and any department, bureau, administration, or other agency of the Federal Government.

(rr) *Valencia type peanuts produced in the Southwest suitable for cleaning and roasting.* Valencia type peanuts produced in the Southwest containing not more than 25 percent shells damaged by: (1) Discoloration; (2) cracks or broken ends; or (3) both discoloration, and cracks or broken ends.

Handler Operations

§ 1446.59 Handler responsibilities.

(a) *Examination of producers' marketing cards.* All handlers shall examine producers' marketing cards and record each purchase or delivery of peanuts as required in Part 729 of this title and in accordance with procedures established by ASCS. Any peanuts delivered by producers under an additional peanut contract (Form CCC–1005) in excess of the provisions of such contract shall be considered as having been marketed as quota peanuts. No peanuts shall be handled from any producer who does not present a marketing card and farm identification card at the time of delivery.

(b) *Purchase records.*—(1) *Purchases of quota peanuts on which an ASCS–1007 is prepared.* Each handler shall maintain records of the peanuts purchased and sold. The records shall contain, at a minimum, the following information: (i) The State and county code; (ii) the farm number of the farm on which the peanuts were produced or the registration number of the seller if the seller is a handler; (iii) the quantity and type of peanuts; (iv) the date of purchase; and (v) the applicable ASCS–1007 serial number. The handler shall imprint forms ASCS–1007 and FV–95 with the farm identification card, the peanut buyer's card, and the buying point card.

(2) *Purchases of quota peanuts from producers on which an ASCS–1007 is not prepared.* The handler shall immediately transmit a record of such purchase to CCC. Such record shall show the name and address of the producer, State and county code, farm number, the handler's name, address and registration number, buying point, any marketing penalty collected, the type and quantity of peanuts purchased, and the date of purchase.

(c) *Sales and disposal records.* Each handler shall maintain records of all sales and other disposals of peanuts. Such records shall show date of sale, quantity, type, to whom sold, whether sold as edible peanuts or for crushing, and any other information required by this subpart.

(d) *Method of keeping records.* Handler records shall be maintained by a handler in such a manner that will enable the association or CCC, ASCS, or any other representative of the Secretary to readily reconcile the quantities, grades, and qualities of all peanuts acquired and disposed of by such a handler. Records concerning the acquisition and disposal of contract additional peanuts must also be kept in such a manner that the association or CCC, ASCS, or any other representative of the Secretary can readily determine whether there has been compliance with the provisions of this subpart.

(e) *Retention of records.* All records shall be maintained for a period of three years following the end of the marketing year in which the peanuts were produced.

§ 1446.54 Contracts for additional peanuts for crushing and exportation.

(a) *Contracts between handlers and producers.* Handlers who have a U.S. address may contract with producers to buy additional peanuts from producers for crushing or exportation, or both: *Provided however,* That producers approved as producer-handlers under Part 1421 of this title, for the purpose of immediate buyback of their additional peanuts, may not contract with themselves. All contracts for sales of additional peanuts shall be completed on Form CCC–1005 and submitted to the county office for approval prior to April 15 of the year in which the crop is produced. Such contracts cannot be sold or traded, except under the terms and conditions specified in paragraph (b) of this section.

(1) Contracts in order to be approved by the county committee shall include at least the following:

(i) The name and address of the producer;

(ii) The State and County code of the State and County in which the additional peanuts are to be produced;

(iii) The name, and address of the handler, and registration number;

(iv) The amount of Segregation 1, Segregation 2, or Segregation 3 peanuts in pounds;

(v) The contract price shown as a percentage of the quota peanut support rate;

(vi) The signature of the producer; and

(vii) The signature of the handler or authorized agent of the handler.

(2) Contracts Form CCC–1005 (1–22–82), may contain but are not required to contain for approval, the following:

(i) The farm serial number of the farm;

(ii) The type of peanuts;

(iii) A requirement of disclosure by the producer of any liens on the peanuts on date of delivery;

(iv) A provision that the producer shall not be liable for failure to deliver against such contract an amount of peanuts in excess of the actual production of such type and quality on the farm. In the case of harvested peanuts, however, the producer shall be free of his delivery obligation only so long as delivery of such peanuts is prevented solely because of external

VOL 48 ISS 94 MY 13 1983 UMI

source such as drought, fire, lightning, inherent explosion, windstorm, tornado, flood or other act of God, or any other condition beyond the control of the producer; or

(v) The signature of the farm operator.

(b) *Contract transfers and delivery of contracted peanuts to other handlers.* If a handler is unable to perform under contracts with producers for the purchase of additional peanuts because of conditions beyond the handler's control, including but not limited to insolvency, bankruptcy, death, or destruction of warehouse facilities, the handler and the producer may agree to the delivery of the peanuts to other handlers under the terms of the original contract or under modified terms. Such transfers shall not be valid without the prior written approval of the Deputy Administrator, State and County Operations, ASCS. A transfer shall be approved by the Deputy Administrator only if it is determined by the Deputy Administrator that such transfer will not impair the effective operation of the peanut program.

(c) *Contract transfers and transfer of delivery obligations to other producers.* If a producer is unable to fully perform under the terms of a contract with a handler for the purchase of additional peanuts because of conditions beyond the prouducer's control including, but not limited to, farm reconstitutions (combinations and divisions), insolvency, bankruptcy or death, the handler and the producer or his succesor-in-interest may agree to a modification of the contract or to the substitution of another producer either under the original terms of the contract or modified terms: *Provided however,* That where there is a substitution of another producer, the original contract price and quantity provided for in the contract may not be changed. Such modifications or transfers of contract obligations shall not be valid without the prior written approval of the Deputy Administrator, State and County Operations, ASCS. A transfer shall be approved by the Deputy Administrator only if it is determined by the Deputy Administrator that such modifications or transfers will not impair the effective operation of the peanut program. Contract modifications other than changes in producer, owner, or operator, may be approved by the county ASCS office in accordance with instructions issued by ASCS.

(d) *Deliveries under optional provisions of the contract.* Contracts may also specify, in addition to other matters, the terms and conditions of delivery of the peanuts covered in the contract. Such terms and conditions may include, but are not limited to, multiple delivery dates, priorities of delivery, specifications regarding quality, and variation in prices for time of delivery and/or quality of the peanuts actually delivered.

(e) *Contracts between handlers.* Handlers may contract with other handlers to transfer liability for exporting or crushing contract additional peanuts. Such contracts must contain the following agreement:

> I agree that I will either export or crush the peanuts delivered under this contract as provided in Part 1446, Subpart-General Regulations Governing 1982 through 1985 Crops Peanut Warehouse Storage Loans and Handler Operations, as amended, by August 31 following the calendar year in which the crop is grown, except that if the final date for export or crushing is extended by the Commodity Credit Corporation to November 30 of that year, I agree to dispose of such peanuts by November 30 of that year, and that, upon my failure to do so, I shall be subject to a marketing quota penalty as specified in such regulations on all such peanuts which have not been so crushed or exported. I further agree that if I contract with another Handler to market any such peanuts, I shall include as part of the contract the agreement contained herein, and upon my failure to do so, I may be subject to a marketing quota penalty, as specified in the regulations on all such peanuts.

(f) *Inspection of contract additional peanuts.* The type and quality of each lot of contract additional peanuts delivered under contract shall be determined by an inspector when such peanuts are delivered by a producer.

(g) *Contracts for 1982 crop additional peanuts.* Contracts between producers and handlers for 1982 crop additional peanuts entered into prior to April 15, 1982, and meeting the requirements of the regulations then in effect (Subpart—General Regulations Governing 1979 and Subsequent Crops Peanut Warehouse Storage Loans and Handler Operations, 7 CFR Part 1446), shall be considered as having met the requirements for such contracts which are set forth in this subpart. However, such contracts and the peanuts which are the subject of such contracts shall otherwise be governed by the terms and conditions set forth in this subpart. All references contained in such contracts to the General Regulations Governing 1979 and Subsequent Crops Peanut Warehouse Storage Loans and Handler Operations, or portions thereof, shall be deemed to be references to this subpart.

§ 1446.55 Commingling of quota and additional peanuts.

Quota and additional farmers stock peanuts of like type and segregation may be commingled and exchanged on a dollar value basis to facilitate handling and marketing. The dollar value basis shall be determined on the basis of the quota support rate. The handler shall receive, store, and deliver all such peanuts in accordance with good commercial practices and instructions provided by CCC. For each lot of quota and/or additional peanuts stored commingled, the records of the handler shall show at all times the date and place received, name and address of the producer, the type, segregation, pounds, and dollar-value-in. The handler shall keep such other accounts and records and furnish such information and reports relating to the dollar-value-out and disposition of such peanuts as may be prescribed by the association or CCC.

§ 1446.56 Use of additional peanuts as domestic edible peanuts.

(a) *"Immediate Buyback" purchase.* During harvest season, a handler shall have the right to purchase additional peanuts from the association for domestic edible use at buying points owned or controlled by such handler at prices equal to 100 percent of the quota loan value of such peanuts plus handling charges. The purchase (i.e., the "immediate buyback" purchase) may be made only from the association and only on the date such peanuts were delivered by the producer as collateral for a price support loan. The "immediate buyback" purchase shall be valid and accepted by the association only if the marketing card (ASCS–1002) is stamped "eligible for buyback". The handler shall: (1) As an agent for the association, advance to the producer price support from CCC funds for the peanuts at the additional loan rate; (2) pay to the producer from his own funds any agreed premiums for the delivery of such peanuts by the producer to the handler; and (3) forward to the association a check payable from his own funds to CCC for the peanuts in an amount equal to the quota loan value of the peanuts, as well as any handling charges. The check and applicable ASCS–1007 will identify the peanuts as additional peanuts that may be used for domestic edible use and those documents must be transmitted to the association (as evidenced by a postmark) not later than the third workday (excluding Saturdays, Sundays, and Federal holidays) following the day the peanuts were inspected. Such receipts will be credited to the additional loan pool for such peanuts.

(b) *Purchases of Quota and Additional Peanuts Subsequent to Delivery.* Handlers may also purchase quota or additional peanuts for the loan pool for domestic edible use after delivery by producers to the association, under terms and conditions established by the association and CCC. The minimum price for such purchases shall be the applicable carrying charges plus: (1) Not less than 105 percent of the quota loan value of the peanuts if paid for not later than December 31 of the marketing year; or (2) not less than 107 percent of the quota loan value if paid for after December 31 of the marketing year.

§ 1446.57 Compliance requirements for handlers of contract additional peanuts.

(a) *Records.* All contract additional peanuts acquired by a handler shall be disposed of by domestic crushing or exportation to an eligible country in accordance with the conditions set forth in this subpart. All handler's records shall be subject to a review by the association, CCC, ASCS, or other representatives of the Secretary of Agriculture to determine compliance with the provisions of this subpart. Refusal to make such handler's records available to the association, CCC, ASCS, or other representative of the Secretary or the failure of such records to establish such disposition by the handler shall constitute prima facie evidence of noncompliance with this subpart for which a penalty may be assessed against the handler in accordance with § 1446.59. Reviews of handler records shall be made by the association in accordance with guidelines established by CCC.

(b) *Excess marketings of quota peanuts.* A handler will be subject to a penalty for noncompliance if it is determined by CCC that he marketed from any crop, for domestic edible use, a larger quantity, or higher grades or quality of peanuts, than could reasonably be produced from the quantity of peanuts having the grade, kernel content, and quality of quota farmers stock peanuts purchased by the handler during the applicable marketing year and those purchased in accordance with the provisions of § 1446.56, regardless of whether additional peanuts were acquired by the handler. In such case, the handler will be obligated to pay a penalty equal to 120 percent of the basic quota support rate with respect to that quantity of farmers stock peanuts which are determined by CCC to be necessary to produce the excess quantity or grade or quality of peanuts sold, expect that such penalty may be reduced in appropriate circumstances under the terms set forth in § 1446.59, which also prescribes the manner in which penalties will be assessed.

(c) *Marketing in the U.S. of peanut products made from contract additional peanuts.* A handler will be subject to a penalty for noncompliance if it is determined by CCC that the handler marketed in the United States, including its territories and possessions and the District of Columbia, any peanut products made from any crop of contract additional peanuts. In such case, the handler will be obligated to pay a penalty equal to 120 percent of the basic quota support rate with respect to that quantity of farmers stock peanuts which are determined by CCC to be necessary to produce the quantity of peanut products imported and sold, except that such penalties may be reduced in appropriate circumstances under the terms set forth in § 1446.59, which also prescribes the manner in which penalties will be assessed.

(d) *Storage requirements for contract additional peanuts prior to processing.*—(1) *Commingled storage.* Handlers may commingle quota loan, quota commercial, additional loan, and contract additional peanuts. In such case, quota loan and additional loan peanuts must be inspected as farmers stock peanuts and settled on a dollar value basis less adjustments for shrinkage, except when such peanuts are purchased from the association for domestic edible use on an in-grade, in-weight basis. Contract additional peanuts must be inspected on a farmers stock basis and accounted for on a dollar-value basis less a one time adjustment for shrinkage for each crop equal to 4.0 percent of the dollar value of the peanuts for Virginia-type peanuts and 3.5 percent for all other peanut types. However, if such additional contract peanuts are graded out and accounted for prior to February 1 of the year following the year in which the peanuts were grown, the adjustment of the dollar value for shinkage shall be 3.5 percent for Virginia-type and 3.0 percent for all other peanuts.

(2) *Identity preserved storage.* Contract additional peanuts stored "identity preserved" shall be inspected as farmers stock peanuts and settled on a dollar value basis. The handler shall receive, store, and otherwise handle such peanuts in accordance with good commercial practices and instructions provided by CCC.

(3) *Penalties.* Failure to store and account for peanuts in accordance with the requirements of this paragraph shall constitute noncompliance with this subpart for which a penalty may be assessed in accordance with § 1446.59.

(e) *Disposition of contract additional peanuts.*—(1) *Disposition.* Handlers shall dispose of all contract additional peanuts, either by exportation, crushing, or substitution, in accordance with the requirements and procedures of § 1446.58.

(2) *Final disposition date.* Handlers shall dispose of all contract additional peanuts by August 31 of the year following the calendar year in which the crop was grown.

(3) *Extension of final disposition date.* The final disposition date shall be extended to November 30 of the year following the calendar year in which the crop was grown if, by August 31, the handler:

(i) Furnishes information to the association showing that the contract additional peanuts have been milled and positive lot identified;

(ii) Furnishes the association with the name and location of the contract additional peanuts; and

(iii) Provides a written statement to the association agreeing to pay for any supervision costs which are incurred with respect to contract additional peanuts after August 31.

(4) *Disposition following an extension.* The identical contract additional peanuts with respect to which a request for extension of the final disposition date has been granted by the association or CCC must be disposed of by exportation or crushing in conformity with the requirements of § 1446.58. Such contract additional peanuts may not be disposed of through the substitution procedures set forth in § 1446.58(d).

(5) *Penalties.* The failure of a handler to dispose of contract additional peanuts by the final date for disposition in accordance with the requirements of this subpart shall constitute noncompliance with the provisions of this subpart for which a penalty may be assessed against the handler in accordance with the provisions of § 1446.59.

§ 1446.58 Supervision and handling of contract additional peanuts.

The handler must arrange for and the association will conduct onsite supervision of domestic handling of contract additional peanuts including storing, shelling, crushing, cleaning, milling, blanching, weighing, and shipping.

(a) *Access to facilities.* The handler, by entering into contracts to receive contract additional peanuts or any person or firm otherwise receiving contract additional peanuts, shall be deemed to have agreed that authorized

VOL 48 ISS 94 MY 13 1983 UMI

representative(s) of CCC and the association:

(1) May enter and remain upon any of the premises of the handler when such peanuts are being received, shelled, cleaned, bagged, sealed, weighted, graded, stored, milled, blanched, crushed, packaged, shipped, sized, processed into flaked peanuts or other products, or otherwise handled.

(2) May inspect such peanuts and the oil, meal, and other products thereof; and

(3) May inspect the premises, facilites, operations, books, and records of the handler to the extent necessary to determine that such peanuts have been handled in accordance with this subpart.

(b) *Notifying the association.* Before moving or processing any contract additional peanuts, the handler (or cleaner, sheller, or processor under contract with the handler) shall notify the association of the time such operation will begin and the approximate period of time required to complete the operation. When a plant is not currently under supervision, the handler shall give at least five working days advance notice to the association so that supervision can be arranged.

(c) *Processing.* The contract additional peanuts shall be shelled or otherwise milled, crushed, or shelled and crushed as a continuous operation separate from other peanuts. Shelled peanuts shall be identified with positive lot identity tags before being stored and moved for crushing, exportation, processing into peanut flakes, or processing into peanut products to be exported. Except as otherwise authorized by the association, such peanuts will be considered as having been crushed or exported only if positive lot identity has been maintained in the following manner:

(1) *Transportation.* The peanuts shall be transported from the storage location in a covered vehicle, such as a truck or railroad car. The vehicle shall be sealed unless the association determines that identity of the peanuts can be maintained without sealing.

(2) *Storage.* The peanuts shall be stored in separate building(s) or bin(s) which can be sealed or which the association determines will satisfactorily maintain lot identity.

(d) *Substitution of quota and additional peanuts.*—(1) *Substitution of quota peanuts which have been exported.*

(i) *Farmers stock peanuts.* The identical contract additional farmers stock peanuts shall be handled in accordance with the provisions of this section, except that with prior notification to and approval of the association, farmers stock quota peanuts of the same crop, type, quality, and area may be exported in place of such additional peanuts.

(ii) *Milled peanuts.* The identical contract additional milled peanuts shelled under supervision of the association shall be disposed of in accordance with this section, except that with prior notification to and approval by the association, such peanuts may be used to replace, in domestic edible use, quota peanuts of the same crop, type, area, and screen size, which have been previously exported. The quota peanuts exported, for which substitution is requested, must have been positive lot identified and otherwise handled as additional peanuts.

(2) *Use of additional peanuts for domestic edible uses prior to substitution.* Additional peanuts may be used for domestic edible use with prior notification and approval of the association and upon presentation to the association of an irrevocable letter of credit in an amount which is not less than 120 percent of the quota support rate for any portion of the lot for which substitution has not been approved in accordance with paragraph (d)(1) of this section. Such letter of credit shall be issued in a form and by a bank which is acceptable to CCC. The handler shall subsequently deliver to the association satisfactory evidence that a like amount of quota peanuts of appropriate screen sizes have been handled as contract additional peanuts and exported in accordance with these regulations. Such evidence must be submitted no later than 30 days after the final date for export as established in § 1446.57(e)(2) or 15 days prior to the expiration of the letter of credit, whichever occurs first. If satisfactory evidence is not presented by such date, CCC may authorize the association to draw against the letter of credit the full amount of the penalty which would otherwise be due for failure to dispose of contract additional peanuts in accordance with this subpart.

(3) *Time limitations.* Substitution may not be requested or approved with respect to contract additional peanuts for which the final disposition date has been extended in accordance with § 1446.57(e)(3).

(e) *Expense charged to handlers.* All supervision costs shall be borne by handlers.

(f) *Domestic sale or transfer of contract additional peanuts.*—(1) *Farmers stock peanuts.* The handler must submit contracts (CCC–1006) covering any domestic sale, transfer, or other disposition of farmers stock contract additional peanuts to the association for written approval. Such approval must be obtained prior to any physical movement of the peanuts by the handler from the buying point. Approval of any domestic sale, transfer, or other disposition may be made only if the person to whom the peanuts are sold, transferred, or disposed of agrees in writing to handle and crush (including processing into flakes in those instances where such processing may be considered as crushing under § 1446.52(a)) or export the contract additional peanuts as raw peanuts or peanut products in accordance with the terms and conditions of this subpart. Approval of such contracts may be made before or after delivery of the peanuts to the handler by the producer.

(2) *Milled peanuts.* The handler must submit contracts (CCC–1006) covering any domestic sale, transfer, or other disposition of milled contract additional peanuts to the association for written approval. Approval must be obtained prior to any physical movement of the peanuts by the handler. Approval of any domestic sale, transfer, or other disposition may be made only if the person to whom the peanuts are sold, transferred, or disposed of agrees, in writing, to handle and crush (includes processing into flakes if approved by the association or CCC) or export the contract additional peanuts in accordance with the terms and conditions of this subpart.

(g) *Disposal of contract additional peanuts.* Contract additional peanuts may be disposed of by domestic crushing or by exportation to an eligible country as follows:

(1) All kernels may be crushed domestically; or

(2) All kernels may be exported for crushing, if fragmented; or

(3) All kernels that are graded to meet the edible export standards may be exported and the remaining kernels: (i) Crushed domestically, or (ii) exported for crushing, if fragmented; or

(4) All of the peanuts may be exported as farmers stock peanuts; or

(5) The peanuts may be exported to an eligible country as peanut products if such peanuts meet edible export standards; or

(6) The peanuts may be processed into peanut flakes for those domestic uses approved by CCC or the Association to be considered as a crushing use under the terms of § 1446.52(a) if such peanuts meet domestic edible quality standards; or

(7) The peanuts may be exported as milled or inshell peanuts.

(h) *Disposal of meal contaminated by aflatoxin.* All meal produced from peanuts which are crushed domestically and found to be unsuitable for use as feed because of contamination by aflatoxin shall be disposed of for nonfeed purposes only. If the meal is exported, the export bill of lading shall reflect the analysis of the lot by inclusion and appropriate completion thereon of the following statement: "This shipment consists of lots of meal which contains aflatoxin ranging from —— to —— PPB and averaging —— PPB."

(i) *Final dates for scheduling supervision.* Contract additional farmers stock peanuts shall be scheduled for supervision by the Association during the normal marketing period but not later than July 31 of the calendar year following the calendar year in which the crop was grown, unless prior approval of a later date has been made by the association.

(j) *Exportation provisions.*—(1) *Exportation to a U.S. Government agency.* Except for the exportation of raw peanuts to the military exchange services for processing outside the United States, the exportation of peanuts in any form by or to a United States Government agency shall not be considered as exportation to an eligible country, but shall instead be considered a domestic edible use of such peanuts. However, sales to a foreign government which are financed with funds made available by a United States agency, such as the Agency for International Development, will not be considered sales to a United States Government agency if the peanuts are not purchased by the foreign buyer for transfer to a United States agency.

(2) *Exportation of contract additional peanuts.*—All contract additional peanuts which are not crushed domestically (including approved processing into flakes) and which are eligible for exportation shall be exported in accordance with the provisions of this subpart to an eligible country as peanuts or peanut products.

(3) *Reentry transshipment and liquidated damages.*—(i) *Reentry transshipment.* Additional peanuts and peanut products made from such peanuts which have been exported shall not be reentered by anyone into the United States in any form or product and shall not be caused by a handler to be diverted or transshipped to other than an eligible country in any form or product. If contract additional peanuts or peanut products made from such peanuts are reentered into the United States, the handler shall, except in cases where the handler's liability is transferred under a valid good-faith transfer executed in accordance with the regulations of this part, be liable for liquidated damages as specified in paragraph (j)(3)(ii) of this section. Liability for liquidated damages arising out of purchases of loan additional peanuts (peanuts purchased from inventories of additional peanuts pledged as price support loan collateral) are governed by the terms of announcements issued by CCC describing the terms and conditions of such sales.

(ii) *Liquidated damages.* Any handler receiving contract additional peanuts shall be deemed to have agreed that: CCC may incur serious and substantial damages to its program to support the price of quota peanuts if additional contract peanuts or products made from such peanuts are exported and later are reentered into the United States or diverted or transshipped to other than an eligible country in any form or product; the amount of such damages will be difficult, it not impossible, to ascertain exactly; and, with respect to any such peanuts or the products of such peanuts which are reentered into the United States or diverted to or transshipped to other than an eligible country, such handler shall pay to CCC, as liquidated damages and not as a penalty, the amount by which the national quota support rate for the applicable crop year exceeds the national additional peanut support rate, for that year on a per pound basis for each pound of peanuts or peanut products reentered. It is agreed that such liquidated damages are a reasonable estimate of the probable actual damages which CCC would suffer because of such reentry, diversion, or transshipment.

(iii) *Waiver or reduction of liquidated damages.* The liquidated damages specified in paragraph (j)(3)(ii) of this section may be reduced or waived if the Executive Vice President of CCC, or his designee, determines that such waiver or reduction will not impair the effective operation of the peanut price support program. Such reduction or waiver may contain such terms and conditions as the Executive Vice President of CCC or his designee determines to be appropriate and necessary for effectuating the purposes of the peanut price support program.

(4) *Evidence of exportation.* The handler shall furnish the association or CCC with the following documentary evidence of exportation of peanuts or peanut products not later than 30 days after the final disposition date provided in § 1446.57(e):

(i) *Exportation by water.* A nonnegotiable copy of an onboard ocean bill of lading, signed on behalf of the carrier, showing the date and place of loading onboard vessel, the weight of the peanuts, peanut meal, or products exported, the name of the vessel, the name and address of the exporter, and the country of destination. Peanut meal which is unsuitable for use as feed because of contamination by aflatoxin shall be identified on the bill of lading in accordance with this section.

(ii) *Exportation by rail or truck.* A copy of the bill of lading (showing the weight of the peanuts or peanut meal or products exported), supplemented by a copy of the Shipper's Export Declaration or other documentation acceptable to the association. Peanut meal which is unsuitable for feed use because of contamination by aflatoxin shall be identified on the bill of lading in accordance with this section.

(iii) *Exportation by air.* A copy of the Airway Bill (showing the weight of the peanuts, peanut meal, or peanut products exported, the consignee and shipper) and other documentation acceptable to the association.

(iv) *Certified statement.* A statement signed by the handler specifying the name and address of the consignee or, upon request by the association of CCC, a copy of the consignee receipt.

(k) *Penalties.* Failures to obtain required supervision from the association, or failure to handle and dispose of contract additional peanuts in accordance with the provisions of this section, shall constitute noncompliance with the provisions of this subpart for which a penalty may be assessed in accordance with § 1446.59.

§ 1446.59 Assessment of penalties and liquidated damages against handlers.

(a) *Penalty liability.* A handler shall be subject to the penalty provisions of this subpart for any or all of the following violations:

(1) Failure to keep or make available records in accordance with § 1446.57(a);

(2) Excess marketings of quota peanuts, as set forth in § 1446.57(b), including any marketing of imported peanut products made from contract additional peanuts as set forth in § 1446.57(c) or any marketing of imported peanut products made from additional peanuts purchased from the inventory of CCC loan collateral peanuts;

(3) Failure to store and account for contract additional peanuts in accordance with the requirements of § 1446.57(d);

VOL 48 ISS 94 MAY 13 1983 UMI

(4) Failure to dispose of contract additional peanuts in accordance with this subpart by the final disposition date in accordance with § 1446.57(e); or

(5) Failure to obtain supervision of or to handle contract additional peanuts as required by § 1446.58.

(b) *Liquidated damages.* The liability for, and the amount of liquidated damages shall be determined in accordance with § 1446.58(j)(3).

(c) *Penalty rate and amount.* The penalty rate shall be equal to 120 percent of the basic quota support rate for the applicable crop year for the type of peanuts involved in the violation for which the penalty is being assessed. The amount of the penalty shall be equal to the penalty rate times the quantity of peanuts: (1) For which records have not been properly kept or made available; (2) marketed as excess quota marketings; (3) not properly stored; (4) not properly disposed of; (5) not properly supervised or handled; or (6) determined by CCC to have been necessary to produce the quantity of peanut products made from contract additional peanuts imported and sold in the United States.

(d) *Notice of assessment.* A handler shall be notified in writing of the assessment of a penalty or liquidated damages by a CCC contracting officer. Such notice shall state the basis for the assessment of the penalty or liquidated damages, and shall advise the handler of the handler's appeal rights under this subpart.

(e) *Appeals.* A handler who is dissatisfied with the penalties or liquidated damages assessed by the CCC contracting officer may file a written request for reconsideration of the assessment with the CCC contracting officer. Such request must be made no later than 15 days after the handler receives the notice of assessment. If the handler is dissatisfied with the determination, the handler may appeal such determination by submitting a written notice of appeal to the Executive Vice President of CCC, within 15 days of the issuance of a determination of reconsideration by the contracting officer. Except as otherwise provided herein, such appeal shall be conducted in accordance with the appeal regulations set forth in Part 780 of this title.

(f) *Request for reductions of penalties or liquidated damages.*—(1) *Form of request.* A handler may request a reduction in the amount of the penalties or liquidated damages which have been assessed. Such a request shall be treated as an appeal under paragraph (e) of this section, and must comply with the requirements of that section. The handler may simultaneously contest liability for the penalty or liquidated damages and, in the alternative, request that the penalty or liquidated damages be reduced.

(2) *Reduction criteria.*—(i) *Liquidated damages.* The criteria for reducing liquidated damages shall be those which are set forth in § 1446.58(j)(3)(iii).

(ii) *Penalties.* A penalty may be reduced if the Executive Vice President of CCC or his designee, determines that the violation for which the penalty was assessed was done unintentionally or unknowingly by the handler and that a reduction in the amount of the penalty would not impair the effective operation of the price support program for peanuts. The provisions of this paragraph shall be applicable only to handlers who made a good faith effort to comply fully with the terms and conditions of the program.

(3) *Limitations.* The amount of a penalty may not be reduced to less than an amount which is equal to 40 percent of the basic quota support rate for the applicable crop year times the quantity of peanuts involved in the violation. There shall be no limitation on the amount by which an assessment of liquidated damages may be reduced.

Warehouse Storage Loans

§ 1446.60 Availability of warehouse storage loans.

(a) *Loans to associations.* CCC will make warehouse storage price support loans to the associations specified in paragraph (b) of this section which contract with CCC to arrange for the storing and handling of farmers stock peanuts, make price support advances to producers on such peanuts, and use such peanuts as collateral for loans to be obtained from CCC. Loans on quota peanuts shall be made on the basis of the quota support rate, and loans on additional peanuts shall be made on the basis of the additional support rate. Such loans will mature on demand.

(b) *Associations and areas.* Price support advances will be available through:

(1) The GFA Peanut Association of Camilla, Georgia, for the Southeastern area consisting of Puerto Rico, the U.S. Virgin Islands, and the States of Alabama, Florida, Georgia, Mississippi, and that part of South Carolina south and west of the Santee-Congaree-Broad Rivers;

(2) The Southwestern Peanut Growers Association of Gorman, Texas, for the Southwestern area consisting of all other territories and possessions of the United States not listed in paragraphs (b)(1) or (b)(3) of this section, and the States of Alaska, Arizona, Arkansas, California, Colorado, Hawaii, Idaho, Kansas, Louisiana, Montana, Nebraska, New Mexico, Nevada, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming;

(3) The Peanut Growers Cooperative Marketing Association of Franklin, Virginia, for the Virginia-Carolina area consisting of the District of Columbia, and the States of Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and that part of South Carolina north and east of the Santee-Congaree-Broad Rivers.

(c) *Where available.* Price support advances will be available to eligible producers at warehouses which have entered into peanut receiving and warehouse contracts with the association. Such contracts will require the warehouseman to inform producers that price support advances are available and to make advances to producers on eligible peanuts tendered for price support as provided in paragraph (g) of this section. The contracts will require Warehousemen to: (1) Examine the producers' marketing cards to determine price support eligibility; (2) make entries on the marketing card as required by Part 729 of this title; and (3) record each delivery as to quota or additional peanuts and date of delivery. If quota peanuts or contract additional peanuts are delivered, the balance of the quota or contract additional peanuts must be shown on the marketing card after each delivery. The names and locations of such warehouses may be obtained from the office of the appropriate association or from State or county ASCS offices.

(d) *Time.* Price support advances to eligible producers on peanuts of any crop will be available from the beginning of harvest through the following January 31 or such later date as may be established by the Executive Vice President, CCC. If the final date of availability falls on a nonworkday for the association, the applicable final date shall be the next workday.

(e) *Inspection.* The type and quality of each lot of farmers stock peanuts delivered to an association for a price support advance shall be determined by an inspector when such peanuts are received at a warehouse under contract with an association.

(f) *Producer agreement.* To obtain a price support advance, the producer shall, in writing, authorize the association to pledge the peanuts delivered to the association by the producer to CCC as collateral for a warehouse storage loan and relinquish any right to redeem or obtain possession of such peanuts.

(g) *Advance to the producer.* For each lot of peanuts delivered, the association will make a price support advance to the producer in an amount equal to the support value of such peanuts in accordance with procedures established by CCC. However, in addition to marketing quota penalties and the deductions specified in § 1446.62, any assessments or excise taxes imposed by State law will be deducted from such advances and paid to the proper State authorities. In addition, the Southwestern Peanut Growers Association may, upon the prior agreement of the producer, deduct from such advance an amount which is approved by CCC, not to exceed $1 per net weight ton of peanuts upon which such advance was made, and which is to be used in financing its peanut related activities outside the price support program.

(h) *Fraud by the producer.* The making of any fraudulent representation by a producer in the loan documents or in obtaining a price support loan advance shall render the producer subject to criminal prosecution under applicable Federal statutes. In addition to any liability under criminal or civil fraud statutes, the producer shall be personally liable to CCC for the amount of the loan advance and for all costs which CCC incurred as a result of the producer's fraudulent representation, together with interest upon such amounts at the rate per annum equal to the rate of interest which was charged CCC by the Treasurer of the United States on the date the price support loan advance was made. The producer shall be given credit for the proceeds received by CCC upon sale of the peanuts upon which such advance was made.

(i) *Ineligible peanuts.* Any person who causes ineligible peanuts (as defined in § 1446.64), to be placed in the loan program shall pay to CCC, as liquidated damages, the amount by which the average quota or additional loan rate (whichever is applicable) for that type of peanuts exceeds the market price for such type for crushing, as determined by CCC. Such person shall pay such amount to CCC promptly upon demand. Liquidated damages under this subsection may be reduced by the Executive Vice President, CCC, or his designee based upon a consideration of the following factors: (1) Whether the person causing ineligible peanuts to be placed in the loan program made a good faith effort to ensure that ineligible peanuts were not pledged as loan collateral; (2) the degree of damage or potential damage to the price support program; (3) the nature and circumstances of the violation; (4) the extent of the violation; and (5) any other pertinent information.

§ 1446.61 Pooling and distribution of net gains.

The association shall establish separate pools by area, type, and segregation of peanuts and maintain separate, complete and accurate records for quota peanuts under loan and for additional peanuts under loan. Bright hull and dark hull Valencia peanuts produced in the southwest area shall be considered as different types for purposes of establishing pools under this section. Net gains on peanuts in each pool shall be distributed to each producer in proportion to the value of peanuts placed in the pool by the producer, except that any distribution of net gains with respect to additional peanut pools of any type to a producer shall be reduced to the extent of any loss incurred by CCC on quota peanuts of a different type placed under loan by the same producer. In addition, the proceeds due to any producer from any pool shall be reduced by the amount of any losses which are incurred by CCC with respect to peanuts which are transferred from an additional loan pool to a quota loan pool under the provisions of this subpart.

(a) *Quota pool.* Net gains from peanuts in the quota pool shall consist of:

(1) the net gains which are in excess of the loan indebtedness on quota peanuts and other costs or losses which are incurred by CCC as the result of such peanuts being placed in the pool by a producer, plus

(2) an amount from the net gains on additional peanuts sold into domestic food and related uses which is equal to the losses incurred in disposing of an equal quantity of quota peanuts of the same type and segregation in the same production area, considering sales of quota peanuts for export first and then as necessary, sales for crushing.

(b) *Additional pool.* Net gains for peanuts in the additional pool shall consist of:

(1) The net gains which are in excess of the loan indebtedness on additional peanuts and other costs or losses which are incurred by CCC as the result of such peanuts being placed in the pool by a producer, less

(2) An amount of the net gains from the additional pool allocated to the quota pool to offset any loss on that pool which is attributable to additional peanuts being used in domestic edible use.

§ 1446.62 Producer indebtedness.

(a) *Facility and drying equipment loans.* If an installment or installments on any loan made by CCC on farm storage facilities or drying equipment are payable under the provisions of the note evidencing such loan and the amount due is recorded on the producer's marketing card, any amount due the producer under this subpart, after deduction of payments due prior lienholders, shall be applied to such installment(s).

(b) *Producers listed on county debt record.* If the producer is indebted to CCC, Farmers Home Administration, or to any other agency of the United States, and such indebtedness is listed on the county debt record and recorded on the producer's marketing card, amounts due the producer under this subpart, after deduction of amount due prior lienholders and on farm storage facilities or drying equipment, shall be applied to such indebtedness as provided in the Secretary's Setoff Regulations, Part 13 of this title.

§ 1446.63 Eligible producer.

(a) *Requirements.* An eligible producer is an individual, partnership, association, corporation, estate, trust, or other legal entity, and whenever applicable, a State, political subdivision of a State, or any agency thereof, producing peanuts as a landowner, landlord, tenant, or sharecropper on a farm. No producer on a farm for which the farm operator fails timely to file a report of crop or land use acreage as required by Part 718 of this title shall be eligible for price support at the quota loan rate unless the late-filed report was accepted by the county ASC committee. In addition, no producer shall be eligible for price support at the quota loan rate if the producer has filed an erroneous report of crop or land use acreage unless: (1) The determined acreage does not differ from the reported acreage by more than the tolerance established by Part 718 of this title; or (2) the county ASC committee determines that the producer acted in good faith in reporting the crop or land use acreage.

(b) *Estates and trusts.* A receiver of an insolvent debtor's estate, an executor or an administrator of a deceased person's estate, a guardian of an estate or of a

VOL
48
ISS
94
MAY
13
1983
UMI

ward or of an incompetent person, and trustees of a trust estate shall be considered to represent the insolvent debtor, the deceased person, the ward or incompetent, and the beneficiaries of a trust, respectively, and the production of the receiver, executor, administrator, guardian, or trustees shall be considered to be the production of the person represented. Loan documents executed by any such person shall be accepted by CCC only if they are legally valid and such person has the authority to sign the applicable documents.

(c) *Eligibility of minors.* A minor who is otherwise an eligible producer shall be eligible for price support only if such minor meets one of the following requirements: (1) The right of majority has been conferred on such minor by court proceedings or by statute; (2) a guardian has been appointed to manage such minor's property and the applicable price support documents are signed by the guardian; or (3) a bond is furnished under which a surety guarantees to protect CCC from any loss incurred for which the minor would be liable had such minor been an adult.

§ 1446.64 Eligible peanuts.

Eligible peanuts shall be farmers stock peanuts of the applicable crop which were produced in the United States by an eligible producer.

(a) *Quota support.* Peanuts eligible for quota support are peanuts which meet the following requirements. The peanuts:

(1) Must be Segregation 1 peanuts;

(2) Must contain not more than 10 percent moisture and which, if mechanically dried, contain at least 6 percent moisture;

(3) Must contain no more than 10 percent foreign material;

(4) Must be free and clear of all liens and encumbrances, including any landlord's liens, unless acceptable waivers are obtained;

(5) Must, if delivered to the association in bags in the Southwestern area, be in new or thoroughly cleaned used bags which: (i) Are made of material other than mesh or net, weighing not less than 7½ ounces nor more than 10 ounces per square yard and containing no sisal fibers, (ii) are free from holes, (iii) are finished at the top with either the selvage edge of the material, a binding, or a hem, and (iv) are uniform in size with approximately 2 bushel capacity;

(6) Must not have been produced on land owned by the Federal Government if such land is occupied without a lease permit or other right of possession; and

(7) Must have been inspected as farmers stock peanuts and have an official grade determined by an inspector.

(b) *Additional support.* Peanuts eligible for additional support are peanuts which meet the following requirements. The peanuts:

(1) Must contain not more than 10 percent moisture;

(2) Must contain not more than 10 percent foreign material, except that such peanuts may contain more than 10 percent foreign material, if the handler agrees to purchase such peanuts for domestic edible use as provided in § 1446.56(a).

(3) Must be free and clear of all liens and encumbrances, including landlord's liens, unless acceptable waivers are obtained;

(4) Must, if delivered to the association in bags in the Southwestern area, be in new or thoroughly cleaned used bags which: (i) Are made of material other than mesh or net, weighing not less than 7½ ounces nor more than 10 ounces per square yard and containing no sisal fibers, (ii) are free from holes, (iii) are finished at the top with either the selvage edge of the material, a binding, or a hem, and (iv) are uniform in size with approximately 2 bushel capacity;

(5) Must not have been produced on land owned by the Federal Government if such land is occupied without a lease permit or other right of possession; and

(6) Must have been inspected as farmers stock peanuts and have an official grade determined by an inspector.

Peanuts which are graded as Segregation 2 or 3 and which, because they contain more than 10 percent moisture and/or foreign material, would otherwise not be considered acceptable for loans under the provisions of (b)(1) and (b)(2) will nonetheless be considered eligible for loans, provided that all other conditions of this section are met, if: the level of moisture does not exceed a level determined to be acceptable by the association; the local crushing market for peanuts is such that the peanuts can be crushed within a reasonable time, as determined by the association; and the producer has made a bona fide effort, as determined by the association, to clean and dry such peanuts prior to offering such peanuts for loan.

(c) *Ownership requirement.* In addition to the requirements set out above, the beneficial interest in all peanuts of all segregations tendered for support as either quota or additional peanuts must be in the producer who delivers them to the association and must always have been in such producer or a former producer whom such producer succeeded before the peanuts were harvested. In order to meet the requirements of succession, the rights, responsibilities, and interests of the former producer with respect to the farm on which the peanuts were produced shall have been substantially assumed by the person claiming succession. Mere purchase of a crop prior to harvest, without acquisition of any additional interest in the farm on which the peanuts were produced, shall not constitute succession. Any producer in doubt as to whether his interest in the peanuts complies with the requirements of this section should, before applying for price support, make available to the appropriate county ASC committee all pertinent information which will permit a determination with respect to succession to be made by CCC.

§ 1446.65 Disposition of Segregation 3 peanuts and liquidated damages.

(a) *Disposition of Segregation 3 peanuts.* Any producer who has a lot of farmers stock peanuts classified by the inspector as Segregation 3 peanuts shall:

(1) Deliver the peanuts to the association subject to the conditions set forth in this subpart for loan at the additional loan rate;

(2) Deliver such lot as contract additional peanuts subject to the provisions of § 1446.54;

(3) Sell such peanuts as quota peanuts subject to the conditions set forth in this subpart to a handler who is a signer of the peanut marketing agreement or to any handler in the event that such peanuts are seed peanuts produced under the auspices of a State agency if the handler to whom the peanuts are sold has signed a supervision supplement to the warehousing contract with the area marketing association; or

(4) Retain the lot for seed.

(b) *Failure to Properly Dispose of Segregation 3 Peanuts.* If the producer does not dispose of or market such peanuts as provided above on the date of inspection, such producer shall be ineligible for continued quota price support for the rest of the marketing year on all peanuts at the close of business on the day of the inspection.

(c) *Retention of Segregation 3 Peanuts for Seed.* If the producer elects to retain a lot for seed, the producer shall designate such peanuts as quota peanuts, have the net weight of such peanuts determined and deducted from the farm marketing card, and advise the inspector that the peanuts are being retained for seed. The producer shall be given a copy of the ASCS–1007 as a record showing the quantity and quality factors of the peanuts and must store such peanuts separate from other peanuts on the farm. The producer shall notify CCC when such peanuts are used and otherwise account for the disposition of such peanuts. Should it later be determined that such peanuts are unfit for seed use, the producer may, after receiving prior approval from the county office, sell such peanuts for crushing as quota peanuts without benefit of price support.

(d) *Liquidated damages.* Any producer participating in the price support loan program shall be deemed to have agreed that: CCC will incur serious and substantial damage to its program to support the price of peanuts if Segregation 3 peanuts are disposed of other than in the manner prescribed by CCC; the amount of such damages will be difficult, if not impossible, to ascertain exactly; and, with respect to any lot of peanuts which is pledged as collateral for a quota price support loan but which is ineligible for such loan, or any lot of peanuts which is pledged as collateral for a quota price support loan by a producer after the producer has disposed of any lot of Segregation 3 peanuts in any manner other than in the manner prescribed in paragraph (a) of this section, such producer shall pay to CCC as liquidated damages and not as a penalty, the difference between the quota loan rate and the additional loan rate (on a per pound basis) per net pound of such peanuts. It is agreed that such liquidated damages are a reasonable estimate of the probable actual damages which CCC would suffer because of such action by the producer. The provisions of § 1446.60(i) relating to the producer's liability shall not be applicable to such peanuts. However, the producers retain such liability as the producer may have under any applicable civil or criminal fraud statute.

§ 1446.66 Producer transfers of additional loan stocks to quota pools.

Producers may transfer Segregation 2 and Segregation 3 additional loan peanuts to the quota loan pool after the producer has completed marketing and returned his marketing card to the county office. Such transfer may not exceed the smaller of the effective farm poundage quota minus the production of Segregation 1 peanuts on the farm, or the undermarketing of quota peanuts shown on the farm marketing card: *Provided,* That the pool proceeds due such producer from peanuts in any other pool shall be reduced by the amount of any losses to CCC on the peanuts so transferred. The support values for any Segregation 2 peanuts so transferred shall be the support value for quota peanuts minus the damage discount published in the quota support schedule and the support value for Segregation 3 peanuts shall be the support value for quota peanuts minus the applicable discount published in the quota support schedule. Producers who are eligible to transfer additional loan peanuts to the quota loan pool in accordance with the provisions of this section may apply for such transfers with the county office. The county office shall determine the quantity of undermarketings of quota peanuts and the quantity of additional peanuts which are eligible for transfer. The producer must indicate to the county office the net weight and applicable Form ASCS–1007 numbers for the peanuts to be transferred. Such pounds shall be considered as marketing of quota peanuts, the applicable ASCS–1007 shall be appropriately adjusted and the producer will be advanced the appropriate difference between the additional and quota support rates.

Signed at Washington, D.C., on May 10, 1983.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

[FR Doc. 83–12952 Filed 5–12–83; 8:45 am]

BILLING CODE 3410–05–M

Rural Electrification Administration

7 CFR Part 1701

Public Information; Appendix A—REA Bulletins; Withdrawal of REA Specification for Direct Burial Telephone Cable (Air Core), PE–23

AGENCY: Rural Electrification Administration, USDA.

ACTION: Final rule.

SUMMARY: REA hereby amends Appendix A—REA Bulletins by withdrawing Bulletin 345–14, REA Specification for Direct Burial Telephone Cable (Air Core), PE–23. A review of the current specifications and practices in rural telephony revealed that the product covered in this specification has little or no utility in today's modern telecommunications systems. Filled cables are now used in applications for which this product was intended. As the product is no longer used, there is no valid reason to maintain the specification.

EFFECTIVE DATE: May 6, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph M. Flanigan, Director, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Room 2835, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 382–8663. The Final Impact Statement describing the options considered in developing this final rule and the impact of implementing each option is available on request from the above-named individual.

SUPPLEMENTARY INFORMATION: REA regulations are issued pursuant to the Rural Electrification Act as amended (7 U.S.C. 901 et seq.). This final action has been reviewed in accordance with Executive Order 12291, Federal Regulation. This action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) result in significant adverse effects on competition, employment, investment or productivity and therefore has been determined to be "not major." This action does not fall within the scope of the Regulatory Flexibility Act and is not subject to OMB Circular A–95 review. This program is listed in the Catalog of Federal Domestic Assistance as 10.851—Rural Telephone Loans and Loan Guarantees.

Background—While useful in the past, the product covered by this specification has little or no utility in today's modern telecommunication system because of the increasing use of filled cables in similar applications. As the product is no longer produced in significant quantities, and rural telecommunications systems are no longer using it, withdrawal of this specification will permit a reduction in government paperwork with virtually no impact on the private sector.

A Notice of Proposed Rulemaking was published in the **Federal Register** on February 15, 1983, Volume 48, Number 32, page 6718. However, no public comments were received in response to the notice.

In view of the above, the Administrator hereby amends 7 CFR Part 1701, Appendix A—REA Bulletins, by withdrawing Bulletin 345–14, REA Specification for Direct Burial Telephone Cable (Air Core), PE–23.

List of Subjects in 7 CFR Part 1701

Loan programs—communications, Telecommunications, Telephone.

Dated: May 6, 1983.

Harold V. Hunter,

Administrator.

Arrival-Departure Manifests and Lists; Supporting Documents; Revised Requirements

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule eliminates certain manifest requirements for carriers transporting aliens. In addition, procedures for manifests required by air and sea carriers are simplified to eliminate collection of unnecessary information and thus reduce their paperwork requirements.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT:
For General Information: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 I Street, N.W., Washington, D.C. 20536, Telephone: (202) 633–3048
For Specific Information: Lawrence J. Weinig, Immigration and Naturalization Service, 425 I Street, N.W., Washington, D.C. 20536, Telephone: (202) 633–2680

SUPPLEMENTARY INFORMATION: After careful review of the Service's information collecting requirements under section 231 of the Act (8 U.S.C. 1221), it has been determined that the manifest procedures and reporting requirements for commercial passenger carriers can be simplified to reduce the paperwork burden imposed under the Act.

Under this rule, use of Form I–418, Passenger List-Crew List, is no longer required as a passenger manifest and its use is now limited to crewmember manifests. Both sea and air carriers will continue to use Form I–92, Aircraft/Vessel Report, for passenger manifests.

Additionally, Form I–94, Arrival/Departure Record, is not required for arriving or departing resident aliens and immigrants; however, use of Form I–94 is still required for nonimmigrants. Also, crewmembers are still required to use Form I–95AB, Crewman's Landing Permit, for multiple entries.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because the rule is limited to revising procedures which reduce the paperwork reporting burden upon the public.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule will not have significant economic impact on a substantial number of small entities.

This is not a major rule within the meaning of Section 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 231

Air carriers, Aliens, Crewmen, Inspections, Maritime carriers, Passenger vessels.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 231—ARRIVAL-DEPARTURE MANIFESTS AND LISTS; SUPPORTING DOCUMENTS

In Part 231, §§ 231.1 and 231.2 are revised to read as follows:

§ 231.1 Arrival manifest for passengers.

(a) *Requirement for manifest.* The master, captain, or agent of every vessel or aircraft arriving in the United States from a foreign place or outlying possession of the United States shall present an arrival manifest to the immigration officer at the port or entry. The manifest must be in the form of a separate Arrival/Departure Record, Form I–94, prepared on board for each passenger except: United States citizens, lawful permanent resident aliens of the United States, and immigrants to the United States. In addition, a properly completed Aircraft/Vessel Report, Form I–92, must be submitted for each arriving aircraft vessel which is transporting passengers. Manifests are not required by vessels or aircraft arriving directly from Canada on a trip originating in that country or arriving in the Virgin Islands of the United States directly from a trip originating in the British Virgin Islands.

(b) *In-Transit Passengers.* An Arrival/Departure Record, Form I–94, is not required for an arriving, through-flight passenger at a United States port provided:

(1) The passenger will depart directly to a foreign place or outlying possession of the United States on the same flight;

(2) The number of through-flight passengers is noted on the Aircraft/Vessel Report, Form I–92, for the flight;

(3) The flight is inspected at a port of entry designated in paragraph 214.2(c) of this chapter;

(4) The carrier is signatory to an Immediate and Continuous Transit Agreement, Form I–426; and

(5) All through-flight passengers remain on board the aircraft or in a separate area under the direction and control of the Service during the ground time.

(c) *Progressive Clearance.* Inspection of arriving passengers may be deferred at the request of the carrier to an onward port of debarkation. Authorization for this progressive clearance may be granted by the Regional Commissioner when both the initial port of entry and the onward port are within the same regional jurisdiction, but when the initial port of entry and onward port are located within different regions, requests for progressive clearance must be authorized by the Assistant Commissioner for Inspections. When progressive clearance is requested, the carrier shall present Form I–92 in duplicate at the initial port of entry. The original Form I–92 will be processed at the initial port of entry, and the duplicate noted and returned to the carrier for presentation at the onward port of debarkation.

(d) *Preparation of Arrival/Departure Record, Form I–94.* Air and sea carriers shall be responsible to ensure that a properly completed From I–94 is presented to the immigration inspector at the port of entry for each arriving passenger except those passengers who do not require a Form I–94 under paragraph (a) of this section. The following classes of aliens are not required to complete the departure portion of the form I–94 if they are entering the U.S. for business or pleasure under section 101(a)(15)(B) of the Act, and intend to remain in the United States for less than six months:

(1) Citizens of Canada or British dependent territories citizens, Bermuda, and

(2) Residents of Canada or Bermuda having common nationality with Canadian nationals or British dependent territories citizens, Bermuda.

§ 231.2 Departure manifest for passengers.

The master, captain, or agent of every vessel or aircraft departing from the United States for a foreign place or outlying possession of the United States shall present a departure manifest to the immigration officer at the port of departure. The manifest must be in the form of a properly completed departure portion of Form I–94, Arrival/Departure Record, for each person on board except for United States citizens, and lawful permanent resident aliens of the United States. No manifest is required for a vessel or aircraft departing on a trip directly for and terminating in Canada, or departing from the United States Virgin Islands driectly to the British Virgin Islands on a trip terminating in the British Virgin Islands. Whenever possible, the departure Form I–94 used shall be the same form given the alien at the time of arrival in the United States. Carriers shall endorse the Form I–94 with the departure information on the reverse of the form. Additionally, a properly completed Aircraft/Vessel Report, Form I–92, must be completed for each departing aircraft and each departing vessel which is transporting passengers. Submission of Forms I–94 and I–92 to the immigration officer shall normally be accomplished within 48 hours of the departure, exclusive of Saturdays, Sundays, and legal holidays. Failure to submit departure manifests within this time period shall be regarded as failure to comply with section 231(d) of the Act, unless prior authorization for delayed delivery of the departure manifest is obtained from the district director. A nonimmigrant alien departing on an aircraft proceeding directly to Canada on a flight terminating in that country should surrender any Form I–94 in his/her possession to the airline agent at the port of departure. Aircraft manifests should not include I–94 forms for in-transit passengers referred to in paragraph (b) of § 231.1.

(Secs. 103, 231 of the immigration and Nationality Act, as amended; (8 U.S.C. 1103, 1221))

Dated: April 22, 1983.

Andrew J. Carmichael, Jr.,
Associate Commissioner for Examinations, Immigration and Naturalization Service.

9 CFR Part 92

[Docket No. 82–054]

Treatment of Horses From Countries Affected with CEM

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document revises the conditions which States must meet in order to receive stallions over 731 days of age imported from countries in which CEM exists. This action is necessary to prevent the introduction and dissemination of CEM into the United States.

DATES: Effective date: May 13, 1983. Comment date: Comments must be received on or before July 12, 1983.

ADDRESS: Written comments to T. O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

All written submissions made pursuant to this interim rule will be made available for public inspection at the Federal Building, Room 728, Hyattsville, MD, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT:
Dr. M. R. Crane, VS, APHIS, USDA, Room 840, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This rule has been reviewed in conformance with Executive Order 12291, and has been determined to be not a "major rule." Based on information compiled by the Department, it has been determined that this rule will have an annual effect on the economy of less than 100 million dollars; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Dr. Saul T. Wilson, Jr., Director, National Program Planning Staffs, VS, APHIS, USDA, has determined that an emergency situation exists which warrants publication without prior opportunity for a public comment period on this interim rule. These amendments are necessary to protect the United States from the introduction and dissemination of CEM, and should be made effective immediately in order to accomplish this purpose.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this emergency interim action is impracticable, unnecessary and contrary to the public interest, and good cause is found for making this emergency interim action effective less than 30 days after publication of this document in the **Federal Register.**

Comments have been solicited for 60 days after publication of this documents, and this emergency interim action will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

Certification Under the Regulatory Flexibility Act

Mr. Bert W. Hawkins, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This rule will only affect those importers interested in importing stallions from countries in which CEM exists. It is anticipated that approximately 60 such stallions will be imported during calendar year 1983. This compares with approximately 40,000 horses of all classes imported into the United States in fiscal year 1982.

Alternatives

The following alternatives were considered: (1) To not amend the regulations, and (2) to amend the regulations as set forth in this document. The present regulations present unnecessary risks of the introduction and dissemination of CEM into the United States which are eliminated by these amendments. Also, these amendments relieve restrictions by permitting specimens collected from mares used to test stallions for CEM to be sent to USDA-approved laboratories. Accordingly, alternative 2 was selected.

Background

On January 4, 1980, a document was published in the **Federal Register** (45 FR 1003–1006) which established the conditions which States must meet in order to be approved to receive stallions over 731 days of age imported from countries in which CEM exists. These conditions were intended to eliminate unnecessary risks of the introduction and dissemination of CEM into the United States. Upon further consideration, the Department believes that these conditions still present unnecessary risks, and that these risks must be eliminated. Therefore, in order to eliminate unnecessary risks regarding the introduction and dissemination of CEM into the United States, this document amends the conditions which States must meet in order to be approved to receive stallions over 731 days of age imported from countries in which CEM exists. Each amendment made by this document is discussed in detail below.

The introductory clause in § 92.4(a)(6) is amended to conform a cross reference in that clause to the style presently required in the Document Drafting

VOL 48 ISS 94 MAY 13 1983 UMI

Handbook published by the Office of the Federal Register. Other nonsubstantive changes are made for clarity.

Present § 92.4(a)(6)(ii) is renumbered § 92.4(a)(6)(ii)(A) and is amended to correct a typographical error. As presently written § 92.4(a)(6)(ii) requires that an approved State to receive stallions from CEM contries quarantine certain specified imported stallions until such stallions have been treated in accordance with the provisions of paragraph "(a)(6)(ii)." The treatment required prior to release from such quarantine is, however, set forth in § 92.4(a)(6)(iii). Therefore, the reference contained in present § 92.4(a)(6)(ii) to "(a)(6)(ii)" is amended to read "(a)(6)(iii)." Other nonsubstantive changes are made to conform cross references in § 92.4(a)(6)(ii) to the style presently required in the Document Drafting Handbook published by the Office of the Federal Register and to remove redundant language.

Further, a new § 92.4(a)(6)(ii)(B) is added to require that in order to be approved to receive stallions over 731 days of age imported for permanent entry from countries in which CEM exists (as listed in § 92.2(i)(1)), the State must agree to quarantine all mares used to test stallions for CEM until the mares have been released from quarantine in accordance with new § 92.4(a)(6)(iii)(C)(*4*). The Department believes that the quarantine of such mares until the provisions for release have been met is necessary to prevent the possible interstate dissemination of CEM. The substantive aspects of the provisions under which mares used to test stallions for CEM may be released from quarantine are discussed below.

The introductory clause in § 92.4(a)(6)(iii) is amended to conform cross references in that clause to the style presently required in the Document Drafting Handbook published by the Office of the Federal Register.

Further, the present introductory clause in § 92.4(a)(6)(iii) requires that to be approved to receive stallions over 731 days of age from countries in which CEM exists, the State must have laws and regulations to ensure that stallions are treated in a manner specified in the remainder of § 92.4(a)(6)(iii). This document amends the introductory clause in § 92.4(a)(6)(iii) to give a State the option as to whether to have laws or regulations requiring the specified treatment. This amendment is made because it is not necessary that a State have both laws and regulations requiring a specified treatment. As long as the treatment is required and such requirements have the force and effect of law this Department has no interest in whether such requirements take the form of laws enacted by the State legislature or regulations promulgated by a State agency or both.

Present § 92.4(a)(6)(iii)(A) requires that in order to be approved to receive stallions over 731 days of age from countries in which CEM exists, a State must have laws and regulations which require that on 5 consecutive days the prepuce, penis, including the fossa glandis, and urethral sinus of the stallion be thoroughly cleaned and washed (scrubbed) while in full erection with a solution of not less than 2 percent surgical scrub chlorhexidine and then thoroughly coated (packed) with an ointment of not less than 0.2 percent nitrofurazone under the monitoring of a State or Federal veterinarian and performed by an accredited veterinarian. This document amends the extent of oversight of the treatment by requiring that the treatment be done under the direct supervision of a State veterinarian rather than that the treatment be monitored by a State or Federal veterinarian. The present requirement that a State or Federal veterinarian monitor the treatment has been misinterpreted to not require the physical presence of a State or Federal veterinarian during the treatment described above. Therefore, in order to clarify the intent of this regulation, this document amends § 92.4(a)(6)(iii)(A) to require direct supervision of the treatment by a State veterinarian. This amendment clarifies the requirement that a veterinarian employed by the State in which the stallion is located be physically present during all aspects of the treatment of the stallion required in § 92.4(a)(6)(iii)(A).

This document also amends the oversight required in § 92.4(a)(6)(iii)(A) by requiring that the oversight be performed by a State veterinarian rather than providing individuals with the option of having the oversight performed by a State or Federal veterinarian. This option has been deleted because this Department no longer has adequate personnel available to perform the function involved.

Present § 92.4(a)(6)(iii)(A) is further amended to require that prior to the treatment of the stallion one specimen each shall be taken from the prepuce, the fossa glandis and the urethral sinus of the stallion and cultured for CEM. This requirement is added for two reasons. First, it will provide this Department information regarding the numbers of stallions and the origins of stallions which are affected with CEM when they enter this country. Present § 92.2(i)(2)(iv) requires that stallions over 731 days of age from countries in which CEM exists must be accompanied by a certificate signed by a salaried veterinary officer of the national government of the country of origin stating that certain specified things were done or not done with respect to the stallion.

Should the information provided by the cultures performed prior to treatment of the stallion in the United States indicate a pattern of CEM affected stallions entering this country from a particular country of origin, the Department will have an opportunity to consult with the national veterinary service of that country in an attempt to remedy any deficiencies which may exist in their treatment of such stallions.

The second reason for adding the requirement that specimens be taken from the stallion and cultured prior to the treatment presently required in § 92.4(a)(6)(iii)(A) is to provide State officials with information regarding the disease status of each stallion to be treated. If a culture indicates that a particular stallion is affected with CEM prior to the stallion being treated, this will enable the State veterinarian supervising such treatment and the accredited veterinarian performing such treatment to be particularly conscientious with respect to the treatment required in § 92.4(a)(6)(iii)(A). It should be noted however, that the treatment required by § 92.4(a)(6)(iii)(A) is required no matter what results are obtained by culturing the specimens taken prior to treatment.

Present § 92.4(a)(6)(iii)(A) is further amended by deleting footnote 5a and the reference thereto. The reference to footnote 5a appears directly after the term "accredited veterinarian", and the footnote informs the reader that the term "accredited veterinarian", as used in § 92.4(a)(6)(iii)(A), is defined in Title 9, Code of Federal Regulations, Part 160. This footnote and reference thereto are no longer necessary because the term "accredited veterinarian" is defined in Title 9, Code of Federal Regulations, § 92.1(aa), and this definition is applicable to the term as used in § 92.4(a)(6)(iii)(A). The deletion of the footnote and reference thereto is not substantive because the definition of the term "accredited veterinarian" in § 92.1(aa) is identical to the definition in Title 9, Code of Federal Regulations, Part 160.

Present § 92.4(a)(6)(iii)(B) is amended by renumbering the section as § 92.4(a)(6)(iii)(B)(*2*) and revising the paragraph as discussed below. A new § 92.4(a)(6)(iii)(B)(*1*) is added which requires that mares to be used to test stallions for CEM must be permanently

identified with the letter "T" before such mares are used for testing stallions for CEM. This identification is necessary to aid State officials in determining the identity of mares which must be placed under quarantine in accordance with § 92.4(a)(6)(ii)(B) as discussed above, and in determining the identity of mares which have already been used to test stallions for CEM. (As discussed below, mares may not be used to test stallions for CEM twice).

New § 92.4(a)(6)(iii)(B)(*1*) specifies that the marking shall be applied to the mare by a Veterinary Services inspector, State inspector or an accedited veterinarian. The Department believes that this restriction on the identity of those who may apply the mark is necessary to ensure that the mares to be used to test stallions for CEM will be identified properly.

New § 92.4(a)(6)(iii)(B)(*1*) also amends the regulations to require that the mares be marked with a hot iron, freezemarking or lip tattoo. These methods of marking ensure that the mark will be permanent and easy to identify as the letter "T." Further, new § 92.4(a)(6)(iii)(B)(*1*) requires that if a hot iron or freezemarking is used, the marking shall not be less than 2 inches high and shall be applied to the left shoulder or left side of the neck of the mare. If a lip tattoo is used, the marking must not be less than 1 inch high and three-fourths of an inch wide and must be applied to the inside surface of the upper lip of the mare. These requirements regarding the size and location of the marking are necessary to ensure that mares to be used to test stallions for CEM can be quickly and easily identified.

As stated above, this document renumbers present § 92.4(a)(6)(iii)(B) as § 92.4(a)(6)(iii)(B)(*2*). In addition, new § 92.4(a)(6)(iii)(B)(*2*) is amended in three respects.

First, the present regulations refer to the scrubbing and packing (of the stallion) required in "(1)". The reference to "(1)" is a typographical error which is amended in this document to refer the reader to the scrubbing and packing required in "paragraph (a)(6)(iii)(A)."

Second, the present regulations require, among other things, that stallions over 731 days of age from countries in which CEM exists must be bred to two mares qualified prior to breeding as apparently free from CEM. After such breeding the mares are required to be tested to determine the CEM disease status of the stallion. This document amends new § 92.4(a)(6)(iii)(B)(*2*) to prohibit the use of mares which have been used to test stallions for CEM previously and to prohibit the use of mares which have been bred after the time specimens were taken or samples drawn from the mares to qualify the mares as apparently free from CEM. These two additional requirements for mares to be used to test stallions for CEM are necessary to ensure that the mares used to test the stallion for CEM are not affected with CEM prior to being used to test the stallion. The additional requirements will prevent the possible spread of CEM to stallions by mares which are used to test the stallion for CEM. Further, such mares found positive for CEM after being used to test a stallion for CEM, will constitute a more reliable indication of the source of infection.

Third, minor nonsubstantive changes are made for ease of reading.

Section 92.4(a)(6)(iii)(C)(*3*) is amended by making certain editorial, nonsubstantive changes for clarity and ease of reading.

Present § 92.4(a)(6)(iii)(C)(*4*) is redesignated at §§ 92.4(a)(6)(iii)(D)(*1*) and 92.4(a)(6)(iii)(D)(*2*) and revised as discussed below.

As explained above, this document adds a requirement that in order to be approved to receive stallions from countries in which CEM exists, a State must agree to quarantine all mares used to test stallions for CEM. This quarantine is necessary to prevent the possible interstate dissemination of CEM. This document adds a new provision designated as § 92.4(a)(6)(iii)(C)(*4*) which provides conditions under which a State may release a mare used to test a stallion for CEM. The Department believes that each condition under which the mares in question may be released from quarantine will assure that the mare does not disseminate CEM.

First, new § 92.4(a)(6)(iii)(C)(*4*)(*i*) provides that mares which have been used to test stallions for CEM may be released from quarantine if they are found negative on all cultures and tests required to be performed on specimens collected from the mare to determine the CEM disease status of the stallion. Specifically, those tests and cultures set forth in §§ 92.4(a)(6)(iii)(C)(*1*), 92.4(a)(6)(iii)(C)(*2*), and 92.4(a)(6)(iii)(C)(*3*). This Department believes that should each of the cultures and tests referred to be negative there is little likelihood that the mare is affected with CEM, and, therefore, she may be released from quarantine.

Second, new § 92.4(a)(6)(iii)(C)(*4*)(*ii*) provides that mares which have been used to test stallions for CEM may be released from quarantine if an accredited veterinarian performs an ovariectomy on the mare under the supervision of a State veterinarian. An ovariectomy prevents a mare from going into heat and thereby prevents breeding. Therefore, the risk of the mare disseminating CEM is minimal and the mare may be released from quarantine. To ensure that the ovariectomy is performed correctly this new paragraph requires that the operation be performed by an accredited veterinarian and be directly supervised by a State veterinarian. Direct supervision requires physical presence.

Third, new § 92.4(a)(6)(iii)(C)(*4*)(*iii*) provides that any mare used to test a stallion for CEM may be released from quarantine if the mare has been treated and handled in accordance with § 92.4(a)(9)(iii). Section § 92.4(a)(9)(iii) sets forth the treatment and handling necessary to ensure that mares are not affected with CEM. If a mare quarantined pursuant to § 92.4(a)(6)(ii)(B) is subjected to the treatment and handling set forth in § 92.4(a)(9)(iii) the risk is minimal that she is affected with CEM, and therefore, the mare may be released from quarantine.

Fourth, new 92.4(a)(6)(iii)(C)(*4*)(*iv*) provides that any mare used to test a stallion for CEM may be released from quarantine if the mare is moved directly to slaughter without unloading en route, is euthanized or dies. A dead mare or a mare disposed of in any such manner will not have an opportunity to breed and will not have an opportunity to disseminate CEM, and, therefore, the quarantine may be removed.

As stated above, present § 92.4(a)(6)(iii)(C)(*4*) is redesignated as §§ 92.4(a)(6)(iii)(D)(*1*) and 92.4(a)(6)(iii)(D)(*2*). Present § 92.4(a)(6)(iii)(C)(*4*) requires that all cultures and tests of the mares used to test the stallion must be negative for CEM before the stallion may be released from detention. This requirement is retained in new § 92.4(a)(6)(iii)(D)(*1*) and only minor nonsubstantive changes are made for ease of reading.

Present § 92.4(a)(6)(iii)(C)(*4*) also requires that if any CEM culture or test required by § 92.4(a)(6)(iii) is positive, the stallion shall not be released from quarantine and shall be retreated and retested as required by Title 9, Code of Federal Regulations, Part 92. This requirement is set forth in new § 92.4(a)(6)(iii)(D)(*2*) with one minor change. The reference to retreatment and retesting as required by Title 9, Code of Federal Regulations, Part 92, is amended to require retreatment and retesting as required by § 92.4(a)(6)(iii). The reference in the present regulations to the entire part is in error

VOL 48 ISS 94 MY 13 1983 UMI

Present § 92.4(a)(6)(iii)(D) requires that all tests and cultures required by § 92.4(a)(6)(iii) shall be conducted at the National Veterinary Services Laboratories, Ames, Iowa. Present § 92.4(a)(6)(iii)(D) is redesignated as § 92.4(a)(6)(iii)(E)(*1*) and amended to allow CEM tests and cultures to be conducted not only at the National Veterinary Services Laboratories, Ames, Iowa, but also at any other laboratory approved by the Deputy Administrator, Veterinary Services, to conduct CEM cultures and tests. The provision regarding approval for other laboratories to conduct CEM cultures and tests is added because the Department believes that other laboratories which meet the standards required before approval to conduct CEM cultures and tests is granted will provide results on such cultures and tests which are as reliable as those provided by the National Veterinary Services Laboratories. If other laboratories are approved, those which are closer to the point of collection of specimens to be tested or cultured for CEM will, in many cases, receive the specimens sooner than they would be received by the National Veterinary Services Laboratories, and the reliability of the results from such cultures or tests will thereby be improved.

In this regard, new § 92.4(a)(6)(iii)(E)(*2*) requires that all specimens submitted to the National Veterinary Services Laboratories or an approved laboratory must be accompanied by a statement indicating the date and time of the collection. To be eligible for testing or culture, the specimen must be received by the laboratory within 48 hours of collection. Specimens deteriorate over time, and those which are received more than 48 hours after collection do not yield reliable results with respect to CEM.

New § 92.4(a)(6)(iii)(E)(*3*) provides an address to which anyone may write to obtain a list of laboratories approved by the Deputy Administrator, Veterinary Services, to conduct CEM cultures and tests and the standards which must be met for a laboratory to be placed on or remain on the approved list.

New § 92.4(a)(6)(iii)(E)(*4*) provides that the Deputy Administrator, Veterinary Services, may refuse to grant approval to or may withdraw approval from a laboratory which does not meet the standards necessary for approval. This new section requires that the notification of the refusal to grant approval or the withdrawal of approval must be in writing and is effective upon service of the notification upon an official of the laboratory, pending the outcome of any hearing and judicial review thereof, unless otherwise ordered by the Administrator, Animal and Plant Health Inspection Service. If there is a material dispute of fact, the laboratory shall be afforded an opportunity for a hearing with respect to the merits or validity of the refusal to grant approval to or the withdrawal of approval from the laboratory to conduct CEM cultures and tests. The hearing shall be conducted in accordance with rules of practice which shall be adopted for the hearing by the Administrator, Animal and Plant Health Inspection Service.

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, Part 92, Title 9, Code of Federal Regulations, is amended as follows:

1. In § 92.4, paragraph (a)(6) of the introductory clause up to and including the colon is revised as follows:

§ 92.4 Import permits for ruminants, swine, horses from countries affected with CEM, poultry, poultry semen, animal semen, birds, and for animal specimens for diagnostic purposes.[5]

(a) * * *

(6) In order to be approved to receive stallions over 731 days of age pursuant to § 92.2(i)(2)(iv) the following conditions shall be met:

* * * * *

§ 92.4 [Amended]

2. § 92.4, paragraph (a)(6)(ii) is redesignated (a)(6)(ii)(A) and revised to read as follows:

(a) * * *

(6) * * *

(ii)(A) The State must agree to quarantine all stallions over 731 days of age imported from countries listed in § 92.2(i)(1), pursuant to § 92.2(i)(2)(iv), until the stallions have been treated in accordance with paragraph (a)(6)(iii) of this section.

* * * * *

3. In § 92.4, a new paragraph (a)(6)(ii)(B) is added to read as follows:

(a) * * *

(6) * * *

(ii) * * *

(B) The State must agree to quarantine all mares used to test stallions for CEM until the mares have been released from quarantine in accordance with paragraph (a)(6)(iii)(C)(*4*) of this section.

* * * * *

4. In § 92.4, paragraph (a)(6)(iii), the introductory clause up to and including the colon is revised as follows:

(a) * * *

(6) * * *

(iii) The State must have laws or regulations requiring that stallions over 731 days of age imported from countries listed in § 92.2(i)(1) pursuant to § 92.2(i)(2)(iv) have been treated in the following manner:

* * * * *

5. In § 92.4(a)(6)(iii)(A) footnote 5a is removed.

6. In § 92.4, paragraph (a)(6)(iii)(A) is revised to read as follows:

(a) * * *

(6) * * *

(iii) * * *

(A) One specimen each shall be taken from the prepuce, the fossa glandis, and urethral sinus of the stallion and be cultured for CEM. After the specimens have been cultured for CEM, on 5 consecutive days the prepuce, penis, including the fossa glandis, and urethral sinus of the stallion shall be thoroughly cleaned and washed (scrubbed) while in full erection with a solution of not less than 2 percent surgical scrub chlorhexidine and then thoroughly coated (packed) with an ointment of not less than 0.2 percent nitrofurazone by an accredited veterinarian under the direct supervision of a State veterinarian.

* * * * *

7. In § 92.4, paragraph (a)(6)(iii)(B) is revised by redesignating the present paragraph as (a)(6)(iii)(B)(*2*) and adding a new paragraph (a)(6)(iii)(B)(*1*) to read as follows:

(a) * * *

(6) * * *

(iii) * * *

(B)(*1*) *Identification of test mares.* Mares to be used to test stallions for CEM shall be permanently identified before the mares are used for such testing with the letter "T." The marking shall be permanently applied by an inspector, State inspector, or accredited veterinarian who shall use a hot iron, freezemarking or a lip tattoo. If a hot iron or freezemarking is used, the marking shall not be less than two inches high and shall be applied to the left shoulder or left side of the neck of the mare. If a lip tattoo is used, the marking shall not be less than one inch high and three-fourths of an inch wide and shall be applied to the inside surface of the upper lip of the mare.

* * * * *

8. In § 92.4, a new paragraph (a)(6)(iii)(B)(*2*) is revised to read as follows:

(*2*) After a period of seven days following the fifth consecutive day of scrubbing and packing required in paragraph (a)(6)(iii)(A) of this section, the stallion shall be bred to two mares which have not been previously used to test stallions for CEM, which are qualified prior to breeding as apparently free from CEM and which have not been bred from the time specimens were taken from the mares to qualify the mares as apparently free from CEM. To qualify as apparently free from CEM, each mare shall be tested with negative results by a complement fixation (CF) test for CEM and specimens taken from each mare shall be cultured negative for CEM. For culture, one specimen each shall be collected during estrus from the endometrium of the uterus, clitoral sinuses and clitoral fossa. After an interval of not less than seven days, one specimen each shall be collected from the cervix, clitoral sinuses and clitoral fossa.

* * * * *

9. In § 92.4, paragraph (a)(6)(iii)(C)(*3*) is revised to read as follows:

(a) * * *

(6) * * *

(iii) * * *

(C) * * *

(*3*) Two blood serum samples obtained at intervals of not less than seven days between the 15th to 40th day after the day of breeding shall be tested by the complement fixation (CF) test for CEM.

* * * * *

10. In § 92.4, paragraph (a)(6)(iii)(C)(*4*) is revised to read as follows:

(a) * * *

(6) * * *

(iii) * * *

(C) * * *

(*4*) A mare which has been used to test stallions for CEM may be released from quarantine only if:

(*i*) The mare is found negative for CEM on all cultures and tests required under paragraphs (a)(6)(iii)(C)(*1*), (a)(6)(iii)(C)(*2*), and (a)(6)(iii)(C)(*3*) of this section; or

(*ii*) The mare is subjected to an ovariectomy by an accredited veterinarian under the direct supervision of a State veterinarian; or

(*iii*) The mare is treated and handled in accordance with paragraph (a)(9)(iii) of this section; or

(*iv*) The mare is moved directly to slaughter without unloading enroute, is euthanized or dies.

* * * * *

11. In § 92.4, paragraph (a)(6)(iii)(D) is revised to read as follows:

(a) * * *

(6) * * *

(iii) * * *

(D)(*1*) A stallion may be released from quarantine only if all cultures and tests of specimens from the mares used to test the stallion for CEM, are negative for CEM.

(*2*) If any culture or test required by this paragraph is positive for CEM, the stallion shall be retreated and retested in accordance with this paragraph.

* * * * *

12. In § 92.4, a new paragraph (a)(6)(iii)(E) is added to read as follows:

(a) * * *

(6) * * *

(iii) * * *

(E)(*1*) All tests and cultures required by this paragraph shall be conducted at the National Veterinary Services Laboratories, Ames, Iowa, or at a laboratory approved by the Deputy Administrator, Veterinary Services, to conduct CEM cultures and tests.

(*2*) All specimens submitted to the National Veterinary Services Laboratories or an approved laboratory for CEM culture or testing shall be accompanied by a statement indicating the date and time of collection. To be eligible for CEM culture or testing the specimen must be received by the National Veterinary Services Laboratories or approved laboratory within 48 hours of collection.

(*3*) A list of laboratories approved to conduct CEM cultures and tests and the standards which must be met to attain and retain approval are available from the Deputy Administrator, Veterinary Services, APHIS, USDA, 6505 Belcrest Road, Hyattsville, Maryland 20782.

(*4*)(*i*) The Deputy Administrator, Veterinary Services, may refuse to grant approval to or may withdraw approval from a laboratory to conduct CEM cultures and tests if the Deputy Administrator, Veterinary Services, determines that the laboratory does not meet the standards necessary for approval.

(*ii*) The Deputy Administrator, Veterinary Services, shall send a written notice to an official at the laboratory which shall state the reasons for the refusal to grant approval to the laboratory to conduct CEM cultures and tests or the withdrawal of approval from the laboratory to conduct CEM cultures and tests. If there is a material dispute of fact, the laboratory shall be afforded an opportunity for a hearing with respect to the merits or validity of the refusal to grant approval to or the withdrawal of approval from the laboratory to conduct CEM cultures and tests. The hearing shall be conducted in accordance with rules of practice which shall be adopted for the hearing by the Administrator, Animal and Plant Health Inspection Service. The refusal to grant approval to or the withdrawal of approval from a laboratory to conduct CEM cultures and tests shall be effective upon service of the notification on an official of the laboratory and shall continue in effect pending the outcome of any hearing and any judicial review thereof, unless otherwise ordered by the Administrator, Animal and Plant Health Inspection Service.

(Sec. 2, 32 Stat. 792, as amended, secs. 2, 4, 11, 76 Stat. 129, 130, 132; 21 U.S.C. 111, 134a, 134c, 134f; 37 FR 28464, 28477; 38 FR 19141)

Done at Washington, D.C., this 3rd day of May, 1983.

Norvan L. Meyer,

Acting Deputy Administrator, Veterinary Services.

FEDERAL ELECTION COMMISSION

11 CFR Part 110

[Notice 1983-14]

Disclaimer Notices

AGENCY: Federal Election Commission.

ACTION: Final rule: Announcement of effective date.

SUMMARY: On March 2, 1983 (48 FR 8809), the Commission published the text of revisions to its regulations at 11 CFR 110.11(a) which govern the inclusion of disclaimer notices in political advertising and communications. The Commission announces that these regulations are effective as of May 13, 1983.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 1325 K Street, NW, Washington, D.C. 20463, (202) 523-4143 or (800) 424-9530.

SUPPLEMENTARY INFORMATION: 2 U.S.C. 438(d) requires that any rule or regulation prescribed by the Commission to implement Title 2, United States Code, be transmitted to the Speaker of the House of Representatives and the President of the Senate prior to final promulgation. If neither House of Congress disapproves the regulation

VOL

within 30 days after its transmittal, the Commission may finally prescribe the regulation in question. The regulations made effective by this notice were transmitted to Congress on February 25, 1983. Thirty legislative days expired in the Senate as of April 21, 1983 and in the House as of April 27, 1983.

Announcement of Effective Date

11 CFR 110.11(a), as published at 48 FR 8809–8810, is effective as of May 13, 1983.

Dated: May 6, 1983.

Danny L. McDonald,

Chairman, Federal Election Commission.

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 556, 590 and 591

[No. 83-242]

Preemption of State Due-on-Sale Laws

Dated: April 28, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") has implemented § 341 of the Garn-St Germain Depository Institutions Act of 1982, which provides for federal preemption of state laws restricting the right of any lender to exercise its contractual obligation to declare immediately due and payable sums secured by the lender's security instrument if all or any part of the real property securing the loan is sold or transferred without the lender's prior written consent. To that end, the Board has revised its existing regulations and issued new regulations regarding preemption of state laws restricting the use of due-on-sale clauses with respect to both federally and non-federally chartered lenders. The revisions: (1) Describe real property lenders subject to the statute and regulations; (2) restate the preemption of state laws with respect to all federally chartered institutions; (3) provide for preemption of state law for lenders holding real property loans not originated by federally chartered institutions; (4) provide a "window period" during which loans originated or assumed by lenders other than federally chartered institutions will be subject to state law or judicial decision prohibiting exercise of due-on-sale clauses; (5) describe specific circumstances in which no lender shall exercise due-on-sale clauses; and (6) provide notice that the Board will issue interpretations of the statute upon receipt of written requests.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Gwenn Hibbs, Deputy Director, Legislative Counsel (202–377–6448), or Anne K. Scully, Attorney, Legislative Counsel (202–377–6460), Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: Section 341 of the Garn-St Germain Depository Institutions Act of 1982 ("Act"), Pub. L. No. 97–320, 96 Stat. 1469, 1505, provides for federal preemption of state laws restricting the right of lenders to exercise their contractual right to declare a real property mortgage due and payable, pursuant to a due-on-sale clause, if all or any part of the real property is sold or transferred without the lender's prior written consent. The statutory preemption is, however, subject to a "window-period" which excepts certain loans originated or assumed after state action which (by statute, constitutional provision or judicial decision) restricted the enforcement of due-on-sale clauses.

Section 341(e)(1) of the Act authorized the Board, in consultation with the Comptroller of the Currency and the National Credit Union Administration Board, to issue regulations and to publish interpretations to implement the national policy governing the preemption of state laws restricting the exercise of due-on-sale clauses by both federally and non-federally chartered lenders. Prior to enactment of the Act on October 15, 1982, the Board had promulgated regulations affirming the right of federal associations to exercise due-on-sale clauses notwithstanding restrictive state laws, subject to certain enumerated limitations (12 CFR 545.8–3 (f) and (g), 556.9(c) (1976)).

The Board proposed on January 13, 1983, to revise and amend its regulations to implement the preemption established by the Act. (Board Resolution No. 83–17, 48 FR 2373, January 19, 1983). The proposed regulations restated and clarified, where necessary, the basic statutory framework set out in section 341 of the Act and consolidated and simplified existing provisions of §§ 545.8–3 (f) and (g) and 556.9. In addition, the Board requested comment on the appropriateness of the proposed clarifications and amplification of the statutory framework and whether the proposals adequately served the stated regulatory objectives.

The Board received 59 comment letters to its proposal: 17 from law firms, 24 from financial institutions, 11 from national and state trade associations, 2 from federal and state regulatory agencies, 3 from other corporations, and 2 from individuals. Generally, the commenters approved of the proposed regulations as providing a sound basis for the exercise of due-on-sale clauses, especially where the rules clarified several perceived statutory ambiguities. However, the Board received some comments recommending revision of certain provisions of the proposed regulations. Generally, these comments requested that the Board: (1) Specifically identify the window-period states and define the commencement date of a given state's window-period; (2) clarify the extent to which the borrower's and lender's expectation of enforcement of due-on-sale clauses in pre-window-period loans should be honored even though the Act does not appear to address the matter; (3) clarify whether state laws lengthening foreclosure procedures following the exercise of due-on-sale clauses are preempted or whether they are laws creating window-periods; (4) clarify the right of a lender in a window-period state to enforce a due-on-sale clause if a transferee does not meet customary credit standards; (5) clarify whether loans originated by service corporations of federal associations should be treated as originated by federal associations for purposes of federal preemption of window-period loans; (6) reconsider its proposal to limit the exceptions to the exercise of due-on-sale clauses set forth in section 341(d) of the Act to owner-occupied property; (7) specify enforcement methods available to lenders to prevent subsequent transfers of property that has been transferred into an inter vivos trust; and (8) reconsider the proposed prohibition on assessment of prepayment penalties in the event a lender exercises its option under a due-on-sale clause.

The Board has considered the comments and has determined to adopt the regulation substantially as proposed. However, in response to major issues raised by commenters regarding certain proposed provisions and in order to eliminate confusion and controversy with respect to application of those provisions, the Board has clarified the definition of window-period loan; has adopted a revised list of state-law restrictions that create a window period; and has clarified, where necessary, language contained in the Act regarding the issues of customary credit standards, transfers made to inter vivos trusts, and enforcement of due-on-sale clauses contained in various real estate devices.

Definitions

Due-on-Sale Clause—"Sale or Transfer" of Property

The Board has modified the definition of "due-on-sale clause" in § 591.2(b) of the final regulation to clarify the scope of what constitutes a "sale or transfer" of property for purposes of enforcing a due-on-sale clause. Several commenters suggested including a regulatory definition of "sale or transfer" to provide explicitly that the due-on-sale clause may be invoked not only upon sales or transfers of all or any part of the secured property, but also in response to the various devices that have been used to circumvent a due-on-sale clause, the Board has therefore established in the final regulation a definition of "sale or transfer" which includes various categories of real estate financing techniques considered to be "sales or transfers" for purposes of the exercise of a due-on-sale clause. In particular, consistent with section 341(d)(4) of the Act, which prohibits the exercise of a due-on-sale clause upon the granting of a leasehold interest of three years or less not containing an option to purchase, the Board has defined a "leasehold interest with a term greater than three years" as a "sale or transfer" for "due-on-sale" purposes.

"Lender." Section 591.2(g) of the final regulation expands the list of entities enumerated in the statutory definition of lender expressly to include insurance companies and federal and state chartered credit unions. The Board emphasizes that this list is intended to be representative and not exclusive. Failure to enumerate a specific entity in the regulation should not be interpreted to mean that such entity is excluded from coverage under section 341 of the Act and the applicable rules.

"Loan Secured by Lien on Real Property." The Board has modified final § 591.2(h) by deleting the proposed requirement that a leasehold interest in real property extend five years beyond the maturity of the loan. The proposed definition paralleled the definition of the same term in § 590.2 (usury preemption) of the Board's regulations. Additionally, Board regulations (12 CFR 545.32(c), Board Resolution No. 83–241, April 26, 1983) defining this term in the context of lending practices of federal associations also require that if security property is a leasehold, it must extend or be subject to extension at the option of the association for at least five years beyond the maturity of the loan. See also 12 CFR 541.14 (1979).

The requirement under Part 545 is intended to ensure that federal associations will have an interest of substantial value to protect a leasehold loan if there is a default by the borrower at or near the maturity date. In the context of defining terms applicable to due-on-sale preemption by all lenders, including state-chartered financial institutions and lenders such as finance companies, mortgage bankers, and other corporate entities, however, the Board believes it is inappropriate to impose its security requirements for federal associations in defining leasehold loans qualified for due-on-sale enforcement. These loans, subject to applicable regulation by state or other federal authorities, will therefore qualify for federal due-on-sale preemption.

Window-Period Loan

Commenters addressing the window-period loan definition generally requested the Board to clarify or revise the proposal in six areas, to: (1) Identify explicitly window-period states and beginning dates; (2) clarify the status of land-sale installment contracts; (3) clarify if window-periods were created by state law fully prohibiting enforcement or merely restricting enforcement of due-on-sale clauses; (4) clarify if window-periods cover all loans made or assumed during the period, or only the types of loans expressly protected by state decision or statute; (5) clarify the beginning and ending dates of the window-period if a state has rescinded its restrictions on due-on-sale clauses prior to October 15, 1982; (6) clarify the need to record an alleged window-period transfer.

a. *Defining the Window Period.* Consistent with the literal language and legislative history of the Act section 341(c)(1), proposed § 591.2(p) defined a window-period loan as one "made or assumed" during the period beginning on the date a state prohibited, by statute or judicial decision, "the unrestricted exercise of due-on-sale clauses" and ending on October 15, 1982.

The Board declined to identify expressly such states in its proposed rule, but solicited comments as to whether five broad categories of state law should be regarded as the types which, as a matter of federal law, "prohibited the unrestricted exercise" of due-on-sale clauses and created window-periods within the meaning of Act section 341(c)(1). While many comments approved this approach, with modifications, others urged the Board to promulgate a list of window-period laws and starting dates to eliminate confusion and conflicting interpretations. Upon consideration of these comments, the Board is incorporating in the final window-period loan definition a modified version of the five "categories" outlined in its proposal.

The Board is cognizant of the dilemma for lenders created by ambiguous state laws. However, the Board has determined that it would be inappropriate, at this time, to analyze and interpret various state laws by listing window-period states and the beginning dates of those window-periods. It is anticipated, however, that the Board's Office of General Counsel will render advisory opinions interpreting such state laws. This decision accords with the legislative history of the Act, which clearly evinces Congressional intent that the interpretation of window-period laws is a matter best left to state interpretation and state judicial decision. S. Rep. No. 536, 97th Cong., 2d Sess. 22, 58–59 (hereafter "S. Rep.").

The Board's adoption of the "categories" approach will provide a uniform framework to guide lenders in determining if a state law is of the type Congress intended to create a window-period. At the same time, this approach honors Congressional deference to state action. Ultimately, state attorneys general and courts must decide whether a particular state law or judicial decision is within the purview of the Act as implemented by the Board's regulation. New subparagraph (3) of final § 591.2(p) accordingly establishes two categories of state laws which create window-periods, substantially revising the five categories originally proposed.

The first two proposed categories (pertaining to laws permitting due-on-sale enforcement where the lender's security interest is impaired, and laws allowing due-on-sale enforcement where a person who assumes the loan fails to meet customary credit standards) are consolidated and retained in the final regulation as § 591.2(p)(3)(i). The Board has refined the language of the latter category to reference laws allowing exercise of a due-on-sale clause if the transfer impairs the "likelihood of repayment." The Board believes that this broad concept is inclusive of the proposal language regarding a transferee failing to meet "customary credit standards." Together with the fourth proposed category (designated as § 591.2(p)(3)(ii) in the final rule), pertaining to laws limiting interest rate increases upon assumption, these types of laws comprise the exclusive list of state laws that trigger a window-period. If a state law does not fall into one of the two categories, it does not create a window-period. Such a law would be preempted pursuant to Act § 341(b) (1)–

VOL 48 ISS 94 MAY 13 1983 UMI

(2) however, if it imposed any other burden on the lender's effective use of the due-on-sale option.

The Board's final definition of window-period law categories also clarifies whether a particular type of foreclosure statute is preempted or is of a type creating a window-period. For example, a statute may provide for a longer than normal redemption period for foreclosures of property following enforcement of a due-on-sale clause by a lender, unless the transfer impairs the lender's security interest or likelihood of repayment. Consistent with the legislative history of the Act, the Board has determined that such a foreclosure statute is preempted by the Act and by the final rules. 128 Cong. Rec. S. 12235 (daily ed. September 24, 1982) (statement of Sen. Garn). However, such a foreclosure statute does not create a window-period because it does not fall within the two categories of state laws listed in the final rule that establish a window-period. In those instances where a lender otherwise subject to such a law has not provided for its right to enforce a due-on-sale clause vis-a-vis foreclosure in the contract, the lender must look to other state statutes governing real property foreclosure for its remedies.

The third proposed category (state laws that condition the use of due-on-sale clauses on the existence of "legitimate grounds") has been deleted in the final regulation. The Board believes that the proposed language was overly vague and could have invited conflicting interpretations. Moreover, the same concept is embodied in other provisions referring to laws restricting exercise of due-on-sale clauses to transfers which impair the lender's security interest or the likelihood of repayment.

The fourth proposed category (state laws which restrict or disallow interest-rate changes during the term of the loan, or upon assumption) has been redesignated as subparagraph (3)(ii) of § 591.2(p), and modified to include only those laws that require the lender to accept an assumption without an interest-rate change or with an interest-rate change below the lender's current market interest rate for similar loans. Several commenters expressed concern that the language of the proposal could be interpreted to include laws not related to due-on-sale enforcement or not substantially restricting it, such as usury laws and laws designed to prohibit or restrict the creation of adjustable-rate mortgages. The modification of the proposed language reflects the intent of the Act and will not create window-periods in states whose laws were not intended to affect due-on-sale clause enforcement.

The fifth proposed category (laws which limit the fee a lender may charge for transfer of a loan) has been eliminated in the final regulation. As several commenters noted, limiting the fees a lender may charge for transfer does not substantially impair enforcement of a due-on-sale clause (although the lender's cost of doing business may increase as a result). While the legislative history of section 341 of the Act specifically notes that state law restrictions "prohibit[ing] the full exercise of due-on-sale clauses by limiting the fee lenders can charge for transfer of a loan." (S. Rep. at 23) are of the type that might create window-periods, the Board believes that Congress did not intend to create a window-period based on laws which did not substantially impair enforcement.

b. *Land Sale Contracts.* Several California commenters requested clarification of the commencement date established for determining window-period loans in that state because of the impact of the definition upon the status of installment land-sale contract transactions. Generally, the commenters agreed with the definition of the commencement date for determining window-period loans as the date when state law or judicial decision prohibited the exercise of due-on-sale clauses upon the *outright transfer of property.* However, they expressed concern over apparently conflicting commencement dates for window-period loans created by the California Supreme Court which, in 1974, limited the exercise of due-on-sale clauses in loans on property transferred by installment land-sales contracts and, in 1978, limited due-on-sale enforcement as to property transferred by outright sale. The commenters noted that, absent clarification regarding the window-period commencement date for installment land-sales transactions, lenders could retroactively enforce due-on-sale clauses based on transfers by installment land sales in California between 1974 and 1978. The commenters argued that such a result seemed inconsistent with Congress' intent, in creating window-periods under Act section 341(c), to protect homebuyers who "relied on state due-on-sale restrictions and reasonably believed they had assumable loans." S. Rep. at 22.

The Board is aware of the apparent inconsistencies created by the definition of window-period in the proposed regulation. However, the Board believes that the definition is clearly in accordance with the requirements of the Act. First, section 591.2(a) which defines "assumed" to include transfers of real property by installment land-sales contracts, is based on explicit guidance in the legislative history of the Act. S. Rep. at 22. Second, the legislative history explicitly defines and clarifies the language of section 341(c)(1) as follows: "The window-period begins on the date the state law prohibited 'the unrestricted exercise of due-on-sale clauses *upon outright transfers of the property*'." S. Rep. at 22 (emphasis added). Congress based its definition on the U.S. Supreme Court decision in *Fidelity Federal Savings and Loan Association* v. *De La Cuesta,* 102 S. Ct. 3014, 3031 n.24 (1982). Thus, in a footnote to this statement, Congress directly addressed the various California Supreme Court decisions, including both the 1974 and 1978 cases regarding due-on-sale limitations, and cited as "instructive" the ruling of the U.S. Supreme Court in *De La Cuesta* that it was not until 1978 that the lender's right to accelerate a loan in response to an "outright transfer" was limited to cases where the security was impaired. *Id.* at n.1. In view of this ligislative history, the Board believes that it was Congress' intent to extend window-period protection only to assumptions of land-sales contracts after 1978 in California, notwithstanding the anomalies which might result.

c. *State Law Prohibition or Restriction on Exercise.* Under section 591.2(p) of the proposed regulation, a window-period is created on the date a state law or judicial decision prohibits the "*unrestricted* exercise of due-on-sale clauses * * *." (emphasis added). A number of commenters requested that the Board delete the work "unrestricted" in the final definition to conform to the statutory language of section 341(c)(1) of the Act. Section 341(c)(1) of the Act defines a window-period loan as one subject to a state law or decision "*prohibiting* the exercise of due-on-sale clauses." In the commenters' view, the proposed definition was inappropriate because it broadened the criteria to be used in the determination of the window-period. Arguably, the proposed definition would either increase the number or expand the duration of window-periods because it would allow an interpretation of the window-period to include times when any partial restriction on enforcement of due-on-sale clauses existed under state law.

The Board does not agree, for several reasons, with the commenters' interpretation that Congress intended a window-period to exist only where exercise of a due-on-sale has been "prohibited" absolutely. First, the legislative history of section 341 refutes this reasoning. It clearly provides that:

> The window-period begins on the date the state law prohibited the *unrestricted exercise* of due-on-sale clauses upon outright transfers of the property. In states with judicial restrictions which purport to *retroactively restrict* due-on-sale enforcement, the window-period would not begin until the date of the judicial decision.

S. Rep. at 22. (emphasis added). Moreover, other references in the legislative history to the meaning of the word "prohibit" evince Congressional intent that it include prohibition of the "full exercise" of the clause or the limitation of the enforcement of the clause in various instances, such as impairment of the lender's security interest. Second, this conclusion is also supported by the Board's survey of those state laws tentatively identified as creating window-periods by the legislative history of Act section 341 and the comments received. None of these states, either by statute or judicial decision, absolutely prohibit the exercise of due-on-sale clauses. Instead, the statutes and judicial decisions are generally of the type which prohibit acceleration unless the lender can show that the transfer would impair its security interest or the likelihood of repayment. Were the Board to adopt an "absolute prohibition" approach in defining window-period loans, it would effectively eliminate all window-periods, in contravention of the legislative history. Therefore, the Board has retained the concept of a law prohibiting "unrestricted exercise" in defining "window-period loan" in the final rule.

d. *Types of Loans Covered by Window-Period Laws.* Section 341(a)(3) of the Act and proposed § 591.2(1) define a real property loan to include, among other types, a loan secured by a residential manufactured home, whether considered real or personal property. Several commenters noted that in many states, mobile home lending is a personal-property-secured transaction rather than a real property secured transaction. The commenters also noted that personal property transactions in most states are governed by the Uniform Commercial Code section 9-311, which specifically validates due-on-sale clauses in personal-property-secured transactions. The commenters observed that the result of the Act and the proposed rule would be to give mobile home borrowers an exemption from exercise of due-on-sale clauses which was never in effect under applicable state law. Other comments raised similar questions about state laws restricting due-on-sale clauses but expressly limited in application to narrow categories of loans on residential property used as the borrower's principal residence.

In the Board's view, a loan falls within the ambit of window-period protection only if it is the specific category of loan to which state legislative action or judicial decision applied in prohibiting the unrestricted exercise of due-on-sale clauses. Thus, while the legislative history clearly indicates that the due-on-sale *preemption* applies to mobile homes regardless of whether they are designated as real or personal property, S. Rep. at 57, Congress also indicated that the basic purpose of the window-period was to treat fairly home buyers who "relied on state law restrictions and reasonably believed they had assumable loans." S. Rep. at 22. Conversely, the legislators did not intend to create window-periods for loans never subject to state law restrictions. This "limited reliance" principle is reaffirmed in the legislative history of Act section 341(c), which declares that states are not authorized to expand the kinds of loans subject to the window-period. S. Rep. at 23.

Consistent with the reliance principle underlying Act 341(c), the Board has modified § 591.2(p) to apply only to those loans which are of the *type* the state law creating the window-period intended to protect. This interpretation is reflected in § 591.2(p)(1), referring to window-period loans as those "subject to" the state law creating the window-period.

Finally, the Board believes that this reliance principle, along with the principle that states may not retroactively expand the scope of the window-period, would require that a state judicial decision creating the window-period include language expressly holding a due-on-sale clause unenforceable, rather than merely commenting on unenforceability in *dicta.*

e. *Beginning/Ending Date of Window Period.* The definition of window-period in § 591.2(p) of the final rule has been modified from the proposal to clarify that the date upon which a window-period commences in a particular state is the *later* of the date upon which a state statute restricting the exercise of a due-on-sale clause becomes *effective* or is adopted, in the event that any of those states have delayed effective dates.

The Board is also revising the final definition to provide that a window-period ends on the *earlier* of October 15, 1982, or the date a state law rescinded a prior statutory or judicial restriction on the enforcement of due-on-sale clauses. The Board believes that this revision is consistent with Congressional intent to protect only a borrower's reasonable expectations and reliance on the contract terms as they existed at the time of origination or assumption of the loan, and not to extend or to create a window-period in a state where none existed under state law. S. Rep. at 22.

f. *Recording of Window-Period Loans.* The Board is incorporating in its final definition of window-period loans under § 591.2(p) a "sunset date" for transfers of loans qualifying for window-period treatment pursuant to section 341(c)(1) of the Act. In order to be afforded the protection of the window-period provision, a sale or transfer of real property made on or before October 15, 1982, must be recorded either prior to or not more than 60 days after October 15, 1982. The Board believes that this modification will prevent fraudulent backdating or nonrecordation of transfer documents.

Preemption—Loans Originated by Federal Associations

The proposed rule provided that a federal association, as to any real property loan orignated or to be originated by it, may include a due-on-sale clause in the contract between it and the borrower and may enforce the clause if title or any interest therein is transferred "by the borrower," without the prior written consent of the association. The Board recognizes that there may be instances in which a transferor who is a successor or assignee of the borrower may not be technically obligated under the loan instruments. Accordingly, the Board is striking the words "by the borrower" from final § 591.3(a), to ensure that the basic preemption will extend to any transfer by any party with an equitable or legal ownership interest in the property securing the loan. This change is consistent with the literal language of the Act's definition of due-on-sale clause and corresponding § 591.2(b).

The Board is also modifying proposed § 591.3(a) to affirm that a federal association *continues* to have the authority to include a due-on-sale clause in any real property loan originated by it. Under the proposal, the language could have been read to create only a prospective right. This clarification affirms the Board's longstanding preemption policy in this area, beginning with its interpretation of a 1948 regulation requiring federal associations to include in their loan contracts provisions for "full protection to" the

VOL 48 ISS 94 MY 13 1983 UMI

federal association. *See* 12 CFR 545.6–11 (1975); Advisory Opinion of Federal Home Loan Bank Board, Resolution No. 75-647, *In the Matter of Schott v. Mission Federal Savings and Loan Association;* 41 FR 6283, 6285 (1976); 48 FR 2373 (1983).

The Board has clarified proposed § 591.3(b) to indicate that the right to exercise a due-on-sale clause in any loan originated by a federal association shall be exclusively governed by the terms of the loan contract except as such right is *otherwise* modified by the exceptions set forth in § 591.5. The Board has also made a technical revision in § 591.3(b) by changing the word "association" to "lender" in the last clause of that paragraph for consistency of reference.

In response to requests by several commenters, the Board has clarified that loans originated by service corporations of federal associations are not necessarily exempted from the window-period provisions, as are federal associations by Act section 341(c)(2)(C). The language of the Act exempts only those loans originated by federal associations from the window-period provisions. Further, the legislative history does not appear to reflect Congressional intent to extend such treatment to federal associations' service corporations, which by their very definition are separate legal entities. Finally, previous Board regulations regarding federal preemption of state due-on-sale prohibitions conferred the right to include a due-on-sale clause only on federal associations and no mention was made of service corporations.

Preemption—Other Lenders

The title of final § 591.4 has been changed from "Other lenders" to "Loans originated by lenders other than federal associations" to clarify that the provisions apply with respect to all other lenders holding loans not originated by federal associations. The heading change also clarifies any regulatory ambiguity that may have arisen in the provisions of §§ 591.3 and 591.4.

Regarding preemption applicable to non-window-period loans under both §§ 591.3 and 591.4, several lenders requested clarification of a lender's right to impose non-contract conditions as a condition for waiving a due-on-sale clause. Both the Act and the relevant rule as proposed provided for preemption in non-window-period loans by stating that the lender's exercise of the due-on-sale clause "shall be *exclusively* governed by the loan contract." (emphasis added). In the Board's view, the preemptive mandate of section 341(b)(2) is not intended to supersede applicable state contract law concerning rights of a lender ancillary to waiver of a valid due-on-sale clause, and not substantially limiting the economic benefit of the option. Thus, section 341(b)(2) does not prohibit a lender from imposing any non-contractual term as a condition of waiving a due-on-sale clause, if state law governing enforcement of the contract would permit such a requirement.

Additionally, several commenters raised the issue of whether the Board should adopt language paralleling the statutory language of "encouragement" of allowing "blended rate" assumptions for federal associations or other lenders notwithstanding preemption of state law restricting due-on-sale enforcement. The Board believes that the statutory language of Act section 341(b)(3) is permissive; a lender, at its discretion, may offer blended rates to the borrower, upon the exercise of the lender's option under a due-on-sale clause, but the Act imposes no mandatory obligation upon lenders to offer such blended rates. Therefore, the final regulation imposes no such condition.

The Board has also made several changes in the language of proposed § 591.4(b)(1) to clarify ambiguities regarding the Act's treatment of window-period loans. In addition, the Board wishes to clarify the extent to which a state may "otherwise regulate such contracts". The legislative history of section 341(c)(1)(A) of the Act clearly indicates that a state having a window-period can shorten the three-year window-period or even repeal existing due-on-sale restrictions. However, states cannot *2retroactively* extend the window-period, nor can a state expand the type of loan to which the window-period applies. S. Rep. at 22.

A second change affecting window-period loans involves the Board's interpretation of Act 341(c)(2)(A), permitting lenders subject to window-period laws to invoke a due-on-sale clause if a transferee fails to meet "customary credit standards." The Board has added new paragraph (d) to § 591.4 in response to several commenters' requests for clarification regarding: (1) What constitutes "customary standards" that an institutional or private lender may apply with respect to window-period loans; and (2) whether a lender may apply the "customary standards" in effect as of the time of transfer of the property subject to the loan, or whether the lender is limited to the creditworthiness standards that it applied at the time of loan origination.

The legislative history of the Act states that lenders have the right to require transferees of window-period loans to meet to customary credit standards which are applicable to loans secured by similar property. In addition, the legislative history provides that a lender may require a transferee to provide customary information and "completion of its customary credit application" upon transfer of a window-period loan. S. Rep. at 24, 57. Consistent with this statement of intent, the Board has modified § 591.4 by adding a new paragraph (d)(1)(i) to identify customary credit standards for lenders who make real property loans in the ordinary course of business (e.g., banks, savings and loans and other institutional lenders).

The Board has also modified § 591.4 by adding new paragraph (d)(1)(ii) to identify customary credit standards for noninstitutional lenders and other real property sellers. Literally, the broad definition of "lender" in the Act contemplates imposition of customary credit standards by private persons who, as creditors, are subject to the terms of the Act but who are not in the business of making real estate loans. Such individuals will not have credit-worthiness standards which they usually apply to loans secured by similar property (the standard provided for an institutional lender) because they will not deal in a volume of transactions sufficient to establish any "customary" standards. In order to create uniform standards imposed by private lenders, to the extent practicable, final § 591.4(d)(1)(ii) permits a private seller or lender to impose the credit standards customarily applied by other similarly situated lenders or sellers in the geographic market within which the transaction occurs.

New § 591.4(d)(1)(i) and (ii) require that the application of customary credit standards by both institutional and non-institutional lenders shall be those in effect as of the time of *transfer* of the loan securing the real property.

Another issue arising under the "customary credit standard" exception to use of due-on-sale clauses in window-period loans involves the respective duties of borrower and lender when a transfer is contemplated. A number of comments raised the point that a lender's right to accelerate under section 341(c)(2)(A) would be meaningless if a transferee or prospective transferee refuses to cooperate. Because credit reporting agencies generally require a written release from a borrower before

providing a credit report, a noncooperative transferee could prevent a lender from making the determination that the transferee has failed to meet its customary credit standards. Such a result would clearly contravene Congressional intent in creating the customary credit standard provision for window-period loans. Accordingly, the Board has provided in the final language (§ 591.4(d)(2)) that a lender may exercise its due-on-sale clause *either* if: (1) The transferee fails to meet the lender's customary credit standards; or (2) upon a transfer, the transferee fails to provide information necessary for the lender to approve or disapprove the loan, within 15 days or the lender's written request.

New § 591.4(d)(3) also ensures that a lender must respond in good faith to a credit application of a transferee by acting to approve or disapprove the transfer within 30 days of receiving the credit application and any related credit information it may have requested.

Finally, new § 591.4(d)(4) clarifies that the right to invoke a due-on-sale clause when a transferee fails to meet customary credit standards is not intended to be exclusive of any other exceptions or qualifications currrently available in states which have window-periods. That is, the customary credit standards qualification is available to lenders holding window-period loans in addition to any other rights accorded the lender regarding assumptions in states restricting due-on-sale exercise (such as the right to impose a limited transfer fee or limited increase in interest rate upon assumption).

Limitation on Exercise of Due-on-Sale Clauses

Borrower-Occupied Homes. Consistent with Act section 341(d)(1), proposed § 591.5(b) set forth a list of statutory restrictions on the exercise of due-on-sale clauses for real property loans originated by all lenders, including window-period loans. The Board further noted in the preamble that it proposed to modify the statutory scheme by providing that the restrictions listed in the statute would apply only to loans made on homes occupied or to be occupied by the borrower. While the Board has carefully evaluated comments objecting to this limitation, it has determined to retain this principle in accordance with its belief that this approach is most consistent with the Congressional purpose of restricting due-on-sale exercise to protect consumers. S. Rep. at 24–25. A structural and historical analysis of the exemptions also supports the Board's interpretation that they apply only to borrower-occupants. To a large extent, the exemptions in the Act are extracted directly from the Board's existing due-on-sale regulations and statements of policy in which the exemptions were intended only to apply to borrower-occupants. In light of the Board's pre-existing interpretation and expressed intent regarding these exemptions and the subsequent restatement of those exemptions in the Act, the Board believes that applying the restrictions only to borrower-occupied home loans is most consistent with the intent of Congress. Accordingly, loans on all property other than borrower-occupied homes are not subject to the restrictions set out in final § 591.5(b).

Secondary Liens. Final § 591.5(b)(1)(i) clarifies that the limitation on the exercise of a due-on-sale clause in the event of the creation of a secondary lien or encumbrance does not include a transfer of the property pursuant to a contract for deed.

The Board believes that if a contract-for-deed transfer were considered to be a subordinate lien or encumbrance within the meaning of section 341(d)(1) of the Act, it would effectively create a loophole which would render the Act meaningless. Moreover, such a clarification is consistent with prior opinions of the Board and case law. Therefore, the final regulation indicates that the creation of a vendor's or vendee's interest in a contract for deed does not fall within the limitations of section 341(d)(1) of the Act.

In addition, as a technical matter, the Board has modified the language of the proposal to cover liens not relating to "a transfer of *rights* of occupancy in the property" to conform to the literal language of Act section 341(d)(1).

Leasehold Interest. Final § 591.5(b)(1)(iv), regarding the limitation on enforcement of a due-on-sale clause with respect to the granting of a leasehold interest, has been adopted as proposed. One commenter queried when an owner must occupy the property to avoid acceleration under this provision. In the Board's view, the requirement of owner-occupancy applies only at the time the loan securing the property was initially made, not at the time the owner enters into a lease with a tenant.

Inter Vivos Trusts. The Board has modified proposed § 591.5(b)(1)(vi), pertaining to limitation of due-on-sale enforcement upon transfer of the property to an *inter vivos* trust. As proposed, the lender could not enforce its due-on-sale clause upon a transfer to an *inter vivos* trust where the borrower is and remains the beneficiary and occupant of the security property. Several commenters noted that some states, such as Illinois, authorize transfers of property into so-called land trusts, where a trustee holds only legal title to the property. They expressed concern that transfers of property into a land trust could result in permanent incapacity of leaders' due-on-sale enforcement rights because the beneficiary of the trust is free to direct the sale of the beneficial interest without any public record (legal title remains with the trustee) or notice to the lender (trustee cannot reveal transfer absent consent of beneficiary). The commenters argued that, unless the Board modified the proposed rule to provide specific protection for lenders, the rule provided a means by which borrowers could circumvent a due-on-sale clause.

The Board agrees that lenders should be allowed to protect their legitimate right to exercise a due-on-sale clause against such transfers. The legislative history of Act § 341(d) indicates that the exceptions against exercise of due-on-sale clauses are not intended to allow borrowers to circumvent the right of the lender to exercise its option under a valid due-on-sale clause. S. Rep. at 24–25. Consistent with this clear Congressional directive and the Board's broad authority to issue regulations implementing the Act, the Board has modified the final rule to provide that the *inter vivos* trust exemption will not apply if a borrower refuses to provide reasonable means acceptable to the lender by which the lender will be assured of timely notice of any subsequent transfer of the beneficial interest or change in occupancy.

Technical Changes. The Board has modified proposed § 591.5(b)(1)(iii) to correct a typographical error. The final subdivision reads "* * * or operation of law *on* the death * * *," rather than "* * * or operation of law *or* the death * * *."

Prepayment Penalties. The Board has determined to eliminate a proposed limitation in § 591.5(b)(2), which would have precluded a lender from imposing prepayment penalties in the event of exercise of a due-on-sale clause. However, the final regulation retains the ban on the imposition of prepayment penalties on loans originated by federal associations after July 31, 1976, and prior to the effective date of the final rule. This approach is consistent with prior Board policy and ensures that holders of loans originated during that period will not be prejudiced by retroactive application of the new policy eliminating the proscription, as implemented in the final regulation.

Notwithstanding the elimination of the proscription on assessments of

VOL 48 ISS 94 MAY 13 1983 UMI

prepayment charges, however, all lenders must comply with the pre-disclosure requirements regarding such charges imposed on federal associations by § 545.33(f)(1)(ii). The Board believes that this revision is within the scope of its authority and discretion, and is consistent with its decision to permit federal associations to determine their own prepayment policies in its final regulations implementing the new thrift lending authority under Act sections 321–330 (Resolution No. 83–241, April 26, 1983).

While the Board has determined not to impose federal restrictions on the imposition of prepayment (or equivalent) fees in conjunction with the exercise of due-on-sale clauses, lenders must consult state law to determine the validity of such practices. The legislative history of the preemptive language in Act section 341(b) indicates that Congress intended to preempt only those state laws interfering with a lender's effective enforcement of a due-on-sale clause as a means of increasing the yield on older low-interest mortgages in portfolio, at the time the loans are transferred. S. Rep. at 21, 22, 23, 57. While the ability to impose a prepayment or equivalent fee upon due-on-sale acceleration may be of some economic benefit to the lender, it is in no sense essential to effective use of the due-on-sale clause for the purpose of raising portfolios yields to current market rates.

Consequently, lenders should carefully review applicable state statutes and judicial decisions in this area. The Board notes that, to date, when mortgage instruments contain both a prepayment penalty and a valid due-on-sale clause, the courts have denied enforcement of the prepayment penalty upon a sale by a mortgagor leading the lender to accelerate the debt. The rationale in these cases is that the lender's election to accelerate renders the payment a "postpayment"—one made after maturity of the loan—that by definition is not a "prepayment" of the mortgage debt. *See, e.g., Slevin Container Corp. v. Provident Fed. Sav.*, 98 Ill. App. 646, 424 N.E.2d 939 (1981).

The Board has modified § 591.5(b)(3) of the proposed rule to clarify that the term "assumption" describes a written agreement between the lender and the borrower's successor in interest in which the latter agrees to be obligated under the terms of the loan. Such a change in language was made to avoid the possible interpretation of the term "assumption" as including transfers of real property "subject to" a mortgage or similar lien pursuant to the definition of "assumed" in § 591.2(a) of the final rule.

The Board has also modified proposed § 591.5(b)(3) by incorporating an additional sentence regarding the legal effect of waiver of a lender's due-on-sale option pursuant to the prospective transferee's agreement to assume the loan at a higher interest rate. This sentence is simply a recodification of the last sentence of prior Board regulation 12 CFR 545.8–3(g). Thus, a lender which waives exercise of the due-on-sale clause pursuant to paragraph (b)(3) will be required to release the original borrower from all contractual obligations under the mortgage, and will be deemed to have made a new loan to the existing borrower's successor in interest. The Board believes this reaffirmation of prior Board policy is an appropriate means of preventing any uncertainty or confusion regarding the legal status of the parties upon such a transfer.

Effective Date

The Board has determined that the full 30-day delay of effective date following publication of the regulations pursuant to 5 U.S.C. 553(d) and 12 CFR 508.14 is unnecessary because: (1) They relieve restrictions imposed on lenders by state laws restricting due-on-sale clause exercise, and (2) it is in the public interest to provide as expeditiously as possible uniform guidelines pertaining to preemption of state due-on-sale clause restrictions. The rules will therefore take effect on May 10, 1983.

Final Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, Pub. L. 96–354, 94 Stat. 1164 (September 19, 1980), the Board is providing the following regulatory flexibility analysis:

1. *Reasons, objective, and legal basis underlying the rule.* These elements have been incorporated elsewhere into the supplementary information regarding the rule.

2. *Small entities to which the rule will apply.* The final rule will apply to all federally-chartered and insured depository institutions, all state-chartered and state-insured depository institutions, and all other government or corporate entities who fall within the definition of "lender" in Pub. L. 97–320 section 341(a)(2).

3. *Impact of the rule on small businesses.* The rule will not have a disproportionate effect on small businesses. By creating competitive parity between all lenders as to the use of due-on-sale clauses, the rule will benefit small lenders. The rule would have no significant economic impact on a substantial number of small entities.

4. *Overlapping or conflicting federal rules.* Any inconsistent state or federal law or regulation is superseded by the Board's rule, and in particular by the regulatory authority granted exclusively to the Board under subsection (e)(1) of section 341 Pub. L. 97–320. That subsection grants the Board broad authority to promulgate regulations governing preemption of due-on-sale clauses by all lenders making real property loans. Any overlapping or inconsistency will be eliminated through revisions of other law after implementation of this rule.

5. *Alternatives to the rules.* Most of the provisions are mandated by statute; moreover, to the extent that alternatives to the rules were considered, they are discussed elsewhere in the supplementary information.

Regulatory Analysis

The elements of regulatory analysis for major regulations required by Board Resolution No. 80–584 (September 11, 1980) have been incorporated in the supplementary information regarding the rule.

List of Subjects in 12 CFR Part 591

Savings and loan associations, Banks, banking, Mortgages.

Accordingly, the Board hereby amends Part 556, Subchapter C, and Part 590, Subchapter G, and adds new Part 591 to Subchapter G, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

Subchapter C—Federal Savings and Loan System

PART 556—STATEMENTS OF POLICY

§ 556.9 [Amended]

1. Amend § 556.9 by removing paragraph (b)(1) and redesignating the text of paragraph (b)(2) thereof as paragraph (b), and removing paragraphs (c), (d), (e) and (f) thereof.

2. Revise the title of Subchapter G as follows:

Subchapter G—Preemption of State Lending Restrictions

PART 590—PREEMPTION OF STATE USURY LAWS

3. Amend § 590.2 by revising paragraph (g), as follows:

§ 590.2 Definitions.

* * * * *

(g) "Residential manufactured home" shall mean a manufactured home as defined in the National Manufactured Home Construction and Safety Standards Act, 42 U.S.C. 5402(6), which is or will be used as a residence.

* * * * *

4. Revise paragraph (e) of § 590.4 as follows:

§ 590.4 Consumer protection rules for federally-related loans, mortgages, credit sales and advances secured by first liens on residential mobile homes.

* * * * *

(e) *Balloon payments.*—(1) *Federal associations.* Federal association creditors may enter into agreements with debtors which provide for non-amortized and partially-amortized loans on residential manufactured homes, and such loans shall be governed by the provisions of this section and § 545.33(f) of this Chapter.

(2) *Other creditors.* All other creditors may enter into agreements with debtors which provide for non-amortized and partially-amortized loans on residential manufactured homes to the extent authorized by applicable Federal or state law or regulation.

* * * * *

5. Add a new Part 591, as follows:

PART 591—PREEMPTION OF STATE DUE-ON-SALE LAWS

Sec.

591.1 Authority, purpose, and scope.
591.2 Definitions.
591.3 Loans originated by Federal associations.
591.4 Loans originated by lenders other than Federal associations.
591.5 Limitation on exercise of due-on-sale clauses.
591.6 Interpretations.

Authority: Sec. 5, 48 Stat. 132 (12 U.S.C. 1464), as amended by Sec. 401, 94 Stat. 160; Sec. 311, 97 Stat. 1496; Sec. 341, Pub. L. 97–320, 96 Stat. 1469, 1505–1507.

§ 591.1 Authority, purpose, and scope.

(a) *Authority.* This part contains regulations issued under section 5 of the Home Owners' Loan Act of 1933, as amended, and under section 341 of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97–320, 96 Stat. 1469, 1505–1507.

(b) *Purpose and scope.* The purpose of this permanent preemption of state prohibitions on the exercise of due-on-sale clauses by all lenders, whether Federally- or state-chartered, is to reaffirm the authority of Federal savings and loan associations to enforce due-on-sale clauses, and to confer on other lenders generally comparable authority with respect to the exercise of such clauses. This Part applies to all real property loans, and all lenders making such loans, as those terms are defined in § 591.2 of this Part.

§ 591.2 Definitions.

For the purposes of this Part, the following definitions apply:

(a) "Assumed" includes transfers of real property subject to a real property loan by assumptions, installment land sales contracts, wraparound loans, contracts for deed, transfers subject to the mortgage or similar lien, and other like transfers.

(b) "Due-on-sale clause" is a contract provision which authorizes the lender, at its option, to declare immediately due and payable sums secured by the lender's security instrument upon a sale of transfer of all or any part of the real property securing the loan without the lender's prior written consent. For purposes of this definition, a "sale or transfer" means the conveyance of real property of any right, title or interest therein, whether legal or equitable, whether voluntary or involuntary, by outright sale, deed, installment sale contract, land contract, contract for deed, leasehold interest with a term greater than three years, lease-option contract or any other method of conveyance of real property interests.

(c) "Federal association" has the same meaning as provided in § 541.8 of this Chapter.

(d) "Federal credit union" means a credit union chartered under the Federal Credit Union Act.

(e) "Home" has the same meaning as provided in § 541.14 of this Chapter.

(f) "Insured institution" has the same meaning as provided in § 561.1 of this Chapter.

(g) "Lender" means a person or government agency making a real property loan, including without limitation, individuals, Federal associations, state-chartered savings and loan associations, national banks, state-chartered banks and state-chartered mutual savings banks, Federal credit unions, state-chartered credit unions, mortgage banks, insurance companies and finance companies which make real property loans, manufactured-home retailers who extend credit, agencies of the Federal government, any lender approved by the Secretary of Housing and Urban Development for participation in any mortgage insurance program under the National Housing Act, and any assignee or transferee, in whole or part, of any such persons or agencies.

(h) "Loan secured by a lien on real property" means a loan on the security of any instrument (whether a mortgage, deed of trust, or land contract) which makes the interest in real property (whether in fee, or in a leasehold or subleasehold) specific security for the payment of the obligation secured by the instrument.

(i) "Loan secured by a lien on stock in a residential cooperative housing corporation" means a loan on the security of: (1) A security interest in stock or a membership certificate issued to a tenant stockholder or resident member by a cooperative housing organization; and (2) an assignment of the borrower's interest in the proprietary lease of occupancy agreement issued by such organization.

(j) "Loan secured by a lien on a residential manufactured home, whether real or personal property," means a loan made pursuant to an agreement by which the party extending the credit acquires a security interest in the residential manufactured home.

(k) "Loan originated by" a Federal association or other lender means any loan for which the lender makes the first advance of credit thereunder, provided that such lender then held a beneficial interest in the loan, whether as to the whole loan or a portion thereof, and whether or not the loan is later held by or transferred to another lender.

(l) "Real property loan" means any loan, mortgage, advance or credit sale secured by a lien on real property, the stock or membership certificate allocated to a dwelling unit in a cooperative housing corporation, or a residential manufactured home, whether real or personal property.

(m) "Residential manufactured home" has the same meaning as provided in § 590.2(g) of this Subchapter.

(n) "Reverse mortgage" is any instrument providing periodic payments to homeowners based on accumulated equity, whether the payments are made directly by the lender, through purchase of an annuity through an insurance company or in any other manner. The loan may be due either upon a specific date or when a specified event occurs, such as the sale of the property or death of the borrower.

(o) "State" means the several states, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, the Northern Mariana Islands, the Virgin Islands, and American Samoa.

(p)(1) A "window-period loan" is a real property loan, not originated by a Federal association, which was made or assumed during a window-period created by state law and subject to that law, which loan was recorded, at the time of origination or assumption, before October 15, 1982, or within 60 days thereafter (December 14, 1982).

VOL
48
ISS
94
MY
13
1983
UMI

(2) The window-period begins on:

(i) The date a state adopted a law (by means of a constitutional provision or statute) prohibiting the unrestricted exercise of due-on-sale clauses upon outright transfers of property securing loans subject to the state law creating the window-period, or the effective date of a constitutional or statutory provision so adopted, whichever is later; or

(ii) The date on which the highest court of the state rendered a decision prohibiting such unrestricted exercise (or if the highest court has not so decided, the date on which the next highest appellate court rendered a decision resulting in a final judgment which applies statewide), and ends on the earlier of the date such state law prohibition terminated under state law or October 15, 1982.

(3) Categories of state law which create window-periods by prohibiting the unrestricted exercise of due-on-sale clauses upon outright transfers of property securing loans subject to such state law restrictions include laws or judicial decisions which permit the lender to exercise its option under a due-on-sale clause only where:

(i) The lender's security interest or the likelihood of repayment is impaired; or

(ii) The lender is required to accept an assumption of the existing loan without an interest-rate change or with an interest-rate change below the market interest rate currently being offered by the lender on similar loans secured by similar property at the time of the transfer.

§ 591.3 Loans originated by Federal associations.

(a) With regard to any real property loan originated or to be originated by a Federal association, as a matter of contract between it and the borrower, an association continues to have the power to include a due-on-sale clause in its loan instrument.

(b) Except as otherwise provided in § 591.5 of this Part with respect to any such loan made on the security of a home occupied or to be occupied by the borrower, exercise by any lender of a due-on-sale clause in a loan originated by a Federal association shall be exclusively governed by the terms of the loan contract, and all rights and remedies of the lender and borrower shall at all times be fixed and governed by that contract.

§ 591.4 Loans originated by lenders other than Federal associations.

(a) With regard to any real property loan originated by a lender other than a Federal association, as a matter of contract between it and the borrower, the lender has the power to include a due-on-sale clause in its loan instrument.

(b) Except as otherwise provided in paragraph (c) of this section and § 591.5 of this Part, the exercise of due-on-sale clauses in loans originated by lenders other than Federal associations shall be governed exclusively by the terms of the loan contract, and all rights and remedies of the lender and the borrower shall be fixed and governed by that contract.

(c)(1) In the case of a window-period loan, the provisions of paragraph (b) of this section shall apply only in the case of a sale or transfer of the property subject to the real property loan and only if such sale or transfer occurs on or after October 15, 1985: *Provided*, that: (i) With respect to real property loans originated in a state by lenders other than national banks, Federal associations, and Federal credit unions, a state may otherwise regulate such contracts by state law enacted prior to October 16, 1985, in which case paragraph (b) of this section shall apply only if such state law so provides; and (ii) with respect to real property loans originated by national banks and Federal credit unions, the Comptroller of the Currency or the National Credit Union Administration Board, respectively, may otherwise regulate such contracts by regulations promulgated prior to October 16, 1985, in which case paragraph (b) shall apply only if such regulation so provides.

(2) A lender may not exercise its options pursuant to a due-on-sale clause contained in a window-period loan in the case of a sale or transfer of property securing such loan where the sale or transfer occurred prior to October 15, 1982.

(d)(1) Prior to the sale or transfer of property securing a window-period loan subject to the provisions of paragraph (c) of this paragraph,

(i) Any lender in the business of making real property loans may require any successor or transferee of the borrower to supply credit information customarily required by the lender in connection with credit applications, to complete its customary credit application, and to meet customary credit standards applied by such lender, at the date of sale or transfer, to the lender's similar loans secured by similar property.

(ii) Any lender not in the business of making loans may require any successor or transferee of the borrower to meet credit standards customarily applied by other similarly situated lenders or sellers in the geographic market within which the transaction occurs, for similar loans secured by similar property, prior to the lender's consent to the transfer.

(2) The lender may exercise a due-on-sale clause in a window-period loan if:

(i) The successor or transferee of the borrower fails to meet the lender's credit standards as set forth in paragraphs (b)(1) (i) and (ii) of this section; or

(ii) Upon transfer of the security property and not later than fifteen days after written request by the lender, the successor or transferee of the borrower fails to provide information requested by the lender pursuant to paragraph (d)(1) (i) or (ii) of this section, to determine whether such successor or transferee of the borrower meets the lender's customary credit standards.

(3) The lender shall, within thirty days of receipt of a completed credit application and any other related information provided by the successor or transferee of the borrower, determine whether such successor or transferee meets the customary credit standards of the lender and provide written notice to the successor or transferee of its decision, and the reasons in the event of a disapproval. Failure of the lender to provide such notice shall preclude the lender from exercise of its due-on-sale clause upon the sale or transfer of the property securing the loan.

(4) The lender's right to exercise a due-on-sale clause pursuant to this paragraph is in addition to any other rights afforded the lender by state law regulating window-period loans with regard to the exercise of due-on-sale clauses and loan assumptions.

§ 591.5 Limitation on exercise of due-on-sale clauses.

(a) *General.* Except as provided in §§ 591.4 (c) and (d)(4) of this Part, due-on-sale practices of Federal associations and other lenders shall be governed exclusively by the Board's regulations, in preemption of and without regard to any limitations imposed by state law on either their inclusion or exercise including, without limitation, state law prohibitions against restraints on alienation, prohibitions against penalties and forfeitures, equitable restrictions and state law dealing with equitable transfers.

(b) *Specific limitations.* With respect to any loan on the security of a home occupied or to be occupied by the borrower,

(1) A lender shall not (except with regard to a reverse mortgage) exercise its option pursuant to a due-on-sale clause upon:

(i) The creation of a lien or other encumbrance sub-ordinate to the lender's security instrument which does not relate to a transfer of rights of occupancy in the property: *Provided*, that such lien or encumbrance is not created pursuant to a contract for deed;

(ii) The creation of a purchase-money security interest for household appliances;

(iii) A transfer by devise, deacent, or operation of law on the death of a joint tenant or tenant by the entirety;

(iv) The granting of a leasehold interest which has a term of three years or less and which does not contain an option to purchase (that is, either a lease of more than three years or a lease with an option to purchase will allow the exercise of a due-on-sale clause);

(v) A transfer, in which the transferee is a person who occupies or will occupy the property, which is: (A) A transfer to a relative resulting from the death of the borrower; (B) a transfer where the spouse or child(ren) becomes an owner of the property; or (C) a transfer resulting from a decree of dissolution of marriage, legal separation agreement, or from an incidental property settlement agreement by which the spouse becomes an owner of the property; or

(vi) A transfer into an *inter vivos* trust in which the borrower is a and remains the beneficiary and occupant of the property, unless, as a condition precedent to such transfer, the borrower refuses to provide the lender with reasonable means acceptable to the lender by which the lender will be assured of timely notice of any subsequent transfer of the beneficial interest or change in occupancy.

(2) A lender:

(i) Which is a Federal association and which originates a loan after July 31, 1976, and before [May 10, 1983], shall not impose a prepayment charge or equivalent fee in connection with acceleration of the loan by exercise of a due-on-sale clause;

(ii) Which originates a loan on or after [May 10, 1983] may impose a prepayment charge or equivalent fee in connection with acceleration of the loan by exercise of a due-on-sale clause, provided that, at the time of origination of the loan, the lender complies fully with the disclosure requirements for Federal associations set forth in § 545.33(f)(1)(ii) of this Chapter.

(3) A lender waives its option to exercise a due-on-sale clause as to a specific transfer if, before the transfer, the lender and the existing borrower's prospective successor in interest agree in writing that the successor in interest will be obligated under the terms of the loan and that interest on sums secured by the lender's security interest will be payable at a rate the lender shall request. Upon such agreement and resultant waiver, a lender shall release the existing borrower from all obligations under the loan instruments, and the lender is deemed to have made a new loan to the existing borrower's successor in interest.

(i) The waiver and release apply to all loans secured by homes occupied by borrowers made by a Federal association after July 31, 1976, and to all loans secured by homes occupied by borrowers made by other lenders after the effective date of this regulation.

(4) Nothing in paragraph (b)(1) of this section shall be construed to restrict a lender's right to enforce a due-on-sale clause upon the subsequent occurrence of any event which disqualifies a transfer for a previously-applicable exception under that subparagraph.

(c) *Policy considerations.* Paragraph (b) of this section does not prohibit a lender from requiring, as a condition to an assumption, continued maintenance of mortgage insurance by the existing borrower's successor in interest, whether by endorsement of the existing policy or by entrance into a new contract of insurance.

§ 591.6 Interpretations.

The Board periodically will publish Interpretations under Section 341 of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97–320, 96 Stat. 1469, 1505–1507, in the **Federal Register** in response to written requests sent to the Secretary to the Board, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552.

(Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 341, 96 Stat. 1469, 1505–1507; Reorg. Plan No. 3 of 1947; 3 CFR 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

John M. Buckley, Jr.,

Acting Secretary.

[FR Doc. 83–12669 Filed 5–12–83; 8:45 am]

BILLING CODE 6720–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 444, 448, and 455

[Docket No. 79N–0341; DESI Nos. 8615, 9152, 9188, and 50168]

Oligosaccharide, Peptide, and Certain Other Antibiotic Drugs; Confirmation of Effective Dates and Further Amendment

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective dates and further amendment.

SUMMARY: The Food and Drug Administration is confirming the effective dates of amendments to the antibiotic drug regulations announced in the **Federal Register** of May 28, 1982, and is further amending the regulations to provide accepted standards for a particular formulation that was inadvertently omitted from the May 28, 1982 final rule.

DATES:

The amendment announced in this final rule is effective May 13, 1983.

Comments, objections, and requests for hearing by June 13, 1983.

Data, information, and analyses to justify a hearing by July 12, 1983.

ADDRESS: Objections and requests for hearing, supporting data and information, and other comments should be identified with the docket number appearing in the heading of this document and sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Douglas I. Ellsworth, National Center for Drugs and Biologics (HFN–8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3650.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of May 28, 1982 (47 FR 23440), as part of actions classifying various ophthalmic steroid/anti-infective combination drug products as effective and announcing conditions for their further marketing, the Director of the Bureau of Drugs and Biologics amended the antibiotic drug regulations to require a minimum of 10,000 units per milliliter or units per gram (units/mL or g) of polymyxin B in all ophthalmic combinations that contain this component. The Director also amended the antibiotic regulations to provide for the certification (now accepted public standards, see 47 FR 39155) of ophthalmic combination products that has been released pending a final determination of their effectiveness. In response to the amendments, one objection was filed but was later withdrawn. Therefore, the effective dates of the May 28, 1982 final rule are hereby confirmed.

In reviewing the products affected by the conclusions regarding steroid/anti-infective combination drug products, the Director noted that no standards had been announced for Burroughs Wellcome's Cortisporin Ophthalmic Ointment (NDA 50–416) or Kasco-Efco's Bacitracin-Polymyxin-Neomycin with Hydrocortisone Ophthalmic Ointment (NDA 60–731) each containing bacitracin zinc, neomycin sulfate, polymyxin B

VOL 48 ISS 94 MAY 13 1983 UMI

sulfate (10,000 units/g), and hydrocortisone. At one time, these products contained 5,000 units/g of polymyxin B and were classified in the **Federal Register** of August 29, 1980 (45 FR 57776), as lacking substantial evidence of effectiveness because of their polymyxin B level. The August 29, 1980 notice also stated that these products would be regarded as effective if reformulation to contain 10,000 units/g. Although these products were reformulated to contain 10,000 units/g of polymyxin B, the May 28, 1982 final rule inadvertently omitted standards for these drugs. Therefore, § 448.313b of the antibiotic regulations (21 CFR 448.313b) is hereby further amended to provide standards for these drugs. Because this additional amendment is not controversial and provides notice of accepted standards for marketed products already in compliance with the standards, notice and comment procedure for the action and a delayed effective date are found unnecessary and not in the public interest.

List of Subjects

21 CFR Part 444

Antibiotics, Oligosaccharide.

21 CFR Part 448

Antibiotics, Peptide.

21 CFR Part 455

Antibiotics.

PART 448—PEPTIDE ANTIBIOTIC DRUGS

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463 as amended (21 U.S.C. 357)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5110) and redelegated to the Director of the National Center for Drugs and Biologics (see 21 CFR 5.78 and 47 FR 26913 published in the **Federal Register** of June 22, 1982), the July 7, 1982 effective date for the amendments to §§ 444.342a, 444.342d, and 444.542a, and the amendment to § 448.313b to the extent it affects bacitracin zinc-neomycin sulfate-polymyxin B sulfate-hydrocortisone ophthalmic ointment, and new §§ 444.342j and 444.342k, as announced in the May 28, 1982 final rule, is confirmed; the February 22, 1983 effective date for the amendments to §§ 444.342b, 444.342h, 444.342i, and 448.310b, and the amendment to § 448.313b to the extent it affects bacitracin zinc-neomycin sulfate-polymyxin B sulfate ophthalmic ointment, and the amendment to § 455.310d, as announced in the May 28, 1982 final rule, is confirmed; and Part 448 is amended in § 448.313b by revising the section heading and paragraph (a)(1)(i) and (ii) and by adding new paragraph (a)(1)(iii), to read as follows:

§ 448.313b Bacitracin zinc-neomycin sulfate-polymyxin B sulfate ophthalmic ointment; bacitracin zinc-neomycin sulfate-polymyxin B sulfate-hydrocortisone ophthalmic ointment; bacitracin zinc-neomycin sulfate-polymyxin B sulfate-hydrocortisone acetate ophthalmic ointment.

(a) * * *

(1) * * *

(i) 400 units of bacitracin, 3.5 milligrams of neomycin, 10,000 units of polymyxin B with or without 10 milligrams of hydrocortisone acetate;

(ii) 500 units of bacitracin, 3.5 milligrams of neomycin, 10,000 units of polymyxin B; or

(iii) 400 units of bacitracin, 3.5 milligrams of neomycin, 10,000 units of polymyxin B, and 10 milligrams of hydrocortisone.

* * * * *

Any person who will be adversely affected by the amendments to § 448.313b announced in this final rule may file objections to it, request a hearing, and show reasonable grounds for the hearing. Any person who decides to seek a hearing must file (1) on or before June 13, 1983; a written notice of participation and request for hearing and (2) on or before July 12, 1983 the data, information, and analyses on which the person relies to justify a hearing, as specified in 21 CFR 430.20. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who request(s) the hearing, making findings and conclusions and denying a hearing.

The procedures and requirements governing this order, a notice of participation and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and granting or denying of a hearing are contained in 21 CFR 430.20.

All submissions under this order, except comments from an individual, must be filed in four copies. An individual submitting only comments may submit one copy. All submissions must be identified with the docket number appearing in the heading of this order and filed with the Dockets Management Branch (address given above).

All submissions under this order, except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Effective Date. This amendment is effective May 13, 1983.

(Sec. 507, 59 Stat. 463 as amended (21 U.S.C. 357))

Dated: May 6, 1983.

21 CFR Parts 510 and 558

New Animal Drugs for Use in Animal Feeds; Tylosin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed for Southern Micro-Blenders, Inc., providing for manufacturing a 10-gram-per-pound tylosin premix. The 10-gram-per-pound premix is used to make complete feeds for swine, cattle, and chickens. In addition, the firm is added to the list of sponsors of approved NADA's.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Bureau of Veterinary Medicine (HFV–130), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301–443–4913.

SUPPLEMENTARY INFORMATION: Southern Micro-Blenders, Inc., 3801 North Hawthorne St., Chattanooga, TN 37406, is the sponsor of NADA 133–833 submitted on its behalf by Elanco Products Co. This NADA provides for use of premixes containing 40 or 100 grams per pound of tylosin (as tylosin phosphate) or granulated tylosin concentrate to make a 10-gram-per-pound premix which is used to make complete feeds for swine, beef cattle, and broiler, replacement, and layer chickens. The feed is used as in 21 CFR 558.625(f)(1) (i) through (vi). The basis of approval is discussed in the freedom of information (FOI) summary. The NADA is approved and the regulations are amended to reflect the approval.

In addition, the sponsor has not been previously added to the list of sponsors of approved NADA's in 21 CFR 510.600(c). The list is amended to add this sponsor.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

BILLING CODE 4160-01-M

---

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject To Certification; Methylprednisolone and Aspirin Tablets

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to codify a previously approved new animal drug application (NADA) sponsored by The Upjohn Co. providing for safe and effective use of methylprednisolone and aspirin tablets as an anti-inflammatory and analgesic agent in dogs. FDA is further amending the regulations to specify those conditions of use for which approval of applications for identical or similar products need not include certain effectiveness data. A previously approved supplemental NADA reflects compliance with the conclusions of National Academy of Sciences/National Research Council Drug Efficacy Study Implementation (NAS/NRC–DESI) evaluation of the product.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Terence Harvey, Bureau of Veterinary Medicine (HFV–110), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301–443–3420.

SUPPLEMENTARY INFORMATION: The Upjohn Co., Kalamazoo, MI 49001, is sponsor of NADA 11–700 providing for oral use of a tablet containing methylprednisolone and aspirin as an anti-inflammatory and analgesic agent in dogs. The NADA was originally approved on May 21, 1959. The product was the subject of a NAS/NRC–DESI notice in the **Federal Register** of March 20, 1969 (34 FR 5448). The notice stated that NAS/NRC had concluded, and FDA had concurred, that the product was probably effective as an anti-inflammatory and analgesic in treating dogs for myositis, arthritis, ocular inflammation, otitis, dermatitis, and allergic conditions; but that no documentation had been provided to substantiate the label claim that it is advantageous to combine methylprednisolone with aspirin or any salicylate.

By letter dated March 13, 1969 to the firm, FDA indicated that certain changes would be necessary in the package insert. The letter further stated that "While we believe both compounds are effective when used alone, data will need to be submitted to show an added effect when in combination." The firm was provided 6 months to make the necessary changes in the insert labeling or to submit additional information supporting the labeling used.

The Upjohn Co. responded by submitting a supplemental NADA which provided the requested changes in the insert labeling. The supplement was approved September 12, 1969. Accordingly, the NAS/NRC–DESI status of the product was upgraded to effective. The regulations are amended to codify Upjohn's previously approved NADA and to specify the NAS/NRC-approved conditions of use.

For approval of NADA's for identical or similar products having the same conditions of use, applications need not include efficacy data as specified by 21 CFR 514.1(b)(8)(ii) or 514.111(a)(5)(ii)(*a*)(*4*), but approval may require bioequivalency or similar data as suggested in the guidelines for submitting NADA's for NAS/NRC-reviewed generic drugs. The guidelines are available from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

VOL
48
ISS

MY
13
1983
UMI

This action, codification of a previously approved NADA, does not constitute reaffirmation of the safety and effectiveness data supporting the approval. Because the NADA was approved before July 1, 1975, the sponsor was not required to submit a summary of the safety and effectiveness data and information in accordance with the freedom of information provisions of §514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)).

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 520

Animal drugs, Oral use.

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part, 520 is amended by adding new § 520.1409, to read as follows:

§ 520.1409 Methylprednisolone, aspirin tablets.

(a) *Specifications.* Each tablet contains 0.5 milligram of methylprednisolone and 300 milligrams of aspirin.

(b) *Sponsor.* See No. 000009 in § 510.600(c) of this chapter.

(c) *NAS/NRC status.* The conditions of use have been NAS/NRC reviewed and found effective. New animal drug applications for approval of drugs for these conditions of use need not include effectiveness data specified by § 514.111 of this chapter, but may require bioequivalency and safety information.

(d) *Special considerations.* (1) Clinical and experimental data have demonstrated that corticosteroids administered orally or parenterally to animals may induce the first stage of parturition when administered during the last trimester of pregnancy and may precipitate premature parturition followed by dystocia, fetal death, retained placenta, and metritis.

(2) Systemic therapy with methylprednisolone is contraindicated in animals with tuberculosis, chronic nephritis, peptic ulcer, or Cushingoid syndrome. The presence of diabetes mellitus, osteoporosis, predisposition to thrombophlebitis, hypertension, congestive heart failure, or renal insufficiency necessitates carefully controlled use of corticosteroids.

(3) Anti-inflammatory action of corticosteroids may mask signs of infection.

(e) *Conditions of use*—(1) *Amount.* Dogs under 15 pounds, ¼ to 1 tablet daily; 15 to 60 pounds, 1 to 2 tablets daily; 60 pounds and over, 2 tablets daily.

(2) *Indications for use.* As an anti-inflammatory and analgesic agent in dogs.

(3) *Limitations.* Administer total daily dose in divided doses 6 to 10 hours apart, with a light feeding. When response is attained, dosage should be gradually reduced until maintenance level is achieved. Do not administer to cats. Do not overdose. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. May 13, 1983.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: May 6, 1983.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing those regulations reflecting approval of a new animal drug application (NADA) providing for use of cyclothiazide tablets in dogs for their diuretic and saluretic effects and another NADA providing for use of an ointment containing flurandrenolide and neomycine on dogs for topical management of allergic dermatitis, otitis externa, and superficial pyoderma. The sponsor, Elanco Products Co., requested the withdrawal of approvals.

EFFECTIVE DATE: May 23, 1983.

FOR FURTHER INFORMATION CONTACT: David N. Scarr, Bureau of Veterinary Medicine (HFV–214), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3183.

SUPPLEMENTARY INFORMATION: In a notice published elsewhere in this issue of the **Federal Register**, approval of NADA 13–547 for Renazide Tablets and NADA 13–133 for Corderm Ointment, both sponsored by Elanco Products Co., a Division of Eli Lilly & Co., is withdrawn. This document amends the animal drug regulations by removing 21 CFR 520.526 and 524.1000 that reflect approval of the NADA's.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(2) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cummulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects

21 CFR Part 520

Animal drugs, oral use.

21 CFR Part 524

Animal drugs, topical.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.84), Parts 520 and 524 are amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 520.526 [Removed]

1. Part 520 is amended by removing § 520.526 *Cyclothiazide tablets.*

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 524.1000 [Removed]

2. Part 524 is amended by removing § 524.1000 *Flurandrenolide with neomycin sulfate ointment.*

Effective date. May 23, 1983.

(Sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360b(e)).)

Dated: May 2, 1983.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

BILLING CODE 4160-01-M

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Glycopyrrolate Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by A. H. Robins Co. providing for use of glycopyrrolate injection as a preanesthetic agent in cats.

EFFECTIVE DATE: May 13, 1983

FOR FURTHER INFORMATION CONTACT: Bob G. Griffith, Bureau of Veterinary Medicine (HFV–112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4330.

SUPPLEMENTARY INFORMATION: A. H. Robins Co., Research Laboratories, 1211 Sherwood Ave., Richmond, VA 23220, filed a supplement to NADA 101–777 providing for safe and effective use of glycopyrrolate injection for intramuscular use in cats as a preanesthetic agent.

A. H. Robins presently holds an approval for intramuscular, intravenous, and subcutaneous use of the drug in dogs as a preanesthetic agent. Under the Bureau of Veterinary Medicine's supplemental approval policy (42 FR 64367; December 23, 1977), this is a Category II supplement. The Bureau required, and the sponsor submitted, safety and effectiveness studies to support the supplement. The supplement is approved and the regulations are amended to reflect the approval for the use of the product in cats. The regulations are also being amended to delete the reference to the preservation used in the product which need not be specified since it is not an active ingredient.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 522

Animal drugs, injectable.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 522 is amended by revising § 522.1066 to read as follows:

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 522.1066 Glycopyrrolate injection.

(a) *Specifications.* Each milliliter of aqueous solution contains 0.2 milligram of glycopyrrolate.

(b) *Sponsor.* See No. 000031 in § 510.600(c) of this chapter.

(c) *Conditions of use.* (1) It is indicated as a preanesthetic agent in dogs and cats.

(2) It is administered intravenously, intramuscularly, or subcutaneously in dogs and intramuscularly in cats at a dosage level of 5 micrograms per pound of body weight (0.25 milliliter per 10 pounds of body weight).

(3) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. May 13, 1983.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360(i)).)

Dated: May 2, 1983.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 0

[Docket No. R-83-990]

Standards of Conduct for HUD Employees

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule.

SUMMARY: This rule amends the regulations prescribing Standards of Conduct for HUD employees, to bring the post-employment restrictions into conformity with the Ethics in Government Act of 1978. In accordance with section 207 of that Act, the rule also provides that persons who must file financial disclosure statements under the Act are exempt from filing additional financial disclosure reports. Finally, the rule removes the Appendix to the regulations, which lists positions for which persons must file confidential statements of employment and financial interests.

EFFECTIVE DATE: June 27, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. David D. White, Assistant General Counsel for Administrative Law, Office of General Counsel, Room 10252, 451 7th Street, S.W., Washington, D.C. 20410, (202) 755–7137. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The Ethics in Government Act of 1978, Pub. L. 95–521, provides for public financial disclosure by certain Government officials. Title V of the Act, as amended, revises the provisions of 18 U.S.C. 207 relating to the activities of former Government employees. As a result, HUD is amending 24 CFR Part 0 to revise its post-employment regulations and certain financial disclosure regulations, to conform to the provisions of the Act.

Major Provisions

1. Section 0.735–213, "Prohibited activities by former employees," has been made obsolete by the Ethics in Government Act. Accordingly, this rule revises § 0.735–213 to reflect the amendments to 18 U.S.C. 207 effected by title V of the Act and to refer to regulations of the Office of Personnel Management implementing those amendments.

2. This rule amends § 0.735–403 to exempt persons required to file statements under the Ethics in Government Act of 1978 from filing any additional financial disclosure reports. This is consistent with section 207 of that Act.

3. As part of the Department's efforts to promote regulatory simplicity, this rule streamlines § 0.735–409 and removes the Appendix at the end of Part 0. The Appendix lists positions for which incumbent employees must file confidential financial disclosure reports under Subpart D of Part 0. In the future, the list of positions will not be published as an Appendix to Part 0. The rule also deletes references to the Appendix contained in §§ 0.735–401 and 0.735–404.

Since all of the changes made by this rule relate to agency management or personnel, the requirements for notice of

VOL
48
ISS
94
MY
13
1983
UMI

proposed rule making contained in 5 U.S.C. 553(b) are not applicable to this rule. Accordingly, these amendments are being adopted by final rule, to become effective as provided above, without an opportunity for public comment on the changes made by the rule.

HUD regulations published at 47 FR 56266 (1982), amending 24 CFR Part 50, which implements section 102(2)(C) of the National Environmental Policy Act of 1969, contain categorical exclusions from their requirements for the actions, activities and programs specified in § 50.20. Since the amendments made by this rule fall within the categorical exclusion for internal administrative procedures set forth in paragraph (k) of § 50.20, the preparation of an Environmental Impact Statement or a Finding of No Significant Impact is not required for this rule.

Pursuant to the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities. The rule affects only Government employees and is not expected to have any economic impact on small entities.

This rule is not listed in the Department's Semiannual Agenda of Regulations published on October 28, 1982 (47 FR 48422), pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 0

Conflict of interest.

PART 0—[AMENDED]

Accordingly, the Department amends 24 CFR Part 0) by:

1. Revising § 0.735–213 to read as follows:

§ 0.735–213 Prohibited activities by former employees.

(a) No former employee, including a former special Government employee, after terminating Government employment, shall knowingly act as agent or attorney for, or otherwise represent, any other person in any formal or informal appearance before, or with the intent to influence, make any oral or written communication on behalf of any other person to any agency, employee or court of the United States or the District of Columbia, in connection with any particular Government matter involving a specific party, in which matter such employee participated personally and substantially as a Department employee.

(b) No former employee, including a former special Government employee, within two years after terminating employment by the United States, shall knowingly act as agent or attorney for or otherwise represent any other person in any formal or informal appearance before, or with the intent to influence, make any oral or written communication on behalf of any person to any agency, employee or court of the United States or the District of Columbia, in connection with any particular Government matter involving a specific party, if such matter was actually pending under the employee's official responsibility as an officer or employee within a period of one year prior to the termination of such responsibility.

(c) No former Senior Employee, as defined in 5 CFR § 737.3(a)(6), within two years after terminating employment by the United States, shall knowingly represent or aid, counsel, advise, consult, or assist in representing any other person by personal presence at any formal or informal appearance before any agency, employee or court of the United States or the District of Columbia, in connection with any particular Government matter involving a specific party, in which matter he or she participated personally and substantially.

(d) For a period of one year after terminating employment by the United States, no former Senior Employee, other than a special Government employee who serves for fewer than sixty days in a calendar year, shall knowingly act as an agent or attorney for, or otherwise represent, anyone in any formal or informal appearance before, or with the intent to influence, make any written or oral communication on behalf of anyone to the Department or any of its officers or employees, in connection with any particular Government matter, whether or not involving a specific party, which is pending before the Department, or in which it has a direct and substantial interest.

(e) The prohibitions set forth in paragraphs (a) through (d) of this section will be applied in accordance with regulations of the Office of Government Ethics as set forth in 5 CFR Part 737.

2. Revising the introductory language of paragraph (b) and paragraphs (c) and (d) of § 0.735–401 to read as follows:

§ 0.735–401 Employees required to submit statements.

* * * * *

(b) Employees classified at GS–13 or above who are in positions the incumbents of which are responsible for making a Government decision or taking a Government action in regard to: * * *

(c) Employees classified at GS–13 or above who are in positions which the Department has determined have duties and responsiblities which require the incumbent to report employment and financial interests in order to avoid involvement in a possible conflicts-of-interest situation and carry out the purpose of law, Executive order, and this part.

(d) Employees classified below GS–13 who are in positions which otherwise meet the criteria in paragraphs (b) or (c) of this section. These positions have been approved by the Office of Government Ethics as exceptions that are essential to protect the integrity of the Government and avoid employee involvement in a possible conflicts-of-interest situation.

3. Revising paragraph (b) of § 0.735–403 to read as follows:

§ 0.735–403 Employees not required to submit statements.

* * * * *

(b) A statement of employment and financial interest is not required by this subpart from the Secretary; a full-time member of a committee, board, or commission appointed by the President; or a person required to file a financial disclosure report under the Ethics in Government Act of 1978 (the Act). These employees are subject to separate reporting requirements under Section 401 of Executive Order 11222 or Title II of the Act.

4. Revising § 0.735–404 to read as follows:

§ 0.735–404 Time and place for submission of employees' statements.

(a) An employee required to submit a statement of employment and financial interest as required in § 0.735–401 shall submit that statement on Form HUD–844 (Revised) to the official designated in paragraph (b) of this Section not later than thirty days after the employee's entrance on duty, and annually as provided in § 0.735–405.

(b) All employees shall submit their statements to the Assistant General Counsel for Administrative Law, or to any other Deputy Counselor who may be designated by the Department Counselor. Such statements shall be enclosed in sealed envelopes marked "Standards of Conduct—Department Counselor-Administratively Confidential."

5. Revising § 0.735–409 to read as follows:

§ 0.735–409 Confidentiality of employees' statements.

Each statement of employment and financial interest, and each supplementary statement, shall be held in confidence by the Department. To insure this confidentiality:

(a) The Department Counselor or his or her designee shall review and retain employees' statements;

(b) Officials and employees designated under paragraph (a) of this Section are responsible for maintaining the statements in confidence and shall not allow access to, or allow information to be disclosed from, a statement except to carry out the purposes of this Part; and

(c) The Department may not disclose information from a statement except as the Office of Personnel Management or the Secretary may determine for good cause shown.

Appendix [Removed]

6. Removing the Appendix, *List of Positions Subject to Subpart D.*

Authority: Sec. 7(d) Department of Housing and Urban Development Act (42 U.S.C. 3535(d)) (18 U.S.C. 207) The Ethics in Government Act of 1978 (Pub. L. 95–521).

Dated: May 9, 1983.

Samuel R. Pierce, Jr.

Secretary, Department of Housing and Urban Development.

[FR Doc. 83–12957 Filed 5–12–83; 8:45 am]

BILLING CODE 4210–01–M

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 201

[Docket No. R–83–1096]

Mortgage Insurance Loans; Changes in Interest Rates

AGENCY: Office of Assistant Secretary of Housing—Federal Housing Commissioner; HUD.

ACTION: Final rule.

SUMMARY: This change in the regulations decreases the HUD/FHA maximum allowable finance charge on Title I mobile home loans, combination and mobile home lot loans, property improvement loans, and historic preservation loans. This action by HUD is designed to bring the maximum interest rate and financing charges on HUD/FHA-insured loans into line with market rates and help assure an adequate supply of and demand for FHA financing.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Jim L. Anderson, Director, Operations Division, Office of Single Family Housing, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410 (202–755–6880).

SUPPLEMENTARY INFORMATION: The following miscellaneous amendments have been made to this chapter to decrease the maximum interest rate which may be charged on loans insured by this Department. Maximum finance charges on property improvement loans have been lowered from 16.00 percent to 15.50 percent, the finance charge on mobile home loans lowered from 14.50 percent to 14.00 percent, and the finance charge on combination loans for the purchase of a mobile home and a developed or undeveloped lot has been lowered from 14.00 percent to 13.50 percent. The maximum charge on historic preservation loans has been lowered from 16.00 percent to 15.50 percent.

The Secretary has determined that such changes are immediately necessary to meet the needs of the market and to prevent speculation in anticipation of a change, in accordance with his authority contained in 12 U.S.C. 1709–1, as amended. The Secretary has, therefore, determined that advance notice and public comment procedures are unnecessary and that good cause exists for making this amendment effective immediately.

This is a procedural and administrative determination as set forth in the statutes and as such does not require a determination of environmental applicability.

List of Subjects in 24 CFR Part 201

Health facilities, Historic preservation, Home improvement, Mobile homes, Manufactured homes and lots.

Accordingly, Chapter II is amended as follows:

PART 201—PROPERTY IMPROVEMENT AND MOBILE HOME LOANS SUBPART A—ELIGIBILITY REQUIREMENTS—PROPERTY IMPROVEMENT LOANS

1. Section 201.4(a) is revised to read as follows:

§ 201.4 Financing charges

(a) *Maximum financing charges.* The maximum permissible financing charge exclusive of fees and charges as provided by paragraph (b) of this section which may be directly or indirectly paid to, or collected by, the insured in connection with the loan transaction, shall not exceed 15.50 percent annual rate. No points or discounts of any kind may be assessed or collected in connection with the loan transaction. Finance charges for individual loans shall be made in accordance with tables of calculation issued by the Commissioner.

* * * * *

Subpart B—Eligibility Requirements—Mobile Home Loans

2. Section 201.540(a) is revised to read as follows:

§ 201.540 Financing charges.

(a) *Maximum financing charges.* The maximum permissible financing charge which may be directly or indirectly paid to, or collected by, the insured in connection with the loan transaction, shall not exceed 14.00 percent simple interest per annum. No points or discounts of any kind may be assessed or collected in connection with the loan transaction, except that a one percent origination fee may be collected from the borrower. If assessed, this fee must be included in the finance charge. Finance charges for individual loans shall be made in accordance with tables of calculation issued by the Commissioner.

* * * * *

Subpart D—Eligibility Requirements—Combination and Mobile Home Lot Loans

3. Section 201.1511(a), subparagraph (1) is revised to read as follows:

§ 201.1511 Financing charges.

(a) *Maximum financing charges.* * * *

(1) 13.50 percent per annum.

* * * * *

Subpart E—Eligibility Requirements—Historic Preservation Loans

4. Section 201.1625(a) is revised to read as follows:

§ 201.1625 Financing charges.

(a) *Maximum financing charges.* The maximum permissible financing charge, exclusive of fees and charges as provided by paragraph (b) of this section, which may be directly or indirectly paid to, or collected by the insured in connection with the loan transaction, shall not exceed an 15.50 percent annual rate. No points or discounts of any kind may be assessed or collected in connection with the loan transaction. Finance charges for individual loans shall be made in accordance with tables of calculation issued by the Commissioner.

[Docket No. R-83-1095]

Mortgage Insurance Loans; Changes in Interest Rates

AGENCY: Office of Assistant Secretary for Housing—Federal Housing Commissioner; HUD.

ACTION: Final rule.

SUMMARY: This change in the regulations decreases the HUD/FHA interest rates on insured loans. This action by HUD is designed to bring the maximum interest rates into line with other competitive market rates and help assure an adequate supply of and demand for FHA financing.

EFFECTIVE DATE: May 9, 1983.

FOR FURTHER INFORMATION CONTACT: John N. Dickie, Director, Financial Analysis Division, Office of Financial Management, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410 (202–426–4667).

SUPPLEMENTARY INFORMATION: The following amendments have been made to this chapter to decrease the maximum interest rate which may be charged on loans insured by this Department. The maximum interest rate on HUD/FHA insured home mortgage insurance programs has been lowered from 12.00 percent to 11.50 percent for level payment (including operative builder) and from 12.00 percent to 11.75 percent for graduated payment home loan programs (GPM). For insured multifamily project mortgage loan programs, the maximum interest rate has been lowered from 13.00 percent to 12.50 percent. The maximum interest rate for multifamily construction and Title X land development loans has been lowered from 14.00 percent to 12.50 percent.

The secretary has determined that such changes are immediately necessary to meet the needs of the market and to prevent speculation in anticipation of a change, in accordance with his authority contained in 12 U.S.C. 1709–1, as amended. The Secretary has, therefore, determined that advance notice and public comment procedures are unnecessary and that good cause exists for making this amendment effective immediately.

This is a procedural and administrative determination as set forth in the statutes and as such does not require a determination of environmental applicability.

List of Subjects in 24 CFR Parts 203, 205, 207, 213, 220, 221, 232, 234, 235, 236, 241, 242 and 244

Mortgage insurance.

Accordingly, Chapter II is amended as follows:

PART 203—MUTUAL MORTGAGE INSURANCE AND REHABILITATION LOANS

Subpart A—Eligibility Requirements

1. Section 203.20 paragraph (a) is revised to read as follows:

§ 203.20 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 11.50 percent per annum, except that where an application for commitment was received by the Secretary before May 9, 1983, the mortgage may bear interest at the maximum rate in effect at the time of application.

* * * * *

2. Section 203.45 paragraph (b) is revised to read as follows:

§ 203.45 Eligibility of graduated payment mortgages.

* * * * *

(b) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 11.75 percent per annum, except that where an application for commitment was received by the Secretary before May 9, 1983, the mortgage may bear interest at the maximum rate in effect at the time of application.

* * * * *

3. Section 203.46 paragraph (c) is revised to read as follows:

§ 203.46 Eligibility of modified graduated payment mortgages.

* * * * *

(c) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 11.75 percent per annum, except that where an application for commitment was received by the Secretary before May 9, 1983, the mortgage may bear interest at the maximum rate in effect at the time of application.

* * * * *

PART 205—MORTGAGE INSURANCE FOR LAND DEVELOPMENT

Subpart A—Eligibility Requirements

4. Section 205.50 is revised to read as follows:

§ 205.50 Maximum interest rate.

Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 12.50 percent per annum. Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the 12.50 percent rate, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

Subpart A—Eligibility Requirements

5. Section 207.7 paragraph (a) is revised to read as follows:

§ 207.7 Maximum interest rate.

(a) Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the

applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 213—COOPERATIVE HOUSING MORTGAGE INSURANCE

Subpart A—Eligibility Requirements—Projects

6. Section 213.10 paragraph (a) is revised to read as follows:

§ 213.10 Maximum interest rate.

(a) Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

Supart C—Eligibility Requirements—Individual Properties Released From Project Mortgage

7. Section 213.511 paragraph (a) is revised to read as follows:

§ 213.511 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 11.50 percent per annum, except that where an application for commitment was received by the Secretary before May 9, 1983, the mortgage may bear interest at the maximum rate in effect at the time of application.

* * * * *

PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS

Subpart C—Eligibility Requirements—Projects

8. Section 220.576 paragraph (a) is revised to read as follows:

§ 220.576 Maximum interest rate.

(a) Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE

Subpart C—Eligibility Requirements—Moderate Income Projects

9. Section 221.518 paragraph (a) is revised to read as follows:

§ 221.518 Maximum interest rate.

(a) Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 232—NURSING HOMES AND INTERMEDIATE CARE FACILITIES MORTGAGE INSURANCE

Subpart A—Eligibility Requirements

10. Section 232.29 paragraph (a) is revised to read as follows:

§ 232.29 Maximum interest rate.

(a) Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

Subpart C—Eligibility Requirement—Supplemental Loans To Finance Purchase and Installation of Fire Safety Equipment

11. Section 232.560 paragraph (a) is revised to read as follows:

§ 232.560 Maximum interest rate.

(a) On or after May 9, 1983, the loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 12.50

VOL 48 ISS 94 MAY 13 1983 UMI

percent per annum, with the exception of applications submitted pursuant to feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

Subpart A—Eligibility Requirements—Individually Owned Units

12. Section 234.29 paragraph (a) is revised to read as follows:

§ 234.29 Maximum interest rate.

(a) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 11.50 percent per annum, except that where an application for commitment was received by the Secretary before May 9, 1983, the mortgage may bear interest at the maximum rate in effect at the time of application.

* * * * *

13. Section 234.75 paragraph (b) is revised to read as follows:

§ 234.75 Eligibility of graduated payment mortgages.

* * * * *

(b) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 11.75 percent per annum, except that where an application for commitment was received by the Secretary before May 9, 1983, the mortgage may bear interest at the maximum rate in effect at the time of application.

* * * * *

14. Section 234.76 paragraph (c) is revised to read as follows:

§ 234.76 Eligibility of modified graduated payment mortgages.

* * * * *

(c) The mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed 11.75 percent per annum, except that where an application for commitment was received by the Secretary before May 9, 1983, the mortgage may bear interest at the maximum rate in effect at the time of application.

* * * * *

PART 235—MORTGAGE INSURANCE AND ASSISTANCE PAYMENTS FOR HOME OWNERSHIP AND PROJECT REHABILITATION

Subpart D—Eligibility Requirements—Rehabilitation Sales Projects

15. Section 235.540 paragraph (a) is revised to read as follows:

§ 235.540 Maximum interest rate.

(a) On or after May 9, 1983, the loan shall bear interest at the rate agreed upon by the lender and the borrower, which rate shall not exceed 12.50 percent per annum, with the exception of applications submitted pursuant to feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 236—MORTGAGE INSURANCE AND INTEREST REDUCTION PAYMENTS FOR RENTAL PROJECTS

Subpart A—Eligibility Requirements for Mortgage Insurance

16. Section 236.15 paragraph (a) is revised to read as follows:

§ 236.15 Maximum interest rate.

(a) Effective on or after may 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 241—SUPPLEMENTARY FINANCING FOR INSURED PROJECT MORTGAGES

Subpart A—Eligibility Requirements

17. Section 241.75 is revised to read as follows:

§ 241.75 Maximum interest rate.

Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 242—MORTGAGE INSURANCE FOR HOSPITALS

Subpart A—Eligibility Requirements

18. Section 242.33 paragraph (a) is revised to read as follows:

§ 242.33 Maximum interest rate.

(a) Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

* * * * *

PART 244—MORTGAGE INSURANCE FOR GROUP PRACTICE FACILITIES

Subpart A—Eligibility Requirements

19. Section 244.45 paragraph (a) is revised to read as follows:

§ 244.45 Maximum interest rate.

(a) Effective on or after May 9, 1983, the mortgage shall bear interest at the rate agreed upon by the mortgagee and the mortgagor, which rate shall not exceed:

(1) 12.50 percent per annum with respect to permanent financing;

(2) 12.50 percent per annum with respect to construction financing prior to and including the cutoff date for cost certification.

Applications for conditional or firm commitments received on or after May 9, 1983, will be processed at the rates specified above, with the exception of applications submitted pursuant to unexpired site appraisal and market analysis (SAMA) or feasibility letters, or outstanding conditional or firm commitments, issued prior to the effective date of the new rate. In these instances, applications will be processed at a rate not exceeding the applicable previous maximum rates, if the higher rate was previously agreed upon by the parties. Notwithstanding these exceptions, the application will be processed at the new lower rate if requested by the mortgagee.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2619

Valuation of Plan Benefits in Non-Multiemployer Plans; Amendment Adopting Additional PBGC Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This amendment to the regulation on Valuation of Plan Benefits in Non-Multiemployer Plans contains the interest rates and factors for the period beginning June 1, 1983. The interest rates and factors are to be used to value benefits provided under terminating non-multiemployer pension plans covered by Title IV of the Employee Retirement Income Security Act of 1974.

The valuation of plan benefits is necessary because, under section 4041 of the Act, the Pension Benefit Guaranty Corporation and the plan administrator must determine whether a terminating pension plan has sufficient assets to pay all benefits under the plan that are guaranteed by the PBGC under the Title IV plan termination insurance program.

The interest rates and factors set forth in Appendix B to Part 2619 are adjusted periodically to reflect changes in financial and annuity markets. This amendment adopts the rates and factors applicable to plans that terminate on or after June 1, 1983, and will enable the PBGC and plan administrators to value the benefits provided under those plans. These rates and factors will remain in effect until PBGC publishes an amendment revising them.

EFFECTIVE DATE: June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Mrs. Renae R. Hubbard, Special Counsel, Office of the General Counsel, Code 210, Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006, 202–254–4895 (not a toll-free number).

SUPPLEMENTARY INFORMATION: On January 28, 1981, the Pension Benefit Guaranty Corporation ("PBGC") issued a final regulation (46 FR 9492) establishing the methods for valuing plan benefits of terminating non-multiemployer plans covered under Title IV of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1001 *et seq.* (1976), *as amended by* the Multiemployer Pension Plan Amendments Act of 1980, Pub. L. 96–364, 94 Stat. 1208 (the "Act"). That regulation, 29 CFR Part 2610, was recodified as 29 CFR Part 2619 on June 24, 1981, effective June 29, 1981 (46 FR 32574). Appendix B to the regulation, which contains formulas for valuing different types of benefits, sets forth the interest rates and factors that are to be used in the formulas. Because these rates and factors are intended to reflect current conditions in the financial and annuity markets, it is necessary to update the rates and factors periodically.

When published as part of the final regulation, Appendix B contained interest rates and factors for valuing benefits in plans that terminated during the period from September 2, 1974 through April 1, 1981. Subsequently, the PBGC adopted additional rates and factors for valuing benefits in plans that terminated on or after April 1, 1981 and before April 1, 1983 (46 FR 26765, 46 FR 31257, 46 FR 38693, 46 FR 45761, 46 FR 50788, 46 FR 55958, 46 FR 61084, 47 FR 2313, 47 FR 6426, 47 FR 20761, 47 FR 30757, 47 FR 40541, 47 FR 46273, 47 FR 51393, 47 FR 56134, 48 FR 1715).

On March 15, 1983, the PBGC published rates for plans that terminate on or after April 1, 1983 (48 FR 10819). That rate has remained in effect until now and will remain in effect for plan terminations through the end of May, 1983. At this time, however, changes in the financial and annuity markets require a decrease in the rates used for valuing benefits. Accordingly, this amendment adds to Appendix B a new set of interest rates and factors for plans that terminate on or after June 1, 1983. This interest rate and these factors will remain in effect until such time as PBGC publishes another amendment concerning the rates.

Generally, the rates will be in effect for at least one month. Any change in the rates normally will be published in the **Federal Register** by the 15th of the month preceding the effective date of the new rates.

The PBGC has determined that notice and public comment on this amendment are impracticable and contrary to the public interest. This determination is based on the need to determine and issue new interest rates and factors promptly so that the rates can reflect, as accurately as possible, current market conditions. The PBGC has found that the public interest is best served by issuing the rates and factors on a prospective basis so that plans may be able to calculate the value of plan benefits before submitting a notice of intent to terminate. Also, plans will be able to predict employer liability more accurately prior to plan termination. Moreover, because of the need to provide immediate guidance for the valuation of benefits under plans that

VOL
48
ISS
94
MY
13
1983
UMI

will terminate on or after February 1, 1983, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the rates set forth in this amendment to the final regulation effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, February 17, 1981, because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

List of Subjects in 29 CFR Part 2619

Employee benefit plans, Pension insurance, and Pensions.

PART 2619—[AMENDED]

In consideration of the foregoing, Part 2619 of Chapter XXVI, Title 29, Code of Federal Regulations, is hereby amended as follows:

1. The authority citation for Part 2619 reads as follows:

Authority: Secs. 4002(b)(3), 4041(b), 4044, and 4062(b)(1)(A), Pub. L. 93–406, 88 Stat. 1004, 1020, 1025, 1029 (1974) as amended by Secs. 403(1), 403(d), and 402(a)(7), Pub. L. 96–364, 94 Stat. 1302, 1301, and 1299 (1980) (29 U.S.C. 1302, 1341, 1344, 1362).

2. Rate Set 41 of Appendix B is revised and Rate Set 42 of Appendix B is added to read as follows:

Appendix B—Interest Rates and Quantities Used To Value Immediate and Deferred Annuities

In the table that follows, the immediate annuity rate is used to value immediate annuities, to compute the quantity "G," for deferred annuities and to value both portions of a refund annuity. An interest rate of 5% shall be used to value death benefits other than the decreasing term insurance portion of a refund annuity. For deferred annuities, k_1, k_2, k_3, n_1, and n_2 are defined in § 2619.45.

Rate set	For plans with a valuation date		Immediate annuity rate	Deferred annuities				
	On or after	And before		k_1	k_2	k_3	n_1	n_2
41	4–1–83	6–1–83	9.50	1.0675	1.0750	1.0400	7	8
42	6–1–83		9.25	1.0850	1.0725	1.0400	7	8

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 917

Kentucky Permanent Program; Removal of Condition of Approval and Consideration of Additional Amendments

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: This document amends 30 CFR Part 917 by (1) removing a condition of approval of the Kentucky permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), regarding a plan for the processing of permit applications; (2) approving additional amendments to the Kentucky program, relating to hydrologic information in permit applications and incidental boundary revisions; and (3) creating two new conditions of approval, relating to the deferral of contemporaneous reclamation and the definition of "principal shareholder."

EFFECTIVE DATE: The removal of this condition and the approval of these program amendments are effective on May 13, 1983.

FOR FURTHER INFORMATION CONTACT: W. H. Tipton, Director, Kentucky Field Office, Office of Surface Mining, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504, Telephone (606) 233–7327.

SUPPLEMENTARY INFORMATION:

Background on the Kentucky Program Submission and Conditional Approval

On December 30, 1981, Kentucky resubmitted its proposed regulatory program to OSM. On April 13, 1982, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary approved the program subject to the correction of twelve minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the May 18, 1982 **Federal Register** (47 FR 21404–21435).

Information pertinent to the general background, revisions and modifications to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Kentucky program can be found in the May 18, 1982 **Federal Register.**

Deficiency (1) of the Kentucky program for which the Secretary required correction as a condition of approval is as follows:

(1) Kentucky did not have a plan which includes: (1) A process for prompt completeness determinations of permit applications from existing operators who expect to continue mining past the eighth month of primacy; (2) assurances that operators who have not submitted complete applications by eight months after primacy will be immediately advised that they may not continue mining until being issued an approved permit, and (3) a policy that permit applications for new areas will not be given priority for processing over those for existing operations which are continuing to mine under the interim program when such existing mine applications are one year or older.

Submission of Material To Satisfy Condition and Additional Program Amendments and Revisions

On May 28 and July 29, 1982, OSM received from the Commonwealth of Kentucky material intended to satisfy conditions (b) and (c). On May 28, 1982, OSM also received, pursuant to the 30 CFR 732.17 State program amendment procedures, certain revisions to the State regulations and laws. Further, on June 18, 1982, OSM received from Kentucky a letter attempting to clarify certain statements in the May 18, 1982 **Federal Register** notice (47 FR 21404–21435) announcing the approval of the State program.

One of the points made in the clarification letter is that on page 21426 of the May 18, 1982, notice in Item No. 3, related to permitting, in response to a public comment, the Secretary defined "incidental boundary revisions" as incidental to whatever revision is being sought. Kentucky interprets its statute to allow boundary revisions incidental to the mining operation as a whole.

OSM published a notice in the **Federal Register** on July 23, 1982, announcing receipt of these provisions and inviting public comment on whether the proposed program amendments corrected these deficiencies, and whether the Secretary should approve the additional amendments and clarifications to the State program (47 FR 31890–31896). The public comment period ended August 23, 1982. A public hearing was held on August 12, 1982. OSM published a second notice in the **Federal Register** on September 8, 1982, announcing receipt of provisions to satisfy conditions (k) and (l), and inviting public comment on whether the proposed amendments corrected these deficiencies (47 FR 38536–39537). The public comment period ended October 8, 1982. A public hearing scheduled for September 22, 1982, was not held because no one expressed a desire to present testimony.

On January 4, 1983 (48 FR 245–252), OSM published a notice in the **Federal Register** which: (1) Removed and amended certain conditions; (2) approved certain other program amendments; (3) deferred Secretarial action on the following proposed Kentucky rule revisions: 405 KAR 7:020 Section 1(86), 8:050 Section 2, 16:020 Section 4 and 16:190 Section 2(2); (4) deferred Secretarial action on the following proposed Kentucky statutory revisions: KRS 350.060 Sections 5(21) and 5(22), 350.093 Section 10(2), and 350.062(9), contained in Senate Bill 218; (5) approved certain clarifications to the Kentucky program contained in the letter from the State, dated June 18, 1982; (6) deferred Secretarial action on the clarification in the June 18, 1982, letter relating to incidental boundary revisions; and (7) deferred Secretarial action on whether the material submitted by Kentucky satisfies condition (1).

Subsequent to the close of the second public comment period, OSM Field Office personnel and Kentucky regulatory officials met in executive session on November 5, 1982, and November 8, 1982 (Administrative Record KY–471). Kentucky has submitted clarifying material to OSM in letters, dated October 29, 1982, November 5, 1982, and December 17, 1982. Further, Kentucky has issued Reclamation Advisory Memorandum #53, dated November 17, 1982, and #55, dated December 1, 1982 (Administrative Record KY–475). The summaries of these two meetings, the two reclamation advisory memoranda and the new material submitted by Kentucky relate to certain of the items listed above on which the Secretary deferred action in the January 4, 1983 **Federal Register** notice, as follows:

(a) Revisions to KRS 350.050 Section 5(g) and 405 KAR 7:020 Section 1(86).

(b) Revisions to 405 KAR 16:020 Section 4.

(c) Revisions to KRS 350.093 Section 10(2).

(d) Revisions to KRS 350.062 (9).

(e) The satisfaction of condition (1), and

(f) The clarification in the June 18, 1982, letter relating to incidental boundary revisions.

Secretary's Findings

1. The Secretary finds the following material submitted by Kentucky satisfies condition (1): The program amendment procedures submitted on July 29, 1982; the further information contained in the letters dated November 5 and 8, 1982; the information obtained at meetings between OSM Field Office personnel and Kentucky regulatory officials on November 5 and 8, 1982 (Administrative Record KY–471); and the procedures set forth in Reclamation Advisory Memorandum #53, dated November 17, 1982, and Memorandum #55, dated December 1, 1982 (Administrative Record KY–475). These materials, taken together, provide:

(1) A process for prompt completeness determinations of permit applications from existing operators who expect to continue mining past the eighth month of primacy. This process is described in detail in Technical Reclamation Memorandum #53, Memorandum #55, and the material submitted on July 29, 1982.

(2) Assurances that operators who have not submitted complete applications by eight months after primacy will be immediately advised that they may not continue mining until being issued an approved permit. This policy is specifically stated in Technical Memorandum #53 and in the material submitted on July 29, 1982.

(3) A policy that permits applications for new areas will not be given priority for processing over those from existing operations which are continuing to mine under the interim program when such existing mine applications are one year old or older. In the material submitted on July 29, 1982, Kentucky states that, "For those applications still in the backlog as of P+20 (1/18/84), the first priority of review will become the backlog of applications with new permanent program permits taking a second priority." Since P+20 represents 20 months from primacy, it is also the date on which applications from existing operations will be one year old as applications are due 8 months from primacy, and almost all applications were complete as of 8 months from primacy. Thus, permit applications for new areas will not be given priority for processing over those from existing operations when such existing mine applications are one year old or older.

2. The Secretary finds that the following program amendments submitted by Kentucky on May 28, 1982, and as further clarified, are not fully consistent with SMCRA and hereby imposes additional conditions of program approval related thereto:

a. Amendments to KRS 350.060 Section 5(g) and 405 KAR 7:020 Section 1(86) to change the definition of "principal shareholder" to, "any person who is the record or beneficial owner of ten (10) percent or more interest of the applicant." As explained in the letter, dated November 5, 1982, the Kentucky definition may require reporting in an instance when individuals own more shares of voting stock in a corporation which has issued voting and non-voting stock; but the Kentucky definition applies to owners of non-voting stock because it is based on ownership and not classes of voting stock as in the Federal definition at 30 CFR 770.5 and SMCRA Section 507(b)(4). Thus, individuals owning 10 percent of non-voting stock would be identified in the application, whereas under the Federal standard such individuals need not be identified.

Because the revised Kentucky definition would allow permit applications to not identify persons owning 10 percent of the outstanding voting shares of a class of stock in all instances, it is not consistent with SMCRA Section 507(b)(4). That section of SMCRA is clear in its requirement that for corporate applicants, each person owning 10 percent or more of a class of voting stock must be identified. Thus, the Secretary finds KRS 350.060 Section 5(g) and 405 KAR 7:020 Section 1(86) to be inconsistent with SMCRA Section 507(b)(4).

On April 12, 1983, the State was advised of the need to amend KRS 350.060 Section 5(g) and 405 KRS 7:020 Section 1(86) so that these provisions are consistent with SMCRA Section 507(b)(4).

By letter dated April 14, 1983, the State agreed to amend its statute by May 1, 1984 and its regulations by October 31, 1984. In the interim, Kentucky agreed to require reporting in a manner consistent with SMCRA Section 507(b)(4), and to require corporate operators to amend their permit applications to include the identification of appropriate individuals.

b. Amendments to KRS 350.093 Section 2 and 405 KAR 16:020 Section 4 to allow an operator to defer contemporaneous reclamation requirements if the operator can demonstrate that the deferment is necessary to address adverse conditions, combined surface and underground activities, or coal

VOL 48 ISS 94 MY 13 1983 UMI

marketing problems. Such deferments may not exceed an aggregate of 30 months.

SMCRA Section 515(b), in part, provides:

(b) General performance standards shall be applicable to all surface coal mining and reclamation operations and shall require the operation as a minimum to—(16) insure that all reclamation efforts proceed *in an environmentally sound manner and as contemporaneously as practicable with the surface coal mining operations* . . . (Emphasis added.)

The Secretary finds that the Kentucky amendments only partially provide that reclamation efforts proceed in an "environmentally sound manner" as required by SMCRA Section 515(b)(16). First, by the terms of KRS 350.093 Section 10(2) and 405 KAR 16:020 Section 4(4), the department is required to periodically reexamine and update the amount of the bond on the permit area so that the amount of the bond is sufficient to assure completion of reclamation. Second, in a letter dated December 17, 1982 (Administrative Record KY–477), Kentucky states that it intends to consider any site granted a contemporaneous reclamation deferment as an active site, thus requiring monthly partial and quarterly complete inspections Further, where an inspection indicates that remedial measures should be taken which may involve partial or total withdrawal of the deferment, the need for abatement will supersede such deferment.

The Secretary also finds that these amendments are only partially consistent with the requirement that reclamation efforts proceed "as contemporaneously as practicable with surface coal mining operations." 405 KAR 16:020 Section 4 and KRS 350.093 Section 10(2) allow the deferment of coal removal and contemporaneous reclamation only if the permittee can demonstrate at least one of the following:

1. Adverse conditions including weather, labor and other conditions are present which are clearly beyond the permittee's control. If reclamation is delayed under any of these circumstances, such reclamation would still occur as contemporaneously as "practicable" with mining operations because the permittee would be unable to proceed with reclamation until such adverse conditions no longer existed.

2. Combined surface and underground mining activities subject to the provisions of 405 KAR 8:050 Section 7 and 405 KAR 20:020, and other mining operations pursuant to KRS 350.080 are involved. This deferment of contemporaneous reclamation is also provided for in SMCRA Section 515(b)(16).

3. Coal marketing problems are present. While this deferment is not listed in the category of "adverse conditions", the Secretary believes that it is the same in effect. The alternative to deferment of reclamation may very well be abandonment of the site since the permittee will likely not be able to afford reclamation activities. Under Kentucky's amendments, the site will be inspected on a regular basis so that it is maintained in an environmentally sound manner. By keeping the operator in control of the site, the State will be spared bond forfeiture action and the necessity of hiring a third party to perform the reclamation.

In the discussion of the OSM rule, 30 CFR 816.100, regarding contemporaneous reclamation in the March 13, 1979 **Federal Register** notice at 44 FR 15225, it is stated:

The Office considered an alternative approach of attempting to quantify the term "contemporaneously", for all activities and to enumerate maximum delay periods after which, if an activity has not been undertaken, this standard would be breached. This alternative approach was rejected, in favor of general language. The alternative selected should allow the regulatory authority the necessary flexibility to approve mine plans with varying reclamation timetables, based on specific site conditions.

The Secretary finds, however, that these amendments are not sufficiently clear as to the State's discretion and control in allowing such deferrals. Further, to the extent that the provisions of KRS 350.093(2) allow the State to grant deferrals from the distance criteria of contemporaneous reclamation requirements, the statute is inconsistent with SMCRA Section 515(b)(16). Therefore, the Secretary conditions his approval of these amendments on Kentucky submitting material to provide:

(1) Clarification that at all times the applicant for a reclamation deferral pursuant to KRS 350.093 Section 2 has the burden of proof in establishing the need for such a deferral;

(2) Criteria that operators must meet in order to obtain such deferrals;

(3) A requirement that the applicant must demonstrate that: (a) reclamation on the site is contemporaneous as of the date of the request for deferral; and (b) the distance requirements of 405 KAR 16:020 Section 2, regarding backfilling and grading requirements, will be met during the period of deferral;

(4) Re-evaluation of the bond on all deferrals issued to assure sufficiency thereof.

Further, Kentucky must agree that all deferrals previously issued will be re-evaluated on the basis of this condition and, in the interim, the State will meet the terms of this condition as a matter of policy.

On April 12, 1983, the State was advised of the need to amend its statute by May 1, 1984, and its regulation by October 31, 1984, to meet this condition. By letter dated April 14, 1983, the State agreed to so amend its program. In the interim, Kentucky agreed to satisfy the terms of this condition as a matter of policy.

3. The Secretary finds that program amendments to KRS 350.062(g) submitted by Kentucky on May 28, 1982, and as further clarified, are fully consistent with SMCRA and hereby approves them. These amendments state that the Kentucky Department for Natural Resources and the Environment shall not unreasonably deny or delay a permit application if certain hydrologic information contained in the application is processed or analyzed in a manner different from prescribed technical guidelines if such manner contains a sampling and testing program based on all available information on a site-specific basis. Further, certain hydrologic information requirements in the application may be waived if the information is already available to the State. In the November 5, 1982, meeting between OSM and Kentucky personnel (Administrative Record KY–471), Kentucky stated such waivers apply only to test borings and core samples and not to any other data required to be supplied under KRS 350.062(3). As clarified, the amendment is consistent with SMCRA Section 507(b)(15) and is no less effective than 30 CFR 779.14(B)(3).

4. The Secretary finds the statement regarding incidental boundary revisions in the June 18, 1982, letter from the State to be acceptable, and hereby approves it as a clarification to the Kentucky program. In that letter, Kentucky stated that its law allows boundary revisions incidental to the mining operation as a whole. Further, by letter, dated October 29, 1982, Kentucky clarifies its interpretation of an "incidental boundary revision." First, as stated in Kentucky's definition of the term, such a revision must be necessary for reasons unforeseen at the time the original application was prepared, and must be small in relation to the permit area. The cumulative acreage may not exceed: 1) 10% of the permit area or 5 acres, whichever is less, when the extension includes new areas from which coal will be removed, or 2) 10% of the permit area or 2 acres, whichever is less, when the extension is for new areas not involving coal extraction.

Second, all incidental boundary revisions entailing the extraction of additional coal are subject to the requirements for major revisions under the State's rules. 405 KAR 8:010 Section 20(2)(b) provides: "Major revisions shall be subject to all the requirements of Sections 5, 7 through 12, 13(1), 13(2), 14(1) through 14(6), 14(8), 14(10) through 14(15), 15, 16, 18, and 24." An examination of the listed requirements reveals that all major revisions are subject to all of the public participation requirements and almost all of the findings required to be made by the regulatory authority upon the issuance of a permit.

Third, all incidental boundary revisions not entailing the extraction of additional coal are subject to the requirements for minor revisions under the State's rules. 405 KAR 8:010 Section 20(3)(a) provides: "All revisions which are not determined by the department to be major revisions are minor revisions. Minor revisions shall be subject to Sections 5, 7, 12, 13(1), 13(2), 14(1) through 14(6), 14(8), 14(10) through 14(15), 15, 16(1), 16(3), 16(4)(a), 16(5), 18 and Section 24." An examination of the listed requirements reveals that all minor revisions are subject to almost all of the public participation requirements and almost all of the findings required to be made by the regulatory authority upon the issuance of a permit. The only requirements missing from those for major revisions are contained in 405 KAR 8:010 Sections 16(2), (4)(b) and (6), and are: (1) The department need not provide copies of written findings of any permit conferences; (2) the department need not publish a summary of its decision in the newspaper; and (3) the department need not notify the city or county of the land to be affected.

For these reasons, the Secretary finds Kentucky's treatment of incidental boundary revisions to be consistent: (1) With the State's authority to establish guidelines for a determination of the scale or extent of a revision request under SMCRA Section 511(a)(2), and (2) with SMCRA Section 511(a)(3).

Kentucky has incorporated this definition of "incidental boundary revision" in its regulations at 405 KAR 7:020 Section 1(57). On January 27, 1983, OSM published a notice in the **Federal Register** (48 FR 3779–3780), requesting public comment on this proposed amendment to the Kentucky program. The decision on the regulation will be made at a later date.

Public Comments

1. The Appalachian Research and Defense Fund of Kentucky, Inc. (ARDFK) expressed its concern that the State's use of "incidental boundary revisions" will allow additional lands to be bootstrapped onto permit areas in a deliberate and impermissible fashion. Further, ARDFK states that OSM cannot, under SMCRA Section 511, approve incidental boundary revisions where the objective is the extension of the permit area.

The Secretary believes that Kentucky's definition of "incidental boundary revisions" is limited enough by its own terms to allay any fears that there will be proportionately large areas bootstrapped onto permit areas. For the reasons set forth above in Finding 4, the Secretary finds Kentucky's treatment of incidental boundary revisions to be consistent with SMCRA Section 511.

2. ARDFK comments that the material submitted by Kentucky fails to satisfy condition (1) as it: (1) Allows for a backlog of permit applications for transition operations from the interim program by January 18, 1984, 20 months after primacy, and (2) provides that new applications may take priority in processing over applications from transition operations before the backlog of applications from transition operations has been reduced or controlled through the first 20 months of primacy.

First, the Secretary never established an absolute cutoff date of 20 months for processing the applications from transition operations. The 20 month period was set as a goal to be attained. The Secretary imposed condition (1), "to ensure that the goals for receipt and review of complete applications are not pushed forward indefinitely because of work on new applications . . . ." (47 FR 21417, Finding 17.19). It was always contemplated that Kentucky's plan for transition to primacy would have to be based on the realities of processing such a large number of applications from transition operations. The Secretary continues to believe that it is most important that Kentucky adequately review applications and issue permits only after thorough consideration, rather than rush applications through to meet an absolute deadline.

Second, Kentucky's plan for transition to primacy and the Secretary's imposition of a condition do not prohibit the State from giving priority to the processing of new permit applications. In the November 5, 1982, meeting between OSM and Kentucky personnel (Administrative Record KY–471), the State indicated that it does not anticipate a backlog of new permits that could not be considered along with priority interim permits.

On these bases and for the reasons set forth above in Finding 1, the Secretary finds that Kentucky has submitted material to satisfy condition (1).

3. ARDFK objects to Kentucky's definition of "principal shareholder" at KRS 350.060 Section 5(g) and 405 KAR 7:020 Section 1(86), claiming that these amendments are less inclusive because they do not include those individuals who own less than 10 percent of the aggregate interest of the applicant entity, but who in fact have a substantial interest in terms of control and decisional authority. Further, ARDFK states that these amendments are not in accordance with SMCRA Section 507(b)(4).

For the reasons set forth above in Finding 2(a), the Secretary agrees with the commenter, and finds KRS 350.060 Section 5(g) and 405 KAR 7:020 Section 1(86) not to be consistent with SMCRA Section 507(b)(4).

4. ARDFK asserts that the amendments to KRS 350.093 Section 2 and 405 KAR 16:020 Section 4, regarding contemporaneous reclamation, are in direct violation of SMCRA. According to the commenter, SMCRA is clear that reclamation, including backfilling, grading, replacement of topsoil, and revegetation occur as soon in time as possible following coal removal. SMCRA provides only one variance from this requirement where the applicant proposes to combine surface mining and underground operations, and submits specific, feasible plans for the underground operations. ARDFK states that the amendment is overboard in allowing up to 30 months delay in reclamation for coal marketing problems. ARDFK maintains that Kentucky has attempted to remedy the illegality of these provisions by allowing a simultaneous deferral of coal removal so that the State can argue that reclamation is occurring in a contemporaneous manner when coal removal resumes. According to ARDFK, this attempt does not save the provisions because the legislative history of SMCRA clearly reflects a concern with allowing unreclaimed surface disturbances to remain for any time beyond that physically necessary for removal of the exposed seam.

The commenter states further that the deferral of reclamation or coal removal is in violation of the mining and reclamation plan requirements of SMCRA, and has none of the safeguards of 30 CFR 785.18 or Part 818 for soil and

VOL 48 ISS 94 MAY 13 1983 UMI

topsoil protection, protection against off-site impacts, and none of the aspects of planning that accompany concurrent surface and underground operations. ARDFK asserts that such deferral lacks the aspects of planning and limited scope and duration of the permissible variance. The lack of planning by operators seeking such deferrals should not be rewarded with further exemptions from planning to avoid evironmental impacts.

ARDFK adds that these deferrals constitute a wide-open waiver with no environmental safeguards. Further, the power to grant these deferrals is in the State field offices so there is no mechanism for accountability. At a minimum, there should be review and concurrence by the OSM field office.

The Secretary believes that some of the commenter's concerns are provided for by the fact that reclamation must be contemporaneous as of the time of the approval of the deferral, and that these sites will continue to be inspected on a monthly basis. In regard to planning, the operator seeking a deferral must plan in order to meet the conditions required for granting a deferral. Finally, as set forth above in Finding 2(b), the Secretary finds KRS 350.093 Section 2 and 405 KAR 16:020 Section 4 to be unacceptable in their present form, and has conditioned his approval of these amendments upon further clarifications as described in that finding.

5. ARDFK further objects to the amendments regarding the deferral of contemporaneous reclamation as follows:

a. There is no delineation between waivers for market conditions and those for unmarketability of the coal itself (high sulfur, high ash, etc.).

The Secretary does not believe that such a delineation could ever be made, or that it should. Given the vagaries of the market, one cannot totally define why particular types, grades or qualities of coal cannot be sold at any one time, other than the fact that no one is willing to buy it at what is an economic price to the producer. Therefore, all such problems are ones of coal marketing. The Secretary believes that if the conditions he has imposed on these amendments are satisfied, Kentucky's program will be consistent with SMCRA and no less effective than the Federal regulations.

b. There is no regulatory authority for withdrawal of the deferral on other grounds, once issued.

The Secretary disagrees with this comment. KRS 350.050(1) and (5) enumerate the enforcement and inspection authority of the department. KRS 350.130 describes the consequences to an operator of noncompliance with an order of the department. The Kentucky regulations of 405 KAR 12:020 spell out the State's enforcement powers. The Secretary believes that these enforcement powers constitute sufficient authority for the withdrawal of any deferral, and would only approve these amendments on that basis.

6. ARDFK charges that 30 CFR 732.17(h)(6) requires that OSM make a decision on all program amendments within 30 days of the close of the public comment period, and that OSM has exceeded the 30-day periods for these amendments which closed on August 23 and October 8, 1982. Instead, OSM did not approve some amendments until January 4, 1983, and deferred the rest until they could be "cured" by Federal rule change.

The Secretary admits that OSM did not meet the 30-day requirement in 30 CFR 732.17(h)(6). Kentucky submitted an amendment package which was extremely large and complex, and contained both amendments to meet conditions and unsolicited amendments. The number and complexity of the issues raised by these amendments required additional time, and for certain amendments, eventually necessitated the submission of further, clarifying material from the State.

Two amendments, regarding the definition of preparation plants and augering on premined lands, raise issues OSM has been working on for years. OSM is presently in rulemaking in these areas, and the Secretary feels that it would be unwise for him to reach a decision regarding Kentucky's amendments prior to his final decision on the Federal rules. The final Environmental Statement (January 1983), discussing the alternatives under consideration in these rule revisions, reveals the complexity and the number of choices in these areas.

7. ARDFK makes a number of demands to enforce a recent OSM memorandum as follows:

a. Request an inventory by Kentucky of all "coal marketing deferrals."

The Secretary believes that the conditions he has imposed on these amendments in Finding 2(b), above, adequately meet the commenters' request. Further, OSM is continuing to review these deferrals as part of its oversight responsibility.

b. Take appropriate enforcement action against deferrals.

OSM intends to take appropriate enforcement action where it detects violations.

c. Require Federal permits for all off-site crushing and sizing facilities.

As explained in response to comment number 6, above, OSM,'s jurisdicton regarding preparation plants is presently under rulemaking. The Secretary also believes that Kentucky's amendment is not clearly inconsistent with existing Federal law or regulations. Therefore, the Secretary finds that it would be inappropriate to require Federal permits for all off-site crushing and sizing facilities in Kentucky at this time.

d. Require Kentucky to ask operators to amend their permit applications to include owners of 10% of any class of stock.

The Secretary agrees with this comment, and has required Kentucky operators to so amend their permit applications (See Finding 2(a), above).

e. Take appropriate steps to cure other deficiencies in the Kentucky program.

When such deficiencies are detected, OSM will take appropriate steps to cure them.

8. ARDFK charges that OSM offered statutory language to the Kentucky legislature regarding these amendments, and acquiesced in the enactment of statutes on the definition of a preparation plant and the granting of contemporaneous reclamation deferrals.

OSM did testify before the Kentucky legislature regarding these amendments, but warned the State Legislature that any decision by OSM, on amendments submitted by the State would be subject both to analysis by OSM and to public comments. Thus, OSM never approved any amendments prior to their submission.

9. The Kentucky Coal Association commented supporting the State's interpretation of its law as allowing incidental boundary revisions to the mining operation as a whole, but felt that such revisions should be limited to 10 percent of the permit area acreage with no 5-acre maximum.

For the reasons set forth in Finding 3, above, the Secretary finds Kentucky's treatment of incidental boundary revisions to be consistent with SMCRA Section 511. Since Kentucky has not submitted an amendment limiting such revisions as the Coal Association urges, it is unnecessary to comment on such a proposal.

Approval of Amendment To Satisfy Condition and Additional Program Amendments

Accordingly, condition (1) is hereby removed.

Revisions to the following Kentucky statutory provision is hereby approved pursuant to 30 CFR 732.17: KRS 350.062(9), contained in Senate Bill No. 218. The statements in the June 18 and October 29, 1982, letters, regarding incidental boundary revisions are approved as a clarification to the Kentucky program.

30 CFR 917.11 is amended to indicate approval of the program amendment and clarifications, and to impose two new program conditions, regarding contemporaneous reclamation deferrals and the definition of "principal shareholder." 30 CFR 917.10 incorporates approval of the corresponding amendment and clarifications. The removal of this condition and the approval of the additional amendment and clarifications to the Kentucky program are effective May 13, 1983.

Additional Findings

1. *Compliance with the National Environmental Policy Act:* Pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental document need be prepared on this rulemaking as State program decisions are exempt from compliance with the National Environment Policy Act, 42 U.S.C. 4321 *et seq.*

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 917

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, Part 917 of Title 30 is amended as set forth herein.

Dated: May 9, 1983.

Daniel N. Miller, Jr.,

Assistant Secretary for Energy and Minerals.

PART 917—KENTUCKY

Part 917 of title 30 is amended as follows:

§ 917.11 [Amended]

1 Section 917.11 is amended by removing and reserving paragraph (l).

2. Section 917.11 is amended by adding paragraphs (m) and (n) as follows:

* * * * *

(m) Termination of the approval found in 30 CFR 917.10 will be initiated unless Kentucky submits to the Secretary: By May 1, 1984, copies of enacted laws amending KRS 350.093(2) consistent with SMCRA Section 515(b)(16); and by October 31, 1984, copies of promulgated regulations amending 405 KAR 16:020 Section 4 to be no less effective than 30 CFR 816.101. Specifically, changes to the law and regulations must provide:

(1) Clarification that at all times the applicant for a reclamation deferral pursuant to KRS 350.093 Section 2 has the burden of proof in establishing the need for such a deferral;

(2) Criteria that operators must meet in order to obtain such deferrals;

(3) A requirement that the applicant must demonstrate that: (i) reclamation on the site is contemporaneous as of the date of the request for deferral; and (ii) the distance requirements of 405 KAR 16:020 Section 2, regarding backfilling and grading requirements, will be met during the period of deferral; and

(4) Re-evaluation of the bond on all deferrals issued to assure sufficiency thereof.

Further, all deferrals previously issued will be re-evaluated on the basis of this condition; and in the interim, the State will meet the terms of this condition as a matter of policy.

(n)(1) Termination of the approval found in 917.10 will be initiated unless Kentucky submits to the Secretary: (i) by May 1, 1984, copies of enacted laws amending KRS 350.060 Section 5(g) to be consistent with SMCRA Section 507(b)(4); and (ii) by October 31, 1984, copies of promulgated regulations amending 405 KAR 7:020 Section 1(86) to be no less effective than 30 CFR 770.5.

(2) In the interim, the State has agreed to require: (i) reporting in a manner consistent with SMCRA Section 507(b)(4), and (ii) corporate operators to amend their permit applications to include the identification of appropriate individuals.

§ 917.15 [Amended]

3. Section 917.15 is amended to add the following paragraph (c):

* * * * *

(c) The following amendments are approved effective on May 13, 1983. Revisions submitted on May 28, 1982, to KRS 350.062(9) and KRS 350.093 Section 2, contained in Senate Bill No. 218; Revisions submitted on May 28, 1982, to 405 KAR 16:020 Section 4.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-1-FRL 2328-8; Docket No. ME 586]

Approval and Promulgation of Implementation Plans; Maine; Revision to the Ozone Attainment Plan, Pioneer Plastics

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the Maine Department of Environmental Protection (DEP). This revision will reduce volatile organic compound (VOC) emissions from Pioneer Plastics, Auburn, Maine. The intended effect of this action is to reduce VOC emissions in an area where air quality is worse than National Ambient Air Quality Standards for ozone. We are approving this action under Section 110 of the Clean Air Act.

EFFECTIVE DATE: July 31, 1983.

ADDRESSES: Copies of the submittal are available for public inspection at the U.S. Environmental Protection Agency, Room 2111, JFK Federal Building, Boston, MA 02203; Public Information Reference Unit, EPA Library, 401 M Street, SW, Washington, D.C. 20460; Office of the Federal Register, 1100 L Street, NW, Room 8401, Washington, D.C. 20408 and the Maine Department of Environmental Protection, State House, Augusta, Maine 04330.

FOR FURTHER INFORMATION CONTACT: Margaret McDonough, (617) 223-5130.

SUPPLEMENTARY INFORMATION: EPA is approving a revision that requires Pioneer Plastics, a paper coating operation located in Auburn, Maine, to install a volatile organic compound (VOC) incinerator that will reduce VOC emissions by at least 85%. EPA considers this reduction to be reasonably available control technology because it is consistent with the Control Technology Guidelines (CTG's) published by EPA in May, 1977. Except for the issues discussed below, this revision and EPA's rationale for approving it are discussed in detail in

VOL 48 ISS 94 MY 13 1983 UMI

the Notice of Proposed Rulemaking published on October 18, 1982 (47 FR 46335) and will not be restated here.

In the NPR we stated that we would approve the air emissions license issued to Pioneer Plastics as a SIP revision. However, in this final action we are approving only the license conditions that limit VOC emissions. All other conditions of the license are not pertinent to the ozone attainment plan. EPA and DEP have determined that the effective date of this action, July 31, 1983, is as expeditious as practicable.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 12, 1983. This action may not be challenged later in proceedings to enforce its requirements (see 307(b)(2)).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

Authority: Section 110(a) and Section 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)).

Note—Incorporation by reference of the State Implementation Plan for the State of Maine was approved by the Director of the Federal Register on July 1, 1982.

Dated: May 4, 1983.

Lee L. Verstandig,

Acting Administrator.

PART 52—[AMENDED]

Part 52 of Chapter, I, Title 40 of the Code of Federal Regulations is amended as follows:

1. Section 52.1020 is amended by adding paragraph (c)(18) as follows:

§ 52.1020 Identification of plan.

* * * * *

(c) * * *

(18) On May 12, 1982 and February 11, 1983 the Maine Department of Environmental Protection submitted an emission limit contained in an air emissions license which requires Pioneer Plastics, Auburn, Maine to reduce its volatile organic compound emissions by at least 85%.

BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

41 CFR Ch. 1

[FPR Temp. Reg. 59, Supp. 1]

Subcontracting Report Forms, Standard Forms 294 and 295

AGENCY: General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This supplement extends the expiration date of Federal Procurement Regulations Temporary Regulation 59 (46 FR 33270, June 29, 1981). This extension reflects the continued applicability of Standard Form 294, Subcontracting Report for Individual Contracts, and Standard Form 295, Summary Subcontract Report, to provide a basis for evaluating the effectiveness of subcontracting programs. The effect will be to continue the requirement to use these forms until further refinements are made and published in a permanent amendment to the FPR.

DATES:

Effective date: April 1, 1983.

Expiration date: This regulations will continue in effect until April 1, 1985, unless canceled earlier.

FOR FURTHER INFORMATION CONTACT: Mr. Frank T. Van Lierde, Office of Federal Acquisition and Regulatory Policy (202–523–4768).

CHAPTER 1—[AMENDED]

In 41 CFR Chapter 1, FPR Temporary Regulation 59, Supplement 1 is added to the appendix at the end of the chapter.

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)))

Federal Procurement Regulations, Temporary Regulation 59, Supplement 1

To: Heads of Federal agencies

Subject: Subcontracting report forms, Standard Forms 294 and 295

1. *Purpose.* This supplement extends the expiration date of FPR Temporary Regulation 59.

2. *Effective date.* This regulation is effective April 1, 1983.

3. *Expiration date.* FPR Temporary Regulation 59 and this supplement will expire on April 1, 1985, unless canceled earlier.

4. *Explanation of changes.* Paragraph 3 of FPR Temporary Regulation 59 is revised to delete the expiration date of April 1, 1983, and to prescribe the revised expiration date which appears in paragraph 3, above.

Dated: May 5, 1983.

Ray Kline,

Acting Administrator of General Services.

BILLING CODE 6820-61-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6519]

Suspension of Community Eligibility Under the National Flood Insurance Program; Arkansas et al.

AGENCY: Federal Emergency Management Agency, FEMA

ACTION: Final Rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the flood plain management requirements of the program. If FEMA receives documentation that the community has adopted the required flood plain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division (202) 287–0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C 4001–4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities are suspended on the effective date in the fourth column, so that as of that date flood insurance is no longer available in the community. However, those communities which, prior to the suspension date, adopt and submit documentation of legally enforceable flood plain management measures required by the program, will continue their eligibility for the sale of insurance. Where adequate documentation is received by FEMA, a notice withdrawing the suspension will be published in the **Federal Register**.

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that notice and public procedure under 5 U.S.C. 533(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6 month, 90 days, and 30 days notification addressed to the Chief Executive Officer that the community will be suspended unless the required flood plain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Associate Director of State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local flood plain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate flood plain management, thus placing itself in non-compliance of the Federal standards required for community participation.

In each entry, a complete chronology of effective dates appears for each listed community.

List of Subjects in 44 CFR Part 64

Flood insurance, Flood plains.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of Eligible Communities.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of Flood Insurance in community	Special flood hazard area identified	Date [1]
Arkansas: Pulaski	Unincorporated areas	050179	Mar. 6, 1979, emergency, July 16, regular, 1981, May 16, 1983, suspended.	July 16, 1981	May 16, 1983.
Colorado: Gunnison	Gunnison, city of	080080	June 18, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Dec. 26, 1975	Do.
Illinois: Jackson	Grand Tower, city of	170300	Apr. 30, 1974, emergency, May 16, 1983, regular, May 16, 1983, suspended.	June 8, 1979	Do.
Franklin	West Frankfort, city of	170239	May 13, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Oct. 13, 1978	Do.
Kansas: Barton	Great Bend, city of	200019	Feb. 24, 1977, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Mar. 19, 1976	Do.
Maryland: Worcester	Ocean City, town of	245207	June 18, 1971, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Feb. 6, 1976	Do.
Massachusetts: Worcester	Fitchburg, city of	250304	July 9, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Oct. 3, 1975	Do.
Kalamazoo	Portage, city of	260577	May 20, 1976, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Sept. 19, 1975	Do.
Missouri: Jefferson	Unincorporated areas	290606	June 10, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	July 29,1980	Do.
New Jersey: Ocean	Island Heights, borough of	340374	Sept. 6, 1974, emergency, June 15, 1979, regular, May 16, 1983, suspended.	July 19, 1974, Dec. 12, 1975 and June 15, 1979.	Do.
Bergen	Norwood, borough of	340057	May 30, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	July 23, 1976	Do.
New York: Steuben	Avoca, village of	360765	July 5, 1974, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Mar. 5, 1976	Do.
Nassau	Baxter Estates, village of	360459	July 15, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Oct. 24, 1975	Do.
Steuben	Cohocton, town of	360771	May 6, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	May 28, 1976	Do.
Do	Cohocton, village of	360556	Jan. 15, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Jan. 2, 1976	Do.
Wayne	Galen, town of	361225	Aug. 2, 1976, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Nov. 19, 1976	Do.
Nassau	Lawrence, village of	360476	June 27, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Aug. 6, 1976	Do.
Oneida	New York Mills, village of	360537	May 23, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	June 7, 1974	Do.
Greene	Prattsville, town of	360296	Nov. 14, 1975, emergency, May 16, 1983, regular, May 16, 1983, suspended.	Apr. 11, 1975	Do.
Nassau	North Hempstead, town of	360482	Dec. 17, 1971, emergency, Apr. 1, 1980, regular, May 16, 1983, suspended.	Apr. 15, 1977	Do.
Westchester	Rye, city of	360931	Apr. 23, 1974, emergency, Apr. 1, 1980, regular, May 16, 1983, suspended.	Apr. 1, 1980	Do.
Tennessee: Knox	Knoxville, city of	475434	Aug. 14, 1970, emergency, May 1, 1970, regular, May 16, 1983, suspended.	Feb. 11, 1977	Do.
Do	Unincorporated areas	475433	Aug. 14, 1970, emergency, July 23, 1971, regular, May 16, 1983, suspended.	Mar. 18, 1977	Do.
New Hampshire: Sullivan	Newport, town of	330161	May 12, 1975, emergency, Apr. 18, 1983, regular, May 16, 1983, suspended.	June 18, 1980	Do.

BILLING CODE 6718-03-M

44 CFR Part 64

[Docket No. FEMA 6517]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program; California et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP) and eligible for second layer insurance coverage. These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the regular program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fourth column of the table.

ADDRESS: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–6620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division, (202) 287–0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, flood plains.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of Eligible Communities.

State and county	Location	Community No.	Effective date of authorization of sale of flood insurance for area [1]	Hazard area identified
California: Fresno County	Colvis, city of	060044	790212, emergency; 830316, regular.	770823
Colorado: Delta County	Paonia, town of	080045	750610, emergency; 830316, regular.	740524

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 81

[FR Docket No. 80–144; SS Docket No. 78–145; FCC 83–199]

Amendment of the Commission's Rules To Delete Those Provisions That Limit the Entry of New Stations Into the VHF Public Coast Station Market, and To Require Applicants for Public Coast Stations To Meet Certain Financial Qualifications

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends Part 81 to delete exclusivity provisions, require applicants for public coast stations to construct and operate within 8 months and declines to impose a requirement that applicants meet certain financial qualifications. These actions were staff initiated and were intended to improve public coast station service.

EFFECTIVE DATE: June 13, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Robert P. DeYoung, Private Radio Bureau, (202) 632–7175.

Coast stations.

Report and Order

Proceedings Terminated

In the matter of amendment of the Commission rules to delete those provisions that limit the entry of new stations into the VHF public coast station market; and amendment of Part 81 of the Commission's rules to require applicants for public coast stations to meet certain financial qualifications; PR Docket No. 80–144, SS Docket No. 78–145.

Adopted: April 27, 1983.

Released: May 6, 1983.

By the Commission: Commissioner Jones absent.

1. On April 24, 1980, the Commission released a Notice of Proposed Rule Making in PR Docket No. 80–144 (45 FR

VOL 48 ISS 94 MY 13 1983 UMI

28781) proposing to delete from its rules Section 81.303(b). This rule section provides territorial market protection to the licensees of existing stations. Prior to issuing the Notice of Proposed Rule Making in PR Docket No. 80–144, the Commission had released, on May 9, 1978, a Notice of Proposed Rule Making in SS Docket No. 78–145 (43 FR 20026) to amend its rules to require an applicant for a new public coast station to demonstrate its financial ability to construct the station and to operate the station for one year. Because this rule would operate to restrict entry into the VHF public coast station market, the Commission felt that it should be reconsidered in the context of the proposal to delete § 81.303(b). Thus it reopened the comment periods in SS Docket No. 78–145 to run concurrently with the comment period in PR Docket No. 80.144. The Commission has received comments and reply comments on both proposals and the comment periods are now closed.

Background

2. Public coast radiotelephone stations are land stations in the maritime mobile service that are open to public correspondence. In general these stations are interconnected to the public wireline telephone system. By utilizing the services of these stations, ships may make and receive telephone calls to and from any telephone which has access to the nationwide telephone network, including calls overseas and to other ships. Public coast stations are classified under the Commission's rules as "high seas", "regional" or "local service (VHF)" depending upon the frequency bands from which their channel assignments are drawn. The important difference among these classes of stations is the distance over which each can communicate.

3. Local service (VHF) public coast stations, which are the subject of PR Docket No. 80–144, provide service which is local in coverage. These stations operate in the VHF–FM band of 156–162 MHz and are capable of good transmission quality over distances up to 30–80 kilometers (20–50 miles). Generally, propagation in the marine VHF band follows a nearly line-of-sight path between the antennas of the two stations desiring to communicate with each other. Thus, VHF coverage is limited by the height of the antennas of the two stations communicating.

4. Under present Commission rules, there are nine VHF public correspondence channels which are assigned on a priority basis to public coast station applicants. Initially, only one public correspondence channel is assigned to a station. The channels are assigned on a priority basis as set forth in § 81.304(b)(22). Channels 26 and 28 are assigned interchangeably as the first priority number and are considered the primary public correspondence channels. The Commission will attempt to assign one of these two channels to a public coast station before it assigns one of the remaining seven channels. If channel occupancy reaches a certain level, the Commission will allow an additional channel.

5. Because of the limited range of VHF and the number of VHF channels available, local service (VHF) public coast stations offer greater possibilities for superior marine radiotelephone communications along the seacoasts and inland waterways than the other two classes with longer range propagation.[1] Stations can be spaced along the coast and waterways at intervals necessary to eliminate interference between stations operating on the same channel. The short range characteristic of the stations allows the same channel to be used at many different localities, thus, making more stations possible. Moreover, the fact that there are nine different VHF public correspondence channels permits a maximum of nine different stations to be located relatively close to each other.

6. Because marine VHF–FM radio communication developed later than marine communication in the medium and high frequencies, the local service (VHF) public coast stations were the last of the three classes of stations to be established. Even after marine VHF–FM radio communication became feasible, new applicants were reluctant to establish VHF public coast stations until traffic potential became sufficient to sustain the expense of operating such facilities. On the other hand, vessel owners were reluctant to invest in VHF radio installations which would not, in the absence of sufficient VHF public coast stations, afford them the communication service they required. To remedy this situation, the Commission amended its rules to encourage the use of marine VHF and to relieve the congestion that was becoming prevalent on the medium and high frequencies. First, the rules were amended to require ship stations having the capacity to communicate with regional service coast stations to also have the capacity to communicate with local service VHF coast stations. Further, the Commission prohibited communications to regional stations by vessels within range of local service stations. Second, in Docket No. 19360, the rules were amended to limit overlap of the coverage areas between local service (VHF) stations to not more than 20%, with certain exceptions.[2]

7. This latter amendment, which is set forth in Section 81.303(b) of the Commission's rules, was explicitly intended to offer protection to existing stations from the encroachment on their service areas by applicants for new stations. It bars the application for a public coast station which would duplicate more than 20% of the service area of an existing station, with two exceptions. The first exception, § 81.303(b)(1), requires a showing by the applicant that the proposed station would be at least 30 miles from the existing station and would primarily serve another boating locality. A boating locality is a port, marina or harbor with docking facilities for not less than 10 commercial or 50 noncommercial radio equipped vessels. The second exception, § 81.303(b)(2), requires a detailed showing that the channel occupancy rate of the existing station exceeds 50% during its busiest hours of operation.

8. When discussing this amendment in Docket No. 19360, the Commission stated that "we believe these new stations should be given a reasonable opportunity to commence and continue operations and, along with earlier stations, become economically viable. As our VHF program develops and the nature and extent of the need for additional types of service becomes more clear we can reconsider the matter".[3] Since Docket 19360 was adopted and released, local service (VHF) public coast stations have become well established along the seacoasts and inland waterways of the contiguous 48 states. They provide the public correspondence service that most small noncommercial and recreational vessels now use. Commercial vessels and their related interests also use these stations extensively.

[1] High seas public coast stations provide a telecommunication service which is world-wide in coverage. This service is primarily used by ocean-going vessels for both commercial and personal traffic. Regional public coast stations provide coastal harbor service. The coverage varies widely with the time of day and other factors which affect propagation such as season, atmospheric conditions, sun spots, etc. Distances in excess of 1000 miles are possible at certain times, but may be limited to less than 100 miles at other times.

[2] Report and Order, Docket No. 19360, 35 FCC 2d 842 (1972).

[3] Id. at 848.

Deletion of § 81.303(b)

PR Docket No. 80–144

9. In the Notice of Proposed Rule Making in PR Docket No. 80–144, the Commission proposed to delete from the rules § 81.303(b) and its two exceptions. The Commission felt that this would provide multiple coverage, especially in high density areas, thus permitting a choice of service to users which would operate to reduce costs and generally improve service. Under this proposal, applicants desiring to establish public coast stations and to compete in a specific service area would be licensed until the nine channels are exhausted without regard to duplication of service. Channels would be assigned on a first-come first-served basis, and no showing of channel occupancy would be required of an applicant intending to establish a new station in the service area of an existing station.

10. The proposed rule changes substantially differ from the existing scheme. The proposed changes favor new entry. The existing rules disfavor new entry. This is so because an applicant for a first frequency in a market where there is an existing station presently needs to show a 50 percent frequency occupancy at the existing station under § 81.303(b)(2). An existing station, however, to be eligible for an additional frequency, must make a 40 percent occupancy showing under § 81.304(b)(22)(ii). Thus, an existing station is always eligible for an additional frequency before a new applicant is eligible for its first frequency assignment.

11. Under the proposed rule changes, which we are adopting, new entry is favored because a new station applicant need make only a general public interest showing while an existing station must make the 40 percent occupancy showing before it can obtain an additional frequency. Many existing coast station operators understandably strongly opposed this arrangement. Moreover, many comments by existing coast station licensees suggested that they be given preferences in applying for remaining frequencies on the theory that they be given an incentive to improve their services. We feel that the marketplace, particularly a competitive one, should provide adequate incentive to do so.

12. We believe that competition and free entry are in the public interest where the circumstances warrant it. The VHF public coast station market is such a case. The capital cost of entering this market is relatively low, allowing ease of entry if there are no regulatory barriers. Many existing coast station licensees, suggested that the Commission should not adopt competition and free entry "in the abstract" but should consider the peculiar aspects of the coast station market structure, the peculiarities of interconnect arrangements and the potential for "cream skimming" due to such factors as seasonal traffic peaks. We are reluctant to reflect such considerations in our rules. These variables may not be universally found in all markets. In most cases, we expect that the availability of more than one service offeror to a ship in a given area will result in either lower costs or improved services. This should be particularly the case in the maritime service where the special needs and characteristics of the maritime communicator are more likely to be responded to in a competitive environment. However, these applications will continue to be subject to and processed in accordance with Section 309 of the Act.

Thus any existing station will continue to be able to petition to deny a specific application based on facts peculiar to a given situation which would raise a substantial and material question of fact whether the public interest would be served by the grant of the application. See Section 1.962 of our rules.

13. To alleviate the concerns of existing coast stations about speculative or undercapitalized entry we are adopting a rule which will require all recipients of these frequencies to place them in operation within eight months of grant. This was suggested to us in the comments as a deterrent to speculative or undercapitalized new entry. This approach has been successfully used in the land mobile and maritime services with respect to initial frequency assignment.

14. One of the commenters expressed the concern that easing entry might invite "captive use" of these frequencies, that is limited coast station eligible might apply for these duplex, dedicated frequencies with no real intention of being open for public correspondence.[4] We do not believe this is a serious concern. This abuse is theoretically possible under the existing rule yet we have no evidence that it has occurred. Moreover, the rules clearly require stations of this class to be open to the public. Failure to provide a public correspondence service would be grounds for forfeiture of the license.

[4] A limited coast station is a private station on land which communicates only with the licensee's vessels for business or operational purposes. It is not open to public correspondence.

15. One of the commenters suggested that in easing entry, the Commission should also ease exit where automated interconnected systems, such as the one authorized on the Mississippi River, will compete with the current manually operated system. We are not adopting this suggestion at this time because we feel it is premature.[5] It appears there will remain some demand for manual service. Whether the demand will be sufficient to support all existing manual stations is unclear because we have no experience where automated and manual operations have been in direct competition for a large number of vessels. As we acquire experience in this area, we will be willing to revisit this concern.

16. One commenter, station WAH, suggested that it be given special protection from competitive entry because it uniquely receives competition from foreign coast station operations. We are not adopting this suggestion because we do not believe that foreign competition is materially different from domestic competition in the context of this rule making.

Financial Qualifications

SS Docket No. 78–145

17. In SS Docket No. 78–145, the Commission proposed to amend its rules to require an applicant for a new public coast station to demonstrate financial ability to construct the station and to operate the station for one year.

This standard had been applied to past applicants for public coast stations and, in effect, had become Commission policy.[6] This rulemaking would have incorporated this policy into the rules. Of the eight commenters responding to our original proposal to incorporate the financial standard for public coast station applicants into the rules, four supported it without any changes while the other four recommended certain

[5] Pursuant to Section 214 of the Communications Act, 47 U.S.C. 214, coast station licensees may discontinue service by obtaining from the Commission a certificate that neither the present nor future public convenience and necessity will be adversely affected thereby.

[6] See *In the Matter of West Indies Communications, et al.*, Docket No. 19367, 33 FCC 2d 851, 853 (1979); the Review Board stated that the test to determine the financial qualifications of a public coast station applicant should be: "(1) that it has available sufficient funds for construction, and (2) that the operation can be financed for a period of one year after construction." The one year test was taken from the standard the Commission established for commercial broadcast applicants. The standard for commercial broadcast applicants has subsequently been shortened to three months and is merely certified to by the applicant, see *In the Matter of Revision of Application for Construction Permit for Commercial Broadcast Stations*, released October 19, 1981, FCC 81–278, at page 2.

UMI

modifications to ease the standards. In response to our reopening of Docket 78–145 for additional comment, four commenters addressed the issue and all favored some form of financial qualification.

18. We feel that adoption of the proposed financial showing might constitute a potential barrier to entry into this service particularly with respect to VHF local service stations, many of which are licensed to relatively small scale entrepreneurs. They would certainly impose additional paperwork burdens on applicants. We feel that the eight month requirement to construct and begin operation should be a deterrent to "frequency hoarding" or undercapitalized speculative entry. Further, ordinary business prudence will operate to discourage frivolous ventures. For these reasons, we are not adopting the rule amendments proposed in Docket 78–145.[1]

19. For the reasons set forth above, it is ordered, That the rule amendments proposed in Docket 78–145 are not adopted and the proceeding is terminated.

20. It is further ordered, That the proposed amendments to § 81.303 of the rules in Docket 80–144, as modified above, are adopted effective June 13, 1983, in accordance with the attached appendix and the proceeding is terminated.

21. For further information on this proceeding, contact Robert DeYoung at (202) 632–7175.

Secretary.

Appendix

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

Part 81 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. Section 81.61 is revised to read as follows:

§ 81.61 Time in which station is placed in operation.

In those cases in which a new license is issued, or in which additional operating frequencies have been authorized, if the station or frequencies authorized have not been placed in operation within 8 months from the date of the grant, the authorization shall be invalid and must be returned to the Commission for cancellation.

§ 81.303 [Amended]

2. In § 81.303, paragraphs (b), (d) and (e) are removed and designated [Reserved].

[FR Doc. 83–12864 Filed 5–12–83; 8:45 am]

BILLING CODE 6712–01–M

[1] The Commission has also eliminated the financial qualifications requirement in the Public Mobile Radio Services, see Report and Order, CC Docket No. 80–55, adopted September 10, 1980, 82 FCC 2d 152.

Proposed Rules

Federal Register
Vol. 48, No. 94
Friday, May 13, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 226

Child Care Food Program; Miscellaneous Amendments

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule makes several editorial changes and clarifications to the August 20, 1982, final Child Care Food Program (CCFP) regulations. In addition, some substantive changes to those regulations are being proposed. The number of reviews of child care facilities which State agencies are required to conduct is reduced. The appeal process is clarified. The application of alternate approval procedures in backlog situations is rescinded. Limitations are placed on the State agency's authority to waive certain overclaims. Restrictions on sponsoring organizations' use of interest bearing accounts are removed. State agencies' administrative flexibility is increased in several areas. Family-style meal service is presented as an option for institutions. Certain institution responsibilites with respect to licensing and tax-exempt status are emphasized.

Interested parties are invited to comment on this proposal.

DATES: Comments must be received on or before July 12, 1983 to be assured of consideration in the final rule.

ADDRESS: Written comments should be sent to Beverly Walstrom, Chief, Policy and Program Development Branch, Child Care and Summer Programs Division, Food and Nutrition Service, U.S. Department of Agriculture, Alexandria, Virginia 22302.

FOR FURTHER INFORMATION CONTACT: Beverly Walstrom or Mary Lou Wheeler at the above address or by telephone at (703) 756–3888. Copies of all written comments will be made available for review during business hours at Room 416, 3101 Park Center Drive, Alexandria, Virginia 22302.

SUPPLEMENTARY INFORMATION:

Classification

This rulemaking has been reviewed in accordance with Executive Order 12291 and has not been classified as major because it will not have an annual effect on the economy of $100 million, will not cause a major increase in costs or prices, and will not have a significant economic impact on competition, employment, investment productivity, innovation or on the ability of U.S. enterprises to compete with foreign based enterprises. This rule has also been reviewed with regard to the requirements of Pub. L. 96–354. The Administrator of the Food and Nutrition Service has certified that this rule does not have a significant economic impact on a substantial number of small entities.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping requirements that are included in this proposed rule will be submitted for approval to the Office of Management and Budget OMB). They are not effective until OMB approval has been obtained.

Background

The Child Care Food Program (CCFP) is authorized by Section 17 of the National School Lunch Act. The Department is now proposing to clarify and amend several provisions in the Child Care Food Program regulations in response to recommendations from those involved in Program administration.

1. Review Requirements

At the present time, State agencies are required by Federal regulations at 7 CFR 226.6(k) to review 33.3 percent of all institutions annually. With respect to centers, the State agency is to review 15 percent of all child care centers under each sponsoring organization reviewed, and 10 percent of the first 1,000 homes and five percent of all homes over 1,000 operated by each sponsoring organization reviewed. The Department finds, however, that this requirement strains the resources of many State agencies to the point that they have insufficient staff time to respond to special review problems. For example, it is frequently desirable to have reviewers make more than one visit to large sponsors, problem facilities or new facilities, but because of the necessity to meet the review requirements in the regulations, it is not possible to make additional visits. Moreover, the workload posed by the current requirement sometimes does not allow sufficient time for detailed and thorough reviews.

In response to this situation, the Department is proposing to reduce the State agency monitoring requirements in § 226.6(k). The Department proposes to require States to review 15 percent of the sponsor's first 25 centers or three centers, whichever is less, provided at least one center is reviewed. If the sponsor has more than 25 centers, the State agency will review eight percent of the centers in excess of 25, up to a maximum of 25 reviews. The review requirements for sponsors of day care homes are proposed as follows: 10 percent of the first 50 homes, with a minimum of two reviews (unless the sponsor operates only one home), seven percent of the next 150 homes, five percent of the next 800 homes, and two percent of all remaining homes. Under this system, the number of reviews required of State agencies would be reduced for nearly all sponsors. The greatest reductions, however, would be in the case of very large sponsors. For example, when reviewing a sponsor with 500 homes, the State agency would be required to review 30 homes rather than the 50 currently required, a reduction of 40 percent.

These reductions will allow State agencies greater flexibility to reallocate their resources to such areas of the Program as training, technical assistance or administration, which, in turn, can result in a more efficient and effective operation. The Department does not believe that Program accountability will be compromised by this change. Reviews of centers will be only slightly reduced. While the reduction in home reviews is somewhat greater, the Department's experience suggests that trends in a sponsor's operations can be determined from a smaller number of reviews. Moreover, States will have greater flexibility to concentrate review activity in problem areas or to follow up on corrective action. In many cases, therefore, this

VOL 48 ISS 94 MAY 13 1983 UMI

provision will actually enhance Program accountability.

The Department is proposing to revise the specified content of reviews. Currently, § 226.6(K) specifies that Program reviews shall assess institutional compliance with meal requirements, family-size and income documentation where applicable, financial management standards, and non-discrimination regulations. In order to provide State agencies with greater flexibility, the Department is proposing to amend the rule to require that State agencies conduct reviews to ensure compliance with the CCFP regulations and with any applicable instructions of FNS and the Department.

The Department is also proposing to amend § 226.16 (d) (4) (ii), the requirements for sponsoring organizations to review the day care homes they sponsor. The current regulations require that each home be visited by the sponsor at least three times annually. However, the Department considers that the number of visits can be varied to some degree, depending upon the extent to which individual providers need assistance from the sponsor. Some providers need to be visited more often than three times a year, while others do not need such frequent visits. The Department is proposing, therefore, that with FNSRO approval, State agencies may allow sponsors to make an average of three annual visits to their homes, provided that each home is visited at least twice a year. FNSRO approval of a State agency's request to exercise this option will be based on a finding that the ability to reallocate visits will enable affected sponsors to allocate their resources more efficiently and to manage their providers more effectively.

2. Interest Bearing Accounts

Section 226.16(j) requires sponsoring organizations to maintain all Program payments in non-interest bearing accounts between the date of receipt from the State agency and the date of disbursement. This provision was intended to ensure that advance payments and start-up payments were not misused by participants but were disbursed in accordance with Program regulations. However, Departmental Regulations (7 CFR 3015) do not establish such a restriction for State agency administered programs. Therefore, the Department is proposing to delate this paragraph from the regulations. Sponsors wishing to open interest bearing accounts will be subject to the laws and policies of the States in which they operate, unless they are participating in a Program administered directly by FNS. In these latter cases, sponsors will be subject to OMB circulars, which require that any interest earned on advance payments or start-up payments must be returned to FNS.

3. Appeals Procedures

The Department is proposing to clarify several provisions dealing with appeals. First, in § 226.6(j)(3) the Department proposes to emphasize that the State agency may, if it chooses, be represented at the appeal proceeding. The Department never intended that the State agency should be excluded from these proceedings. The State agency's presence can, in fact, prevent needless confusion, because a representative can explain the State's reason for taking the action being reviewed and can answer questions posed by the review official. As a result of this amendment, the Department is also proposing to amend paragraph (j)(4) to require that the State agency, as well as the appellant, be given 10 days notice of the time and place of any hearing.

Second, in § 226.6(j)(9) the Department is proposing to clarify the procedure governing reimbursement for meals served during appeals of terminations. At the present time, terminated institutions which appeal the termination action and continue serving meals according to CCFP regulations during the period of the appeal are eligible for reimbursement for those meals regardless of the outcome of the appeal. The Department is proposing to allow reimbursement in these instances only if the institution's appeal is successful; whenever the appeal officer sustains the State agency's termination action, reimbursement will not be paid. This policy is already in affect in the Summer Food Service Program, and the Department considers it desirable to have appeal procedures as consistent as possible for the two programs. Moreover, institutions are terminated only if they have been found to be seriously deficient and have failed to correct their deficiency within a reasonable period of time. Since the grounds for termination frequently involve financial mismanagement or fraud, the Department does not believe it is prudent to continue paying Program monies to such institutions unless an administrative review has determined that the State agency acted improperly in terminating the institution. This amendment will not impose an inordinate hardship on institutions which were improperly terminated, since they will receive reimbursement for eligible meals served. This provision will, however, prevent reimbursement for meals served by institutions which are seriously deficient in their operation of the Program.

The Department also proposes to amend § 226.6(j) to specify that States which have their own appeal procedures may use these procedures rather than the CCFP procedures, as long as the following conditions are fulfilled: (1) Appellants are assured of a fair and impartial hearing before an independent offical, at which they are allowed to be represented by legal counsel, (2) decisions are rendered in a timely manner, (3) appellants are afforded the right to either a review of the record with the right to file written information, or a hearing which they may attend, and (4) adequate notice is given of the place, date and procedures of the hearing.

Also, the Department is proposing to steamline the appeal procedure by requiring State agencies to advise participants of the appeal procedures only once each year rather than each time an appealable action is taken, as is currently the case. The Department believes that all participants in the Program must be aware of the proper procedures to be followed in requesting an administrative review of a State agency's action. The Department also recognizes, however, that providing a complete description of the appeal process each time an appealable action is taken can be very time consuming for the State agency without providing necessary information to the participant. Therefore, the Department is proposing to amend paragraph (j) to require State agencies to advise participants annually of all appeal procedures. The Department recommends that this information be made available with other application renewal material. Paragraph (j)(1) will then be revised to delete the requirement that the appeal procedure be explained each time an adverse action is taken. The proposed revision, however, will still require State agencies to advise participants of their right to appeal each time an adverse action is taken.

Finally, a change has been made in this rule in order to clarify the status of Federal audit findings as they relate to the appeals process. Section 226.6(j) lists various types of State agency actions which may be appealed. These include the review of a denial of an application for participation, a denial of a start-up payment or an advance payment, a denial of a claim for reimbursement, or a termination action, among others.

The review procedure is intended to provide administrative redress to participants who believe they have been adversely affected by arbitrary or capricious State agency actions. In some instances, however, action must be taken because of situations or events beyond the jurisdiction of a State agency, specifically as a result of Federal Audit findings.

It was never intended that, under the appeals procedures, State hearing officials would be able to waive Federal Claims against State agencies by overturning the State's action which has been taken against an institution as a result of Federal audit findings. While the hearing official's determination is the final administrative determination to be afforded to the appellant, only the Secretary has the authority to adjust, settle, compromise or deny any Federal claim arising under the Program. Federal claims against a State cannot be dismissed by State hearing officials.

This rule, therefore, proposes a new provision (§ 226.6(j)(11)), which clarifies that when an appeal results in the dismissal of a claim against a sponsor which the State agency asserted based upon Federal audit findings, FNS may assert a claim against the State agency in accordance with the procedures outlined in § 226.14(b).

4. Audit Disregard

The proposed regulation would amend § 226.8(e) to allow FNS or the Office of the Inspector General to disregard an overpayment which does not exceed $100. In the case of State agency administered programs, the amount will be established by State law, regulations or procedures. The level in the current regulations ($35) has not been adjusted for several years, and the Department is proposing this change in recognition of that fact. The disregard level for the Summer Food Service Program (SFSP) is $100. The Department considers, therefore, that raising the level for the CCFP is appropriate at this time.

5. Meal Requirements

The Department is proposing to make three amendments to the meal pattern requirements, all of which represent clarifications of existing policies. The first two amendments are minor editorial changes. In discussing supplements, the current regulations state in § 226.20(a)(3) that "supplemental food shall be served between other meal types * * *" This statement could be interpreted as prohibiting supplemental food in the morning or evening. The Department did not intend such a prohibition, however, and this proposed rule deletes the words "be served between other meal types and." It must be noted, however, that the time restrictions governing meal service would still apply. Secondly, § 226.20(d)(2) currently indicates that additional food may be served for lunches and suppers but makes no mention of supplements. There was no intention to leave supplements out of this passage, and the Department is proposing to correct this oversight.

Finally, the proposed regulations state the department's position that family style meal service may be employed by institutions. The CCFP has long been recognized as a means not only for providing nutritious meals to children, but also for helping them to develop good eating habits which they will retain in later years. Both of these nutritional objectives can be effectively pursued through family style meal service, especially when those objectives are stressed by supervising adults through personal example and assistance to children during the meal. While no provision on family style service appears in the current regulations, the Department did not intend to preclude institutions from employing this technique, provided that meal requirements are observed. Therefore, the Department is proposing to add § 226.20(o) for clarification.

6. Waiver of Claims

Section 226.14(b) authorizes State agencies to waive disallowances or collection of overpayments for meal pattern violations in the case of institutions which prepare their own meals if the State determines that the institution has taken appropriate corrective action. This provision was intended to give State agencies a degree of flexibility to deal with situations in which the interests of the Program would be served through corrective action. This authority, however, does not extend to overpayments established by Federal audits. Federal audits are independent of the State, and the findings of those audits are beyond the State's jurisdiction. Therefore, the Department is adding a statement to this provision specifying that a State's waiver authority may not be exercised if the overpayment in question was established by a Federal audit. this prohibition extends to situations in which an administrative review officer dismisses a claim against an institution which has been asserted because of a Federal audit finding. As noted in the discussion of appeal provisions above, FNS may assert a claim against the State agency in such situations.

7. Eligibility Requirements

The Department is proposing two amendments which affect eligibility criteria. The proposed amendment to § 226.6(d)(1) is designed to ensure that institutions admitted to the Program on the basis of Federal approval by another program continue to maintain a safe and healthy environment for children. The Department has traditionally allowed institutions to satisfy the licensing/approval criterion for Program eligibility by demonstrating that they are participating in another Federal program, such as Head Start. This policy was adopted because institutions must meet performance standards in order to be admitted to these programs, and these standards require participants to obtain State or local licensing, where available. It has come to the Department's attention, however, that institutions participating in Federal programs have occasionally continued their participation in those programs despite having had their licenses revoked. As a result, they have continued to participate in the CCFP as well. This situation has the potential of permitting participation by institutions whose environments are detrimental to the health and safety of enrolled children, and the Department considers that it has an obligation to ensure that Program benefits are made available only to institutions which offer high quality child care. Therefore, the Department is proposing in § 226.6(d)(1)(i) that institutions will not be eligible for the CCFP unless they maintain their compliance with State or local licensing requirements where available, regardless of participation in other Federal programs. Institutions which are found to be no longer in compliance with licensing requirements will be disqualified from the CCFP unless they obtain licensing.

The second proposal amends § 226.15(a) to clarify the situation when an institution is moving toward obtaining tax-exempt status from the Internal Revenue Service (IRS). Currently, institutions which have not yet received their nonprofit certification from IRS may participate pending consideration of their applications. If IRS has not acted within 12 months, the institution is terminated from the CCFP unless it can demonstrate that it has complied with all requests from IRS for additional information. Ultimately, the responsibility for obtaining evidence of compliance rests with the institution, not with the administering agency. There has, however, been some confusion on this point. Therefore, the Department is proposing to add a clarification to § 226.15(a) emphasizing that obtaining evidence of compliance is the institution's responsibility.

VOL 48 ISS 94 MAY 13 1983 UMI

8. Administrative Flexibility/Program Simplification

Finally, the Department is proposing several amendments designed to increase State agencies' flexibility in administering the Program, to simplify Program administration and to reduce paperwork.

a. *Readmission of seriously deficient institutions.* The first proposal is intended to give State agencies greater authority in determining when to readmit institutions which have been terminated because they have been seriously deficient in operating the Program. Currently, § 226.6(c) specifies that an institution which has been terminated because it has been seriously deficient shall not be eligible to participate in the Program for the remainder of the fiscal year of its termination and the next two fiscal years unless the State agency, with FNS concurrence, determines that appropriate corrective action has been taken. Some State agencies have expressed concern that this passage can be interpreted as requiring the institution's readmission after the second subsequent fiscal year regardless of whether or not the serious deficiency has been corrected. The Department has no wish to restrict State agencies' ability to enforce the provisions of the regulations. Since serious deficiencies warranting termination generally involve fiscal mismanagement or health and safety violations, the Department considers that institutions which have such problems and do not correct them should not be permitted to operate in the Program. Therefore, the sentence specifying a waiting period for readmission to the Program is being deleted in order to emphasize that institutions terminated for serious deficiencies cannot be readmitted to the Program unless they satisfy the State that corrective action has been taken.

b. *Health/sanitation and fire/safety inspections.* A second proposal aimed at Program simplification involves the health, fire and safety permits required of facilities which are admitted to the Program using the alternate approval provision. Currently, § 226.6(d)(2)(C) (1) and (2) require either current health/sanitation and fire/building safety permits or satisfactory reports of inspections conducted by local authorities within the past 12 months. It has come to the Department's attention, however, that local authorities will not always conduct health or fire and safety inspections annually. Consequently, many facilities which have been admitted to the Program after an initial inspection can find themselves threatened with termination despite the fact that they are maintaining a healthful and safe environment for children. Therefore, to avoid unnecessary complications for both facilities and State agencies, the Department is proposing to replace the 12 month requirement with a 36 month requirement in both passages. This change will allow State or local officials a greater degree of flexibility to determine what constitutes a current permit or approval while still ensuring that facilities are inspected periodically.

c. *Commodities/cash-in-lieu of commodities.* The Department is proposing to delete the provision in § 226.6(g) of the current regulations permitting institutions to switch from receiving commodities to receiving cash or vice versa during the school year. Because commodities are provided in advance to State distributing agencies on the basis of the initial annual preferences stated by institutions, it is highly unlikely that any distributing agency would approve an institution's request for a switch during the school year. The current option, therefore, serves only to create additional paperwork for State agencies and State distributing agencies to no purpose.

d. *Corrective action plans.* Currently, § 226.7(c) requires State agencies to submit a plan for correcting serious deficiencies noted during management evaluations within 60 days of receiving the management evaluation report. The Department considers that the 60-day time limit may be too restrictive in some cases, depending on the nature and extent of the deficiency. The Department is proposing, therefore, to allow a greater time limit for submission of corrective action plans when the State demonstrates good cause as to why such plans cannot be developed within 60 days. The Department considers that this provision will allow for greater flexibility on the part of both the States and FNS in correcting serious and complicated deficiencies.

e. *Sponsor/home agreements.* Section 226.18(b) of the regulations currently requires State agencies to develop written agreements for sponsoring organizations to execute with their day care providers. These agreements specify the rights and responsibilities of both parties and cover such areas as training, review activity, meal pattern responsibility, etc. The Department considers such agreements essential to the proper administration of the day care home segment of the CCFP. However, it is not always necessary for State agencies. In many instances, it can be advantageous for sponsors to have the authority to develop their own agreements. For example, many State and county government organizations already have their own agreements, which can be as effective as an agreement developed by the State agency. Therefore, in the interest of potential paperwork reduction for State agencies and increased State and local flexibility, the Department is proposing to make the development of sponsor/home agreements a State option. State agencies can elect to continue developing this agreement, or States may require that sponsors develop the agreement themselves, subject to the approval of the State agency.

The current regulations at § 226.18(b)(8) also specify that sponsor/provider agreements shall contain a clause permitting either party to terminate the agreement for reasons of convenience at any time. This provision was intended to cover situations in which a sponsor could no longer continue its operations or a home provider no longer wished to participate in the Program. It has come to the Department's attention, however, that in some situations, providers are terminating their association with one sponsor and executing new agreements with another sponsor with little or no notice and without cause. While the Department does not wish to abridge providers' freedom to change sponsors, it must be noted that such a situation increases the potential for dual participation of homes in the Program. It can, moreover, be unfair to sponsors, who project their budgets over an entire year, based on the number of homes they expect to administer, and often incur expenses early in the year for training and materials. If, after incurring these expenses, sponsors lose a substantial number of homes, it might not be possible for them to recoup their outlays. For these reasons, some States have indicated that they wish to limit terminations for convenience, and the Department is proposing to amend § 226.18(b)(8) to specify that States may take such action if they so elect. The Department emphasizes that this amendment would not affect the right of either party to terminate the agreement for cause. The Department considers that this latter clause sufficiently protects providers in the event their sponsor is not fulfilling its responsibilities.

f. *Alternate approval in backlog situations.* Section 226.6(d)(4) of the current regulations requires State agencies to apply alternate approval criteria to otherwise eligible facilities which have applied for licenses but have not received determinations because of a backlog at the licensing agency. This provision was intended to mitigate situations in which facilities offering adequate child care might be delayed in receiving CCFP benefits through no fault of their own. The Department's experience has shown, however, that this provision creates a significant administrative burden for State agencies. Moreover, this requirement places the State agency in the untenable position of deciding on the adequacy of facilities for which licensing is available. The Department believes this function should rest solely with licensing agencies. Therefore, since this employment of alternate approval is not mandated by the legislation governing the CCFP, the Department is proposing to rescind this provision. The Department will also delete the reference to this provision in § 226.6(d)(3)(iii).

9. Clarifications/Editorial Changes

The Department is proposing two editorial amendments. The first of these would specify in § 226.6(m) that institutions are responsible for ensuring that all deficiencies identified during reviews are corrected. This passage is somewhat ambiguous, as currently written, and the Department is proposing this minor amendment in order to avoid any possible misunderstanding. The second such amendment is intended to streamline the regulations by deleting the list of items in § 226.6(b) which are required to be considered during the application approval process. Since all of these annual requirements are discussed in detail in § 226.6(e), the Department does not consider that their reiteration in § 226.6(b) serves any useful purpose.

10. State Agency Review Systems

While the Department is not proposing a specific amendment at this time, it wishes to receive comments on whether or not States should be permitted the option to substitute their own review systems for the review requirements in § 226.6(k), provided they first receive approval from the Food and Nutrition Service (FNS). The Department considers that such a provision could better enable States to respond to their own unique situations. For example, State agencies may wish to develop a system of statistical sampling which is reliable but does not correspond to the minimum requirements in these regulations, or for some States fewer visits may be justified because most of the State's sponsors operate effectively and efficiently.

Listing of Subjects in 7 CFR Part 226

Day care, Food assistance programs, Grant programs—health, infants and children, Surplus agricultural commodities.

PART 226—[AMENDED]

Accordingly, the Department is proposing to amend 7 CFR 226 as follows:

1. By amending § 226.6 as follows: Revising paragraph (b); in paragraph (c), revising the third sentence; in paragraph (d), adding a clause at the end of paragraph (1)(i), in paragraphs (2)(i)(C)(*1*) and (2)(i)(C)(*2*), replacing the phrase "within the past 12 months" with "within the past 36 months"; in paragraph (3), placing a period after the word "standards" in clause (ii) of the second sentence, and removing clause (iii); and removing paragraph (d)(4); in paragraph (g), removing the last sentence; in introductory paragraph (j), adding two sentences after the first sentence and revising the last sentence; revising paragraph (j)(1); in paragraph (j)(3), adding a sentence at the end of the present text; revising paragraph (j)(4); placing a period after the word "action," removing the word "and," and adding a clause at the end of the third sentence in paragraph (j)(9); and adding a new paragraph (j)(11); in paragraph (k), removing the third and fourth sentences and adding four new sentences; and revising the first sentence of paragraph (m), to read as follows:

§ 226.6 State agency administrative responsibilities.

* * * * *

(b) *Application approval.* Each State agency shall establish an application procedure to determine the eligibility under this part of applicant institutions, and facilities for which applications are submitted by sponsoring organizations. State agencies, by written consent of the State agency and the institutions, shall renew agreements with institutions not less frequently than annually. A State agency may not execute an agreement to be effective during two fiscal years but may nevertheless establish an ongoing renewal process for the purpose of reviewing and approving applications from participating institutions throughout the fiscal year. Any institution applying for participation in the Program shall be notified of approval or disapproval by the State agency in writing within 30 calendar days of filing a complete and correct application. If an institution submits an incomplete application, the State agency shall notify the institution within 15 calendar days of receipt of the application and shall provide technical assistance, if necessary, to the institution for the purpose of completing its application. Any disapproved applicant shall be notified of its right to appeal under paragraph (j) of this section.

(c) *Denial of applications and termination of institution.* * * * Following such termination, the institution shall not participate in the Program until such time as the State agency, with FNS concurrence, determines that the institution has taken appropriate corrective action to prevent recurrence of the deficiencies that led to termination from the Program. * * *

(d) *Licensing/Approval.* * * *

(1) *General.* * * *

(i) Are licensed or approved by Federal, State, or local authorities, provided that institutions which are approved for Federal programs on the basis of State or local licensing shall not be eligible for the Child Care Food Program if they are out of compliance with licensing requirements; or

* * * * * *

(2) *CCFP child care standards.*

(i) * * *

(C) *Safety and Sanitation. (1)* A current health/sanitation permit or satisfactory report of an inspection conducted by local authorities within the past 36 months shall be submitted.

(2) A current fire/building safety permit or satisfactory report of an inspection conducted by local authorities within the past 36 months shall be submitted.

* * * * * *

(g) *Commodity distribution.* The State shall annually inquire as to the preference of each institution for commodities or cash-in-lieu of commodities. Each institution electing cash-in-lieu of commodities shall receive such payments. Each institution which elects to receive commodities shall have commodities provided to it unless the State agency, after consultation with the State commodity distribution agency, demonstrates to FNS that distribution of commodities to the number of such institutions would be impracticable. The State agency may then, with the concurrence of FNS, provide cash-in-lieu of commodities for all institutions. A State agency request for cash-in-lieu of all commodities shall be submitted to FNS not later than May 1 of the school year preceding the school year for which the request is made. The State agency shall, by June 1 of each year, submit a list of institutions which have elected to

VOL
48
ISS
94
MY
13
1983
UMI

receive commodities to the State commodity distribution agency, unless FNS has approved a request for cash-in-lieu of commodities for all institutions. The list shall be accompanied by information on the average daily number of lunches and suppers to be served to children by each such institution.

* * * * *

(j) *Institution appeal procedures.* * * * State agencies may use State appeal procedures provided they meet the following requirements: Appellants are assured of a fair and impartial hearing before an independent official at which they may be represented by legal counsel, decisions are rendered in a timely manner, appellants are afforded the right to either a review of the record with the right to file written information, or a hearing which they may attend in person, and adequate notice is given of the place, date and procedures of the hearing. The State's procedures for conducting administrative reviews shall be made available in writing to all participants at least once each year. If the State has not established appeal procedures or the procedures do not meet these four criteria, the State agency shall observe the following procedures at a minimum:

(1) The institution shall be advised in writing of the grounds on which the State agency based its action. The notice of action, which shall be sent by certified mail, return receipt requested, shall also include a statement indicating that the institution has the right to appeal the action;

* * * * *

(3) * * * A representative of the State agency shall be allowed to attend the hearing to respond to the appellant's testimony and to answer questions posed by the review official;

(4) If the appellant has requested a hearing, the appellant and the State agency shall be provided with at least 10 calendar days advance written notice, sent by certified mail, return receipt requested, of the time and place of the hearing;

* * * * *

(9) * * * Institutions electing to continue operating while appealing terminations shall not be reimbursed for any meals served during the period of the appeal if the State agency's action is upheld; and

* * * * *

(11) In cases where an appeal results in the dismissal of a claim against an institution which was asserted by the State agency based upon Federal audit findings, FNS may assert a claim against the State agency in accordance with the procedures outlined in § 226.14(c).

(k) *Program assistance.* * * * Program reviews shall assess institutional compliance with the provisions of this Part and with any applicable instructions of FNS and the Department. The State agency shall annually review 33.3 percent of all institutions, including reviews of facilities operated by sponsoring organizations. With respect to sponsors of centers, the State agency shall review as follows: for the first 25 centers, the lesser of three centers or 15 percent of the Program's centers (with a minumum of one center) shall be reviewed; for all remaining centers, eight percent of the centers in excess of 25 shall be reviewed, up to a maximum of 25 centers reviewed. For sponsors of day care homes, the State agency shall review 10 percent of the first 50 homes, with a minumum of two reviews (unless the sponsor has only one home), seven percent of the next 150 homes, five percent of the next 800 homes, and two percent of all homes over 1,000. * * *

* * * * *

(m) *Child Care Standards Compliance.* The State agency shall, when conducting administrative reviews of child care centers, outside-school-hours care centers, and day care homes approved by the State agency under paragraph (d)(3) of this section, determine compliance with the child care standards used to establish eligibility, and the institution shall ensure that all violations are corrected. * * *

* * * * *

2. In § 226.7(c), by adding a sentence between the second and third sentences, to read as follows:

§ 226.7 State agency responsibilities for financial management.

* * * * *

(c) *Management Evaluations and Audits.* * * * If a State makes a showing of good cause, however, FNS may allow more than 60 days in which to submit a plan. * * *

* * * * *

3. By revising the first sentence of § 226.8(e), to read as follows:

§ 226.8 Audits.

* * * * *

(e) In conducting management evaluations or audits for any fiscal year, the State agency, FNS or OIG may disregard overpayment which does not exceed $100 or, in the case of State agency administered programs, does not exceed the amount established by State law, regulations or procedures as a minimum for which claims will be made for State losses generally. * * *

* * * * *

4. By amending § 226.14 as follows: by adding a new sentence to the end of paragraph (b), to read as follows:

§ 226.14 Claims against institutions.

* * * * *

(b) * * * However, the State agency shall not disregard any overpayments or waive collection action arising from the findings of Federal audits.

* * * * *

5. By amending § 226.15 as follows: In 226.15(a) by adding a sentence between the second and third sentences, to read as follows:

§ 226.15 Institution provisions.

(a) *Tax-exempt status.* * * * It shall, however, be the responsibility of the institution to document that it has complied with all requirements of IRS and has provided all information requested. * * *

* * * * *

6. By amending § 226.16 as follows: By revising paragraph (d)(4)(ii); by removing paragraph (j), and by redesignating paragraph (k) as paragraph (j) to read as follows:

§ 226.16 Sponsoring organization provisions.

* * * * *

(d) * * *

(4) * * *

(ii) Three times each year at each day care home, provided at least one review is made during each day care home's first four weeks of Program operations and not more than six months elapse between reviews. However, subject to FNSRO approval, based on a finding that improved efficiency and more effective management warrant such approval, State agencies may allow some or all of their sponsors to conduct reviews an average of three times each year per day care home, provided that each day care home is reviewed at least twice each year and at least one review is made during each day care home's first four weeks of Program operations; and

* * * * *

7. By amending § 226.18 as follows: Adding a new sentence after the second sentence of introductory paragraph (b) and revising paragraph (b)(8), to read as follows:

§ 226.18 Day care home provisions.

* * * * *

(b) * * * The agreement may be developed either by the State agency or, if the State agency elects, by the sponsor with the approval of the State agency. * * *

* * * * *

(8) The right of the sponsoring organization or the day care home to terminate the agreement for cause or, subject to stipulations by the State agency, convenience; and

* * * * *

8. By amending § 226.20 as follows: In introductory paragraph (a)(3), by removing the words "be served between other meal types and"; in paragraph (d)(2), by revising the title; and by adding paragraph (o) to read as follows:

§ 226.20 Requirements for meals.

(a) * * *

(3) Supplemental food shall contain two of the following four components:

* * * * *

(d) *Additional food* * * *

(2) Lunch, supper or supplemental food. * * *

* * * * *

(o) *Family-style meal service.* Meals may be served in a family-style setting.

BILLING CODE 3410-30-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 214

Nonimmigrant Classes; Petition for Alien To Perform Temporary Services or Labor

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This proposed rule would transfer the authority to make determinations on temporary labor certifications for the island of Guam from the Secretary of Labor to the Governor of Guam. This change will provide for closer control on the certification process and provide for local informational input to a greater degree.

DATE: Comments must be in writing and received on or before June 15, 1983.

ADDRESS: Please submit comments in duplicate to the Commissioner, Immigration and Naturalization Service, 425 I Street, NW., Room 7100, Washington, D.C. 20536.

FOR FURTHER INFORMATION CONTACT:

For General Information: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 I Street, NW., Washington, D.C. 20536, Telephone: (202) 633-3048.

For Specific Information: Bert C. Rizzo, Immigration Examiner, Immigration and Naturalization Service, 425 I Street, NW., Washington, D.C. 20536, Telephone: (202) 633-3946.

SUPPLEMENTARY INFORMATION: The present 8 CFR 214.2(h)3)(i) vests the Secretary of Labor with the authority to make determinations of availability and adverse impact on the local labor market of the importation of temporary workers (H-2's) to the United States under section 101(a)(15)(H)(ii) of the Immigration and Nationality Act, 8 U.S.C 1101(a)(15)(H)(ii). These temporary labor certifications are used by prospective employers to support petitions for the importation of temporary laborers. While the service ultimately must judge availability and impact questions, considerable weight is given to the Secretary's determinations. Generally, only in a case when the Secretary issues a notice that the certification cannot be made, will the Service make an independent determination, and even then, will consult with the Secretary prior to rendering a decision.

Because of its unique geographic location and the local conditions in Guam, accurate appraisal of prevailing wages and the impact of imported labor has been difficult to determine. The Governor of Guam has suggested that local conditions can best be appraised through closer examination of those conditions on a local basis. Consultation with the Secretary of Labor has resulted in his concurrence with the Governor's proposal.

It is anticipated that under this proposed change the Governor of Guam will establish a system which would include a designated governing body to make determinations of prevailing wages and availability of U.S. resident workers, as well as adverse impact determinations concerning the importation of temporary foreign labor. The regulation would transfer this function currently performed by the Secretary of Labor to the Governor of Guam or his designated representative. The Commissioner of Immigration and Naturalization, in consultation with the Secretary of Labor, will determine the suitability and validity of the Governor's systems for making the required determinations. Any proposed changes to the systems must be reported to the Commissioner for review and approval prior to implementation.

This proposed change will not materially affect determinations for temporary labor certifications in Guam, but merely transfers the authority to do them.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that the rule, if promulgated, will not have significant impact on a substantial number of small entities. The proposed rule will not be a major rule as defined in section 1(b) of E.O. 12291. It will not have an effect on the economy of $100 million or more; result in an increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or have a significant adverse effect on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 8 CFR Part 214

Administrative practice and procedure, Aliens, Crime, Employment, Passports, Visas.

Accordingly, it is proposed to amend Chapter I of Title 8 of the Code of Federal Regulations as follows:

PART 214—NONIMMIGRANT CLASSES

In § 214.2, it is proposed to revise paragraph (h)(3) to read as follows:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

* * * * *

(h) * * *

(3) *Petition for alien to perform temporary service or labor.*—(i) *Labor certifications, general.* Either a certification from the Secretary of Labor or his designated representative stating that qualified persons in the United States are not available and that the employment of the beneficiary will not adversely affect wages and working conditions of workers in the United States similarly employed, or a notice that such certification cannot be made, shall be attached to every nonimmigrant visa petition to classify an alien under section 101(a)(15)(H)(ii) of the Act, except for employment on Guam. If there is attached to the petition a notice from the Secretary of Labor or his designated representative that certification cannot be made, the petitioner shall be permitted to present countervailing evidence that qualified persons in the United States are not available and that the employment

VOL 48 ISS 94 MY 13 1983 UMI

policies of the Department of Labor have been observed. All such evidence submitted will be considered in the adjudication of the petition.

(ii) *Labor certifications, Guam.* Every nonimmigrant visa petition filed on behalf of an alien for classification under section 101(a)(15)(H)(ii) of the Act for employment on Guam shall be accompanied by either:

(A) Certification from the Governor of Guam or his designated representative stating that qualified residents in the United States are not available to perform the required services and that the employment of a nonimmigrant alien will not adversely affect the wages and working conditions of United States resident workers who are similarly employed on Guam; or

(B) A notice detailing the reasons why the certification required in paragraph (h)(3)(ii)(A) of this section cannot be made.

(iii) *Criteria for Guam labor certifications.* The Governor of Guam shall establish systematic methods for determining the prevailing wage rates and working conditions for individual occupations on Guam and for making labor certification determinations. The wages and working conditions determination need only be made for those occupations where a prospective employer requests a certification to file with a nonimmigrant visa petition based on section 101(a)(15)(H)(ii) of the Act. The wages and working conditions system must consider the prevailing wage rates and working conditions for occupations in both the private and public sectors, in Guam and/or in the "United States", as defined in section 101(a)(38) of the Act, and may not consider wages and working conditions outside of the United States. The system must require that the prospective employer:

(A) Advertise the availability of the position for a minimum of 3 consecutive days in the newspaper of largest circulation on Guam;

(B) Place a job offer with an appropriate agency or the Governor's designated representative at least 30 days in advance of the need for the services to commerce;

(C) Report to the appropriate agency or Governor's designated representative the names of all United States resident workers who applied for the position, indicating those hired or the job-related reasons for not hiring;

(D) Offer all special considerations to all United States resident workers that the employer provides to nonimmigrant workers such as the payment of transportation expenses;

(E) Meet the prevailing wage rates and working conditions determined under the wages and working conditions system by the Governor or his designated representative; and,

(F) Agree to meet all Federal and State requirements relating to employment, such as nondiscrimination, occupational safety, and minimum wage requirements.

(iv) *Approval and publication of employment systems on Guam.* The systems and any modifications of the systems must be approved by the Commissioner of Immigration and Naturalization prior to implementation. If the Commissioner, in consultation with the Secretary of Labor, finds the systems or modified systems meet the requirements of this subsection, the Commissioner shall publish them in the **Federal Register**, and the Governor shall publish them as a public record in Guam. The Governor shall notify the Commissioner of all determinations under the wages and working condition system, including the specific data used in the computations. This information must be submitted quarterly beginning on the first day following the third full month after approval of the wages and working conditions system.

(v) *Multiple beneficiaries.* When the petitioner seeks the services of more than one beneficiary and all the beneficiaries are not included in a single certification, a separate visa petition must be submitted for the beneficiary or beneficiaries covered in each certification.

(vi) *Statement of need.* A statement shall be furnished with the visa petition describing in detail the situation or conditions which make it necessary to bring the alien to the United States, and whether the need is temporary, seasonal, or permanent; if temporary or seasonal, the statement shall indicate whether the situation or conditions are expected to be recurrent.

BILLING CODE 4410-10-M

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Ch. V

Proposed Rules Under The Wagner-Peyser Act (29 U.S.C. 49 et seq.)

AGENCY: Employment and Training Administration, Labor.

ACTION: Advance notice of proposed rulemaking; notice of availability of document.

SUMMARY: This advance notice alerts interested persons to forthcoming rulemaking and offers an opportunity to request informational, draft copies of proposed rules covering the Wagner-Peyser Act (29 U.S.C. 49 et seq.), as amended by Title V of the Job Training Partnership Act (Pub. L. 97-300). Release of the draft regulations is intended to alert interested persons to issues which will be submitted for public comment in the forthcoming proposed rules.

ADDRESS: Requests for draft copies, including self-addressed envelope and/or mailing label, should be addressed to the Assistant Secretary of Labor for Employment and Training, U.S. Department of Labor, 601 D Street, NW., Room 9000, Washington, D.C. 20213. Attention: Patrick J. O'Keefe, Acting Administrator, Office of Strategic Planning and Policy Development.

FOR FURTHER INFORMATION CONTACT: Patrick J. O'Keefe, Telephone: (202) 376-6600.

SUPPLEMENTARY INFORMATION: On October 13, 1982, the President signed the Job Training Partnership Act, Pub. L. 97-300. This statute includes amendments to the Wagner-Peyser Act (29 U.S.C. 49 et seq.). These amendments take effect October 1, 1983.

To provide basic program planning information as early as possible, the Department is making available to interested persons, upon written request, a preliminary draft of the proposed regulations implementing the Wagner-Peyser Act, as amended. Release of the draft regulations is intended to alert interested persons to issues which will be submitted for public comment in the forthcoming proposed rules.

Signed this 9th day of May 1983.

Albert Angrisani,

Assistant Secretary of Labor.

Quick Frozen Peaches; Termination of Consideration of Codex Standard

Correction

In FR Doc. 83-8299 beginning on page 14001 in the issue of Friday, April 1, 1983, make the following corrections on page 14002, the first column:

1. In the first line, insert "20204" immediately following "Washington, D.C.".

2. In the fourth line, the date "September 3, 1882" should read "September 3, 1982".

BILLING CODE 1505-01-M

VETERANS ADMINISTRATION

38 CFR Part 3

Veterans Benefits; Implementing Legislation

AGENCY: Veterans Administration.

ACTION: Proposed regulation amendments.

SUMMARY: The VA (Veterans Administration) is proposing to amend its adjudication regulations to implement pertinent provisions of the Veterans' Compensation, Education, and Employment Amendments of 1982. These regulatory changes will affect the definition of active duty for training, extend burial allowance eligibility, increase special monthly compensation for certain blinded veterans, and extend dependency and indemnity compensation eligibility to certain surviving spouses and children.

DATES: Comments must be received on or before June 13, 1983. We propose to make these changes effective October 1, 1982.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding these changes to Administrator of Veterans' Affairs (271A), Veterans' Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until June 23, 1983. Any person visiting Central Office for the purpose of inspecting comments will be received by the Central Office Veterans' Services Unit in room 132. Visitors to a VA field station will be informed that the records are available for inspection only in Central Office and will be furnished the address and room number.

FOR FURTHER INFORMATION CONTACT: Robert M. White (202) 389-3005.

SUPPLEMENTARY INFORMATION: The Veterans' Compensation, Education, and Employment Amendments of 1982, Pub. L. 97-306, amended title 38, United States Code, requiring several regulatory changes in Part 3 of Title 38 CFR. A discussion of pertinent provisions of this new law is presented below together with the proposed regulatory changes required for implementation.

Section 113 of the new law amended 38 U.S.C. 101(22) to include within the definition of the term "active duty for training" any duty performed by a member of a Senior Reserve Officers' Training Corps program when ordered to such duty for the purpose of field training or a practice cruise under chapter 103 of title 10, United States Code. Effective October 1, 1982, it also repealed 38 U.S.C. 403 which previously provided, among other things, for dependency and indemnity compensation eligibility for survivors of ROTC members who died as a result of annual training duty to which they had been ordered for a period of 14 days or more.

The effect of this new provision is to confer veteran status on all Senior ROTC members who are disabled as a result of injury or disease incurred or aggravated during such specified duty, or who die as a result of such duty as long as they are discharged or released therefrom under conditions other than dishonorable. This status makes such members basically eligible for disability compensation and makes their survivors basically eligible for dependency and indemnity compensation.

This new provision applies only with respect to deaths and disabilities resulting from diseases or injuries incurred or aggravated after September 30, 1982. In addition, Senior ROTC members who become eligible for veterans' benefits based on this provision of law are no longer eligible for benefits under subchapter I of chapter 81 of title 5, United States Code.

To implement section 113 we propose to amend 38 CFR 3.6(c)(4). The current language of subparagraph (4) will be deleted in its entirety and new language will be substituted indicating that duty to which a member of a Senior ROTC program is ordered for the purpose of field training or a practice cruise is included within the definition of active duty for training.

Section 112 of the new law corrected a technical error in 38 U.S.C. 410(b)(1) relating to eligibility for death benefits at the rate payable for DIC (dependency and indemnity compensation). Section 410(b)(1) previously granted such eligibility if a veterans' nonservice-connected death was not the result of his or her own willful misconduct and if the veteran was in receipt of (or but for the receipt of retired or retirement pay was entitled to receive) compensation at the time of death for a service-connected disability that was rated totally disabling for a specified period of time.

An opinion by the VA General Counsel (Op. G.C. 2-81) published on May 21, 1981, held, however, that 38 U.S.C. 410(b)(1) "does not provide a basis for finding entitlement to survivors' benefits where a veteran, at death, had been in receipt of compensation for total disability but not for the requisite duration solely because of VA error in the rating assigned." Therefore, the requirements of § 410(b)(1) have been amended to include as basically eligible the survivors of veterans who were entitled to receive compensation at the total disability rate for the specified period, but who, for some reason, were not actually in receipt of such benefits.

Although this amendment to 38 U.S.C. 410(b)(1) is effective October 1, 1982, it also has retroactive application to those who would have been entitled to DIC payments for any part of the period beginning on October 1, 1978, and ending on September 30, 1982, if this amendment had taken effect on October 1, 1978. We propose to implement this new provision by appropriately amending 38 CFR 3.22(a)(2).

Section 111(a) of Pub. L. 97-306 increased the rate of special monthly compensation payable for service-connected blindness without light perception in both eyes to the rate payable under 38 U.S.C. 314(n). The rate of special monthly compensation payable for this degree of blindness is now equal to the rate payable for anatomical loss of both eyes.

Under the authority of 38 U.S.C. 314(p) the rate payable under § 314(n) was previously granted in cases of bilateral blindness without light perception only if accompanied by phthisis bulbi, evisceration, or other obvious deformity or disfigurement. Since those additional conditions are no longer required for entitlement under § 314(n), we propose to implement this new provision by amending 38 CFR 3.350(d) to include the

VOL 48 ISS 94 MAY 13 1983 UMI

disability of blindness without light perception in both eyes as one of the entitling criteria and by deleting 38 CFR 3.350(f)(2)(iv) which is no longer appropriate.

Since bilateral blindness without light perception has been equated for special monthly compensation purposes with anatomical loss of both eyes, we also propose to amend 38 CFR 3.350(f)(2)(ii) and (iii) to reflect that blindness without light perception in one eye is the equivalent of anatomical loss of one eye for the purposes of subdivisions (ii) and (iii). The proposed amendments required by section 111(a) of the new law will be effective October 1, 1982.

Section 111(b) of the new law has amended 38 U.S.C. 314(p) to provide, in part, that "[i]n the event the veteran has suffered service-connected blindness, with 5/200 visual acuity or less and * * * has also suffered service-connected total deafness in one ear or service-connected anatomical loss of use of one hand or one foot, the Administrator shall allow the next intermediate rate."

In presenting the compromise agreement on this legislation to the House of Representatives, the Chairman of the House Veterans' Affairs Committee stated with regard to section 111(b) that "[w]e feel this increased compensation is warranted because the loss of an extremity has a far greater impact on a blinded veteran's mobility than such loss would have on an individual who has not lost his or her sight." 131 Cong. Rec. H 7774 (daily ed. Sep. 28, 1982) (remarks of Rep. Montgomery). Based on this statement, it seems clear that the purpose of this amendment to 38 U.S.C. 314(p) was to increase the rate of special monthly compensation payable for the specified disability combinations above the rate formerly authorized by law or regulation.

We propose to implement section 111(b) of Pub. L. 97–306 by amending 38 CFR 3.350(f)(2)(v), as redesignated subdivision (iv), to include three new provisions. This amendment will provide that veterans with service-connected blindness in both eyes accompanied by service-connected loss or loss of use of one hand, or loss or loss of use of one foot which by itself or in combination with another compensable disability would be ratable at 50 percent or more will be entitled to the next higher statutory rate (or next higher intermediate rate if already entitled to an intermediate rate), and that veterans with service-connected blindness in both eyes accompanied by service-connected loss or loss of use of one foot which is ratable at less than 50 percent, and which is the only other compensable disability, will be entitled to the next higher intermediate rate (or next higher statutory rate if already entitled to an intermediate rate).

These proposed amendments would be consistent with current rating procedures and would provide increased special monthly compensation to all veterans with the specified disability combinations. These changes will be effective October 1, 1982.

Section 403 of the law provides for burial allowance eligibility in the case of a deceased veteran who had wartime service or was discharged or released from active duty because of a service incurred or aggravated disability, and whose body is held by a State (or political subdivision of a State) if the VA determines that there is no next of kin or other person claiming the body of the deceased veteran and there are insufficient resources available to cover the burial and funeral expenses. This provision reestablishes in certain cases the burial allowance eligibility previously lost under the provisions of the Omnibus Budget Reconciliation Act of 1981.

We propose to implement section 403 by appropriately amending 38 CFR 3.1600 and 3.1601. In addition, we have amended 38 CFR 3.1603 to clarify that it applies only to the authority for burial of unclaimed bodies where eligibility is not based on the new provisions of 38 U.S.C. 902(a)(2). These amendments will apply with respect to burial and funeral expenses incurred after September 30, 1982.

Section 404 of Pub. L. 97–306 provides burial allowance eligibility in the cases of veterans who die in an institution where they were receiving nursing home care under the authority of 38 U.S.C. 620 at the expense of the United States at the time of death. This amendment is effective with respect to deaths occurring after September 30, 1982. We propose to implement section 404 by appropriately amending 38 CFR 3.1600 and 3.1605.

The Administrator hereby certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. The reason for this certification is that the proposed regulations would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these proposed regulations are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, we have determined that these proposed regulation changes are nonmajor for the following reasons:

(1) They will not have an effect on the economy of $100 million or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

(Catalog of Federal Domestic Assistance Program numbers are 64.101, 64.109, and 64.110.)

Approved: May 2, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,
Deputy Administrator.

PART 3—ADJUDICATION

The Veterans Administration proposes to amend 38 CFR Part 3 as follows:

1. In § 3.6, paragraph (c)(4) is revised as follows:

§ 3.6 Duty periods.

* * * * *

(c) *"Active duty for training".* * * *

(4) Duty performed by a member of a Senior Reserve Officers' Training Corps program when ordered to such duty for the purpose of field training or a practice cruise under chapter 103 of title 10, United States Code (38 U.S.C. 101(22); Pub. L. 97–306, 96 Stat. 1429); and

* * * * *

2. In § 3.22, paragraph (a)(2) (introductory portion preceding subdivision (i)) is revised as follows. The introductory portion of paragraph (a) is shown for reader convenience.

§ 3.22 Benefits at DIC rates in certain cases when death is not service-connected.

(a) *Entitlement criteria.* Benefits authorized by section 410(b) of title 38, United States Code shall be paid to a deceased veteran's surviving spouse (see § 3.54(c)(2)) or children in the same manner as if the veteran's death is service connected when the following conditions are met:

* * * * *

(2) The veteran was in receipt of or for any reason (including receipt of military retired or retirement pay or correction of a rating after the veteran's death based on clear and unmistakable error) was not in receipt of but would have been entitled to receive compensation at the time of death for a service-connected disablement that either:

* * * * *

3. In § 3.350, paragraphs (d) (introduction), (d)(4) and (f)(2) are revised as follows:

§ 3.350 Special monthly compensation ratings.

* * * * *

(d) *Ratings under 38 U.S.C. 314(n).* The special monthly compensation provided by 38 U.S.C. 314(n) is payable for any of the conditions which follow.
Amputation is a prerequisite except for loss of use of both arms and blindness without light perception in both eyes. If a prosthesis cannot be worn at the present level of amputation but could be applied if there were a reamputation at a higher level, the requirements of this paragraph are not met; instead, consideration will be given to loss of natural elbow or knee action.

* * * * *

(4) Anatomical loss of both eyes or blindness without light perception in both eyes.

* * * * *

(f) *Intermediate or next higher rate.*
* * *

(2) *Eyes, bilateral, and blindness in connection with deafness.* (i) Blindness of one eye with 5/200 visual acuity or less and blindness of the other eye having only light perception will entitle to the rate between 38 U.S.C. 314 (l) and (m).

(ii) Blindness of one eye with 5/200 visual acuity or less and anatomical loss of, or blindness having no light perception in the other eye, will entitle to a rate equal to 38 U.S.C. 314(m).

(iii) Blindness of one eye having only light perception and anatomical loss of, or blindness having no light perception in the other eye, will entitle to a rate between 38 U.S.C. 314 (m) and (n).

(iv) Blindness in both eyes rated under 38 U.S.C. 314 (l), (m) or (n), or under the intermediate or next higher rate provisions outlined above, when accompanied by:

(*a*) Service-connected total deafness in one ear, will afford entitlement to the next higher intermediate rate or if the veteran is already entitled to an intermediate rate to the next higher statutory rate under 38 U.S.C. 314, but not higher than the (o) rate; or

(*b*) Bilateral deafness rated at no less than 40 percent, and the hearing impairment in one or both ears is service connected, will afford entitlement to the next higher statutory rate under 38 U.S.C. 314 or if the veteran is already entitled to an intermediate rate to the next higher intermediate rate, but in no event higher than the rate for (o); or

(*c*) Service-connected loss or loss of use of one hand, will afford entitlement to the next higher statutory rate under 38 U.S.C. 314 or, if the veteran is already entitled to an intermediate rate, to the next higher intermediate rate, but in no event higher than the rate for (o); or

(*d*) Service-connected loss or loss of use of one foot which by itself or in combination with another compensable disability would be ratable at 50 percent or more, will afford entitlement to the next higher statutory rate under 38 U.S.C. 314 or, if the veteran is already entitled to an intermediate rate, to the next higher intermediate rate, but in no event higher than the rate for (o); or

(*e*) Service-connected loss or loss of use of one foot which is ratable at less than 50 percent and which is the only compensable disability other than bilateral blindness, will afford entitlement to the next higher intermediate rate or, if the veteran is already entitled to an intermediate rate, to the next higher statutory rate under 38 U.S.C 314, but in no event higher than the rate for (o). (38 U.S.C. 314(p); Pub. L. 97–306, 96 Stat. 1429)

* * * * *

4. Section 3.1600 is amended as follows:

(a) By removing the word "and" and inserting the word "or" at the end of paragraph (b)(2)(ii).

(b) By adding a new paragraph (b)(3) and redesignating the former paragraph (b)(3) as paragraph (b)(4) and by revising paragraph (c) so that the added and revised material reads as follows. The introductory portion of (b) is shown for reader convenience.

§ 3.1600 Payment of burial expenses of deceased veterans.

* * * * *

(b) *Nonservice-connected death burial allowance.* If a veteran's death is not service connected, an amount not to exceed $300 (or if entitlement is under § 3.8 (c) or (d), a rate in Philippine pesos equivalent to $150) may be paid toward the veteran's funeral and burial expenses including the cost of transporting the body to the place of burial. Entitlement is subject to the following conditions:

* * * * *

(3) The deceased was a veteran of any war or was discharged or released from active military, naval, or air service for a disability incurred or aggravated in line of duty, and the body of the deceased is being held by a State (or a political subdivision of a State), and the Administrator determines

(i) That there is no next of kin or other person claiming the body of the deceased veteran, and

(ii) That there are not available sufficient resources in the veteran's estate to cover burial and funeral expenses; and (38 U.S.C. 902(a); Pub. L. 97–306, 96 Stat. 1429)

(4) The applicable further provisions of this section and §§ 3.1601 through 3.1610. (38 U.S.C. 210(c), 902)

(c) *Death while properly hospitalized.* If a person dies from non-service-connected causes while properly hospitalized by the Veterans Administration, there is payable an allowance not to exceed $300 for the actual cost of the person's funeral and burial, and an additional amount for transportation of the body to the place of burial. For burial allowance purposes, the term "hospitalized by the Veterans Administration" means admission to a Veterans Administration facility (as defined in 38 U.S.C. 601(4)) for hospital, nursing home, or domiciliary care under the authority of 38 U.S.C. 610 or 611(a), or admission (transfer) to a nursing home under the authority of 38 U.S.C. 620 for nursing home care at the expense of the United States. (38 U.S.C. 903(a)) (If the hospitalized person's death is service connected, entitlement to burial benefits falls under paragraph (a) of this section instead of this paragraph.

5. Section 3.1601 is amended as follows:

(a) By adding a parentheses around the words "other than a § 3.1604(d) claimant" in the introductory portion of paragraph (b).

(b) By adding paragraph (b)(5) as follows:

§ 3.1601 Claims and evidence.

* * * * *

(b) *Supporting evidence.* * * *

(5) *Entitlement under § 3.1600(b)(3).* In addition to the other evidentiary requirements of this subparagraph, there must be written certification over the signature of a responsible official of the State (or political subdivision of the State) where the body was held that—

(i) There is no next of kin or other person claiming the body of the deceased veteran, and

(ii) There are not available sufficient resources in the veteran's estate to cover burial and funeral expenses. (38

VOL 48 ISS 94 MY 13 1983 UMI

U.S.C. 902(a); Pub. L. 97-306, 96 Stat. 1429)

6. Section 3.1603 is revised as follows:

§ 3.1603 Authority for burial of certain unclaimed bodies.

If the body of a deceased veteran is unclaimed, there being no relatives or friends to claim the body, and there is burial allowance entitlement which is not based on § 3.1600(b)(3), the amount provided for burial and plot or interment allowance will be available for the burial upon receipt of a claim accompanied by a statement showing what efforts were made to locate relatives or friends. The question of escheat of any part of such deceased veteran's estate is not a factor in such a claim. Burial allowance may be authorized for cost of disinterment and reburial of unclaimed remains originally accorded pauper burial but not for initial expenses of a burial in a potter's field. Burial in a prison cemetery is not considered a pauper burial.

7. Section 3.1605 (the introductory portion preceding paragraph (a)) is amended by adding the cross reference "(see § 3.1600(c))" after the words "authority of the Veterans Administration" at the end of the first sentence.

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 320

[SWH-FRL 2361-2]

Financial Responsibility Requirements for Facilities Handling Hazardous Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intent and request for comments.

SUMMARY: Under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, 42 U.S.C. 9601 *et seq.*, the Environmental Protection Agency is beginning the process of identifying classes of facilities involved in the production, treatment, storage or disposal of hazardous substances, and assessing the risk of injury associated with the production, treatment, storage or disposal of hazardous substances at those classes of facilities, for purposes of promulgating financial responsibility requirements. The purpose of this notice is to inform the public of those activities and invite comments on the issues involved.

DATE: Comments will be accepted until July 12, 1983.

ADDRESS: Comments may be mailed to Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Comments should identify the regulatory docket as follows: "Docket 108(b), Financial Responsibility Requirements for Facilities."

FOR FURTHER INFORMATION CONTACT: For general information contact the RCRA/Superfund hotline, Office of Solid Waste (WH-562, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, telephone (800) 424-9346, or in Washington, D.C., 382-3000.

For information on the work being done by EPA contact: Peter Guerrero, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, telephone (202) 382-4604.

SUPPLEMENTARY INFORMATION:

I. Background

Section 108(b)(1) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 ("CERCLA" or "the Act") requires that, not earlier than December 11, 1985, the President begin to promulgate financial responsibility requirements for classes of facilities involved in the production, transportation, treatment, storage and disposal of hazardous substances. Hazardous substances, as defined in the Act, include not only hazardous wastes identified or listed under the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA), but also a variety of substances regulated under the Clean Air Act, the Clean Water Act, and the Toxic Substances Control Act. A hazardous substance may be flammable, corrosive or explosive; it may cause cancer, physical disability or serious illness in people; it may cause damage to animals, plants, or other parts of the environment.

Under the section 108(b) requirements, the owner or operator of a facility involved in the production, treatment, storage or disposal of hazardous substances would be required to establish and maintain evidence of financial responsibility consistent with the degree and duration of risk associated with the hazardous substances at the facility. EPA does not expect that these financial responsibility standards will duplicate financial responsibility requirements under RCRA (see 40 CFR 264.140-264.151 and 265.140-265.151) by requiring that an owner or operator demonstrate financial responsibility twice for the same risks.

Section 108(b)(1) further requires that the President publish a notice in the **Federal Register** by December 11, 1983, identifying those classes of facilities for which requirements will be first developed. Priority is to be accorded to those classes of facilities, owners, and operators which present the highest level of risk of injury.

Executive Order 12316, issued on August 14, 1981, delegated authority under section 108(b) for transportation-related facilities to the Department of Transportation. The Environmental Protection Agency was delegated the authority for all other facilities covered by section 108(b).

II. Request for Comments

In order to gather information for the development of a **Federal Register** notice identifying classes of facilities, owners, and operators, and to encourage public participation in this process, the Environmental Protection Agency is today inviting comments on the issues outlined below as well as related issues which respondents may wish to bring to the attention of the Agency. All policies mentioned below are intended only as examples; they are not recommendations by the Agency.

III. Issues

A. What Sources of Data Exist to Help Identify Types of Facilities Involved in the Production, Treatment, Storage or Disposal of Hazardous Substances?

EPA is not at this time seeking to identify specific facilities at which hazardous substances are handled. Rather, the Agency seeks to identify industries, types of facilities, and processes which involve the production, treatment, storage or disposal of hazardous substances. EPA recognizes that its own data collection efforts and regulatory programs are a major source of information on hazardous substances. However, EPA is interested in any additional sources of information which may help the Agency determine the types of facilities covered by section 108(b) of CERCLA.

B. How Should the Population of Facilities Be Divided Into Classes?

Once the Agency has identified the types of facilities involved in the production, treatment, storage and disposal of hazardous substances, the Agency expects to divide these facilities into classes. The reason for this is twofold. First, section 108(b) requires that the Agency identify the classes of facilities for which financial requirements will be first developed. Second, classification may help EPA to assign similar financial requirements to facilities which present similar risks. In order to evaluate classification systems, EPA would like comments on the following questions:

i. What criteria should be used to select a classification system, and how should those criteria be weighted? For instances, classification systems could be evaluated on the basis of their ability to divide the facility population into a manageable number of classes, to reduce to a minimum the variation in risk of injury within classes, and to classify a facility quickly, with a minimal need for new information. If one system does not prove best in relation to all the criteria, then the criteria must be weighted or ranked in order of importance in order to select a classification system.

ii. What alternatives might be used for classifying facilities? It is possible to divide the population of facilities in many different ways. for instance, facilities could be classified according to their Standard Industrial Classification (SIC) codes so that all hazardous substance facilities in a given industry would be subject to the same financial responsibility requirement. Facilities also could be classified according to the types of hazardous substances present at the facility, the proximity to human population, and other factors or combinations of factors.

C. What Constitutes Risk of Injury?

Section 108(b) requires that EPA rank classes of facilities according to the risk of injury associated with the production, treatment, storage or disposal of hazardous substances. Therefore, EPA expects to examine the meaning of the term "risk of injury."

As mentioned above, the term "hazardous substance" includes a wide variety of substances with many different effects on human health, welfare, and the environment. In addition to the effects of the substances themselves, the potential for adverse effects may depend on such factors as the design and environmental setting of the facility, the quantity of the substance present at the facility, the proximity and density of human population, and the environmental pathways which the substance may contaminate and travel through (air, soil, surface water, ground water). The potential for and extent of injury may further depend on the degree and duration of exposure, as well as the type of exposure (inhalation, ingestion, or external exposure to skin or eyes).

The ability of the Agency to consider all possible adverse effects and all possible scenarios of exposure to hazardous substances form production, treatment, storage or disposal facilities is constrained both by the limits of technical knowledge as well as by the limits of available time and resources to perform the required analyses. Therefore, EPA would like comments on at least the following questions:

i. What types of effects upon human health, welfare, and the environment should be included in the definition of "injury"? What effects, if any, are so minor as to be not worth considering?

ii. What factors contribute to the risk that a hazardous substance will cause injury? What factors are most important in determining risk of injury, and what factors, if any, make a negligible contribution to risk?

D. How Should "Risk of Injury" Be Used To Rank Classes of Facilities?

The potential for damage to human health, welfare, and the environment will vary from one facility to another, even among similar facilities handling similar hazardous substances. However, in ranking classes of facilities in order of risk of injury, EPA expects to assess the risk associated with classes of facilities, not individual sites. The following questions are of particular importance:

i. What sources of data exist on the effects of exposure to hazardous substances, the sources and causes of releases of hazardous substances, and other issues of importance in the assessment of risk of injury?

ii. What type of system is most appropriate for assessing the risk of injury associated with a class of facilities? Should a class be characterized by the safest facilities, the most dangerous facilities, an average of the two extremes, or by some other method? What, if any, risk assessment systems or models mights be of use to EPA in these analyses?

IV. Conclusion

EPA is issuing this notice in order to encourage public comment and participation, and to clarify for the public some of the important issues in listing and ranking classes of facilities, owners and operators covered by section 108(b) of CERCLA. Members of the public are urged to comment on the issues outlined above, and on any other issues relatd to section 108(b) of CERCLA. In particular, we invite suggestions for alternative approaches, opinions on their strengths and weaknesses, and discussion of sources of data.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 83

[PR Docket No. 83-429; FCC 83-204]

Amendment of Part 83 of the Commission's Rules To Implement the First Set of Amendments to the Safety of Life at Sea (SOLAS) Convention of 1974 and Conform Commission Rules in Other Matters

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has adopted a Notice to inform the public and to propose rules implementing the first set of amendments adopted by the International Maritime Organization (IMO) at the 45th Session of its Maritime Safety Committee and address other treaty related matters. The amendments will modify the 1974 Safety of Life at Sea (SOLAS) Convention to provide a VHF radio watch on vessels outside harbor and port areas.

DATES: Comments must be received on or before June 13, 1983, and Reply Comments must be received on or before June 28, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Robert C. McIntyre, Private Radio Bureau, (202) 632-7175.

List of Subjects in 47 CFR Part 83

Communication equipment, Marine safety, Vessel, Distress.

In the matter of Amendment of Part 83 of the Commission's rules to implement the first set of amendments to the Safety of Life at Sea Convention of 1974 and conform Commission rules in other treaty matters; PR Docket No. 83-429.

Adopted: April 27, 1983.

Released: May 6, 1983.

VOL 48 ISS 94 MAY 13 1983 UMI

By the Commission: Commissioner Jones absent.

Summary

1. In this Notice of Proposed Rule Making we propose to amend Part 83 of the Commission's rules to implement the first set of amendments to the Safety of Life at Sea (SOLAS) Convention of 1974 adopted by the International Maritime Organization (IMO), and to align the Commission's rules concerning daily testing of the reserve transmitter in accordance with the SOLAS Convention. The proposed rules are contained in Appendix A.

Implementation of Amendments to SOLAS Convention

2. The 1974 SOLAS Convention came into force May 25, 1980,[1] replacing and abrogating the 1960 SOLAS Convention which was signed in London on June 17, 1960.[2] The 1974 SOLAS Convention modified the articles of the convention relating to the amendment process and included in the regulations all the draft amendments developed during the 1960–1974 period to improve the safety of life at sea.

3. Amendments adopted by the expanded Maritime Safety Committee (MSC) of the IMO come into force in a prescribed period of time, nominally two years, without further action required on the part of Contracting Governments.[3] The first set of amendments will come into force on September 1, 1984. The Commission in this notice is proposing rules which provide for implementation of that portion of the first set of amendments to the 1974 SOLAS Convention which were not brought into force by a previous Commission action.[4] The new IMO Chapter IV regulations which are part of this first set of amendments to the 1974 SOLAS Convention are attached as Appendix B. This document is provided in order to aid commenters in responding to this notice.

VHF Watch and Radio Logs Proposals

4. The requirements for a Channel 16 (156.8 MHz) aural watch (See Appendix B, Regulation 8) and the VHF radio log requirements (See Appendix B, Regulation 19) were not addressed in the earlier Commission action in Docket 21089. IMO has determined that a Channel 16 watch would improve the Safety of vessels navigating outside ports and harbors in the same way that the existing bridge-to-bridge radiotelephone operations on Channel 13 aid vessels operating on the navigable waters of the United States—by making available an agreed channel for communication between the bridges of proximate vessels. We recognize that vessels on international voyages, particularly while traveling the high seas away from ports, harbors and coastal areas, will generally be widely separated and out of VHF communication range. Nevertheless, it is important that should the need arise, a common channel should be agreed upon to provide immediate bridge-to-bridge communications.

5. We considered whether this watch should additionally be made applicable to vessels subject to Parts II and III of Title III of the Communications Act of 1934, as amended. These vessels are generally engaged in voyages which ply the same waters as those vessels subject to the SOLAS Convention. Further, vessels on domestic voyages operate primarily in congested coastal waters and have a greater need for bridge-to-bridge communications than vessels on high seas voyages. For these reasons the appended rules require that vessels subject to Part II and III, Title III of the Communications Act of 1934, as amended, maintain a Channel 16 watch when in the open sea outside port and harbor areas.

6. We expect that these rules will significantly improve safety at sea and not impose an economic burden on vessels which are expected to become subject to these watch requirements. Vessels subject to the Communications Act or the Bridge-to-Bridge Radiotelephone Act are required under the present rules to fit with a VHF installation and most, if not all, such installations will operate on Channel 16. Vessels subject to the 1974 SOLAS Convention are required under the present rules to fit with a VHF installation and such installations will operate on Channel 16. We are proposing to permit the watch requirement to be satisfied by using VHF installations which meet the requirements of the Part III of Title III of the Communications Act, Bridge-to-Bridge Radiotelephone Act or the 1974 SOLAS Convention. With regard to the VHF watch we have permitted the watch requirements to be satisfied by monitoring Channel 16 with a receiver having a properly adjusted squelch circuit to reduce the amount of noise on the bridge which could possibly affect the safety of navigation. We do not envisage satisfaction of the watch requirement to be burdensome to the vessel owner or operator.

7. The log requirements for ship VHF radiotelephone stations subject to the Communications Act of 1934 or to the provisions of the SOLAS Convention of 1974 have been designed to minimize the burden on operators and still provide the necessary information required of stations used for safety purposes. We propose to require:

Entry of safety related communications;

The times when the watch is begun, interrupted, and ended;

A daily statement concerning the operating condition of the VHF radiotelephone equipment;

Details of service or maintenance work.

These log requirements are the same as those presently specified for vessels subject to the Vessel Bridge-to-Bridge Radiotelephone Act.

Conforming Commission Rules in Other Matters

8. In other matters relating to the SOLAS Convention it has come to the Commission's attention that the tests required in the Commission's rules (§ 83.449(a)(4)) concerning reserve installations are not in agreement with the convention (See Chapter IV, Regulation 10(s)). The Commission's rules require that the reserve transmitter be tested prior to a vessel's departure from a port and on each day the vessel is outside a port or harbor. The SOLAS Convention requires such tests if the transmitter is not used daily for communications and permits use of a suitable artificial antenna when testing of the reserve transmitter is required. The convention also requires the transmitter to be tested at least once during each voyage with the reserve antenna if it is installed. The Commission in reviewing this matter is of the opinion that the test procedure set forth in the convention is acceptable and somewhat more flexible than our existing rules in Part 83. We are proposing to modify the Commission's rules to align them with the less stringent requirements of the SOLAS Convention.

9. The proposed amendments to the Commission's rules as set forth in the attached Appendix A are issued under the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 4(i) and 303(r).

[1] Docket 80–67, Report and Order adopted June 25, 1980, FCC 80–360, 45 FR 46409.

[2] Docket 15034, Report and Order adopted October 30, 1963, FCC 63–1002, 28 FR 11689.

[3] These amendments will automatically come into force in the United States without specific Senate ratification.

[4] Docket 21089, Report and Order, adopted March 15, 1979, FCC 79–162, 44 FR 18501. In this proceeding the Commission considered the IMO Resolution A. 335 concerning fitting of radiotelegraph ships with radiotelephone stations to be such a significant improvement in safety that Resolution A. 335 was implemented prior to being mandatorily required by the 1974 SOLAS Convention.

Comments

10. Under procedures set out in § 1.415 of the Rules and Regulations, 47 CFR 1.415, interested persons may file comments on or before June 13, 1983, and reply comments on or before June 28, 1983. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

11. In accordance with the provisions of Section 1.419 of the Rules and Regulations, 47 CFR 1.419, formal participants shall file an original and 5 copies of their comments and other materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and 11 copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

12. For purposes of this non-restricted notice and comment rule making proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rule making until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's Staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's rules, 47 CFR 1.1231.

13. Pursuant to Section 605 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), we certify that the proposed rules will not have a significant economic on a substantial number of small entities. Most vessels subject to these rules are operated by large concerns rather than small businesses. Additionally, because the large majority of vessels currently possess adequate equipment to comply with these rules, no additional cost should be incurred.

14. Regarding questions on matters in this document contact Robert C. McIntrye, 202/632–7175.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303).

Federal Communications Commission.

William J. Tricario,

Secretary.

Appendix A

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. In § 83.202 footnotes 1 and 2 are removed; paragraphs (a), (b) and (c) are revised to read as follows:

§ 83.202 Watch required on vessels subject to the Communications Act.

(a) Each ship of the United States which is equipped with a radiotelegraph station for compliance with Part II of Title III of the Communications Act shall while being navigated in the open sea outside a harbor or port:

(1) Keep a continuous and efficient watch on 500 kHz by means of radio officers. In lieu thereof, on a cargo ship equipped with a radiotelegraph auto alarm in proper operating condition, an efficient watch on 500 kHz shall be maintained by means of a radio officer for at least 8 hours per day in the aggregate, i.e., for at least one-third of each day or portion of each day that the vessel is navigated in the open sea outside of a harbor or port;

(2) Keep a continuous and efficient watch on the radiotelephone distress frequency 2182 kHz from the principal radio operating position or the room from which the vessel is normally steered. A radiotelephone distress frequency watch receiver having a loudspeaker and a radiotelephone auto-alarm facility shall be used to keep the continuous watch on 2182 kHz if such watch is kept from the room from which the vessel is normally steered. Except that the radiotelephone auto-alarm facility may only be used after a determination by the master that conditions are such that maintenance of the listening watch would interfere with the safe navigation of the ship;

(3) Keep a continuous and efficient watch on the VHF distress frequency 156.8 MHz from the room from which the vessel is normally steered. The watch shall be maintained by a designated member of the crew who may perform other duties, relating to the operating or navigation of the vessel, which do not interfere with the effectiveness of the watch. Use of a properly adjusted squelch or brief interruptions due to other nearby VHF transmissions are not considered to adversely affect the continuity or efficiency of the required watch on the VHF distress frequency. This watch need not be maintained:

(i) When the vessel is keeping the required watch on the bridge-to-bridge radiotelephone frequency; or

(ii) When the vessel is participating in a Vessel Traffic Service (VTS) system as required or recommended by the U.S. Coast Guard and an efficient watch is maintained on the VTS frequency.

(b) Each cargo ship of the United States which is equipped with a radiotelephone station for compliance with Part II of Title III of the Communications Act shall while being navigated outside of a harbor or port;

(1) Keep a continuous and efficient watch on 2182 kHz in the room from which the vessel is normally steered while at sea, whenever such station is not being used for authorized traffic. Such watch shall be maintained by at least one officer or member of the crew of the vessel who has been designated by the master to do so. The person designated by the master may simultaneously perform other duties relating to the operation or navigation of the vessel, provided such other duties do not interfere with the effectiveness of the watch. A radiotelephone watch receiver having a loudspeaker and a radiotelephone auto alarm facility shall be used to keep the continuous watch on 2182 kHz. Except that the radiotelephone auto alarm facility may

VOL 48 ISS 94 MAY 13 1983 1983 UMI

only be used after a determination by the master that conditions are such that maintenance of the listening watch would interfere with the safe navigation of the ship;

(2) Keep a continuous and efficient watch on the VHF distress frequency 156.8 MHz from the room from which the vessel is normally steered. The watch shall be maintained by a designated member of the crew who may perform other duties, relating to the operation or navigation of the vessel, which do not interfere with the effectiveness of the watch. Use of properly adjusted squelch or brief interruptions due to other nearby VHF transmissions are not considered to adversely affect the continuity or effectiveness of the required watch on the VHF distress frequency. This watch need not be maintained:

(i) When the vessel is keeping the required watch on the bridge-to-bridge radiotelephone frequency; or

(ii) When the vessel is participating in a Vessel Traffic Service (VTS) system as required or recommended by the U.S. Coast Guard and an efficient watch is maintained on the VTS frequency.

(c) Each vessel of the United States transporting more than six passengers for hire, which is equipped with a radiotelephone installation for compliance with Part III of Title III of the Communications Act shall, while being navigated in the open sea or any tidewater within the jurisdiction of the United States adjacent or contiguous to the open sea, keep a continuous and efficient watch on 2182 kHz while the vessel is beyond VHF communication range of the nearest VHF coast station, whenever such installation is not being used for authorized traffic. A VHF watch shall be kept on 156.8 MHz whenever such installation is not being used for authorized traffic. The VHF watch shall be maintained at the vessel's steering station actually in use by the qualified operator as defined by § 83.155(e) of this part, or by a designated member of the crew who has been instructed in radio operation and voice procedure by the radio operator. The crew member so designated may simultaneously perform other duties relating to the operation or navigation of the vessel, provided such other duties do not interfere with the effectiveness of the watch. The use of a properly adjusted squelch is not considered to adversely affect the continuity or the effectiveness of the required watch on the VHF distress frequency. The VHF watch need not be maintained:

(1) When the vessel is keeping the required watch on the bridge-to-bridge radiotelephone frequency; or

(2) When the vessel is participating in a Vessel Traffic Service (VTS) System as required or recommended by the U.S. Coast Guard and an efficient watch is being maintained on the VTS frequency.

2. In § 83.203 the heading is revised and a new paragraph (d) is added to read as follows:

§ 83.203 Watch required on vessels subject to the Safety Convention.

* * * * *

(d) Each ship of the United States subject to the Safety Convention shall maintain a continuous and efficient watch while being navigated in the open sea outside a harbor or port on the VHF distress frequency 156.8 MHz. The watch shall be maintained by a designated member of the crew who may perform other duties, relating to the operation or navigation of the vessel, which do not interfere with the effectiveness of the watch. Use of properly adjusted squelch or brief interruptions due to other nearby VHF transmissions are not considered to adversely affect the continuity or effectiveness of the required watch on the VHF distress frequency. This watch need not be maintained:

(1) When the vessel is keeping the required watch on the bridge-to-bridge radiotelephone frequency.

(2) When the vessel is participating in the system described in paragraph (c) of this section or in a Vessel Traffic Service (VTS) system as required or recommended by the U.S. Coast Guard and an efficient watch is maintained on the frequency appropriate to one of these systems.

3. In § 83.368 paragraph (e) is revised to read as follows:

§ 83.368 Radiotelephone station log.

* * * * *

(e) The log of the bridge-to-bridge station required by the vessel Bridge-to Bridge Radiotelephone Act and the log of ship VHF radiotelephone stations subject to Part II of Title III, of the communications Act of 1934 or to the provisions of the Safety Convention shall include the following entries:

* * * * *

4. In § 83.449 paragraph (a)(4) is revised to read as follows:

§ 83.449 Tests of reserve installation and automatic radiotelegraph alarm signal keyer.

(a) * * *

(4) On days when not used for communication the reserve transmitter energized by the reserve power supply shall be tested by actual operation when connected to the main antenna, an artificial antenna or a reserve antenna (if installed, the reserve antenna must be used at least once each voyage), noting antenna currents:

* * * * *

5. In Subpart BB the title is revised to read as follows:

Subpart BB—VHF Radiotelephone Stations Provided for Compliance With Part II of Title III of the Communications Act or the Provisions of the Safety Convention

6. In § 83.851 paragraph (a) is revised to read as follows:

§ 83.851 VHF radiotelephone station.

(a) The provisions of this subpart are applicable to the VHF radiotelephone station required to be provided on all passenger ships irrespective of size and all cargo ships of 300 gross tons and upwards subject to Part II, Title III of the Communications Act or to the Safety Convention. Vessels subject only to the Communications Act may use VHF radiotelephone installation complying with the Bridge-to-Bridge Radiotelephone Act in Subpart X of this Chapter provided that the equipment can transmit and receive on 156.8 MHz.

* * * * *

Appendix B.—Chapter IV.—Radiotelegraphy and Radiotelephony

The following new Regulation is added:

Regulation 4–1.—VHF radiotelephone installation

(a) Passenger ships irrespective of size and cargo ships of 300 tons gross tonnage and upwards shall be fitted with a VHF radiotelephone installation complying with the provisions of Regulation 17.

(b) The provisions of Regulation 17 shall also apply for VHF radiotelephone installations required by a Contracting Government for all ships to which Chapter V applies navigating in an area under its jurisdiction and for which a VHF radiotelephone installation is not made compulsory by paragraph (a).

The existing text of Regulation 7 is replaced by the following:

Regulation 7.—Watches—radiotelephone

(a) Each ship which is fitted with a radiotelephone station in accordance with Regulation 4 shall, for safety purposes while at sea, maintain continuous watch on the radiotelephone distress frequency in the place on board from which the ship is usually navigated, by use of a radiotelephone distress frequency watch receiver, using a loudspeaker, a filtered loudspeaker or radiotelephone auto alarm.

(b) Each ship referred to in paragraph (a) shall carry qualified radiotelephone operators (who may be the master, an officer or a member of the crew) as follows:

(i) if of 300 tons gross tonnage and upwards but less than 500 tons gross tonnage, at least one operator;

(ii) if of 500 tons gross tonnage and upwards but less than 1,600 tons gross tonnage, at least two operators. If such a ship carries one radiotelephone operator exclusively employed for duties related to radiotelephony, a second operator is not obligatory.

(c) Each ship which in accordance with Regulation 3 or Regulation 4 is fitted with a radiotelegraph station shall, while at sea, maintain continuous watch on the radiotelephone distress frequency in a place to be determined by the Administration, by use of a radiotelephone distress frequency watch receiver, using a loudspeaker, a filtered loudspeaker or radiotelephone auto alarm.

The existing text of Regulation 8 is replaced by the following:

Regulation 8.—Watches—VHF radiotelephone

Each ship which is fitted with a VHF radiotelephone installation in accordance with Regulation 4–1 shall at sea maintain a continuous listening watch on the navigating bridge:

(i) on 156.8 MHz (channel 16) when practicable; and/or

(ii) for such periods and on such channels as may be required by the Contracting Government referred to in Regulation 4–1(b).

Regulation 10.—Radiotelegraph installations

The existing text of paragraph (g) is replaced by the following:

(g–1) The main and reserve transmitters shall, when connected to the main antenna, have a minimum normal range as specified below, that is to say, they must be capable of transmitting clearly perceptible signals from ship to ship by day and under normal conditions and circumstances over the specified ranges.* (Clearly perceptible signals will normally be received if the R.M.S. value of the field strength at the receiver is at least 50 microvolts per metre.)

	Minimum normal range in miles	
	Main transmitter	Reserve transmitter
All passenger ships and cargo ships of 1,600 tons gross tonnage and upwards	150	100
Cargo ships below 1,600 tons gross tonnage	100	75

(g–2) The radiotelegraph installation shall include facilities for radiotelephone transmission and reception on the radiotelephone distress frequency. This requirement may be fulfilled by including such facilities in the main or reserve installation or other installed equipment. The transmitter power and receiver sensitivity of the radiotelephony part of the installation shall comply with Regulation 16(c)(i) and (f) respectively if that part is fitted after September 1, 1986. For installations fitted prior to that date, such transmitter power and receiver sensitivity shall be as determined by the Administration. The location and other conditions of the radiotelephony facilities required by this Regulation shall be as determined by the Administration, except when they form part of the main or reserve radiotelegraph installation.

In the absence of a direct measurement of the field strength the following data may be used as a guide for approximately determining the normal range:

A. In the case of antennae other than self-supporting types.

	Metre-amperes [1]
Normal range in miles:	
200	128
175	102
150	76
125	58
100	45
75	34

[1] The product of the distance (in metres) from the highest part of the antenna to the deepest load water-line and the antenna current (in amperes).

The values given in the second column of the table correspond to an average value of the ratio

$$\frac{\text{effective antenna height}}{\text{maximum antenna height}} = 0.47$$

This ratio varies with local conditions of the antenna and may vary between about 0.3 and 0.7.

B. In the case of self-supporting transmitting antennae:

	Metre-amperes [2]
Normal range in miles:	
200	305
175	215
150	150
125	110
100	85
75	55

[2] The product of the distance (in metres) from the highest part of the antenna to the deepest load water-line and the current (in amperes) measured at the base of the radiating portion of the antenna. The values given in the second column are based on the propagation curves given in CCIR Recommendation 368–2 and also the method, experimental results and calculations in CCIR Report 502–1 and Opinion 43–1. The necessary value of metre-amperes varies considerably with local conditions of the antenna.

The existing text of sub-paragraph (h)(iv) is replaced by the following:

(h)(iv)(1) The radiotelephone transmitting facility required by paragraph (g–2) shall be fitted with an automatic device for generating the radiotelephone alarm signal, so designed as to prevent actuation by mistake, and complying with the requirements of Regulation 16(e). The device shall be capable of being taken out of operation at any time in order to permit the immediate transmission of a distress message. For installations fitted prior to September 1, 1986, the fitting of automatic devices for generating the radiotelephone alarm signal shall be as determined by the Administration.

(2) Arrangements shall be made to check periodically the proper functioning of the automatic device for generating the radiotelephone alarm signal on frequencies other than the radiotelephone distress frequency using a suitable artificial antenna. An exception shall be made for radiotelephone emergency equipment having only the radiotelephone distress frequency in which case a suitable artificial antenna shall be employed.

Note: While all reasonable steps shall be taken to maintain the apparatus in an efficient condition, malfunction of the radiotelephone transmitting facilities required by this Regulation shall not be considered as making the ship unseaworthy or as a reason for delaying the ship in ports where repair facilities are not readily available.

The existing text of sub-paragraph (1)(ii) is deleted.

The existing text of sub-paragraph (m)(iv) is replaced by the following:

(m)(iv) The VHF installation in accordance with the provisions of Regulation 17(c);

Regulation 18.—Radiotelephone installations

The existing text of paragraph (b) is amended by deleting A3H, A3A and A3J.

The existing text of paragraph (c) is replaced by the following:

(c)(i) In the case of cargo ships of 300 tons gross tonnage and upwards but less than 1,600 tons gross tonnage the transmitter shall have a minimum normal range of 150 miles, i.e. it shall be capable of transmitting clearly perceptible signals from ship to ship by day and under normal conditions and circumstances over this range.*

*In the absence of field strength measurements, it may be assumed that this range will be obtained by a power in the antenna of 15 watts (unmodulated carrier) with an antenna efficiency of 27 percent for double sideband emissions or 60 watts peak envelope power for single sideband full carrier emissions when 100 percent modulated by a single sinusoidal oscillation. (Clearly perceptible signals will normally be received if the R.M.S. value of the field strength produced at the receiver by an unmodulated carrier is at least 25 microvolts per metre for double sideband and single sideband full carrier emissions.)

(ii) In the case of existing installations using double sideband emissions on cargo ships of 300 tons gross tonnage and upwards but less than 500 tons gross tonnage, the transmitter shall have a minimum normal range of at least 75 miles.

The existing text of sub-paragraph (j)(iv) is replaced by:

(iv) the VHF installation in accordance with the provisions of Regulation 17(c).

The existing text of Regulation 17 is replaced by the following:

Regulation 17.—VHF radiotelephone installation

(a) The VHF radiotelephone installation shall be in the upper part of the ship complying with the provisions of this Regulation and comprising a transmitter and receiver, a source of energy capable of actuating them at their rated power levels, and an antenna suitable for efficient radiating and receiving signals at the operating frequencies.

(b) On board passenger ships irrespective of size and cargo ships of 500 tons gross

VOL 48 ISS 94 MY 13 1983 UMI

tonnage and upwards it shall be possible to operate the VHF radiotelephone installation from a source of energy which is situated in the upper part of the ship and has sufficient capacity for at least six hours of operation.

(c) The Administration may authorize the use of the reserve source of energy of the radiotelegraph installation or the radiotelephone installation respectively referred to in Regulation 10(m) and Regulation 16(j) to supply the VHF radiotelephone installation. In this case the reserve source of energy is required to be of a capacity sufficient to operate simultaneously the VHF radiotelephone installation and:

(i) the reserve radiotelegraph transmitter and receiver for at least six hours unless a switching device is fitted to ensure alternate operation only; or

(ii) the radiotelephone transmitter and receiver for at least six hours unless a switching device is fitted to ensure alternate operation only.

(d) The VHF radiotelephone installation shall conform to the requirements laid down in the Radio Regulations for equipment used in the VHF maritime mobile radiotelephone service and shall be capable of operation on those channels specified by the Radio Regulations and as may be required by the Contracting Government referred to in Regulation 4–1(b).

(e) The Contracting Government referred to in Regulation 4–1(b) shall not require the transmitter R.F. carrier power output to be greater than 10 watts. The annual shall, in so far as is practicable, have an unobstructed view in all directions.*

*For guidance purposes, it is assumed that each ship is fitted with a vertically polarized unity gain antenna at a nominal height of 9.15 m above water, a transmitter R.F. power output of 10 watts, and a receiver sensitivity of 2 microvolts across the input terminals for 20 dB signal-to-noise ratio.

(f) Control of the channels required for navigational safety shall be immediately available on the navigating bridge convenient to the conning position and, where necessary, facilities should be available to permit radiocommunications from the wings of the navigating bridge.

Regulation 19.—Radio logs

The following paragraph is added to the existing text and the existing paragraph (c) is relettered as paragraph (d):

(c) On each ship fitted with a VHF radiotelephone installation in accordance with Regulation 4–1:

(i) the entries required by the Radio Regulations shall be recorded in the radio log in accordance with the requirements of the Administration;

(ii) a summary of all communications relating to distress, urgency and safety traffic shall be recorded in the ship's log.

[FR Doc. 83–12883 Filed 5–13–83; 8:45 am]
BILLING CODE 6712–01–M

DEPARTMENT OF INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Reclassification of Utah Prairie Dog

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to reclassify the Utah prairie dog from Endangered to Threatened status under the Endangered Species Act of 1973, and to issue a special regulation that would allow a maximum of 5,000 animals of the species to be taken annually between June 1 and December 31 in parts of the Cedar and Parowan Valleys in Utah under a permit system developed by the Utah Division of Wildlife Resources. Such taking would be in the best interest of the conservation of the Utah prairie dog, and would not be allowed to be inconsistent with the conservation of the populations in question. The populations have increased substantially in recent years, and are now straining the carrying capacity of available habitat. They are thus vulnerable to outbreaks of disease (sylvatic plague) such as have occurred among overcrowded rodents elsewhere. There is also a serious conflict developing between these populations and human agricultural interests, which will result in antagonism from local ranchers, and possibly mass illegal killing of the prairie dogs as unwanted nuisances. A program of transplanting to public land has not been able to relieve population pressures, and regulated taking is now seen as the only way to relieve the situation. Comments from the public are solicited on this proposal.

DATE: Comments on this proposed rule must be submitted by July 12, 1983. Requests for a public hearing must be received by June 27, 1983.

ADDRESSES: Interested persons or organizations are requested to submit comments to Regional Director, U.S. Fish and Wildlife Service, Region 6, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80255. Comments and materials relating to this rule are available for public inspection by appointment during business hours at the Service's Regional Office in Denver. Requests for a public hearing should be addressed to the Regional Director at the above address.

FOR FURTHER INFORMATION CONTACT: Regional Director, U.S. Fish and Wildlife Service, Region 6, Denver, Colorado (303/234–2209), or John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–2771).

SUPPLEMENTARY INFORMATION:

Background

The Utah prairie dog (*Cynomys parvidens*) was listed as an Endangered species on June 4, 1973 (38 FR 14678), pursuant to the Endangered Species Conservation Act of 1969. On November 5, 1979, the Utah Division of Wildlife Resources petitioned the U.S. Fish and Wildlife Service to remove the Utah prairie dog from the U.S. list of Endangered and Threatened wildlife. The Service has found that this petition contains substantial data, and warrants the present proposal to reclassify the species from Endangered to Threatened status.

The Utah prairie dog is a burrowing rodent in the squirrel family (Sciuridae) that occurs only in southern Utah. Its total numbers have fallen from an estimated 95,000 individuals in the 1920's to a 1982 spring estimate of about 10,000 adults (Note.—Actual census counts are about half the size of the estimates cited in this proposal, since only about half the animals are above ground at the time of a census count). This decline was caused by disease, habitat alteration, and poisoning by people because the prairie dog was considered to compete with domestic livestock for forage. At present, the Utah prairie dog is still threatened over much of its range by loss of habitat to human residential and agricultural development.

The Utah prairie dog, however, is not in danger of extinction. Despite the above problems, the over-all numbers of the species appear to have been relatively stable since 1972. The total area occupied by the Utah prairie dog at present encompasses some 456,000 acres. The spring estimate of the number of adult animals in the Cedar and Parowan Valleys (encompassing about 113,000 acres) in eastern Iron County, actually increased from 1,200 in 1976 to 7,300 in the spring of 1982. It should be clearly noted at this point that these population estimates are deceptive. They are based on early spring censuses and constitute only the adult animals that have successfully survived the winter. In the summer, after the young are born and become active, the numbers of Utah prairie dogs are much higher. This is the time at which it is necessary to reduce population pressures in the Cedar and Parowan Valleys. Female Utah prairie dogs give

birth to an average of 4.8 young in April (Pizzimenti and Collier, 1975). Assuming that half the adult population is female and each produces an average annual litter of only 4 young, the total adult and juvenile population of the species throughout its whole range in the summer would be at least 30,000 animals (5,000 adult females × 4 pups + 10,000 adults). In the Cedar and Parowan Valleys alone, the summer population would be well in excess of 20,000 animals (3,650 females × 4 pups + 7,300 adults). The adult prairie dogs cease surface activity in late August and September, but the young animals continue surface activity and feeding for several months thereafter. These young prairie dogs suffer a high mortality rate in the fall and winter, but those that do survive over the winter contribute to the steady increase in the numbers of adult Utah prairie dogs noted since 1976. The problem that has developed is that the large number of juvenile animals present during the summer in the Cedar and Parowan Valleys is straining the carrying capacity of available habitat there, and each year there may be an increasing danger of the outbreak of disease (sylvatic plague) among them. Moreover, there is serious conflict in the Cedar and Parowan Valleys between the Utah prairie dog and human agricultural interests. About 62 percent of all Utah prairie dog colonies occurred on private land in 1982; about 88 percent of the total number of animals occurred on private land. In the Cedar and Parowan Valleys, 98 percent of all prairie dogs occur on private land. The major crop on this private land is alfalfa, which is also a preferred food of the prairie dog. Crop losses are extensive where large prairie dog towns have developed; the mounds of the animals damage haying equipment, and the burrows drain irrigated fields. It is estimated that the large summer populations of these prairie dogs cost local ranchers 1.5 million dollars annually in crop losses and damage to equipment.

Farmers in the area traditionally poisoned, shot, or trapped nuisance prairie dogs. Since the Utah prairie dog has been protected by the Endangered Species Act of 1973, however, these methods of control have no longer been legal. Damage in the Cedar and Parowan Valleys has now reached the point at which there is genuine concern that local ranchers might take illegal means of securing relief. Such means, which in the past have included poisoning, could prove severely damaging to the remaining Utah prairie dog populations, and might bring about the extinction of the species.

In an effort to relieve the over population problems, the Utah Division of Wildlife Resources removed 2,437 animals from the Cedar and Parowan Valleys between 1976 and 1980 for transplanting onto public lands. Although many of these animals apparently did not survive, the transplantation program, along with discovery of previously unrecorded colonies, has increased the number of known active prairie dog towns on public lands from 11 in 1976 to 35 in 1982. Meanwhile, the number of active towns on private land increased from 40 in 1976 to 57 in 1982. The transplantation program obviously has not been able to keep pace with the growing prairie dog population in the Cedar and Parowan Valleys, and new sites for reintroduction are limited. It therefore appears that population pressures in this area are now such that regulated taking is necessary for the management and a proper conservation of the species. The present proposal recognizes the biological fact that the Utah prairie dog is a Threatened rather than Endangered species, and would permit the State of Utah to authorize certain individuals to legally take up to 5,000 animals annually between June 1 and December 31, in delineated portions of the Cedar and Parowan Valleys when such take is necessary for the conservation and management of the Utah prairie dog. Also, the State will continue to live-trap prairie dogs on private lands and reestablish them on Federal lands as has been its practice since the mid–1970's

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (codified at 50 CFR Part 424; under revision to accommodate 1982 amendments) set forth the procedures for adding species to the Federal list. The Secretary of the Interior shall determine whether any species is an Endangered species or a Threatened species due to one or more of the five factors described in Section 4(a)(1) of the Act.

These factors and their application to the Utah prairie dog are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The Utah prairie dog once ranged from Pine Valley in Iron and Beaver Counties, to the foothills of the Aquarius Plateau in the east, and from northern Washington and Kane Counties on the south to as far north as Nephi, Utah. Today the species is confined to disjunct areas in southwestern Utah. In the 1920's, it was estimated that there were 95,000 Utah prairie dogs, whereas today (1982) the spring estimate is around 10,000 adult animals. Among other factors, habitat destruction and modification for agricultural and residential uses were important in reducing the range and population of the species. Nevertheless, the population now appears to have been increasing since 1972, and transplants of individuals by State authorities has increased the range since then. At present (1982), the species occurs in an area encompassing some 450,000 acres of land, and about 38 percent of the colonies are located on public land. Although the total number of animals is still small, and the range reduced, the Utah prairie dog is not now in danger of extinction, but it must be closely monitored and managed to assure that it does not become Endangered.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Not applicable.

C. *Disease or Predation.* Rodent populations are subject to sylvatic plague where conditions of overpopulation exist. In Utah's Cedar and Parowan Valleys, the Utah prairie dog population is now crowded and there may be a possibility of this disease erupting among the animals. Although an outbreak of sylvatic plague would probably not result in the species' extinction, it could lead to its becoming endangered.

D. *Inadequacy of existing regulatory mechanisms.* Not applicable.

E. *Other natural or manmade factors affecting its continued existence.* In the Cedar and Parowan Valleys, localized high population levels of the Utah prairie dog reportedly result in crop losses and damage to equipment amounting to some 1.5 million dollars annually. State authorities have not been able to relieve the situation by live-trapping and transplanting individual animals, and there is increasing concern that local ranchers will resort to illegal measures of control. This could pose a serious threat to the populations in the Cedar and Parowan Valleys and, since overall numbers and range are quite small, to the species as a whole.

Effect of the Proposal if Published as a Final Rule

This proposal would reclassify the Utah prairie dog from Endangered status to Threatened status, pursuant to the

VOL 48 ISS 94 MAY 13 1983 UMI

Endangered Species Act of 1973, as amended. Accordingly, there would be some modification of the conservation measures already in effect for this species. The prohibitions of 50 CFR 17.31 for Threatened species are essentially the same as those for Endangered species (illegal to take, import or export, ship in interstate commerce or in the course of a commercial activity, or sell or offer for sale in interstate or foreign commerce; and illegal to possess, sell, deliver, carry, transport, or ship any such wildlife which was illegally taken), except that "any employee or agent of the Service, of the National Marine Fisheries Service, or of a State conservation agency which is operating under a Cooperative Agreement with the Service or with the National Marine Fisheries Service, in accordance with Section 6(c) of the Act, who is designated by his agency for such purposes, may, when acting in the course of his official duties, take those threatened species of wildlife which are covered by an approved Cooperative Agreement to carry out conservation programs." The State of Utah has such a cooperative agreement that covers the Utah prairie dog. Also, in accordance with 50 CFR 17.32, permits for Threatened wildlife are available for scientific purposes, enhancement of propagation or survival, economic hardship, zoological exhibition, educational purposes, or special purposes consistent with the purposes of the Act.

Section 4(d) of the Act states that whenever any species is listed as a Threatened species, the Secretary shall issue such regulations as he deems necessary and advisable to provide for the conservation of such species. A special regulation is proposed herewith for the Utah prairie dog that would apply only to the populations in certain delineated portions of the Cedar and Parowan Valleys in Iron County, Utah. Taking in these delineated areas would be carried out in accordance with Utah State law, through a permit system established by the Utah Division of Wildlife Resources. The number of animals taken annually could not exceed 5,000 and must be taken between June 1 and December 31. Permits would allow controlled shooting, trapping, and drowning in specified areas monitored by the Division. Taking could not include the use of chemical toxicants, since no such materials are registered for control of the species. This taking would be permitted as a conservation measure since the prairie dogs are overcrowding their habitat in these valleys, and population pressures cannot be relieved in any other way. Given the fact that the total population (juveniles and adults) in these valleys probably exceeds 20,000 animals during the summer, the maximum allowed take of 5,000 animals would not jeopardize the survival of the prairie dog population in the Cedar and Parowan Valleys. In addition, the Service would reserve the right to immediately halt any take of Utah prairie dogs if at any time it received substantive information that such take was proving detrimental to survival of the species. The number of animals taken, their location, and the methods of take employed would have to be reported at 90 day intervals to the U.S. Fish and Wildlife Service. The information collection requirement contained in § 17.40(g)(2) does not require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*, because there are fewer than 10 respondents annually.

The State of Utah will continue its annual census count of Utah prairie dogs and submit data it obtains through these counts to the Service each year. The provisions of section 7(a) of the Endangered Species Act would continue to apply to the Utah prairie dog throughout its range. All Federal agencies would be required to insure that actions authorized, funded, or carried out by them are not likely to jeopardize the continued existence of the species. Other provisions of the Act, including those for land acquisition (Section 5) and financial assistance to States (Section 6) also would continue to apply to all populations of the Utah prairie dog.

Public Comments Solicited

The Service intends that the rules finally adopted will be as accurate and effective as possible in the conservation of this species. Therefore, any data, comments, or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interests, or any other interested party concerning any aspect of this proposed rule are hereby solicited. Final promulgation of regulations on the Utah prairie dog will take into consideration the comments and any additional data received by the Service, and such information may lead it to adopt final regulations that differ from the proposal.

Also, the Service is requesting information on environmental and other impact that would result from the reclassification of the Utah prairie dog, and information on possible alternatives to the measure.

The Endangered Species Act has provisions for public hearings if requested, in writing, within 45 days of the date of this proposal. Requests should be addressed to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80255.

National Environmental Policy Act

A draft Environmental Assessment has been prepared in conjunction with this proposal. It is on file in the Service's Office of Endangered Species, 1000 North Glebe Road, Arlington, Virginia, and may be examined by appointment during regular business hours. A determination will be made at the time of a final rule as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969 [implemented at 40 CFR Parts 1500 through 1508].

Proposed Regulations Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend Part 17, Title 50 of the U.S. Code of Federal Regulations as set forth below.

1. The authority citation for Part 17 reads as follow:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 95 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531, *et seq.*).

2. It is proposed to amend § 17.11 by revising the entry on the Utah prairie dog to read as follows:

§ 17.11 [Amended]

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name						
Prairie dog, Utah	*Cynomys parvidens*	U.S.A. (UT)	Entire	T	6	N/A	17.40(g)

3. It is proposed to amend § 17.40 by adding a new paragraph (g) to read as follows:

§ 17.40 Special rules—mammals.

* * * * *

(g) Utah prairie dog (*Cynomys parvidens*)—(1) Except as noted in paragraph (g)(2) of this section, all prohibitions of 50 CFR 17.31 and exemptions of 50 CFR 17.32 shall apply to the Utah prairie dog.

(2) A Utah prairie dog may be taken under a permit issued by the Utah Division of Wildlife Resources, in accordance with the laws of the State of Utah, in the following areas of Cedar Valley and Parowan Valley, Iron County, Utah (Salt Lake Meridian): T33S R8W, T33S R9W, T34S R8W, T34S R9W, T34S R10W, T34S R11W, T35S R10W, T35S R11W, T36S R11W, T36S R12W, T37S R12W, T38S R12W: *Provided*, that such taking does not exceed 5,000 animals annually, and that such taking is confined to the period from June 1 to December 31. The following information must be reported every 90 days to the U.S. Fish and Wildlife Service Regional Office, Denver Federal Center, Denver, Colorado 80225, or to any other address designated by the Service: Name and address of each person holding an active permit; reason for issuance of each permit; number, location, and method of take for all Utah prairie dogs taken during the reporting period; and any other information requested by the Service. The information collection requirement contained in § 17.40(g)(2) does not require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*, because there are fewer than 10 respondents annually.

(3) If the Service receives substantive evidence that taking relative to paragraph (g)(2) of this section is inconsistent with the conservation of Utah prairie dog population in the designated area, it may immediately prohibit or restrict such taking.

Dated: April 12, 1983.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310–55–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 646

Snapper-Grouper Fishery of the South Atlantic; Availability of a Fishery Management Plan and Request for Comments

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of a fishery management plan and request for comments.

SUMMARY: NOAA issues this notice that the South Atlantic Fishery Management Council has submitted the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic for Secretarial review and is requesting comments from the public. Copies of the plan may be obtained from the address below.

DATE: Comments on the plan should be submitted on or before July 22, 1983.

ADDRESSES: All comments should be sent to Jack T. Brawner, Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Copies of the plan are available upon request from the South Atlantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, South Carolina 29407–4699.

FOR FURTHER INFORMATION CONTACT: Rodney C. Dalton (Regional Plan Coordinator), 813–893–3721.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act, as amended, (16 U.S.C. 1801 *et seq.*) requires that each regional fishery management council submit any fishery management plan it prepares to the Secretary of Commerce (Secretary) for review and approval or disapproval. This act also requires that the Secretary, upon receiving the plan, must immediately publish a notice that the plan is available for public review and comment. The Secretary will consider the public comments in determining whether to approve the plan.

This plan proposes measures for managing the domestic commercial and recreational fisheries for species in the snapper-grouper fishery of the South Atlantic. On August 20, 1982, the Environmental Protection Agency published a notice of availability of a draft environment impact statement for this plan (47 FR 36468).

Regulations proposed by the Council and based on this plan are scheduled to be published within 30 days.

(16 U.S.C. 1801 *et seq.*)

Dated: May 9, 1983.

Joe P. Clem,

Acting Chief, Fisheries Process Division, National Marine Fisheries Service.

Flue-Cured Tobacco Referendum Results: 1983 Through 1985 Crops of Tobacco

ACTION: Notice of Results of Marketing Quota Referendum for 1983 Through 1985 Crops of Flue-Cured Tobacco.

SUMMARY: This notice proclaims the results of a marketing quota referendum for flue-cured tobacco which was held on December 16, 1982, in accordance with Section 312(c) of the Agricultural Adjustment Act of 1938, as amended (the "1938 Act"). The referendum was conducted in order to determine whether producers of flue-cured tobacco favor or oppose marketing quotas. Since flue-cured tobacco producers did not disapprove national marketing quotas, such quotas will be in effect for the three marketing years 1983–1984, 1984–1985, and 1985–1986.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Harry D. Millner, Tobacco and Peanuts Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. (202) 447–4281.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified "not major". This notice has been classified as "not major" since it will not result in: (1) an annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies, or a geographic region; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this notice applies as set forth in the Catalog of Federal Domestic Assistance are: Title: Commodity Loan and Purchases; Number: 10.051.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice of determination since the Agricultural Stabilization and Conservation Service is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

On November 30, 1982, the Secretary of Agriculture announced that national marketing quotas would be in effect for flue-cured tobacco for the three marketing years beginning on July 1, 1983, subject to approval by flue-cured tobacco producers voting in a referendum. On December 16, 1982, such a referendum was conducted. Section 312(c) of the 1938 Act provides that if more than one-third of such producers voting in the referendum oppose national marketing quotas, such results shall be proclaimed by the Secretary and national marketing quotas shall not be in effect.

Since the only purpose of this notice is to announce the results of the referendum, it is hereby determined that no further public rulemaking is required. Accordingly, the results of such referendum are set forth below:

Results of the National Marketing Quota Referendum for the 1983 Through 1985 Crops of Flue-Cured Tobacco

(1) *Referendum period.* The national marketing quota referendum for the 1983–1984, 1984–1985, and 1985–1986 marketing years for flue-cured tobacco was held on December 16, 1982, in accordance with 7 CFR Part 717.

(2) *Farmers Voting.* The following is a summary, by State, of the result of the referendum:

FLUE-CURED TOBACCO

State	Yes	No	Total
Alabama	100	0	100
Florida	1,576	116	1,692
Georgia	6,828	521	7,349
North Carolina	67,218	4,676	71,894
South Carolina	11,527	383	11,910
Virginia	9,969	1,361	11,330
Totals	[1]97,218	[2]7,057	104,275

[1] Allegations of voting irregularities were made in Franklin, Harnett, Nash, Randolph and Wilson Counties in North Carolina. Since such a large majority of those producers voting approved marketing quotas, the "yes" votes in these counties have been excluded in order to determine whether the result of the referendum was affected by voting irregularities. The approval rate would have been slightly higher had the "yes" votes in the afore-mentioned counties been included.

[2] This figure includes "no" votes in the 5 counties in North Carolina where the vote was disputed.

(3) *Marketing quotas will be in effect for the 1983 through 1985 crops of flue-cured tobacco.* Since not more than one-third of the producers of flue-cured tobacco voting in the referendum did not vote to disapprove national marketing quotas, and since the 1982–1983 marketing year is the last of three consecutive years for which marketing quotas previously proclaimed will be in effect, a national marketing quota shall be in effect for flue-cured tobacco for the marketing years 1983–1984, 1984–1985, and 1985–1986.

Authority: (Sec. 312(c), 52 Stat. 46, as amended, 7 U.S.C. 1312(c)).

Signed at Washington, D.C. on May 5, 1983.

Everett Rank,
Administrator, Agricultural Stabilization and Conservation Service.

Soil Conservation Service

Colonel Town Community Camp, Public Water-Based Recreation RC&D Measure, New Hampshire; Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Colonel Town Community Camp, Public Water-Based Recreation RC&D Measure, Coos County, New Hampshire.

FOR FURTHER INFORMATION CONTACT: Mr. Richard L. Porter, State Conservationist, Soil Conservation Service, Federal Building, Box G, Durham, New Hampshire, 03824, telephone 603–868–7581.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Richard L. Porter, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for public-water-based recreation. The planned works of improvement include rehabilitating a one-quarter acre pond; spring development for water supply; and, subsurface drainage of a playfield.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency, and to various Federal, State and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Richard L. Porter.

No administrative action on implementation of the proposal will be initiated until 30 days after the date of this publication in the **Federal Register.**

BILLING CODE 3410-16-M

Lake Pleasant Critical Area Treatment Measure; Resource Conservation and Development Program, Massachusetts; Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650; the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Lake Pleasant Critical Area Treatment Measure, Franklin County, Massachusetts.

FOR FURTHER INFORMATION CONTACT: Rex O. Tracy, State Conservationist, Soil Conservation Service, 451 West Street, Amherst, Massachusetts, 01002, telephone (413) 256–0442.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Rex O. Tracy, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns controlling erosion and sedimentation along a 250 foot long section of Hannegan Brook as described in the Lake Pleasant Critical Area Treatment RC&D Measure Plan. The planned works of improvement include the installation of: two rock riprap headwalls, 300 cubic yards of fill, 150 cubic yards of rock riprap and 250 feet of subsurface drainage pipe.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Rex O. Tracy.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 14–83]

Foreign-Trade Zone 81—Portsmouth, New Hampshire; Application for Special-Purpose Subzone at Manchester Manufacturing Plant in Colebrook

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the New Hampshire Port Authority, grantee of Foreign-Trade Zone 81, requesting authority for a special-purpose subzone at the facilities of Manchester Manufacturing, Inc. (MMI) in Colebrook, New Hampshire, within the Norton Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 5, 1983. The applicant is authorized to make this proposal under Section 271–A:11 of the New Hampshire RSA.

On January 20, 1983, the Board authorized the Port Authority to establish a foreign-trade zone (Board Order 207, 48 FR 4308, 1/31/83) in Portsmouth and a subzone at Nashua Corporation facilities in Nashua and Merrimack. The general-purpose zone covers 10 acres at the Port of Portsmouth.

The proposed subzone will comprise MMI's 180,000 square foot manufacturing and warehousing facility, employing some 160 persons, and located on a 15-acre site in the Colebrook Industrial Park. The company manufactures children's outerwear from domestic piece goods, and warehouses some imported apparel. This request is part of MMI's plans to expand its operations relating to the warehousing of imported apparel of all types. In expanding its operations at the plant, the company would undertake the repair and ornamenting of imported garments.

Zone procedures would be used to defer the payment of Customs duties and are being requested to provide a Customs setting for the inspection and repair of imported garments prior to entry. This would result in a greater utilization of the plant, helping to make the company more competitive as a warehouse center for its major retail customer. By increasing the capacity utilization of the Colebrook facility, unit overhead costs on both manufacturing and warehousing operations will be reduced. The resulting lower costs will help this plant regain its competitive

VOL 48 ISS 94 MY 13 1983 UMI

position as a manufacturer in relation to the company's plants abroad, leading to a potential increase in employment of 100 persons.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Edward A. Goggin, Assistant Regional Commissioner, U.S. Customs Service, Northeast Region, 100 Summer St., Boston, MA 02210; and Colonel Carl B. Sciple, Division Engineer, U.S. Army Engineer Division New England, 424 Trapelo Rd., Waltham, MA 02254.

Comments concerning the proposed subzone are invited in writing from interested persons and organizations. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before June 20, 1983.

A copy of the application is available for public inspection at each of the following locations:

Port Director's Office, U.S. Customhouse, Norton, VT 05907

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania Ave. NW., Washington, D.C. 20230.

Dated: May 6, 1983.

John J. Da Ponte, Jr.,
Executive Secretary.

Telecommunications Equipment Technical Advisory Committee; Closed Meeting

A meeting of the Telecommunications Equipment Technical Advisory Committee will be held on June 2, 1983, at 10:00 a.m., Herbert C. Hoover Building, Room 3708, 14th Street and Constitution Avenue, N.W., Washington, D.C. The Committee Advises the Office of Export Administration with respect to technical questions which affect the level of export controls applicable to telecommunications equipment or technology.

The committee will meet only in executive session to discuss matters properly classified under Exective Order 12356, dealing with the U.S. and COCOM control programs and strategic criteria related thereto.

A Notice of Determination to close meetings or portion of meetings of the Committee to the public on the basis of 5 U.S.C. 552b(c)(1) was approved on September 29, 1981, in accordance with the Federal Advisory Committee Act.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, telephone: 202-377-4217.

For further information contact Mrs. Margaret Cornejo 202-377-2583.

Dated: May 9, 1983.

Milton Baltas,
Director of Technical Programs, Office of Export Administration.

BILLING CODE 3510-25-M

Final Affirmative Countervailing Duty Determinations; Certain Stainless Steel Products From Brazil

AGENCY: International Trade Administration, Commerce.

ACTION: Final Affirmative Countervailing Duty Determinations.

SUMMARY: We have determined that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Brazil of hot-rolled stainless steel bar, cold-formed stainless steel bar, and stainless steel wire rod (certain stainless steel products). The estimated net subsidy is 15.44 percent *ad valorem*. The U.S. International Trade Commission (ITC) will determine within 45 days of the publication of this notice whether these imports are materially injuring, or are threatening to materially injure, a U.S. industry.

The Department of Commerce (the Department) and the government of Brazil have entered into a suspension agreement. We continued the investigations at the request of the petitioners in accordance with section 704(g) of the Tariff Act of 1930, as amended (the Act). If the final determinations by the ITC are negative, the suspension agreement shall have no force or effect. If the final determinations by the ITC are affirmative, the suspension agreement shall remain in force.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 377-0171.

SUPPLEMENTARY INFORMATION:

Final Determinations

Based upon our investigations, we have determined that certain benefits which constitute subsidies within the meaning of section 701 of the Act, are being provided to manufacturers, producers, or exporters in Brazil of certain stainless steel products. For purposes of these investigations, the following programs are found to confer subsidies:

- IPI export credit premium.
- Preferential working capital financing for exports.
- Income tax exemption for export earnings.
- Long-term loans.
- IPI rebates for capital investment.

- Industrial Development Council (CDI) program.
- Accelerated depreciation for capital goods manufactured in Brazil.

We have determined the estimated net subsidy on certain stainless steel products from Brazil to be 15.44 percent *ad valorem*.

The Department and the government of Brazil have entered into a suspension agreement. If the final ITC determinations are affirmative, the agreement will remain in force, and we will not issue a countervailing duty order as long as the requirements of section 704(f)(3)(B) of the Act are met.

Case History

On June 16, 1982, the Department received a petition from A1 Tech Specialty Steel Corporation, Carpenter Technology Corporation, Colt Industries, Inc., Crucible Specialty Metals Division, Cyclops Corporation, Guterl Special Steel Corporation, Joslyn Stainless Steels and Republic Steel Corporation, filed on behalf of the U.S. industry producing certain stainless steel products. The petition alleged that certain benefits which constitute subsidies within the meaning of section 701 of the Act are being provided, directly or indirectly, to the manufacturers, producers, or exporters in Brazil of certain stainless steel products.

We found the petition to be sufficient and on July 6, 1982, we initiated countervailing duty investigations (47 FR 30274). We stated that we expected to issue preliminary determinations by September 9, 1982. We subsequently determined that the investigations are "extraordinarily complicated," as defined in section 703(c) of the Act, and postponed our preliminary determinations for 65 days until November 15, 1982 (47 FR 40202).

Since Brazil is a "country under the Agreement" within the meaning of section 701(b) of the Act, injury determinations are required for these investigations. Therefore, we notified the U.S. International Trade Commission (ITC) of our initiations. On August 2, 1982, the ITC determined that there is a reasonable indication that these imports are materially injuring, or are threatening to materially injure, a U.S. industry (47 FR 36038).

We presented a questionnaire concerning the allegations to the government of Brazil in Washington, D.C. on July 21, 1982. On November 1, 1982, we received the response to that questionnaire.

On November 15, 1982, we preliminarily determined that the government of Brazil was providing subsidies to manufacturers, producers, or exporters of certain stainless steel products under six programs. The programs preliminarily found to confer subsidies were:

- Industrialized Products Tax (IPI) export credit premium.
- Preferential working capital financing for exports.
- Income tax exemption for export earnings.
- Long-term loans.
- IPI rebates for capital investment.
- Industrial Development Council (CDI) program.

Notice of the preliminary affirmative countervailing duty determinations was published on November 19, 1982 (47 FR 52207). We directed the U.S. Customs Service to suspend liquidation of all entries of the certain stainless steel products entered or withdrawn from warehouse, for consumption on or after November 19, 1982, and to require the posting of a cash deposit, or bond, or other security in the amount of 12.5 percent of the f.o.b. value of the merchandise.

On December 28, 1982, the Department and the government of Brazil initialed a proposed agreement to suspend the countervailing duty investigations involving certain stainless steel products from Brazil. The basis for the proposed agreement was that the government of Brazil would offset by an export tax the entire amount of benefits we found to confer subsidies on exports of certain stainless steel products to the United States.

On the same date, in compliance with the procedural requirements of section 704(e) of the Act, we consulted with the petitioners and provided them a copy of the proposed agreement. We received comments on the proposed agreement and addressed them in the notice announcing the suspension of the investigations.

On January 27, 1983, the Department and the government of Brazil signed a suspension agreement, as provided for under section 704 of the Act. The agreement became effective with its publication in the **Federal Register** on February 2, 1983 (48 FR 4703). Under the agreement, the government of Brazil is required to offset completely by an export tax the amount of the net subsidy determined by the Department to exist on Brazilian exports of certain stainless steel products to the United States.

By letter of February 22, 1983, counsel for the petitioners requested that the investigations be continued under section 704(g) of the Act. Therefore, we are required to complete the investigations and issue final determinations.

Scope of Investigations

The products covered by these investigations are hot-rolled stainless steel bar, cold-formed stainless steel bar, and stainless steel wire rod. For a further description of these products, see Appendix A to this notice.

There are five known producers and exporters in Brazil of certain stainless steel products to the United States. We have received information from the government of Brazil regarding three of these companies, Companhia Acos Especiais Itabira (ACESITA), Acos Finos Piratini S/A (PIRATINI), and Acos Villares S/A (VILLARES), which represented approximately 99 percent of Brazilian exports of certain stainless steel products to the United States in calendar year 1981.

The period for which we are measuring subsidization is that fiscal year for each company which most closely corresponds to calendar year 1981. That period is calendar year 1981 for ACESITA and PIRATINI, and February 1, 1981 to January 31, 1982 for VILLARES. We have referred to these periods as fiscal year 1981 in this notice.

In its response, the government of Brazil provided data for the applicable periods.

Changes Since the Preliminary Determinations

We preliminarily determined that the program "accelerated depreciation for capital goods manufactured in Brazil" was not used by manufacturers, producers or exporters in Brazil of certain stainless steel products. However, after analysis of the information received during verification which took place during December 13-17, 1982, we have determined that one company, VILLARES, benefitted from that program. We also found additional benefits under the long-term loan program. These major changes as well as others which have resulted from alterations in calculations necessitate modification of the export tax established pursuant to the suspension agreement. Such subsequent determinations are provided for under the terms of the agreement. By letter of March 29, 1983, we notified the government of Brazil that such changes may occur as the result of these determinations. We will officially notify the government of Brazil of these determinations so that they may adjust the export tax accordingly.

Analysis of Programs

I. *Programs Determined to Confer Subsidies.* We have determined that subsidies are being provided to

VOL
48
ISS
94
MY
13
1983
UMI

manufacturers, producers, or exporters in Brazil of certain stainless steel products under the programs described below.

A. *Industrialized Products Tax (IPI) Export Credit Premium.* Under this program the bank involved in the export transaction reimburses in cash to the exporter a percentage of the "adjusted" f.o.b. invoice price of the exported merchandise. After having suspended this program in December 1979, the government of Brazil reinstated it on April 1, 1981. Since the IPI export credit premium program is designed to promote exports and is tied to export performance, we have determined that the program is an export subsidy and therefore is countervailable. The program has also been found to be countervailable in previous countervailing duty investigations involving Brazilian products.

Exporters of certain stainless steel products are eligible for the maximum IPI export credit premium, which, up until March 30, 1982, was 15 percent of the "adjusted" f.o.b. invoice price of the exported merchandise.

Subsequently, the government of Brazil reduced the benefit to 14 percent on March 31, 1982, 12.5 percent on June 30, 1982, and 11 percent on September 30, 1982.

In calculating the amount the exporter is to receive, several deductions may be made to the invoice price to obtain the "adjusted" f.o.b. value. These adjustments include: any agent commissions, rebates or refunds resulting from quality deficiencies or damage during transit, contractual penalties, and the value of imported inputs. In order to receive the maximum export credit premium, the exported product must consist of a minimum of 75 percent value added in Brazil. If this minimum limit is not met, there is a specific calculation to reduce the f.o.b. invoice price when calculating the base upon which the IPI export credit premium is paid.

To determine the amount of benefit, we calculated the value of the IPI credits as of the date of shipment rather than the date of receipt and did not take into account the devaluation of the cruzeiro, in accordance with section 771(6)(B) of the Act. We then divided the value of the IPI credits by the value of exports and calculated a subsidy of 14.53 percent.

This rate is premised on an IPI export credit premium of 15 percent during the period for which we were measuring subsidization.

The government of Brazil has made three reductions in the level of the IPI credit during 1982, the most recent on September 30, 1982 to 11 percent. When there is a fundamental change in the benefit from a program after the period of investigation, which is applicable to all recipients, we take cognizance of that change if we have been able to confirm that the change has occurred and if there is no reason to believe that there has been a shift of these benefits to other programs. We then announce the adjustment in the rate for the deposit of estimated countervailing duties in the next notice published in the normal course of the proceeding. Using 1981 information on the amount of benefit received, we have made a proportional reduction in the amount of estimated net subsidy from this program. On this basis, we calculated a current subsidy of 10.65 percent *ad valorem.*

B. *Preferential Working Capital Financing For Exports: Resolution 674.* Under this program companies are declared eligible to receive working capital loans by the Department of Foreign Commerce of the Banco Central do Brasil (CACEX). These loans may have a duration of up to one year. Firms in the steel industry can obtain this financing at preferential rates for up to 20 percent of the net f.o.b. value of the previous year's exports. The maximum dollar eligibility under this program is established by CACEX and is stated on the "Certificado de Habilitacao" issued to recipients. Since this program is designed to promote exports and is tied to export performance, we have determined that such financing is an export subsidy and therefore is countervailable. This program has also been found to be countervailable in previous investigations involving Brazilian products.

The net export value is calculated by taking numerous deductions from the export value of the merchandise, including agent commissions, contractual penalties or refunds, exports denominated in cruzeiros, imported inputs over 20 percent of the export value, and a deduction for the company's trade deficit as a percentage of the value of its exports. In addition, any growth in the cruzeiro value of exports over the previous year will reduce the value of the benefit as a percentage of the current year's exports.

To determine the value of loans in existence under this program during 1981, we prorated any loans that straddled other years. For loans taken out in fiscal year 1980, only that portion extending into fiscal year 1981 was included in our calculation. Any fiscal year 1981 loans extending into fiscal year 1982 were similarly adjusted.

As in previous Brazilian countervailing duty cases, we are using the rate established by the Banco do Brasil for discounting sales of accounts receivable as the commercial rate for the acquisition of short-term working capital. We have used this comparison because information provided by the government of Brazil indicates that, within the Brazilian financial system, working capital is normally raised through the sale of accounts receivable. In the review period the rate for discounting sales of accounts receivable was 59.6 percent plus a 6.9 percent tax on financial transactions (IOF). The subsidy is the difference between the interest rate available under Resolution 674 and the commercial rate.

The interest rate on loans under Resolution 674 is 40 percent, with interest payable semiannually and the principal fully payable on the due date of the loan. The effective rate of interest for these loans is 44 percent. These loans are also exempt from the IOF. Therefore, the differential between these two types of financing is 22.5 percent. When multiplying this differential by the amount of preferential financing received and dividing the result by the value of exports, we calculated a subsidy of 1.85 percent *ad valorem.*

On February 11, 1983, the government of Brazil notified the Department that the Banco do Brasil rate for discounting accounts receivable had increased from 59.6 percent to 72 percent effective January 3, 1983. In addition, effective January 11, 1983, the tax on financial transactions was reduced from 6.9 percent to 4.6 percent. These changes result in a subsidy rate differential of 32.6 percent rather than 22.5 percent as stated above. Consequently, since the rate established for purposes of the suspension agreement is prospective, we will use 32.6 percent as the applicable differential in determining the subsidy rate from this program for determination of the net subsidy rate which must be offset by an export tax under the terms of the agreement.

C. *Income Tax Exemption For Export Earnings.* Exporters of certain stainless steel products are eligible to participate in this program, under which the percentage of their profit attributable to export revenue is exempt from income tax. To arrive at this percentage, export revenue is divided by total revenue. The amount of profit exempt from the income tax is then multiplied by the 35 percent corporate income tax rate to determine the amount of the benefit. Since the program is designed to promote exports and is tied to export performance, we have determined that it is an export subsidy and therefore is countervailable. This program has also been found to be countervailable in previous investigations involving Brazilian products.

In a program of this kind, benefits cannot be determined with finality until the books are closed sometime in the following year. Therefore, we must look at fiscal year 1980 income tax returns to determine if any benefit was received in fiscal year 1981. VILLARES received benefits under this program in 1981. By dividing the benefit received by the value of exports of the companies under investigation, we calculated a subsidy of 0.55 percent *ad valorem.*

D. *Long-term loans.* Long-term financing in cruzeiros is available in Brazil only through government-controlled financial institutions, such as the National Bank for Economic Development (BNDE) and FINAME, a program of BNDE for the purchase of capital equipment manufactured in Brazil. Generally, these loans are fully indexed to the inflation rate in Brazil and are made at fixed real interest rates. The index used for these loans is the ratio established for the Readjusted Bonds of the National Treasury (ORTN). FINAME loans are granted through commercial banks rather than directly from BNDE and carry higher real interest rates than BNDE loans.

VILLARES received direct BNDE loans. As in previous steel countervailing duty investigations, we have determined that BNDE loans, when fully indexed, are not made at preferential rates. We compared the BNDE loan rates to a constructed benchmark based on the real interest rates of the only private long-term loans commercially available in Brazil—foreign currency loans. Such loans are granted at the London Interbank Offered Rate (LIBOR) plus a certain percentage or spread over LIBOR. Since LIBOR loans are continually readjusted at the prevailing interest rates, we constructed the benchmark by calculating the average real interest component of LIBOR-plus-spread on long-term loans to Brazil for the period 1977–81 during which these BNDE loans were made. We then compared that average real interest rate to the rates at which the long-term BNDE loans were made. Our comparison showed that all the fully-indexed BNDE loans were made at rates above the benchmark. Therefore, we have determined that such BNDE loans are not countervailable.

However, some long-term cruzeiro loans have been granted that are not fully indexed. Under a program instituted in 1975 and no longer in operation, BNDE granted loans that were adjusted at only 20 percent of the variation in ORTN. These loans were granted only to certain sectors of the economy, including the iron and steel industry, for implementing "priority projects." Because they were granted to a group of enterprises or industries we have determined that the program is countervailable. We have also found this program countervailable in previous cases involving Brazilian products.

VILLARES has been granted such a loan and still has an outstanding balance on this loan. We calculated the interest portion of the benefit to VILLARES for this loan as the difference between the amount actually paid in fiscal year 1981 and the amount which would have been paid had the loan been fully adjusted. Even though principal repayments have yet begun for this VILLARES loan, the principal balance is recalculated yearly subject to the 20 percent limit on monetary correction. Therefore, VILLARES benefited from an abatement in principal as well as a reduction in interest. We divided the sum of VILLARES' interest and principal benefits by total sales of all companies under investigation and calculated subsidy of 1.38 percent *ad valorem.*

FINAME loans have been received by ACESITA, PIRATINI, and VILLARES and are available to a wide variety of sectors in Brazil. The steel industry has received such loans in proportions similar to other large capital-intensive industries in Brazil. This appears to be warranted by the capital requirements of such industries. In addition, numerous other sectors also received loans from FINAME during this period. Based on the general availability of these fully-indexed loans, we have determined that they do not confer a subsidy.

E. *IPI rebates for capital investment.* Decree Law 1547 (April 1977) provides funding for the expansion of the Brazilian steel industry through a rebate of the IPI, the Brazilian federal excise tax. Under this tax system, a company determines its liability for the tax at the end of each month. The net tax owed is calculated as the difference between the total IPI the company paid on purchases and the total IPI collected on domestic sales. Normally, within five months after the end of each month, a company must pay the amount of the net tax owed directly to the Brazilian government. This net IPI tax is the basis for calculating the rebate for investment. A Brazilian steel company may deposit 95 percent of the net IPI tax in a special account with the Banco do Brasil. The amounts deposited are to be applied to steel expansion projects, and when rebated to the firms constitute tax-free capital reserves which must eventually be converted into subscribed capital. Benefits under this program are received only by the steel sector. Because they are received by a specific industry, we have determined that the benfits are countervailable. We have also found this program countervailable in previous cases involving Brazilian products.

PIRATINI received benefits under this program from 1977 to 1981, while ACESITA and VILLARES continue to receive them. With the enactment of Decree Law 1843 (December 1980), PIRATINI must now pay the IPI tax to the government which in turn rebates 95 percent to SIDERBRAS, the government holding company to which PIRATINI belongs, to increase its capital.

In these investigations, we considered the amount rebated each year as an untied grant received in that year. As such, we have allocated the grants over 15 years. Under our grant methodology, we determine the present value of grants in order to calculate the current value of the benefit to the grant recipient. The calculation of the present value of funds received is a mechanism for allocating money received in one year to other years and is calculated using a discount rate. For these determinations, we determine that the most appropriate discount rate is the "risk-free" rate as indicated by the secondary market rate for long-term government debt in the country under investigation. The foundation of a country's interest rate structure is usually its government's debt interest rate (the risk-free rate). In this methodology, we have allocated a grant over the useful life of equipment purchased with it when the value of that grant was large (greater than $50 million) and specifically tied to pieces of capital equipment. Where the grant was small (generally less than one percent of the company's gross revenues and tied to items generally expensed in the year purchased, such as wages or purchases of materials), we have allocated the subsidy solely to the year of the grant receipt. We construe that a grant is "tied" when the intended use is known to the subsidy giver and so acknowledged prior to or concurrent with the bestowal of the subsidy. All other grants, such as in this case, are allocated over 15 years, a period of time reflecting the average life of capital assets in integrated steel mills. The 15-year figure is based on Internal Revenue Service studies of actual experience in integrated mills in the U.S.

To calculate the benefit, we have taken the amount rebated in each month, converted the cruzeiro value to an ORTN value by using the ORTN index rate in that month, added the monthly ORTN amounts to determine the amount of the grant in each year and

VOL 48 ISS 94 MY 13 1983 UMI

used as the discount rate for each year the interest rate of 4 percent on ORTN-indexed long-term government debt. The total benefit in ORTN for fiscal year 1981 was converted into cruzeiros using the average ORTN index rate for the year and then divided by the total value of sales for the 1981 fiscal year. The benefit of this subsidy is 0.80 percent *ad valorem*.

F. *Industrial Development Council (CDI) program.* This program allowed an exemption of 80 percent of the customs duties and 80 percent of the IPI tax on certain imported machinery for certain industrial projects approved by the CDI. Because benefits under the program are limited to "approved" development projects we have determined that they were granted to a group of enterprises or industries and are countervailable. We have also found the CDI program countervailable in previous countervailing duty investigations involving Brazilian products.

Decree Law 1726 repealed this program in 1979 and no new projects are eligible for these benefits. However, companies with projects approved prior to repeal may still receive these benefits pending the completion of the project. ACESITA received such benefits during 1981. By dividing the benefit received by the total value of sales of the companies under investigation, we calculated a subsidy of 0.18 percent *ad valorem*.

G. *Accelerated depreciation for capital goods manfactured in Brazil.* This program allows companies that purchase Brazilian-made capital equipment as part of an approved CDI expansion project to depreciate this equipment at twice the rate normally permitted under tax laws. This program is authorized by the same legislation as the previous CDI program, is likewise countervailable and has been found to be countervailable in previous countervailing duty investigations involving Brazilian products.

During verification we found that VILLARES used the accelerated depreciation provisions of this program. The benefit of such a program is reduced taxable income and a subsequent reduction in tax liabilities. In a program of this kind, benefits connot be determined with finality until the books are closed sometime in the following year. Therefore, we must look at fiscal year 1980 income tax returns to determine if any benefit was received in fiscal year 1981. VILLARES claimed that they could have depreciated at a higher "normal" rate than that actually used to compute its tax liability for the 1980 fiscal year thus offsetting any subsidy that they might receive under this program. However, we used the actual amount of accelerated depreciation claimed by VILLARES in excess of the normal depreciation that was used by VILLARES in that year. To calculate the benefit to VILLARES, we determined the amount by which depreciation under this program exceeded normal depreciation, multiplied that amount by 35 percent, the corporate tax rate in Brazil, and then divided the result by the total value of sales for the 1981 fiscal year of the companies under investigation. The *ad valorem* benefit of this subsidy is 0.03 percent.

II. *Program Determined not to Confer Subsidies.* We have determined subsidies are not being provided to manufacturers, producers, or exporters in Brazil of certain stainless steel products under the following program.

Transportation subsidies from preferential port rates. The government of Brazil, in its response to our questionnaire, states that none of the exporters of certain stainless steel products receive preferential port rates. At verification we examined shipping documents for Brazilian and non-Brazilian carriers, compared the freight rates and port charges to published schedules and found that the rates paid by steel exporters were not preferential and therefore not countervailable.

III. *Programs Determined not to be Used.* We have determined that the following programs were not used by the manufacturers, producers, or exporters in Brazil of certain stainless steel products.

A. *The Commission for the Granting of Fiscal Benefits for Special Export Programs (BEFIEX).* BEFIEX grants several types of benefits to companies that are part of certain targeted industries and that sign contracts that include specific export commitments. These benefits include the following: a reduction of between 70 percent and 90 percent of the import duties and the IPI tax on the import of machinery, equipment, apparatus, instruments, accessories and tools necessary to meet the approved export commitment; an extension of the period for carrying tax losses forward from four to six years, provided no dividends are paid during that time; and amortization of pre-operational expenses of BEFIEX projects at the discretion of the company rather than the normal straight-line amortization over ten years. As a general rule, companies that sign BEFIEX contracts guaranteeing these and any other benefits must make an export commitment that over the life of the project it will generate export earnings of at least three times the value of imports for the project. The government of Brazil states that since manufacturers of certain stainless steel products export only a small portion of their production, they are not in a position to make the required export commitments. We found that non of the companies under investigation received benefits from this program with respect to certain stainless steel products.

B. *Export financing under Resolution 68.* This program provides financing for the export of Brazilian goods for a minimum period of 181 days. Such financing is granted on a transaction-by-transaction basis and may cover up to 85 percent of the f.o.b. invoice price for the merchandise (plus freight and insurance). To be eligible, the exporter must show that the foreign purchaser has prepaid 15 percent of the invoice price. We found that none of the exporters of certain stainless steel products used Resolution 68 to finance exports.

C. *Transportation subsidies from preferential rail rates.* We found that exporters of certain stainless steel products almost exclusively utilize trucks to ship their products to the ports of exportation because of the low tonnages of these shipments.

Verification

In accordance with section 776(a) of the Act, we verified data used in making our final determinations. During this verification, we followed normal procedures, including inspection of documents, discussions with company and government officials and inspection of manufacturers' records.

Administrative Procedures

The Department has afforded interested parties an opportunity to present oral views in accordance with its regulations (19 CFR 355.35). There was no request for a public hearing and no written views were received. We received comments on the suspension agreement and addressed those comments in the notice announcing the suspension of the investigations (48 FR 4703).

Suspension of Liquidation

The suspension of liquidation of entries of certain stainless steel products pursuant to the preliminary affirmative determinations was terminated upon publication of the notice of suspension of the investigations.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determinations. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to these investigations. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine within 45 days of the publication of this notice whether imports of certain stainless steel products from Brazil are materially injuring, or threatening to materially injure, a U.S. industry. If the ITC determines that material injury, or threat of material injury, does not exist, the suspension agreement will have no force or effect and these investigations will be terminated. If, however, the ITC determines that such injury does exist, the suspension agreement shall remain in force, and we will not issue a countervailing duty order as long as the requirements of section 704(f)(3)(B) of the Act are met.

These determinations are published in accordance with section 705(d) of the Act.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

May 9, 1983.

Appendix A—Certain Stainless Steel Products From Brazil

For purpose of these investigations:

1. The term "*stainless steel wire rod*" covers a coiled, semi-finished, hot-rolled stainless steel product of solid cross section, approximately round in cross section, not under 0.020 inch nor over 0.74 inch in diameter, not tempered, not treated, and not partly manufactured as currently provided for in item 607.26 of the *Tariff Schedules of the United States* (TSUS) or if tempered, treated, or partly manufactured as provided for in item 607.43 of the TSUS.

2. The term "*hot-rolled stainless steel bars*" covers hot-rolled stainless steel products of solid section having cross sections in the shape of circles, segments of circles, ovals, triangles, rectangles, hexagons or octagons, not coated or plated with metal as currently provided for in item 606.9005 of the *Tariff Schedules of the United States Annotated* (TSUSA).

3. The term "*cold-formed stainless steel bars*" covers cold-formed stainless steel products of solid section having cross sections in the shape of circles, segments of circles, ovals, triangles, rectangles, hexagons or octagons, not coated or plated with metal as currently provided for in item 606.9010 of the TSUSA. Stainless steel is an alloy steel which contains by weight less than 1 percent of carbon and over 11.5 percent of chromium. Iron must predominate by weight and the alloy is malleable as first cast. Allow steel is defined as a steel which contains one or more of the following elements in the quantity, by weight, respectively indicated:

over 1.65 percent of manganese, or
over 0.25 percent of phosphorus, or
over 0.35 percent of sulphur, or
over 0.60 percent of silicon, or
over 0.60 percent of copper, or
over 0.30 percent of aluminum, or
over 0.20 percent of chromium, or
over 0.30 percent of cobalt, or
over 0.35 percent of lead, or
over 0.50 percent of nickel, or
over 0.30 percent of tungsten, or
over 0.10 percent of any other metallic element

[FR Doc. 83-12931 Filed 5-12-83; 8:45 am]

BILLING CODE 3510-25-M

Final Determination of Sales at Less Than Fair Value; Industrial Nitrocellulose From France

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final determination of sales at less than fair value.

SUMMARY: We have determined that industrial nitrocellulose from France is being sold in the United States at less than fair value. The U.S International Trade Commission (ITC) will determine within 75 days of publication of this notice whether these imports are materially injuring, or are threatening to materially injure, a U.S. Industry.

EFFECTIVE DATE: May 13, 1983

FOR FURTHER INFORMATION CONTACT: Betty H. Laxague or Stuart Keitz, Office of Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230 (202-377-3601/0171).

SUPPLEMENTARY INFORMATION:

Case History

On July 2, 1982, we received a petition from Hercules Incorporated (Hercules) of Wilmington, Delaware, the only domestic producer of industrial nitrocellulose. The petition alleged that industrial nitrocellulose from France is being, or is likely to be, sold in the United States at less than fair value, and that such sales are materially injuring, or are threatening to materially injure, a United States industry. The petitioner also alleged sales in the home market at prices below the cost of production. After reviewing the petition, we determined it contained sufficient grounds to initiate an antidumping investigation. We notified the ITC of our action and initiated the investigation on July 28, 1982 (47 FR 32557). On August 16, 1982, the ITC subsequently found that there was a reasonable indication that imports of industrial nitrocellulose from France were materially injuring or were threatening to materially injure a United States industry (47 FR 37314). On Novermber 26, 1982, we published a notice determining that this case was "extraordinarily complicated," as defined in section 733(c)(1)(B) of the Act (47 FR 53441). Therefore, we extended the period for making the preliminary determination by 14 days until, December 23, 1982.

A questionnaire was presented to Societe Nationale des Poudres et Explosifs (SNPE), the respondent in this case, and to its attorney, on August 5, 1982. Responses were received on September 10 and 16, 1982. A verification was conducted at SNPE's plant in Berqerac, France from October 18–20, 1982, and at the headquarters of SNPE in Paris, France, on October 21 and 22, 1982. The home market cost of production section of the response was verified for a second time from February 18 through 24, 1983. On December 23, 1983, we preliminarily determined that industrial nitrocellulose from France is not being sold, or is not likely to be sold, in the United States at less than fair value (47 FR 57308).

Our notice of preliminary determination provided interested parties with an opportunity to submit views orally and in writing. On March 30, 1983, we held a public hearing.

On March 1, 1983, we published a notice extending the period for making the final determination until May 9, 1983, at the request of the petitioner in accordance with section 735(a)(2)(B) of the Act (48 FR 1529).

Scope of the Investigation

The product covered by this investigation is industrial nitrocellulose containing between 10.8 percent and 12.2 percent nitrogen. It should not be confused with explosive grade nitrocellulose which contains over 12.2 percent nitrogen. Industrial nitrocellulose is a dry, white, amorphous synthetic chemical produced by the action of nitric acid on cellulose. The product comes in several viscosities and is used to form films in lacquers, coatings, furniture finishes and printing inks. It is currently classified as cellulosic plastic materials, other than cellulose acetate, under item number 445.2500 of the Tariff Schedules of the United States Annotated.

Approximately three percent of total sales to the U.S. were of butyl nitrocellulose. Since this was such a small quantity and since the cost for producing this product is different from the remaining 97 percent of sales, we disregarded these sales for purposes of the fair value investigation.

VOL 48 ISS 94 MY 13 1983 UMI

The period of investigation for French industrial nitrocellulose sold in the United States is from January 1 to June 30, 1982.

Methodology of Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772 of the Act, we used the purchase price of industrial nitrocellulose, because SNPE sold all of its merchandise to unrelated parties in the U.S. prior to the date of importation.

We calculated purchase price based on the c.i.f., delivered, packed price to unrelated purchasers. We made deductions for ocean freight, insurance, foreign inland freight, and U.S. inland freight.

Foreign Market Value

In calculating foreign market value we used home market sales prices or constructed value in accordance with section 773 of the Act.

The petitioner alleged that sales in the home market were at prices below the cost of producing industrial nitrocellulose. We examined production costs which included all appropriate costs for materials, labor and general expenses. Sales below the cost of production were found to be made for each of the grades of industrial nitrocellulose examined. Where sales of any grade of the merchandise under investigation were made over an extended period of time in substantial quantities, and at prices which did not permit recovery of all costs within a reasonable period of time in the normal course of trade, the Department disregarded these sales in its analysis in accordance with section 773(b) of the Act. For certain grades, we found that sufficient sales of industrial nitrocellulose were made at or above the cost of production and, therefore, those sales were used in making price-to-price comparisons with sales in the U.S. market. For certain other grades of industrial nitrocellulose, we found that sales which were made above the cost of production were inadequate as a basis for the determination of foreign market value and consequently, we used the constructed value of the merchandise for these grades of industrial nitrocellulose to determined their foreign market value.

Where we used constructed value as a basis for foreign market value, we calculated it to include the costs of materials, fabrication, general expenses, profit and the cost of packing. The amount added for general expenses was the statutory minimum of 10 percent of the sum of material and fabrication costs, because the statutory minimum was higher than the actual general expenses. The amount added for profit was the statutory minimum of 8 percent of the sum of materials, fabrication costs, and general expenses because the actual profit was less than 8 percent.

Home market prices were based on the f.o.b. or delivered, packed price to unrelated purchasers. We made deductions, where appropriate, for inland freight, and rebates. Adjustments were made, where appropriate, for differences in warranty expense, credit expense, the cost of the merchandise being compared, and the cost of packing. Adjustments for differences in physical characteristics were based on differences in the cost of materials, labor, and directly-related factory overhead. An adjustment was also made, where appropriate, for the differences between commissions on sales to the United States and indirect selling expenses in the home market used as an offset to U.S. commissions in accordance with § 353.15(c) of the Commerce Regulations.

Adjustments were claimed for institutional advertising expenses and quality control costs. We did not allow these adjustments since they were not directly related to the sales under consideration as required by section 353.15 of the Commerce Regulations.

Technical assistance expense was allowed as part of the offset for U.S. commission sales as an indirect selling expense and not as a circumstance of sale adjustment for all home market sales as claimed by the respondent.

Verification

In accordance with section 776(a) of the Act, we verified the information from SNPE which was used in this determination. We verified the information received on cost of production, sales, and the adjustments claimed. We were granted access to the books and records of SNPE. We used standard verification procedures, including examination of accounting records, financial statements and selected documents containing relevant information. The home market cost of production section of the response was verified for a second time by Alexander Grant & Co.

Results of Investigation

We made fair value comparisons on all U.S. sales reported by SNPE. We have found tht the foreign market value exceeded the United States price on 31.13 percent of the merchandise sold. These margins ranged from 0 to 12.26 percent. The overall weighted-average margin on all industrial nitrocellulose sales is 1.38 percent.

Petitioner's Comments

Comment 1

The Department of Commerce (DOC) has failed to allocate sufficient financing expenses to SNPE's cost of producing industrial nitrocellulose. The DOC's cost of production analysis should include all sales financing expenses that are directly related to home market sales of industrial nitrocellulose. An alternative would be to allocate all SNPE sales financing expenses in such a way as to take account of the fact that there are likely to be no financing expenses in selling to the Government of France and to related customers.

DOC position

When the DOC computes a cost of production, all costs, including finance expenses, are included. The DOC accepts the accounting practices of a respondent in making allocations for gneral, administrative and selling expenses as long as those allocations are the usual accounting practices of the respondent and are acceptable to the DOC. Since financing expenses have been allocated to the cost of production of industrial nitrocellulose by SNPE in accordane with their normal allocation methods, the amounts of these expenses have been accepted by the DOC.

Comment 2

SNPE has allocated indirect selling expenses over all products including those sold to the Government of France and related customers. The DOC should allocate SNPE's indirect selling expenses solely over sales to unrelated customers.

DOC position

The DOC verification established that SNPE inaccuretely allocated indirect selling expenses over the value of all nitrocellulose including sales of the military grade to related parties. Based on our findings, SNPE has reallocated these expenses solely to industrial notrocellulose based on relative sale value of the products sold by the Bergerac plant sales department. (The Bergrac plant is the only SNPE facility which produces industrial nitrocellulose). This reallocated amount is included in the cost of production.

Comment 3

SNPE has understated its research and development (R & D) costs for industrial nitrocellulose. The DOC should reallocate SNPE's R & D costs over all of the products produced by the company.

DOC position

In their response, SNPE deviated from their normal accounting practice by adjusting the R & D allocations to industrial nitrocellulose to exclude R & D they believe to have been associated with other product groups. The DOC accepts the accounting allocations of the responding firm for general, administrative and selling expenses as long as those allocations are the usual accounting practices of the respondent and are acceptable to the DOC. Consequently, we have recomputed the allocation for R & D in accordance with SNPE's normal accounting practices by spreading the R & D expenses over all products and have used this figure in calculating the cost of production for our final determination.

Comment 4

The DOC should permit adjustments only for differences in circumstances of sale directly related to the sales under consideration.

DOC position

In accordance with § 353.15 of the Commerce Regulations, the DOC has not allowed adjustments for differences in circumstances of sale which are not directly related to the sales of industrial nitrocellulose under consideration.

Comment 5

NSPE is selling industrial nitrocellulose in France at prices which do not permit it to recover all of its fully allocated costs of production. The DOC should use the best available information in determining the cost of production, because SNPE failed to give the DOC its profit and loss statement for industrial nitrocellulose as requested in the questionnaire.

DOC position

The DOC's antidumping questionnaie requested financial statements, if they are prepared for the merchandise under investigation. SNPE has stated that it maintains profit and loss statements on a plant basis, not by product, and, therefore, one is not avialable for the merchandise under consideration. However, the detailed cost of production data and profit figures submitted by SNPE were verified twice by the DOC. Consequently, we are satisfied in using the data provided by SNPE, modified in accordance with DOC standards.

Comment 6

SNPE has deviated from its normal accounting practices in reporting to the DOC its depreciation costs on a straight-line basis rather than by an accelerted methodology.

DOC position

In their response, SNPE deviated from their normal accounting pactice by calculating depreciation on a straight-line basis. The DOC accepts the usual accounting practices of a respondent as long as those practices are acceptable under the Generally Acceptable Accounting Principles in the country of production. A respondent may not deviate from its normal accounting practices unless DOC determines that their standard methodology is inappropriate. Since this is not the case, DOC has used the accelerated method in calculating depreciation costs as reflected in SNPE's financial statement.

Respondent's Comments

Comment 1

An adjustment should be made for the differences in the commercial levels of trade between the United States and France.

DOC position

To date, SNPE has not produced information which establishes that a price differential exists in the home market for industrial nitrocellulose or other merchandise of the same class or kind sold at different levels of trade. Such information, if provided, must establish that the differences in the prices are the result of differences in cost of selling at one level of trade as compared to the other. Since no evidence has been received by the DOC which would satisfy the standards of § 353.19 of the Commerce Regulations in this regard, we have not made a level of trade adjustment in making our final determination.

Comment 2

Expenses for technical services should be allowed as an adjustment to the foreign market value as part of the indirect selling expense offset where comparisons are made with U.S. sales involving commissions.

DOC position

The DOC has allowed this offset in accordance with section 353.15 of the Commerce Regulations.

Comment 3

R & D expenses unrelated to industrial nitrocellulose, but related solely to other products or product lines should not be imputed to the cost of production of industrial nitrocellulose. Therefore, the DOC should use R & D expenses reallocated to the products to which they actually apply.

DOC position

See DOC position in petitioner's comment 3.

Comment 4

The straight-line method of calculating depreciation costs more accurately reflects actual production costs than an accelerated method. Therefore, the DOC should use depreciation costs developed through a straight-line methodology.

DOC position

See DOC position in petitioner's comment 6.

Final Determination

Based on our investigation and in accordance with section 735(a) of the Act, we have reached a final determination that industrial nitrocellulose from France is being sold in the United States at less than fair value within the meaning of section 731 of the Act.

Suspension of Liquidation

In accordance with section 735(c)(1)(B) and section 733(d)(1) and (2) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of industrial nitrocellulose from France. This suspension of liquidation applies to all merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average margin by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. The suspension of liquidation will remain in effect until further notice. The weighted-average margin is 1.38 percent.

ITC Notification

We are notifying the ITC and making available to it all non-privileged and non-confidential information relating to this determination. We will allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. If the ITC determines that material injury

VOL 48 ISS 94 MY 13 1983 UMI

or threat of material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If the ITC determines that such injury does exist, we will issue an antidumping order directing Customs officers to assess an antidumping duty on industrial nitrocellulose from France entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price. This determination is being published pursuant to section 735(d) of the Act (19 U.S.C. 1673(d)).

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

May 9, 1983.

[FR Doc. 83-12829 Filed 5-12-83; 8:45 am]

BILLING CODE 3510-25-M

Final Negative Countervailing Duty Determination; Fresh Asparagus From Mexico

AGENCY: International Trade Administration, Commerce.

ACTION: Final Negative Countervailing Duty Determination.

SUMMARY: We have determined that no benefits which constitute bounties or grants within the meaning of the countervailing duty law are being provided to producers or exporters in Mexico of fresh asparagus, as described in the "Scope of Investigation" section of this notice.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: G. Leon McNeill or Julia E. Hatchcox, Office of Investigations, Import Administration International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone (202) 377–1273.

SUPPLEMENTARY INFORMATION:

Final Determination

Based upon our investigation, we determine that no benefits which constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (the Act), are being provided to producers or exporters in Mexico of fresh asparagus, as described in the "Scope of Investigation" section of this notice.

Case History

On November 3, 1982, we received a petition from the California Asparagus Growers' Association, Washington Asparagus Growers' Association, Michigan Asparagus Growers' Association, and Imperial Valley Asparagus Growers' Association, filed on behalf of the fresh asparagus industry in the United States. The petition alleges that the government of Mexico bestows bounties or grants upon the production or exportation of fresh asparagus within the meaning of section 303 of the Act.

We found the petition to contain sufficient grounds upon which to initiate a countervailing duty investigation and, on November 23, 1982, we initiated a countervailing duty investigation (47 FR 53934).

Mexico is not a "country under the Agreement" within the meaning of section 701(b) of the Act, and therefore section 303 of the Act applies to this investigation. Under this section, where as here the merchandise being investigated is dutiable, the domestic industry is not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of this product cause or threaten material injury to a U.S. industry.

On December 6, 1982, we presented a questionnaire concerning the allegations in the petition to the government of Mexico in Washington, D.C. On December 22, 1982, we presented a letter clarifying certain points in our questionnaire to the government of Mexico in Washington, D.C.

On December 17, 1982, we received from the government of Mexico a request for the postponement of the preliminary determination to the extent permitted by the law. The government of Mexico made this request upon the basis that the case is "extraordinarily complicated" under section 703(c)(1)(B) of the Act.

On January 7, 1983, we announced our intention to postpone the preliminary countervailing duty determination involving fresh asparagus until not later than February 22, 1983 (48 FR 2157). We determined, under section 703(c)(1)(B) of the Act, that the case is extraordinarily complicated because the alleged subsidy practices are numerous and complex, because the issues involved are novel, and there are numerous firms whose activities must be investigated. We determined that the parties concerned were cooperating, and that additional time was necessary to make the preliminary determination.

On January 14, 1983, we received from the government of Mexico a response to our contervailing duty questionnaire regarding fresh asparagus. In accordance with our procedures, we sent on February 9, 1983, a supplemental questionnaire to the government of Mexico. We also informed the petitioners and other interested parties that they had additional time to comment. On February 16, 1983, we received from the government of Mexico the response to our supplemental questionnaire regarding fresh asparagus. We also received comments from the counsel for California Asparagus Growers' Association, Washington Asparagus Growers' Association, Michigan Asparagus Growers' Association, and Imperial Valley Asparagus Growers' Association on February 14, 1983, and a letter from counsel for the Imperial Valley Asparagus Growers' Association including additional allegations regarding the provision of water at subsidized rates, and government operation of and construction of irrigation facilities.

On February 22, 1983, we issued our preliminary determination in this investigation (48 FR 8830). We preliminarily determined that no benefits which constitute bounties or grants within the meaning of the countervailing duty law were being provided to producers or exporters in Mexico of fresh asparagus.

We preliminarily determined that producers or exporters of fresh asparagus did not use or were not eligible for the following programs:

- Fund for the Promotion of Exports of Mexican Manufactured Products (FOMEX).
- Certificados de Promocion Fiscal (CEPROFI).
- Import duty reductions and exemptions on raw materials and auxiliary materials physically incorporated into the exported product.
- Sistema Alimentario Mexicano (SAM).
- Preferential loans granted to Mexican agriculture through the Fund Established in Relation to Agriculture (FIRA); the Guarantee and Development Fund for Agriculture, Livestock and Poultry (FONDO); and the National Bank of Rural Credit.
- Discounts on fertilizers, insecticides, seeds and fuels.

We preliminarily determined that the following program was suspended and not used recently:

- Certificado de Devolucion de Impuestos Indirectos (CEDI).

We preliminarily determined we need additional information regarding the following programs:

- Government financing and operation of irrigation projects, including water provided by the government at subsidized rates.

- Investment credits for acquisitions by purchasers located in border areas of new machinery and equipment manufactured of Mexico.
- Credits to promote increased employment or to maintain pre-devaluation employment.
- Special incentives for producers or exporters if they are companies establishing manufacturing plants in border areas.
- Accelerated depreciation for the construction of wholesale warehouses in the border area.

On March 9, 1983, we presented another supplementary questionnaire to the Mexican government.

From March 21 to 31, 1983, we verified the response of the Mexican government to our questionnaries regarding fresh asparagus. During the course of verification, we verified the elements contained in our March 9, 1983 questionnarie to the Mexican government. The Mexican government provided a formal response to this questionnarie on April 11, 1983.

On April 20, 1983, we requested that the Mexican government provide us with further information regarding the government's participation in the construction or operation of irrigation projects. The Mexican government provided us with that information on April 26, 1983. The material related to the construction of such irrigation facilities is material published by the Mexican Secretaria de Agricultura y Recursos Hydraulicos.

Scope of Investigation

The product covered by this investigation is fresh asparagus, current classifiable under item 137.9520 of the *Tariff Schedules of the United States Annotated (TSUSA).*

The period for which we are measuring subsidizations January 1, 1982 to September 30, 1982.

Analysis of Programs

I. Programs for which Producers or Exporters of this Product Are Not Eligible.

A. *Fund for the Promotion of Exports of Mexican Manufactured Products (FOMEX).* FOMEX is a trust established by the government of Mexico to promote the manufacture and sale of exported products. The fund is administered by the Mexican Treasury Department with the Bank of Mexico Acting as the trustee. The Bank of Mexico administers the financing of FOMEX loans through financial institutions which establish contracts for lines of credit with manufacturers and exporters.

In order for a company to be eligible for FOMEX financing for exports, the following requirements must be met: (1) The product to be manufactured must be included on a list made public by FOMEX; (2) the articles to be exported must have a minimum of 30 percent national content in direct production costs; (3) loans granted for pre-export must be in Mexican currency, while loans for export sales are established in U.S. dollars or any other foreign currency acceptable to the Bank of Mexico; and (4) the exporter must carry insurance against commercial risks on export financing loans to the extent of the loans. In previous final countervailing duty determinations regarding Mexico, we have found the FOMEX program to confer benefits constituting bounties or grants.

We verified that producers or exporters of fresh asparagus are not eligible for FOMEX financing because FOMEX is not permitted to provide loans for agricultural products; and, according to the Rules of FOMEX, published August 10, 1979, by the Banco de Mexico, S.A., does not do so. We verified that only manufactured articles may qualify for FOMEX financing, and that the producers or exporters of fresh asparagus do not receive benefits under the FOMEX program.

b. *Certificados de Promocion Fiscal (CEPROFI).* In 1979 the government of Mexico introduced a four-year National Industrial Development Plan (NIDP) which spells out broad economic goals for the country. Tax credits called CEPROFI's are used to promote the NIDP goals, which include increased employment, regional decentralization, industrial development, and the promotion of small and medium-sized firms.

CEPROFI certificates are non-transferable tax certificates of a set value which may be used for a five-year period to pay federal taxes. In previous final countervailing duty determininations regarding Mexico, we have found that certain types of CEPROFIs provide benefits constituting bounties or grants.

As a result of our verification, we determine that producers or exporters of fresh asparagus are not eligible under the CEPROFI program for any benefits. According to the "Accord Establishing Priority Industries for the Granting of Fiscal Stimulants" published in the March 9, 1979 *Diario Oficial,* the only category of fruits or vegetables eligible for benefits under the CEPROFI program is processed fruits and vegetables. We verified that no producer or exporter of fresh asparagus received benefits under the CEPROFI program.

C. *Certificado de Devolucion de Impuestos Indirectos (CEDI).* CEDI is a tax certificate that was issued by the government of Mexico in an amount equal to a percentage of the f.o.b. value of the exported merchandise or, if national insurance and transportation were used, a percentage of the c.i.f. value of the exported product. The CEDIs were non-transferable and could be applied against a wide range of federal tax liabilities (including payroll taxes, value added taxes, federal income taxes, and import duties) over a period of five years from the date of issuance.

We determined in past cases that the CEDI program was countervailable. The government of Mexico notified us that as of August 25, 1982, it discontinued the eligibility of all products for the CEDI program. We have determined in other recent cases that the CEDI certificates were not being issued and that, according to an August 25, 1982 decree published in the *Diario Oficial,* the CEDI program had been suspended. Based on our verification, we determine that producers or exporters of fresh asparagus were not eligible for and did not receive benefits constituting bounties or grants under the CEDI program, and would not be eligible if it were reactivated in its past form.

d. *The Sistema Alimentario Mexicano (SAM) Program.* According to publicly available information, the SAM program, established in April 1980, was an effort on the part of the Mexican government to guarantee a minimum level of nutrition for the Mexican populace and to achieve independence for Mexico in the food sector. In order to achieve this minimum level of nutrition, the SAM program focusea upon the production, processing, marketing and consumption of those items defined by the National Institute of Nutrition as being included in the "basic food basket" for Mexico. In order to foster the availability of basic food products, the SAM program provided numerous services, including the inputs for these basic foods, increasing the guaranteed prices for basic foodstuffs, increasing credit to the agricultural sector and developing technology suitable to the needs of Mexico's small farmers.

Petitioners alleged that under the SAM program, Mexican producers or exporters of fresh asparagus received the following benefits which could constitute bounties or grants: (a) Duty reductions for producers on imports of raw materials for the production and distribution of goods covered by the SAM program; (b) tax credits for investments in vehicles used to distribute basic goods; (c) reductions on business income tax rates for companies

VOL 48 ISS 94 MY 13 1983 UMI

in the agricultural sector or such companies which process their basic product; (d) preferential loans granted to Mexican agriculture; (e) credits for crop insurance and marketing reorganization; (f) credits to producers selling products at prices fixed by the government.

During the course of our verification, we found that only producers of specified basic foods were eligible for SAM. Asparagus is not considered by the Mexican government to be a basic food and was not included on the list of foods eligible for assistance under SAM. Furthermore, we found that only products designated by the Mexican government and included in this list of basic foods were eligible for SAM benefits as outlined in the April 17, 1980, *Diario Oficial* Announcement of the establishment of the program. We also verified at the company/association level that producers and exporters of fresh asparagus did not receive benefits under the SAM program.

Since asparagus is not considered a basic food crop in Mexico, producers or exporters of this product were not eligible for benefits under SAM. We determine that producers or exporters of fresh asparagus were not eligible for and did not receive under SAM benefits which might have constituted bounties or grants. In addition, we found that the SAM program was terminated effective January 19, 1983, as announced in the *Diario Oficial*.

E. *Investment Credits for New Machinery.* Under the CEPROFI program, the government of Mexico provides tax credits for the purchase of Mexican-made machinery or equipment and fixed investment in new industries. As previously noted, producers or exporters of fresh asparagus are not eligible for benefits under CEPROFI. We verified that such tax credits are an integral part of the CEPROFI program. We determine that producers or exporters of fresh asparagus in Mexico are not eligible for and did not receive investment credits for new machinery under the CEPROFI program. We also found no evidence that producers or exporters of fresh asparagus receive such incentive benefits under any other practice.

F. *Credit to Promote Employment.* Under the CEPROFI program, the Mexican government provides tax credits for the generation of employment. Producers or exporters of fresh asparagus are not eligible for benefits under CEPROFI. We verified that such tax credits are an intergal part of the CEPROFI program, and that producers or exporters of fresh asparagus from Mexico are not eligible for tax credit and did not receive such credits for generating increased employment under the CEPROFI program. We also found no evidence that producers or exporters of fresh asparagus receive such incentive benefits under any other practice.

G. *Accelerated Depreciation for Construction.* Petitioners alleged that producers or exporters of fresh asparagus may be eligible for accelerated depreciation for the construction of wholesale warehouses in the border area. We found that accelerated depreciation is available to industries located in the border areas. We also found that such depreciation is not limited to the construction of wholesale warehouses. Producers of non-processed agricultural products, including producers of fresh asparagus, are not eligible for such accelerated depreciation since their income tax, unlike that of industry, is determined on the basis of a percentage of their expenses. Therefore, we determine that producers or exporters of fresh asparagus are not eligible to receive accelerated depreciation benefits and do not receive such benefits.

We verified that producers of fresh asparagus fall within the tax category established by the Mexican government for vegetables for export. Because of their inclusion in this tax category, producers or exporters of fresh asparagus pay taxes based on the highest percentage of their expenses. Agricultural products which are not exported are subject to lower tax rates in accordance with the tax laws of Mexico. Therefore, we determine that producers or exporters of fresh asparagus receive no preference under this tax system.

We determine that producers or exporters of fresh asparagus do not receive such benefits from accelerated depreciation under the CEPROFI program. We also found no evidence that producers or exporters of fresh asparagus receive such benefits under any other Mexican government program.

H. *Preferential Loans Granted to Mexican Agriculture.* 1. *Fund Established in Relation to Agriculture (FIRA).* FIRA is a series of trusts administered by the Bank of Mexico. The Guarantee and Development Fund for Agriculture, Livestock, and Poultry (FONDO) is one of these trusts. FIRA trusts were established to support the farming and livestock sectors and agriculture-related areas through the provision of fixed asset investment loans and working capital loans. According to "The FIRA Credit Policy" published by the Banco de Mexico S.A., FIRA trusts are permitted to provide assistance only in the production of basic foods. FIRA provides: (a) short term financing for up to two years; (B) medium and long term financing up to 15 years, and (c) technical assistance for basic food production. The trusts under FIRA guarantee up to 80 percent of the loans granted by the banking system to low-income producers of basic foods. FONDO, a specialized trust, encourages credit institutions to finance producers of basic foods. According to publicly available information, it does this through financial backing and technical assistance.

We verified that FIRA and its subordinate trusts were established to provide assistance in the production of basic foods. Producers or exporters of fresh asparagus are not eligible for assistance through FIRA and its trusts. We determine that producers or exporters of fresh asparagus are not eligible for and do not receive any benefits under FIRA or any of its subordinate trusts.

2. *National Rural Credit Bank.* The National Rural Credit Bank, which administers the Fund for the Developement and Support of Agricultural Industry, is controlled by the Mexican government and receives its funds exclusively from federal sources. The purpose of this entity is to promote the development of agricultural-related industries. To accomplish this goal, the National Rural Credit Bank provides technical and financial support for the industrialization and commercialization of basic products. According to a recent internal Mexican government document obtained during verification, we found that fresh asparagus is not designated as a basic product by the Mexican government; therefore, producers and exporters of fresh asparagus are not eligible for any financing through the National Rural Credit Bank. Only producers of those products designated as basic products may receive short-term financing for purchases of raw materials and medium-term financing for purchases of farm equipment.

Based on our verification, we determine that producers or exporters of fresh asparagus are not eligible for and do not receive financing through the National Rural Credit Bank.

I. *Discounts On Fuels.* On December 28, 1978, a presidential decree established the conditions and requirements whereby certain industries which ivest in specified regions (such as the border areas), could obtain discounts on certain fuels. Only those industries eligible for CEPROFI could receive such discounts. As previously noted, fresh asparagus is not eligible for benefits under CEPROFI. Therefore, asparagus producers were not eligible for such discounts. Moreover we verified the fuel discount decree was cancelled on November 30, 1982, thus terminating the fuel discount benefit. We determine that producers or exporters of fresh asparagus did not receive and were not eligible during the period of investigation for benefits under the fuel discount decree.

J. *Import Duty Reductions and Exemptions and Incentives for the Establishment of Plants in the Border Areas.* Based on our verification, we found that these two programs are interrelated. Plants established in border areas may qualify for import duty reductions or exemptions on items designated by the government to be in short supply in Mexico. These reductions or exemptions are temporary and are available only to industry and to certain agro-industries which produce processed agricultural products. Such reductions or exemptions are not available to unprocessed agricultural proudcts, including fresh asparagus. We determine that producers or exporters of fresh asparagus in Mexico do not receive and are not eligble for these benefits.

K. *Discounts on Insecticides.* Under the SAM program, producers of specified basic foodstuffs could benefit from a discount on insecticides. Producers or exporters of fresh asparagus were not eligible to receive such benefits under the now terminated SAM program since asparagus is not considered a basic food. Furthermore, producers or exporters of fresh asparagus purchase their insecticides from private sources. We found no evidence that producers or exporters of fresh asparagus receive any discounts on purchases of insecticides under any Mexican government programs.

L. *Discounts on Seeds.* Under the SAM program, producers of specified basic foodstuffs could benefit from a discount on seeds purchased. As previously noted, producers or exporters of fresh asparagus were not eligible for benefits under the now terminated SAM program, since fresh asparagus is not considered a basic food in Mexico. Producers or exporters of fresh asparagus do not purchase their seeds from any government organization, but rather use seeds produced by their own crops. We found no evidence that producers or exporters of fresh asparagus are eligible for or received any discounts on purchases of seeds under any Mexican government programs.

II. *Programs Determined Not To Be Countervailable.* A. *Provision of Water.* Currently there are 77 water districts in Mexico. Water allocation decisions in each district are made by a committee composed of representatives of various government agencies, including the Secretaria de Agricultura y Recursos Hydraulicos (SARH), and representatives of local farmers and agricultural associations. These committees prepare annual plans which allocate, based on water supply, the amount of land available for the production of various crops.

Such plans are coordinated at the national SARH headquarters in Mexico City. In addition, each of these committees establishes the water rates for its district.

Approximately 100 percent of water used in the Caborca, Sonora area comes from private wells, while approximately 99 percent of water used in the Guanajuato area comes from private wells. These are two of the asparagus-producing areas in Mexico. Currently, according to Mexican government regulations, new wells may be established only in order to replace old wells which are no longer serviceable. The Mexican government does not provide any assistance in the construction of new wells.

In the Mexicali, Baja California asparagus-producing region, water for irrigation is from two sources. These are government-owned or private wells and the Colorado River. Most of the water used in this area comes from wells, whether govenment operated or private. Water from the Colorado River is allocated beween the United States and Mexico based on an international treaty. An international entity consisting of both U.S. and Mexican representatives allocates the water from the Colorado River. This water, plus that obtained through underground pumping from wells, is used for agricultural, industrial and residential purposes.

Counsel for one of the petitioners alleges that producers of agricultural products receive water at rates subsidized by the Mexican government.

In the Mexicali, Baja California asparagus-producing region, water rates differ according to use; there are different rates for water used for agricultural purpose, water used for industrial purposes, or residential consumption. The rate for water used for agricultural purposes is approximately 50% less than the rate for water used for industrial and residential purposes. This uniform low rate applies, however, to the water used for all agricultural purposes in this area. Preferential rates are not provided to the producers of any one agricultural product. We do not consider the provision of water at a uniform rate to all agricultural producers in this region to be a benefit, which would constitute a bounty or grant, because we consider the agricultural sector to constitute more than a single group of industries within the meaning of the Act. The provision of low cost water is generally available to the entire agricultural sector of this water district and not specifically targeted toward asparagus production. Therefore, we determine that the provision of water at a uniform rate to the agricultural sector of this water district does not provide to producers or exporters of fresh asparagus a benefit which constitutes a bounty or grant.

B. *Construction and Operation of Irrigation Facilities.* Petitioners alleged that the Mexican government has, and still does, invest in the construction and operation of irrigation facilities. The government of Mexico does participate, through inputs of capital from domestic and international sources, in the construction and upkeep of irrigation facilities. This participation does not confer a bounty or grant provided only to a specific industry or group of industries.

Facilities provided through government participation in such projects are available for use by the agricultural sector as a whole. Agricultural production in the Mexicali, Baja California area depends upon irrigation facilities which use water from private or government operated wells, or from the Colorado River. Some of these activities involve international cooperation with the United States in using the Colorado River as a source of water for irrigation. Although the Mexican government has participated in the construction and operation of irrigation projects in this area, these projects are not specifically targeted to asparagus. Indeed, asparagus comprises less than one percent of the total agricultural production of that area. Instead, wheat and barley comprise a larger portion of the agricultural products grown in the Mexicali area. Irrigation facilities in the Mexicali area except for privately-owned wells, exist for and are use by the entire agricultural sector of this area.

In addition, irrigation projects financed by or operated with government assistance are not limited to a specific region. Consistent with judicial and administrative decisions, we have found that where benefits are bestowed by a government under various regional development programs to industries in specified development areas, those benefits can constitute

VOL 48 ISS 94 MAY 13 1983 UMI

bounties or grants within the meaning of the countervailing duty law.

Here, the Mexican water projects, such as those in the areas where the asparagus at issue is produced, are not limited to specific, targeted regions; they are constructed throughout Mexico. The location of such projects is determined by obvious considerations of the amenability of an area to irrigation in the context of normal agricultural needs and practices. We have ascertained that funds have been expended throughout Mexico for such projects, including improvements to existing facilities. Such expenditures do not constitute subsidies by reason of any regional character.

Further in this case, as explained in this notice, the incentive programs provided by the Mexican government for regional development purposes (such as accelerated depreciation for construction or the elements of the CEPROFI program) are not available to producers or exporters of fresh asparagus.

C. *Discussion on Fertilizers.* Fertilizantes Mexicanos, S.A. (Fertimex), a country-wide, state-owned monopoly, produces and distributes the ingredients for most of the fertilizer used in Mexico. We verified that fertilizer ingredients used in Mexico but not produced by Fertimex are imported. The prices for fertilizer are set on a national level and published in the *Diario Oficial*. The prices set for fertilizer are established on a country-wide basis, and are not established or adjusted on either a regional or product basis. Thus, fertilizer is available at a uniform price to all agricultural producers throughout Mexico. No discounts are granted on either a regional or product basis. We determine that producers or exporters of fresh asparagus do not receive benefits which constitute bounties or grants through the Mexican government's system of setting prices for fertilizers.

Petitioner's Comments

Comment 1

Petitioners believe that bounties or grants are being provided to producers of fresh asparagus in Mexico through processors in Mexico of canned asparagus. Petitioners believe that such bounties are passed on to the growers of fresh asparagus.

DOC Position

We found that the fresh asparagus producers or exporters involved in this case have no relationship with any asparagus processors in Mexico. They instead concentrate solely on marketing the fresh product. Since asparagus producers and asparagus processors are not related, such transactions would not result in a benefit for producers or exporters of fresh asparagus.

Comment 2

Petitioners stated that the Mexican government has targeted expenditures on irrigation projects to the northwestern area of the country in order to promote the production of high value products, including vegetables.

DOC Position

Irrigation facilities in the northwest of Mexico are generally available to the entire agricultural sector, with the exception of privately funded wells. The construction and operation of government irrigation projects in northwestern Mexico is not part of any regional development plan established by the Mexican government. Rather the Mexican government, in a normal function of government, has contributed significant assistance to irrigation projects throughout Mexico.

Comment 3

Petitioners alleged that the Mexican government provides in the asparagus producing areas low cost water to agricultural products which are of high value and which can be exported.

DOC Position

We found that water rates were provided to the entire agricultural sector at uniform rates within a district, for example, the Mexicali, Baja California area. We found no evidence that producers of high value export products received water at lower rates than producers of other agricultural products. Thus, we found that a specific industry or group of industries of the agricultural sector was not provided with special water rates as a result of any government-sponsored development program.

Comment 4

Petitioners claimed that the current operation of Mexico's irrigation system gives preferential status to vegetables, including asparagus. It is irrelevant whether or not such irrigation facilities were originally constructed with the intent to favor asparagus production.

DOC Position

Again, we found that irrigation facilities in the asparagus-producing regions are generally available to all agriculture. Therefore, asparagus producers and exporters do not thereby receive a bounty or grant.

Comment 5

Petitioners alleged that the Mexican government provides credit facilities to assist in agricultural production for export.

DOC Position

As stated in this notice, we found no instances or evidence that producers or exporters of fresh asparagus receive or are eligible for any government-sponsored credit facilities. We found that producers or exporters of fresh asparagus are not eligible and did not receive (a) financing through FOMEX, (b) credit benefits under SAM, or (c) financing under the Fund Established in Relation to Agriculture or the National Rural Credit Bank.

Comment 6

Petitioners alleged that the Mexican government has targeted particular products, including fresh asparagus for export, and has provided to producers of these crops preferential access to inputs.

DOC Position

As stated in sections I–I, I–K, I–L and II–C of this notice, we found that no producer or exporter of fresh asparagus received any type of discount on such inputs as fertilizers, insecticides, fuels, or seeds.

Respondent's Comments

Comment 1

Fresh asparagus has never been included in any list of products eligible for FOMEX financing. FOMEX provides financing only for manufactured products, and fresh asparagus is not a manufactured product.

DOC Position

FOMEX is not permitted to provide loans for agricultural products and, according to its rules of operation, does not do so.

See Section I–A of this notice.

Comment 2

The SAM program was established to foster the availability of basic food products in Mexico, and, at no time, has fresh asparagus been considered by the Mexican government as a basic food item eligible for SAM benefits. Further, the SAM program has been discontinued.

DOC Position

The SAM program was established to foster the increased production of basic food items in an attempt for Mexico to become independent of imports of these basic foods. Fresh asparagus is not considered a basic food item, and, therefore, producers or exporters of fresh asparagus were not eligible to receive benefits through the SAM program. As noted, the SAM program has been discontinued. See Section I–D of this notice.

Comment 3

The CEPROFI program was designed to assist, through the provision of tax credits against federal taxes, firms carrying out investments in certain industrial activities. Producers or exporters of fresh asparagus are not eligible for nor have they received any benefits under the CEPROFI program.

DOC Position

We agree. See Section I–D, E, F, G, I of this notice.

Comment 4

The CEDI program is no longer in operation, and producers or exporters of fresh asparagus were not eligible for CEDI even when it was operational.

DOC Position

We agree. See Section I–C of this notice.

Comment 5

Fresh asparagus producers or exporters have not received fuel discounts and were not eligible for fuel discounts. Furthermore, this program is no longer in effect.

DOC Position

We agree. See Section I–I of this notice.

Comment 6

Producers and exporters of fresh asparagus in Mexico have not received and are not eligible for financing through FIRA and the National Bank of Rural Credit.

DOC Position

We agree. See Section I–H of this notice.

Comment 7

Producers and exporters of fresh asparagus are not eligible for and have not received any benefits from the law permitting accelerated depreciation.

DOC Position

We agree. See Section I–G of this notice.

Comment 8

Producers or exporters of fresh asparagus do not receive discounts on purchases of seeds as they do not purchase seeds from any concern or agency of the Mexican government.

DOC Position

We verified that producers or exporters of fresh asparagus use seeds produced by their own crops. See Section I–L of this notice.

Comment 9

Fertilizers are available at a single price in Mexico, and there is no variation in this price based upon region or crop. There are no preferential prices for producers or exporters of fresh asparagus.

DOC Position

We agree. See Section II–C of this notice.

Comment 10

Producers or exporters of fresh asparagus do not benefit from preferential water rates, or government construction and operation of irrigation facilities.

DOC Position

We do not consider the provision of water at a uniform rate to all agricultural producers in a region to be a benefit. Producers or exporters of fresh asparagus do not receive a benefit through government construction and operation of irrigation facilities since, in this case, these facilities are generally available to the entire agricultural sector.

See Sections II–A and II–B of this notice.

VI. Verification

In accordance with section 776(a) of the Act, we verified the data used in making our final determination. During the verification we followed normal procedures, including inspection of documents with government officials, and on-site inspection of the records and operations of producers and exporters of fresh asparagus.

Administrative Procedures

The Department has afforded interested parties an opportunity to present oral views in accordance with its regulations (19 CFR 355.35). Counsel for the petitioners requested a hearing in this investigation; however, a hearing was not held as the request was not made in a timely manner, and counsel indicated that no one from the requesting firm would be present at the hearing. In accordance with the Department's regulations (19 CFR 355.34(a)), written views have been received and considered. We are hereby concluding our investigation regarding this case.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

May 9, 1983.

BILLING CODE 3510-25-M

University of California; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 83–27. Applicant: University of California, Department of Pathology, La Jolla, CA 92093. Instrument: Camera for Electron Microscope. Manufacturer: Siemens Corp., West Germany. Intended use of instrument: See Notice on page 53083 in the **Federal Register** of November 24, 1982.

Comments: No comments have been received with respect to this application

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The application relates to a compatible accessory for an instrument that has been previously imported for the use of the applicant institution. The accessory is being furnished by the manufacturer which produced the instrument with which it is intended to be used. We are advised by the Department of Health and Human Services in its memorandum dated April 4, 1983 that the accessory is pertinent to the applicant's intended uses and that it knows of no comparable domestic accessory.

The Department of Commerce knows of no similar accessory being manufactured in the United States which is interchangeable with or can be readily adapted to the instrument with which the accessory is intended to be used.

BILLING CODE 3510-25-M

Applications for Duty-Free Entry of Scientific Instruments; National Aeronautics and Space Administration, et al.

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States.

Comments must be filed in accordance with § 301.5(a) (3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Program Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register**.

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 a.m. and 5:00 p.m., Monday through Friday, Room 1523, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00326R. Applicant: National Aeronautics and Space Administration, Resident Office, Jet Propulsion Laboratory, 4800 Oak Grove Drive, Pasadena, CA 91109. Instrument: Excimer Laser System, Model EMG-101E and Accessories. Manufacturer: Lambda Physik, West Germany. Application is a resubmission, notice of which was published in the **Federal Register** of September 20, 1982.

Docket No. 83-179. Applicant: Sutter Community Hospitals, Sutter Memorial Hospital, 28th & L Streets, Sacramento, CA 95819. Instrument: Electron Microscope, EM 109. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: The instrument is intended to be used for the investigation of ultrastructure of surgical pathology tissues to determine the existence of diseased states. The information will culminate in pathological diagnosis for the patient and instruction in pathology for students at the University of California Medical School. Application received by Commissioner of Customs: April 26, 1983.

Docket No. 83-194. Applicant: University of Alabama in Birmingham, Comprehensive Cancer Center, NMR Core Facility, CHSB B-31, Birmingham, AL 35294. Instrument: NMR Spectrometer, Model WH-400. Manufacturer: Bruker Instrument, Inc., West Germany. Intended use of instrument: The instrument is intended to be used for studies of biomolecules including proteins, peptides, nucleic acids, polysaccharides, phospholipids, steroids and complexes of these molecules with each other, with metals and with drugs. Studies of intact cells *in vitro* will also be conducted. The objective of these studies will be to define the conformation-activity and structure activity relationships of the various biomolecules and pharmacologically active agents. Application received by Commissioner of Customs: March 29, 1983.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; National Zoological Park, Smithsonian Institution; Receipt of Modification

Notice is hereby given that National Zoological Park, Smithsonian Institution, Washington, D.C. requests a modification to Permit No. 346 issued under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

The Permit Holder requests additional authority to collect sea lion pups found dead in the study area and to stomach lavage up to 80 sea lion pups for physiologic studies.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this request to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this modification should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D. C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this request are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documentation pertaining to the above modification request is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington D.C.;

Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930, and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: May 6, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-12969 Filed 5-12-83; 8:45 am]

BILLING CODE 3510-22-M

National Marine Fisheries Service; Hubbs-Sea World Research Institute; Issuance of Permit To Take Marine Mammals

On March 8, 1983, Notice was published in the **Federal Register** (48 FR 9680), that an application had been filed with the National Marine Fisheries Service by the Hubbs-Sea World Research Institute, 1700 South Shores Road, Mission Bay, San Diego, California 92109, for a permit to take beluka whales (*Delphinapterus leucas*) for scientific research.

Notice is hereby given that on May 5, 1983, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Scientific Research Permit for the above taking to the Hubbs-Sea World Research Institute, subject to certain conditions set forth therein.

The Permit is available for review by interested persons in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Steeet, N.W., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99802; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: May 5, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

National Marine Fisheries Service; Massachusetts Cooperative Fishery Research Unit; Receipt of Modification Request to Permit No. E12

Notice is hereby given that Mr. Boyd Kynard, Acting Leader, Massachusetts Cooperative Fishery Research Unit, Holdsworth Hall, University of Massachusetts, Amherst, Massachusetts 01003, has requested a modification of Permit No. E12 issued on June 10, 1976 (41 FR 24621) as amended on August 19, 1977, October 26, 1977, and June 25, 1980, under the authority of the Endangered Species Act of 1973 (16 U.S.C. 1531-1543), and the National Marine Fisheries regulations governing endangered fish and wildlife permits (50 CFR Part 222).

Permit No. E12 authorizes an unspecified number of shortnose sturgeon *(Acipenser brevirostrum)* may be captured and observed, but not more than one hundred (100) shortnose sturgeons, at least 16" in length are to be tagged.

The Permit Holder is request to capture up to 300 juvenile sturgeons less than 16" long and tag up to thirty (30) with Atkins or radio tags.

Written data, views, or requests for a public hearing on this modification request should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within thirty (30) days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this request are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documentation pertaining to the above modification request is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: May 6, 1983.

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1983 Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1983 a commodity to be produced by and services to be provided by workshops for the blind and other severely handicapped.

DATE: Comments must be received on or before: June 15, 1983.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47 (a)(2), 85 Stat. 77. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity and services to Procurement List 1983, November 18, 1982 (47 FR 52101):

Class 1680

Belt, Aircraft Safety
1680-00-725-5927

SIC 0782

Grounds Maintenance, Area 12
"NOSTRA", Naval Weapons Station, Yorktown, Virginia

SIC 7349

Janitorial/Custodial, Naval and Marine Corps Reserve Center, Newport News, Virginia

E. R. Alley, Jr.,

Acting Executive Director.

[FR Doc. 83-12910 Filed 5-12-83; 8:45 am]

BILLING CODE 6820-33-M

VOL 48 ISS 94 MY 13 1983 UMI

Procurement List 1983; Additions and Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to and deletion from procurement list.

SUMMARY: This action adds to and deletes from Procurement List 1983 commodities to be produced by and services to be provided by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: May 13, 1983.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher (703) 557–1145.

SUPPLEMENTARY INFORMATION: On July 23, 1982, August 6, 1982, October 29, 1982, January 7, 1983, February 4, 1983, February 22, 1983, February 25, 1983, March 4, 1983, and March 18, 1983, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (47 FR 31915, 47 FR 34161, 47 FR 49066, 48 FR 859, 48 FR 5290, 48 FR 7491, 48 FR 8114, 48 FR 9331, and 48 FR 11484) of proposed additions to and deletion from Procurement List 1983, November 18, 1982 (47 FR 52101).

Additions

After consideration of the relevant matter presented, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities and services listed.

c. The actions will result in authorizing small entities to produce or provide commodities and services procured by the Government.

Accordingly, the following commodities and services are hereby added to Procurement List 1983:

Class 5660

Fasteners, Fence Post
5660–00–148–7251

Class 7910

Pad, Floor Polishing Machine
7910–00–820–7991
7910–00–820–7989
7910–00–820–7990

BILLING CODE 6820–33–M

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 83–2]

Prehearing Conference; Honeywell, Inc., A Corporation

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of Prehearing Conference.

DATE: This notice announces a prehearing conference to be held in the matter of Honeywell, Inc. on May 27, 1983 at 10:00 a.m.

ADDRESS: The prehearing conference will be in the Third Floor Hearing Room, 1111–18th Street, NW., Washington, D.C. For additional information contact: Sheldon D. Butts, Deputy Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, telephone (301) 492–6800.

SUMMARY: Notice of Prehearing Conference. Please take notice that a prehearing conference in this proceeding will be held at 10:00 a.m., on May 27, 1983, in the Third Floor Hearing Room, 1111–18th Street, NW., for the purposes outlined in 16 CFR 1025.21(a). The Presiding Officer will be Administrative Law Judge David G. Oringer. The issues to be considered may include any or all of the following:

(1) Petitions for leave to intervene;

(2) Motions, including motions for consolidation of proceedings and for certification of class actions;

(3) Identification, simplification and clarification of the issues;

(4) Necessity or desirability of amending the pleadings;

(5) Stipulations and admissions of act and of the content and authenticity of documents;

(6) Oppositions to notices of depositions;

(7) Motions for protective orders to limit or modify discovery;

(8) Issuance of subpoenas to compel the appearance of witnesses and the production of documents;

(9) Limitation of the number of witnesses, particularly to avoid duplicate expert witnesses;

(10) Matters of which official notice should be taken and matters which may be resolved by reliance upon the laws administered by the Commission or upon the Commission's substantive standards, regulations, and consumer product safety rules;

(11) Disclosure of the names of witnesses and of documents or other physical exhibits which are intended to be introduced into evidence;

(12) Consideration of offers of settlement;

(13) Establishment of a schedule for the exchange of final witness lists, prepared testimony and documents, and for the date, time and place of the hearing, with due regard to the convenience of the parties; and

(14) Such other matters as may aid in the efficient presentation or disposition of the proceedings.

Dated: May 9, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–M

DEPARTMENT OF DEFENSE

Department of the Army

Intent To Prepare a Regulatory Permit Action Draft Environmental Impact Statement (DEIS) for a Log Transfer Facility at Cube Cove, Chatham Strait, on Admiralty Island, Alaska

AGENCY: Army Engineer District, Alaska, DOD.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: 1. A Department of Army (DA) Public Notice No. NPACO 071–OYD–2–810133, Chatham Strait 92, was circulated for public review May 15, 1981 concerning a proposal by Shee Atika, Incorporated to construct a log transfer facility in Cube Cove, Chatham Strait, on the Northwestern shore of Admiralty Island. The DA permit was issued April 7, 1982 and an application for modification of this permit has been submitted. Concerns expressed by the public have resulted in suspension of the permit pending the completion and findings of the EIS. The proposed project includes: a combined rock fill and floating breakwater, a continuous chain transfer system, an A frame, stifflegs, a barge loading ramp, a bulkhead, a small dock and mooring bouys. The facility is to support Shee Atika's land management activities on adjacent lands.

2. Alternatives for the proposed action will include but not be limited to the following: floating breakwater, solid fill breakwater, combined solid fill and floating breakwater, different numbers and locations of continuous chain transfer facilities, configuration of barge loading facilities, log rafting, barge transport, floating camp, upland camp, sites in other coves and no action.

3. a. Several public hearings and meetings have been held concerning this project. Scoping of the DEIS will include continued coordination with interested local, State and Federal agencies and other interested parties. Scoping meetings are tentatively scheduled for June 7, 1983 in Sitka, Alaska and June 8, 1983 in Angoon, Alaska. Information contained in the Department of Army permit file will be considered along with factual information submitted during the scoping process. Interested parties are urged to actively participate in the scoping process by submitting their concerns to the Alaska District as soon as possible.

b. Anticipated issues to be addressed include but are not limited to: alternatives, socio-economic impacts, land use, the effects on subsistence, water quality, marine flora and fauna, endangered species, cultural resources, and aesthetics, and measures to minimize adverse impacts.

4. The DEIS is expected to be available for public and agency review in early 1984.

ADDRESS: Questions about the proposed action and the DEIS can be answered by: William D. Lloyd, Chief, Environmental Resources Section, U.S. Army Engineer District, Alaska, Pouch 898, Anchorage, Alaska 99506.

Dated: May 3, 1983.

Neil E. Saling,

Colonel, Corps of Engineers, District Engineer.

Department of the Air force

USAF Scientific Advisory Board; Meeting

May 4, 1983.

The USAF Scientific Advisory board Aeronautical Systems Division Advisory Group will meet at Wright-Patterson Air Force Base, Ohio on June 6–7, 1983. The purpose of the meeting will be to review selected programs and projects relating to the missions of the Aeronautical Systems Division. The meeting will convene at 8:30 a.m. and adjourn at 5:00 p.m. each day.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 202–697–8845.

Winnibel F. Holmes,

Air Force Federal Register Liaison Officer.

DEPARTMENT OF EDUCATION

Transition Program for Refugee Children; Application Notice for Fiscal Year 1983

AGENCY: Office of Bilingual Education, ED.

ACTION: Application Notice for Fiscal Year 1983.

Applications are invited for grants under the Transition Program for Refugee Children.

Authority for this program is contained in Section 412(d)(1) of the Immigration and Nationality Act, as amended by the Refugee Act of 1980 (Pub. L. 96–212), and the Refugee Assistance Amendments of 1982 (Pub. L. 97–363).

(8 U.S.C. 1522(d)

Eligible applicants are State educational agencies.

This program supports educational activities designed to meet the special needs of eligible refugee children and to enhance their transition into American society.

Closing date for transmittal of applications: An application for grant must be mailed or hand delivered by July 29, 1983.

Applications delivered by mail: An application sent by mail must be addressed to Dr. R. Rudy Cordova, Director Division of State and Local Programs, Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education (Room 421, Reporters Building), 400 Maryland Avenue, SW., Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legibly mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping lable, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as a proof of mailing:

(1) A private metered postmark, or

(2) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered on at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications delivered by hand: An application that is hand delivered must be taken to the Division of State and Local Programs, Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education, Room 421, Reporters Building, 300 7th Street, SW., Washington, D.C.

The Division of State and Local Programs will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program information: The regulations (34 CFR 538.20(a)) for the Transition Program for Refugee Children provide in part that, to receive a grant under the program, a State educational agency must submit a count of the number of eligible children in its State taken on a date specified by the Secretary in a notice published in the **Federal Register**. The Secretary establishes any day within the period of May 1, 1983 through May 27, 1983 as the date on which a State educational agency shall conduct a count of the children eligible for assistance under the Transition Program for Refugee Children.

A grant is made to a State educational agency based on the number of eligible children enrolled in public and nonprofit private schools in the State, using the weighting factors announced in this notice. Using the same formula, the State educational agency awards subgrants to local educational agencies in its State that proposed to serve eligible children within their jurisdictions. As provided in 34 CFR 538.20, the State educational agency makes subgrants to local educational agencies within 60 days after the State receives the grant award funds. When a local educational agency does not apply to serve its eligible children, the State educational agency provides services directly to those children or arranges for provision of services to those children through subgrants, contracts, and cooperative agreements with other public and private nonprofit organizations, agencies, and insitutions.

Awards under this program are to provide educational services to eligible children during the 1983–1984 school year.

Weighting factors: Section 538.31 of the program regulations authorizes the Secretary to announce the weighting factors to be used in distributing funds under this program. For the award of fiscal year 1983 funds, the Secretary uses the following formula for fund distribution:

Recently of arrival in the United States (in years)	Weighting factors by school level	
	Elementary	Secondary
Less than 1	10	10
1 to 2	3	5
2 to 3	0	3
3 to 4	0	0
More than 4	0	0

Available funds: It is expected that approximately $16.6 million will be available for grants to State educational agencies. These funds are the fiscal year 1983 appropriation.

It is estimated that these funds will provide aproximately $250 of assistance per eligible child. However, the approximate amount of funds available per eliogible child may increase or decrease depending on the total number of eligible children that the States report.

These estimates, however, do not bind the U.S. Department of Education to specific numbers of grants or to the amount of any grant.

Application forms: Application forms and program information packages will be mailed to all State educational agencies. Additional forms and program information packages may be obtained by writing to the Division of State and Local Programs, Office of Bilingual Education and Miniority Languages Affairs, U.S. Department of Education (Room 421, Reporters Building), 400 Maryland Avenue, SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those imposed under the statute and regulations. The Secretary strongly urges that the narrative portion of the application not exceed four pages. The Secretary further urges that applicants not submit information that is not requested.

Applicable regulations: Regulations applicable to this program include the following:

(1) Regulations governing the Transition Program for Refugee Children (34 CFR Part 538) published on January 14, 1981 (46 FR 3378).

(2) Regulations governing the Refugee Resettlement Program (45 CFR Part 400) published on September 9, 1980 (45 FR 59818).

(3) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 76, 77 and 78), except as otherwise provided in 324 CFR Part 538.

Further information: For further information, contact the Application Coordinator for the Transition Program for Refugee Children in the Division of State and Local Programs, Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education (Room 421, Reporters Building), 400 Maryland Avenue, SW., Washington, D.C. Telephone (202) 245–2962. (8 U.S.C. 1522(d))

(Catalog of Federal Domestic Assistance Number 84.146, Transition Program for Refugee Children)

Dated: May 5, 1983.

T. H. Bell,

Secretary of Education.

[FR Doc. 83–12924 Filed 5–12–83; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Intent To Grant Exclusive Patent License; Pan American Energy Corp.

Notice is hereby given of an intent to grant to Pan American Energy Corporation of Los Alamos, New Mexico, an exclusive license to practice in the United States, the invention described in U.S. Patent No. 3,786,858, entitled "Method of Extracting Heat From Dry Geothermal Reservoirs." The patent is owned by the United States of America, as represented by the Department of Energy (DOE).

The proposed license will contain terms and conditions to be negotiated by the parties in accordance with 35 U.S.C. 209. DOE intends to grant the license, upon a final determination in accordance with 35 U.S.C. 209(c), unless within 60 days of this Notice the Assistant General Counsel for Patents, Department of Energy, Washington, D.C. 20585, receives in writing any of the following, together with supporting documents:

(i) A statement from any person setting forth reasons why it would not be in the best interests of the United States to grant the proposed license, or

(ii) An application for a nonexclusive license to manufacture, use, and/or sell the invention in the United States, in which applicant states that he has already brought the invention to practical application or is likely to bring the invention to practical application expeditiously.

The Assistant General Counsel for Patents will review all written responses to this Notice, and will grant the license if, after expriation of the 60-day notice period, and after consideration, written responses to this Notice, a determination is made, in accordance with 35 U.S.C. 209(c), that the license grant is in the public interest.

Signed at Washington, D.C., on this 6th day of May 1983.

R. Tenney Johnson,

General Counsel.

[FR Doc. 83–12908 Filed 5–12–83; 8:45 am]

BILLING CODE 6450–01–M

Office of Conservation and Renewable Energy

[Case No. F–007]

Energy Conservation Program for Consumer Products; Petition for Waiver of Furnace Test Procedures from Honeywell, Inc.

AGENCY: Department of Energy.

SUMMARY: Today's notice publishes a Petition for Waiver" from Honeywell, Inc. (Honeywell), requesting a waiver from the existing Department of Energy (DOE) test procedures for furnaces. Honeywell is requesting the allowance to use an alternate test procedure in its testing of furnaces and boilers equipped with a Honeywell "Integrated Control System" (ICS). DOE is soliciting comments, data, and information respecting the petition.

DATE: DOE will accept comments, data, and information not later than June 13, 1983.

ADDRESS: Written comments and statements shall be sent to: Department of Energy, Office of Conservation and Renewable Energy, Case No. F–007, Mail Station CE–113.1, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT:

Michael J. McCabe, U.S. Department of Energy Office of Conservation and Renewable Energy, Mail Station CE–113.1, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585 (202) 252–9127

Eugene Margolis, U.S. Department of Energy, Office of General Counsel, Mail Station GC–33, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585 (202) 252–9513.

VOL 48 ISS 94 MAY 13 1983 UMI

SUPPLEMENTARY INFORMATION:

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Pub. L. 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Pub. L. 95–619, 93 Stat. 3266, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR Part 430, Subpart B.

DOE has amended the prescribed test procedures by adding 10 CFR § 430.27, Petitions for Waiver, to allow the Assistant Secretary for Conservation and Renewable Energy temporarily to waive test procedures for a particular basic model. 45 FR 64108 (September 26, 1980). Waivers may be granted when one or more design characteristics of basic model either prevent testing of the basic model according to the prescribed test procedures or lead to results so unrepresentative of the model's true energy consumption as to provide materially inaccurate comparative data.

On January 7, 1983, Honeywell filed a Petition for Waiver from DOE test procedures for furnaces. Specifically, the petitioner believes that the use of the existing furnace test procedure will not accurately evaluate a furnace or boiler equipped with Honeywell's Integrated Control System (ICS). Honeywell claims that its ICS is a control system that will provide efficiency enhancement through control of multiple burner firing rates and circulator run time. The multiple burner firing rate is the aspect of the system that constitutes the substance of the request. Honeywell's petition includes a suggested method of weighing the Annual Fuel Utilization Efficiency (AFUE) values at two firing rates in lieu of the currently prescribed provisions which only allow evaluation at the highest firing rate. Honeywell believes this weighted average method will accurately evaluate the performance of any furnace or boiler equipped with the ICS. Honeywell requests the allowance to use the weighted average method, including the use of the specific weighting factor of 16 percent fuel consumption at high fire.

Pursuant to paragraph (b) of 10 CFR § 430.27, DOE is hereby publishing the "Petition for Waiver" in its entirety. The petition contains no confidential information. DOE solicits comments, data and information respecting the petition, particularly with regard to the appropriateness of the weighted AFUE method and the weighting factors suggested by Honeywell (i.e. 16% high fire, 84% lowfire).

Issued in Washington, D.C. April 18, 1983.

Howard S. Coleman,

Principal Deputy Assistant Secretary Conservation and Renewable Energy.

January 7, 1983.

Mr. Joseph Trible,

Assistant Secretary for Conservation, and Renewable Energy, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, D.C. 20585

Dear Mr. Trible: This is a request for waiver, for Honeywell only, from the Consumer Product Test Procedure as specified in 10 CFR Part 430, amended on September 26, 1980, for application to furnaces and boilers using a Honeywell Integrated Control System (ICS).

Appendix N to Subpart B of 10 CFR Part 430 specifies the test procedure to determine the relative efficiency of manufacturers' appliances. Section 430.24 of Subpart B prohibits a manufacturer from representing energy efficiency of products unless based on results obtained as specified in Appendix N to Subpart B. We believe this test procedure will not accurately evaluate a furnace or boiler equipped with an ICS.

In addition to many control and diagnostic functions, the Honeywell ICS provides multiple burner firing rates with fuel/air ratio control, as well as circulator overrun on warm-air furnaces. Our testing on over 20 appliances shows the strategy will increase AFUE by up to four percentage points with the rationale that the appliance is 70% oversize for the structural (Ref.: 10 CFR Part 430, Appendix N to Subpart B).

Appendix A gives a system overview of the multiple firing rate circulator overrun control methods.

Appendix B suggests an alternate test procedure to accommodate these efficiency enhancement features.

Appendix C describes a computation procedure for determining the fraction of time the burner operates at high fire, assuming 60 seconds of high fire operation at the start of each thermostat cycle.

Honeywell is requesting the allowance to use the weighted average method specified in Appendix B, including the use of the weighing factor of 16% fuel use at high fire.

Your consideration of this request for waiver from the Consumer Product Test Procedure will be very much appreciated.

Best regards,

Ralph Torborg

cc: Mr. John Talbot, Consumer Product Efficiency Branch, Conservation and Solar Energy, U.S. Department of Energy, Washington, D.C. 20585

Mr. Esher Kweller, National Bureau of Standards, Building 202, Room 204, Washington, D.C. 20234

Mr. Jack Langmead, GAMA, 1901 North Fort Meyer Drive, P.O. Box 9245, Arlington, VA 22209

Mr. John Woodworth, Hydronics Institute, 35 Russo Place, Berkely Heights, NJ 07922

Mr. Jack H. Hollingsworth, ASHRAE, 31081 Aliso Circle, South Laguna, CA 92677

Appendix A—System Overview Integrated Control System (ICS)

The Honeywell Integrated Control System is an advanced technology system that provides overall control of a gas-fired furnace or boiler by incorporating all necessary control functions.

The logic functions are performed by a microprocessor located within the System Control Module. This module contains the electronics required to interface the system components with the microprocessor. The system uses a two-stage gas valve with a redundant actuator. Proof of flame is provided by a conventional flame rod. The system utilizes a solid state temperature sensor which indirectly controls the circulator during normal operation, or shuts off the gas valve if an over-temperature condition exists.

Combustion air is controlled by a power combustion blower (PCB) assembly with an electronic speed control module to provide high or low combustion air. By controlling the speed of the PCB and the gas valve, the System Control Module can control combustion air and fuel for two-stage firing.

With this system, the capability to control the quantity of combustion air and gas independent of each other has significant safety, reliability and efficiency results. By executing ignition with high air and low gas (low F/A ratio) the possibility of flame-roll out from the vestibule is eliminated. Tests show that with a low F/A ratio, a smooth, quiet ignition is assured even after a 15 minute delay. This is because the F/A ratio goes below the ignition point rapidly as the distance off the burner surface increases. Once ignition is established, the system goes to high-fire to reduce the time the heat exchanger is exposed to corroding condensation with obvious reliability advantages.

- On forced warm air systems, it stays in high-fire for 60 seconds maximum or until the plenum temperature sensor reaches 140°F (but30 second minimum). Normally, this will result in a 60 second high-fire start.
- For hydronic systems, the boiler goes to high-fire on a call for heat and remains in high-fire until the H_2O temperature reaches 105°F (but 30 second minimum). Thus, the system may remain in high-fire each cycle for as little as 30 seconds or for several minutes depending on the mass of the boiler and return water temperature. For our calculations of high-fire fuel use, we assumed 60 seconds of high-fire operation at the start of each thermostat cycle. At all but very light loads, the return water would still be warm at the start of a heating cycle and would quickly be above 105°F even for relatively massive boilers. One minute of high-fire start, therefore, seems reasonable.

After the high-fire start the system goes to low-fire. If low-fire is inadequate to handle the load, the system automatically returns to high-fire.

The system utilizes a conventional single stage thermostat; but contains a special thermostat algorithm that operates the gas valve and the induced draft blower so as to efficiently match the heating load while maintaining a constant F/A ratio. The system will operate at a low firing rate, except after ignition as stated above and during conditions of morning setup or during exceptionally cold weather.

Two stage operation is controlled by a counter. If the call for heat remains on, in 10 minutes the counter will reach its maximum count and call for high-fire and high air. When the call for heat goes away, the burner shuts down and the counter resets to zero.

Circulator overrun operates as follows:

- On forced warm air systems, the circulator turns on 60 seconds after start-up or when the plenum temperature reaches 140° F, whichever occurs first. After the heat request is satisfied, the circulator continues to run until the warm air plenum temperature sensor drops to 95° F.
- After a call for heat on hydronic systems, the circulator comes on when the boiler H_2O temperature rises above 105° F. The circulator shuts down when the thermostat is satisfied.

Appendix B—Proposed Alternate Test Procedures

1. Perform entire test as specified in Appendix N to Subpart B contained in 10CFR, Part 430, with burner set at rated high-fire input. Circulator should be controlled by the ICS.
2. Repeat above test with appliance operating at its low-fire input.
3. Determine fraction of heating season fuel consumed at high-fire input (see Appendix C).
4. Determine the effective AFUE as follows:

AFUE (effective) = X (AFUE High) + (1–X) (AFUE Low)

Where X = % fuel used during high-fire operation = 16%

Example:

AFUE @ High-Fire—80%
AFUE @ Low-Fire—82%
% Time @ High-Fire—16%
AFUE (effective) = (.16×80) + (.84 × 82) = 81.7%

Appendix C

The fraction of heating season fuel consumed by the appliance at high-fire can be determined for various low-fire (derate) conditions. Low-fire derate is defined as the percent reduction form high-fire. In the ICS, low-fire output is about 60% of high-fire output (40% derate). The calculation procedure in Table 1 was used to determine the fraction of fuel consumed at high-fire for the ICS.

In the calculation procedure, the following assumptions were made:

(a) Burner starts each thermostat cycle at high-fire for 60 seconds.

(b) Thermostat cycling rate for the ICS with two stage firing is three cycles per hour @ 50% load.

(c) National average weather (Pittsburgh).

(d) Appliance is 70% oversize.

(e) Both steady state and cycling efficiency follow the trend shown in Figue 1.

(f) Cycling efficiency is Independent of cycling rate and/or thermostat load (Figure 2).

The heating season was divided into outdoor temperature "bins" (see Table 1). ΔT is the indoor/outdoor temperature difference, i.e., the difference between 65°F and the average of the "bin". Thus, ΔT represents the heating load in degrees. The heating season hours in each "bin" were determined from Pittsburgh (national average) weather data. The percentage load at high fire (H) is the ratio of the heating load, ΔT, to the temperature rise achievable by the appliance if it is on continously. The outdoor design temperature for Pittsburgh is 1°F (based on ASHRAE data, Pittsburgh airport temperature exceeds 1°F, 99% of the time during December, January, and February). The design load is thus 64°F (65°F–1°F). The temperature rise achievable by the appliance, assuming 70% over- size, is then 109°F (64°F × 1.7).

Thus, to calculate Col. 4, Table 1:

$H = \Delta T/109°F$

The next column "Total Hours Required (high-fire only)" shows the hours in each "bin" that the appliance must operate in high-fire to satisfy the load (Col. 3 × Col. 4).

The load at combined high-low fire (F_o) is defined in terms of the load at high fire (H) by the following expression:

$$F_o = \frac{0.68\sqrt{0.462 - 0.32H}}{0.016} \quad (1)$$

The derivation of Equation 1 proceeds as follows:

The average energy output of a heating appliance a combined high-low fire for each temperature "bin" (Table 1) must be equal to the average output at high fire only (to satisfy the space heating demand).

$OUTPUT_{HI} = OUTPUT_{HI\text{-}Lo}$ (1a)

The average energy output is also equal to the instantaneous output at high fire (Q_{HI}) times the load at high fire (H)

$OUTPUT_{HI} = Q_{HI}H$ (1b)

At combined high-low fire, the energy output for one thermostat cycle is as follows:

$OUTPUT_{HI\text{-}Lo}/C = Q_{HI}\tau_1 + Q_{Lo}(\tau_{on} - \tau_1)$

where:

C = thermostat cycling rate
τ_1 = on time/cycle at Hi Fire
τ_{on} = on time/cycle for combined Hi-Lo Fire

Defining: $R = Q_{Lo}/Q_{HI}$

$OUTPUT_{HI\text{-}Lo} = C\,[Q_{HI}\tau_1 + RQ_{HI}(\tau_{on} - \tau_1)]$

From equations 1a and 1b:

$Q_{HI}H = C\,[Q_{HI}\tau_1 + RQ_{HI}(\tau_{on} - \tau_1)]$

Then:

$H = C\,[\tau_1 + R(\tau_{on} - \tau_1)]$ (2)

Now, to find an expression for the thermostat cycle-rate, C, in terms of the two-stage firing load, F_o, we must consider the operation of a typical thermostat with thermal or electronic anticipation. As discussed in "Guide to Room Thermostats," *Appliance Manufacturer*, Sept. 1971, p. 89, a thermostat consists of a temperature sensitive differential switch (e.g., mercury bulb with bi-metal) that receives some form of feedback or "anticipation.". The anticipator response may be treated as a first-order lag and the resulting differential equation may be solved at the make and break points of the differential switch to determine τ_{on} and C as a function of percent heating load. F_o, as shown in Figure 3. The resulting expressions, however, are transcendental functions of F_o which must be solved iteratively. An approximation of this function which allows a closed form solution is given by:

$C = 4C_{oo}F_o(1 - F_o)$ (3)

where C_{oo} = thermostat cycle rate of half-load; e.g., three cycles per hour.

Equation 3 was obtained through a second order curve fit to curve C in Fig. 3.

The thermostat on-time is easily found, knowing F_o and C by noting:

$$F_o = \frac{\tau_{on}}{\tau_{on} + \tau_{off}}$$

$$C = \frac{1\ \text{cycle}}{\tau_{on} + \tau_{off}}$$

$$\tau_{on} = F_o(\tau_{on} + \tau_{off}) = \frac{F_o}{C} \quad (4)$$

Solving equations 2, 3, & 4 simultaneously gives equation 5, given the following:

$C_{oo} = 3$ cy/hr
$\tau_1 = 1/60$ hr
$R = 0.6$
$H = 0.6\,F_o - 0.08\,F_o$
(5)

Solving equation (5) using the quadratic formula gives equation (1). The negative value of the square root quantity must be used because the positive value results in a load greater than 100%.

F_o is calculated from Equation 1 and is tabulated for each "bin" in Table 1. The cycling rate (C) is then determined from equation 3 and shown in Table 1, Col. 7. The cycles per year (Col. 8) are equal to the cycles/hr. times the heating season hours in each temperature "bin".

The thermostat cycling rate (C) was calculated assuming a cycling rate of three cycles per hour at 50% load. A Honeywell T87 thermostat, with the anticipation set to match the gas valve current at high-fire, would cycle six times per hour at 50% load. However, at low-fire, because of the reduced anticipation current (one less gas valve operator), the thermostat will cycle three times per hour at 50% load. For solid state thermostats (no thermal anticipation) the cycling rate should be set at three cycles per hour (50% load).

The use of a two-stage firing control enables the use of a slower cycling thermostat to produce comfort conditions (i.e., room temperature fluctuations) identical

to a single stage firing control with a faster cycling thermostat. This is because the two stage control operates at low-fire, and hence at a lower capacity, for most of the heating season. As shown in Figure 4 (this figure is an unpublished extension of a study entitled "Analytical Predictions of Residential Electrical Heating System Performance," by Lorne W. Nelson and John L. Magnussen, *IEEE Transaction on Industry Applications*, Vol. 1A-10, No. 6, Nov./Dec. 1974), space temperature swings are 1) inversely proportional to the first order time constant which approximates the dynamic response of the appliance's heat output rate from a cold startup and 2) inversely proportional to the on/off cycling rate at half load. Additional unpublished studies have shown that space temperature swings are 1) directly proportional to the capacity of the appliance or appliance heating stage being cycled and 2) independent of load between 20%–80%. Thus, a given appliance operated at five cycles per hour at high-fire (Ref. DOE test procedure NBSIR 78–1543, page A–9) could be operated at three cycles per hour at a 40% derate firing rate with negligible difference in space temperature swings (as shown in Figure 4) for a given appliance time constant.

Moreover, derating a given appliance increases the appliance time constant (smaller heat input rate for the same thermal mass) which reduces space temperature swings even further. Therefore, an appliance normally operated by a 5–6 cycle per hour thermostat could be operated by a three cycle per hour thermostat with two stage control with no noticeable effect on homeowner comfort.

The existing DOE test procedure is based on a thermostat cycling rate of five cycles per hour at 50% load. The test procedure also is based on a load of 22.5%. With the ICS, the duty cycle will be considerably higher because the appliance will operate at low-first most of the heating season. Also, the cycling rate will be lower (as described above). With a power-combustion-blower equipped heating appliance the effect of thermostat cycling rate and % load on the energy performance is very small due to low off-cycle losses (see Figure 2). The DOE test procedure, then, will give accurate representation of the energy performance of a heating system equipped with an ICS.

Referring again to Table 1, the hours accumulated in high-fire start up (60 seconds each thermostat cycle) are calculated for each "bin" based on the number of thermostat cycles per year. This data is shown in Table 1, Col. 9. When low-fire is inadequate to supply the required heat, the control system reverts to high-fire.

For the ICS with a 40% derate, low-fire (with a 60 second high-fire start each burner cycle) will satisfy the heating demand for all but the two "coldest" temperature "bins" (The maximum Δ° satisfied by low fire (60% of high fire output) is $0.6 \times 109°F = 65°F$.) Since these "bins" represent less than 0.5% of the heating season hours, they were ignored.

The total hours the appliance operates at high-fire is then simply the hours accumulated during the 60 second high-fire starts. The ratio of the total high-fire start hours (218.2) to the hours required to satisfy the entire heating season load at high-fire (1,372.7) determines the fraction of fuel used at high-fire. For the ICS, this fraction was determined to be 0.16; i.e., 16% of the annual fuel consumption is consumed with the heating appliance operating at high-fire. The effective seasonal efficiency (AFUE) can then be determined from the procedure described in Appendix B.

TABLE 1.—PROCEDURE FOR DETERMINING PERCENT HIGH FIRE FUEL USE AT 40 PERCENT LOW-FIRE DERATE

Pittsburgh Weather 70 percent Oversize

Temperature Bins (F)	ΔT	Heating season hours	(H) Hi-fire percent load	Total Hr. required (Hi-fire only)	(F_H)Hi/Lo combined percent load	Thermostat C		60 Second Hi-fire start (hours)

Federal Energy Regulatory Commission

[Docket No. TA83-2-21-001 (PGA83-2, IPR83-2)]

Arkansas Louisiana Gas Co.; Compliance Filing

May 9, 1983.

Take notice that on April 29, 1983, Arkansas Louisiana Gas Company (Arkla) submitted for filing as part of its FERC Gas Tariff, Original Volume No. 3, Rate Schedule X-26, Second Substitute Thirty-Second Revised Sheet No. 185, Second Revised Sheet No. 187A and Third Revised Sheet No. 187C, to become effective April 1, 1983.

Arkla states that this filing is in compliance with Ordering Paragraphs (C) and (D) of the Commission's order dated March 31, 1983, which required Arkla to file tariff sheet changes on exchange gas within a 30-day period. This filing also makes certain reductions in cost projections in the supporting work sheets and summary sheets of the PGA filing concerning reductions in costs for certain deep deregulated gas and certain tight formation gas.

Arkla states that copies of the filing were mailed to the one customer, Northwest Central Pipeline Company, served under Arkla's Rate Schedule X-26.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-32-001]

Colorado Interstate Gas Co.; Proposed Changes in Rates Under Purchased Gas Adjustment Clause Provisions

May 9, 1983.

Take notice that Colorado Interstate Gas Company (CIG) on April 29, 1983, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1, to be effective May 1, 1983. The filing proposes to decrease the rates charged to its jurisdictional customers by 25 cents per Mcf or approximately $73.4 million. CIG states that the proposed rate reduction results from decreases in gas purchased costs which it expects to obtain through the exercise by CIG of "market-out" provisions in gas purchase contracts covering the sale of Natural Gas Policy Act of 1978 (NGPA) Section 107 gas and renegotiation with certain producer suppliers of contract price and minimum take provisions. Northwest Pipeline Corporation has also recently filed in Docket No. TA83-3-37 (PGA83-3) to reduce its rates to CIG due to a reduction of the Canadian export border price.

CIG also requests waivers of the Natural Gas Act, the Commission's regulations thereunder, and its tariff provisions in order to make this special rate reduction filing and for it to be effective as of May 1, 1983. CIG says that good cause exists for such waiver since it and its customers are encountering difficulties in marketing gas at present price levels.

Copies of CIG's filing have been served upon the Company's jurisdictional customers and other interested persons, including public bodies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 6268-001]

Energenics Systems, Inc.; Surrender of Preliminary Permit

May 9, 1983.

Take notice that Energenics Systems, Inc. (Energenics), Permittee for the proposed Vega Dam Project No. 6268, requested by petition dated April 12, 1983, that its preliminary permit be surrendered. The preliminary permit was issued on November 2, 1982, and would have expired on May 31, 1984. Energenics has determined that hydroelectric development is infeasible due to a lack of adequate head and flow.

The surrender of the preliminary permit for Project No. 6268 is accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-480-000]

Florida Power & Light Co.; Filing

May 9, 1983.

The filing Company submits the following:

Take notice that on April 27, 1983, Florida Power & Light Company (FPL) tendered for filing seven (7) Exhibits A which provide for the contract demands for Florida Keys Electric Cooperative, Inc.; Fort Pierce Utilities Authority; City of Homestead; Lake Worth Utilities Authority; Utilities Commission, City of New Smyrna Beach; City of Starke; and City of Vero Beach.

The proposed effective date for the contract demands for Florida Keys, New Smyrna Beach, and Starke is March 1, 1982; the proposed effective date for the contract demand for Fort Pierce is April 1, 1983; and the proposed effective date for the contract demands for Homestead, Lake Worth and Vero Beach are June 1, 1983.

Any person desiring to be heard or to protest said filing should file a motion to intervene of protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 25, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ES83-40-000]

Idaho Power Co.; Notice of Application

May 9, 1983.

Take notice that on May 2, 1983, Idaho Power Company (Applicant), filed an application with the Federal Energy Regulatory Commission, pursuant to Section 204 of the Federal Power Act, seeking an Order authorizing the Applicant to (a) finance the construction of the Applicant's 50% undivided interest in certain pollution control facilities at the North Valmy Power Plant Unit No. 2 through a loan agreement with Humboldt County, Nevada (the "County") which provides for the issuance by the County of not to exceed $55,000,000 aggregate principal amount, from time to time, outstanding of pollution control revenue notes, the loan of the proceeds to Applicant in return for the issuance of a note of the Applicant to the County, and (b) the assumption of liability as guarantor of the principal of and interest on the notes of Humboldt County, issued in an amount not to exceed $55,000,000 and having maturities not later than May 15, 1990.

Any person desiring to be heard or to make any protest with reference to said Application should, on or before May 26, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). The Application is on file and available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12828 Filed 5-12-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-270-000]

K N Energy, Inc.; Request Under Blanket Authorization

May 9, 1983.

Take notice that on April 12, 1983, K N Energy, Inc. (Applicant), P.O. Box 15265, Lakewood, Colorado 80215, filed in Docket No. CP83-270-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant proposes to construct and operate an additional delivery point to an existing direct sale customer, Nebraska Public Power District (NPPD), under the authorization issued in Docket Nos. CP83-140-000 and CP83-140-001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant states that NPPD has requested a change in delivery points by adding a new delivery point in the vicinity of Sutherland, Nebraska, for the delivery of gas for use in NPPD's Gerald Gentleman Power Plant at that location. It is asserted that the cost of constructing the new delivery point and appurtenant facilities including approximately 6.5 miles of 6-inch lateral pipeline would be reimbursed by NPPD.

Applicant explains that NPPD has requested that deliveries of gas to the Ogallala, Nebraska, plant be moved to the Sutherland delivery point. It is indicated that NPPD intends to cease operation of its Ogallala plant as of June 30, 1983, but that some additional gas deliveries would be required for a period of time for maintenance or for sale demonstration purposes. Applicant asserts that NPPD's combined usage at the Ogallala and Sutherland plants would not exceed the present annual volumetric limitation of 747,953 Mcf.

Applicant states that gas at the Sutherland plant would be used for flame stabilization, ignition fuel and auxiliary boiler fuel for back-up space heating.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary

BILLING CODE 6717-01-M

[Docket No. TA83-2-54-000]

Louisiana-Nevada Transit Co.; Proposed Changes in FERC Gas Tariff

May 9, 1983.

Take notice that on May 2, 1983, Louisiana-Nevada Transit Company (Louisiana) tendered for filing proposed changes in its FERC Gas Tariff Volume I. The proposed changes are to reflect changes in purchased gas cost as provided in the company's Purchase Gas Adjustment Clause applicable to its Rate Schedule No. G-1 and X-2. The change provides for a total adjustment of 18.86¢ per Mcf including a deferred gas cost adjustment of (1.66)¢ per Mcf, to amortize a deferred balance, and a cumulative cost of gas adjustment of 20.52¢ per Mcf.

Louisiana states that copies of the filing were served upon the company's jurisdictional customer and the Arkansas Public Service Commission.

Any person desiring to be heard or to protest said complaint should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this complaint are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12830 Filed 5-12-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-262-000]

Michigan Wisconsin Pipe Line Co.; Application

May 9, 1983.

Take notice that on April 5, 1983, Michigan Wisconsin Pipe Line Company

VOL 48 ISS 94 MAY 13 1983 UMI

(Mich Wisc), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP83-262-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Texas Eastern Transmission Corporation (Tetco) from Vermilion Parish, Louisiana, to St. Landry Parish, Louisiana, pursuant to an agreement dated November 9, 1982, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Mich Wisc states that Tetco has an available supply of gas in the South Riceville Field in Vermilion parish pursuant to a gas purchase contract with Cornell Oil Company, *et al.*, dated April 1, 1982. Mich Wisc indicates that it would transport up to 2,600 Mcf per day (contract demand) at a rate of $1.31 per Mcf of contract demand. Mich Wisc states that it would receive the gas at a proposed interconnection of its lateral pipeline facilities with Tetco's proposed line near the source of the gas in Vermilion Parish and would deliver equivalent volumes at an existing interconnection of Mich Wisc and Tetco's pipeline facilities in St. Landry Parish, Louisiana.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 31, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practive and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Mich Wisc to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP76-91-014]

Montana-Dakota Utilities Co.; Compliance Filing

May 9, 1983.

Take notice that on April 29, 1983, Montana-Dakota Utilities Company (MDU) submitted a filing in compliance with Article VII(3) of the *Amendment of Stipulation and Agreement in Settlement of Remaining Issues*, as filed by MDU on December 4, 1981, and approved by the Commission on February 19, 1982. MDU's filing includes the following:

Article VIII(3)(a): MDU's calculation of deliverability life. (Schedule A)

Article VIII(3)(b): MDU's average cost of purchased gas for on-system and off-system customers from the Co.'s two most recent PGA filings with the FERC. (Schedule B)

Article VIII(3)(c): MDU's average cost per MCF of the highest priced 15 percent, by volume, of the gas purchased from producers for sale to on-system customers, as separately determined from each of MDU's two most recent PGA filings with the FERC. (Schedule B)

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP83-63-001]

National Fuel Gas Supply Corp.; Filing of Motion To Place Into Effect Revised Tariff Sheets

May 9, 1983.

Take notice that on April 29, 1983, National Fuel Gas Supply Corporation (National Fuel) submitted for filing, pursuant to Section 4(e) of the Natural Gas Act, as amended, and Section 154.67 of the Regulations of the Federal Energy Regulatory Commission thereunder, a motion to place the following tariff sheets to its FERC Gas Tariff, Original Volume No. 1, into effect as of May 1, 1983, subject to refund:

Substitute Forty-second Revised Sheet No. 4 [1]
First Revised Sheet No. 8a

Through its motion, National Fuel also seeks to place into effect the following sheets to its FERC Gas Tariff, First Revised Volume No. 2, as of May 1, 1983, subject to refund:

Third Revised Sheet No. 282
Third Revised Sheet No. 302
Third Revised Sheet No. 322
Third Revised Sheet No. 342

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-481-000]

New England Power Co.; Tariff Amendment

May 9, 1983.

The filing Company submits the following:

Take notice that on April 27, 1983, New England Power Company (NEP) submitted for filing an amendment to its FERC Electric Tariff, Original Volume Number 3, in order to make provision for wheeling services performed on the Primary Distribution systems of its Rhode Island and New Hampshire affiliates, The Narragansett Electric Company and Granite State Electric Company.

NEP requests an effective date of June 27, 1983 and requests waiver of the Commission's Regulations for good cause shown.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 285.211, 385.214). All such motions or protests should be filed on or before May 2, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP83-170-001]

Niagara Interstate Pipeline Co.; Amendment

May 9, 1983.

Take notice that on March 25, 1983, Niagara Interstate Pipeline System (Applicant), Tenneco Building, 1010 Milam, Houston, Texas 77001, filed in Docket No. CP83-170-001 an amendment to its application filed in Docket No. CP83-170-000 pursuant to Section 7(c) of the Natural Gas Act so as to reflect a reduction in the volumes of natural gas to be transported and modifications of the facilities to be constructed and operated, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant states that its pending application filed January 25, 1983, in Docket No. CP83-170-000 seeks authorization to construct and operate a natural gas pipeline and related facilities extending from the U.S.-Canadian border near Niagara Falls, New York, to a point close to the Leidy storage field near Tamarack, Pennsylvania, and to transport natural gas through these facilities for Algonquin Gas Transmission Company (Algonquin), Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), Texas Eastern Transmission Corporation (TETCO) and Transcontinental Gas Pipe Line Corporation (Transco). Such facilities, it is asserted, would include approximately 48.6 miles of 48-inch pipeline from the Canadian border to East Aurora, New York, and approximately 112.7 miles of 42-inch pipeline from East Aurora to Tamarack, Pennsylvania, together with 21,000 horsepower of compression at East Aurora and 38,000 horsepower of compression at Tamarack. According to Applicant, the estimated cost of the proposed facilities is $417,817,000.

Applicant states that the facilities and services proposed in its application were designed to accommodate the transportation of the volumes of natural gas which the shippers and others had sought authority to import from Canada in related applications that were pending before the Commission. Applicant proposed to transport 2,518,763 Mcf of gas per day for the shippers.

Applicant states that on January 27, 1983, the Canadian National Energy Board (NEB) issued a decision which authorized the export of lesser volumes at Niagara Falls than had been requested. It is further stated that as a result of that decision Applicant is amending its application to reflect alteration of its proposed facilities and services consistent with the decreased volumes authorized for export.

Applicant states that in view of the reduced volumes which the NEB has authorized for export the design of Applicant's system has been modified in two principal respects. First, it is asserted that the portion of Applicant's system from the Niagara River crossing to East Aurora would now consist of a 42-inch pipeline instead of the 48-inch pipeline previously proposed. Applicant further states that its system would include a single compressor station of approximately 11,600 horsepower at Tamarack in lieu of the two larger stations that had been proposed.

Applicant states that it now seeks authority to transport maximum daily volumes of up to 50,979 Mcf for Algonquin, up to 500,000 Mcf for Tennessee, up to 151,979 Mcf for TETCO, and up to 614,822 Mcf for Transco.

Applicant states that the estimated total cost of the proposed facilities, as modified, is $322,513,000. Applicant proposes to project finance the cost of these facilities and states that it still would attempt to obtain a 75 percent/25 percent debt/equity capital structure.

Applicant states that it proposes to provide service under revised versions of its proposed pro forma Rate Schedule-FERC Gas Tariff and of the proposed form of service agreement under that rate schedule.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before May 31, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR

[1] Forty-second Revised Sheet No. 4 has been amended so as to adjust the proposed rates to reflect the applicable surcharge adjustments.

VOL 48 ISS 94 MAY 13 1983 UMI

385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore file need not file again.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-9-000 (PGA83-2)]

Tennessee Gas Pipeline Company, a Division of Tenneco, Inc.; Rate Change Under Tariff Rate Adjustment Provisions

May 9, 1983.

Take notice that on May 4, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco, Inc. (Tennessee) tendered for filing Substitute Eighth Revised Sheet No. 21 to Original Volume No. 1 of its FERC Gas Tariff to be effective May 1, 1983.

Tennessee states that the purpose of the revised tariff sheets is to reduce Tennessee's gas rates pursuant to Section 2 of Article XXIII of the General Terms and Conditions of its FERC Gas Tariff to reflect implementation of the emergency gas purchase policy which Tennessee made effective May 1, 1983.

Tennessee states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said complaint should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this complaint are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12837 Filed 5-12-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-268-000]

Texas Eastern Transmission Corp.; Request Under Blanket Authorization

May 9, 1983.

Take notice that on April 11, 1983, Texas Eastern Transmission Corporation (Applicant), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP83-268-000 a request pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant proposes to increase the capacity of an existing delivery point to Valley Gas Company (Valley Gas) under the authorization issued in Docket No. CP82-535-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Applicant proposes to increase the capacity of its existing M&R Station No. 1189 located in Blair County, Pennsylvania. It is asserted that Applicant and Valley Gas are preparing to execute a superseding service agreement providing for the purchase by Valley Gas of quantities of natural gas under Applicant's Rate Schedules CS-D, DCQ-D and I-D which would reflect an increase in the maximum daily delivery obligation at M&R Station No. 1189 from 395 dt equivalent to a 3,542 dt equivalent. It is stated that there would be no changes in the maximum daily delivery obligation at the other delivery points listed in the superseding service agreement. It is stated that the natural gas quantities delivered would be utilized as general system supply by Valley Gas. Applicant states that it would be reimbursed for the cost of enlarging M&R Station No. 1189 by Penn Fuel Gas, Inc., a holding company for Valley Gas.

It is submitted that sales of natural gas to Valley Gas would be performed pursuant to Applicant's Rate Schedule CS-D, DCQ-D and I-D and that Applicant's existing tariff does not prohibit the expansion of M&R Station No. 1189. It is stated that the modifications would have no effect on Applicant's peak day or annual deliveries and total volumes covered under the current service agreement with Valley Gas would not be changed. Further, it is asserted that the proposed modification would be accomplished without detriment or disadvantage to Applicant's other customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12838 Filed 5-12-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-131-001]

Texas Eastern Transmission Corp.; Petition To Amend

May 9, 1983.

Take notice that on April 19, 1983, Texas Eastern Transmission Corporation (Tetco), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP82-131-001 a petition to amend the order issue May 14, 1982, in Docket No. CP82-131-000, pursuant to Section 7(c) of the Natural Gas Act so as to authorize the transportation of natural gas for New Jersey Natural Gas Company (New Jersey) for an additional six months, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Tetco proposes to extend the existing transportation service to New Jersey for a period of up to six months at an increased transportation quantity of up to 1,000 dt equivalent of natural gas per day pursuant to the terms and conditions of a gas transportation agreement between Tetco and New Jersey dated April 4, 1982.

It is asserted that Tetco would charge New Jersey its presently effective TS-1 basic rate per dt equivalent delivered under Tetco's Rate Schedule TS-1; provided, however, for all gas transported and delivered hereunder which, when added to the quantities of natural gas delivered to New Jersey under Tetco's Rate Schedule TS-1, non-firm SS-II and other transportation agreements, exceed the combined total curtailment of natural gas sales to New Jersey under all of Tetco's firm sales rate schedules, New Jersey would pay Tetco the applicable effective TS-1 excess rate per dt equivalent delivered under Tetco's Rate Schedule TS-1.

It is asserted that Tetco is now authorized to transport up to 300 dt equivalent of gas per day but that New Jersey has acquired a share in the production of several wells drilled in western New York State which it desires to have transported to help fulfill its need for a greater natural gas supply.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 31, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12839 Filed 5-12-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA82-2-58-002]

Texas Gas Pipe Line Corp.; Tariff Sheet Filing

May 9, 1983.

Take notice that on May 2, 1983, Texas Gas Pipe Line Corporation (Texas Gas), pursuant to § 154.38 of the Commission's Regulations under the Natural Gas Act, filed a Ninth Revised Sheet No. 4a to its FERC Gas Tariff, Second Revised Volume No. 1. Texas Gas states that the filed tariff sheets relate to the Unrecovered Purchased Gas Cost Account of the Purchased Gas Adjustment Provision contained in Section 12 of the General Terms and Conditions of the tariff. More specifically, Ninth Revised Sheet No. 4a reflects a net decrease under that currently being collected to 9.69¢ (at 14.65 psia) to be effective June 1, 1983.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are availale for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12840 Filed 5-12-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-256-000]

Texas Sea Rim Pipeline, Inc.; Application

May 9, 1983.

Take notice that on March 29, 1983, Texas Sea Rim Pipeline, Inc. (Applicant), P.O. Box 4100, The Woodlands, Texas 77380, filed in Docket No. CP83-256-000 pursuant to Sections 311(a)(1) and 311(a)(2) of the Natural Gas Policy Act of 1978 an application for authorization to transport natural gas for a term in excess of two years by means of its 12-inch intrastate pipeline and its 14-inch interstate pipeline, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that its 12-inch intrastate pipeline has been transporting the State of Texas' royalty gas produced from State Pooled Unit Block 14L, Sabine Pass Area, offshore Texas (Block 14L) and that its interstate pipeline has been transporting. The Superior Oil Company's (Superior), natural gas which is produced from Block 14L as well as transporting Natural Gas Pipeline Company of America's (Natural) volumes produced by Superior from the Sabine Pass Area Block 9 Field, offshore Texas. Applicant asserts that due to declining pressures in some of the offshore wells, onshore compression is required and that volumes currently flowing through its intrastate line will have to be transported through its interstate line and volumes currently flowing through its interstate line will have to be transported through its intrastate line. Under the proposed transportation arrangement, Applicant's 14-inch interstate line would be used to hook up all of the wells requiring compression with onshore compression facilities. The 12-inch intrastate line would transport gas from the remaining wells not requiring compreasion, it is asserted.

Applicant states that the 14-inch interstate line would transport approximately 8,000,000 Mcf over the remaining life of the field on behalf of the 12-inch intrastate line. It is stated that this gas will be received at Superior Offshore Platform No. 2 in Block 14L, and delivered to United Texas Transmission Company (UTTCO), at the tailgate of Applicant's onshore facilities in Jefferson County, Texas. Further, it stated that the 12-inch intrastate line would in turn transport approximately 90,000,000 Mcf over the remaining life of the field for the 14-inch interstate line. This gas will be received at Superior offshore platform No. 1 in Block 14L, and delivered to Natural at an existing delivery point in Jefferson County, Texas, it is submitted.

Applicant requests Commission approval of the proposed transportation services for a period of seven years at which time it is anticipated that the field will be depleted. The transportation services would commence upon receipt of a Commission order authorizing the services proposed in this application. The rate to be charged by the 14-inch interstate line to Natural for dry gas deliveries of the Sabine Pass Block 9 production is yet undertermined pending completion of rate settlement issues in Applicant's Docket No. CP81-438-000. It is stated that currently, a rate of 5.37 cents per Mcf is being charged subject to refund in that docket. Applicant states that the rate to be charged by the 12-inch intrastate line would be the 11.0 cents per Mcf rate as authorized by the Texas Railroad Commission for the volumes delivered for UTTCO's account at the onshore delivery point. Applicant states that both the 12-inch intrastate and the 14-inch interstate lines have sufficient capacity to perform such transportation services and to meet their other system obligations.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before May 31, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a

VOL 48 ISS 94 MAY 13 1983 UMI

motion to intervene in accordance with the Commission's Rules.

Secretary.

[FR Doc. 83-12841 Filed 5-12-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP83-11-004 and RP83-30-004]

Transcontinental Gas Pipe Line Corp.; Proposed Changes in FERC Gas Tariff

May 9, 1983.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) on April 29, 1983 tendered for filing certain revised tariff sheets to Second Revised Volume No. 1 of its FERC Gas Tariff. Transco states that the purpose of its filing is to revise its tariff relating to the minimum bill provisions of Transco's CD and ACQ Rate Schedules consistent with Artice XI of the Settlement Agreement in Docket Nos. RP83-11 and RP83-30, which Settlement Agreement was approved by Commission letter order issued April 28, 1983.

Transco states that certain minor modifications to the applicable tariff sheets submitted with the Settlement Agreement filed by Transco on April 13, 1983 are necessary to give effect to the provisions of Article XI whereunder Transco's minimum bill charges are to be revised to eliminate the cost of gas, fuel component, and all surcharges.

Transco has requested that its filing in this case be made effective on May 1, 1983 and it requests a waiver of notice requirement in order to implement the proposed changes as of the date.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rule 214 and Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of April 18 Through April 22, 1983

During the week of April 18 through April 22, 1983, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Dated: May 6, 1983

George B. Breznay,

Director, Office of Hearings and Appeals.

Appeals

Cladouhos & Brashares, 4/22/83; *HFA-0121*

Cladouhos & Brashares filed an Appeal from a partial denial by the Acting disclosure Officer of the DOE Office of Special Counsel of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the Disclosure Officer had failed to adequately explain how the withheld material meets the test set forth by the federal courts in determining the applicability of Exemption 4. Accordingly, the matter was remanded to the Disclosure Officer for a revised determination.

Edward T. Cotham, Jr., 4/18/83; *HFA-0127*

Edward T. Cotham, Jr. filed an Appeal from a partial denial by the Office of Special Counsel of the Economic Regulatory Administration of a Request for Information which he had submitted under the Freedom of Information Act (the FOIA). In the course of reviewing Cotham's Appeal, the Office of Special Counsel indicated that it no longer believed there was any statutory grounds for withholding the relevant portions of the requested document. Accordingly, the Appeal was granted.

Request for Exception

State of Alaska, 4/19/83; *HEE-0028*

The State of Alaska filed an Application for Exception from the provisions of 10 CFR Parts 450 and 455 in which the state sought permission to apply for federal grant which would enable it to reduce consumption and associated costs of conventional energy resources in certain public care institutions. In considering the request, the DOE found that exception relief was warranted because Alaska is uniquely and adversely affected by the "ten minor person requirement" of § 455.2. Accordingly, exception relief was granted.

Motion for Discovery

Jack E. Guenther Double U Oil Co., 4/18/83; *HRD-0012, HRD-0008*

On November 10, 1981 Jack E. Guenther, and Double U Oil Co. (petitioners) filed Motions for Discovery in connection with Proposed Remedial Orders issued to them on July 28, 1982, and June 1, 1981, respectively. In their motions the petitioners requested various documents relating to: (i) the term "property"; (ii) the DOE's authority to assess interest and to order the payment of refunds to the U.S. Treasury; (iii) the allocation of overcharges; (iv) the proper interpretation of 10 CFR 210.62(C) and; (v) the identity of DOE employees consulted in the enforcement process. On April 18, 1983, the OHA issued a Decision and Order denying the petitioners' requests in their entirety.

Interlocutory Order

Texaco Inc., 4/21/83; *HRZ-0145*

Texaco Inc. sought reconsideration of an OHA order directing it to file a Statement of Legal Objections to a Proposed Remedial Order that was issued to the firm on May 1, 1979, by the Office of Special Counsel. Finding that Texaco had failed to show any good cause for rescinding the prior Order, OHA denied the motion.

Refund Applications

Alfred B. Alkek/Adams Resources and Energy, Inc., 4/18/83; *FR6-10*

On April 23, 1982, William L. Theisen filed an Application for Refund pursuant to a Decision and Order issued on April 8, 1982 in *Office of Enforcement*, 9 DOE ¶82,553 (*Alkek/Adams*). In his application, Theisen sought a portion of the funds obtained by the DOE through a consent order entered into by McFarland Energy, Inc. These funds were later consolidated into the *Alkek/Adams* proceeding. In considering the request, the DOE found that Theisen was not eligible for a refund because he had not demonstrated that he had suffered an injury due to McFarland's alleged regulatory violations. Accordingly, Theisen's Application for Refund was denied.

Standard Oil Company (Indiana)/ Bigane Oil Company, et al., 4/22/83; *RF21-954 et al.*

The DOE issued a Decision and Order concerning 43 Applications for Refund filed by consumers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In considering these applications, the DOE concluded that each of the 43 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding total $29,380.

Standard Oil Company (Indiana)/ Hank's Amoco, 4/18/83; *RF21-6115*

The DOE issued a Supplemental Order concerning a March 2, 1983 Decision and Order issued to Hwy 55 Standard, Hank's Amoco (Hank's) and a number of other retailers of Amoco gasoline. *See Standard Oil Company (Iniana)/Hwy 55 Standard*, 10 DOE ¶85,070 (1983). In the March 2 Decision and Order, the DOE had concluded that Hank's should receive a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In the Supplemental Order, the DOE reduced the refund to Hank's based on revised data which the firm had submitted.

Standard Oil Co. (Indiana)/ Laclede Gas Company, 4/20/83; *RF21-4396*

Laclede Gas Company (Laclede) filed an Application for Refund pursuant to 10 C.F.R. Part 205, Subpart V, seeking a portion of the $72 million obtained by the DOE through a consent order entered with Standard Oil Company (Indiana) ("Amoco"). In its application, Laclede requested a refund on volumes of NGL's it sold directly to consumers as a regulated utility. In considering Laclede's claim, the DOE determined that Laclede's statement of how it would pass the refund on to its customers met the requirement established in *Office of Special Counsel: In the Matter of Standard Oil Company (Indiana)*, 10 DOE ¶85,048 (1982). Accordingly, the DOE granted Laclede's refund application.

Refund Application

Vickers Energy Corporation/Meramec Oil Company, Vickers Energy Corporation/ Delano Oil Company, April 19, 1983; RF1-254, RF1-255

The DOE issued a Decision and Order concerning Applications for Refund filed by Meramec Oil Company and Delano Oil Company, motor gasoline resellers, which sought portions of the Vickers Energy Corporation consent order fund. Meramec and Delano sought refunds based upon purchases of Vickers motor gasoline that exceeded the small claim threshold figure of 50,000 gallons per month, and therefore submitted detailed information concerning their business operations. After analyzing this information, the DOE found that Meramec and Delano constituted a single "firm" under the applicable regulations and concluded that they were injured by the alleged overcharges and should receive a combined refund based upon the volume of their Vickers motor gasoline purchases for which they made a showing of injury. Accordingly, the Applications for Refund were granted in part.

Vickers Energy Corp./Zephyr, Inc., April 18, 1983; RF1-21

Zephyr, Inc. filed an Application for Refund in the Vickers Energy Corporation Special Refund Proceeding pursuant to 10 CFR Part 205, Subpart V. Zephyr requested a refund on the basis of its entire purchases of motor gasoline from Vickers during the period May 1976 through March 1979. The firm purchased more than 50,000 gallons of motor gasoline from Vicker in each month of the consent order period. In reviewing the refund appication, the OHA found that Zephyr failed to provide detailed market information regarding the operation of the firm as a whole. The OHA determined that information regarding Zephyr's firmwide operation was a necessary prerequisite to establishing its eligibility for a refund in order to determine the extent of any injury it might have suffered as a result of Vickers' alleged regulatory violations. In addition, Zephyr failed to provide any data to support its claim that it received a lower profit on its sales of Vickers product than on its sales of non-Vickers product. Zephyr's refund, therefore, was limited to its pro rata share of the consent order fund based on its purchases of 50,000 gallons of motor gasoline per month.

BILLING CODE 6450-01-M

Issuance of Decisions and Orders Week of April 25 through April 29, 1983

During the week of April 25 through April 29, 1983, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Andrew Douglas Churchman, April 26, 1983; HFA-0128

Andrew Douglas Churchman filed an Appeal from a denial by the Privacy Act Officer (PAO) of the Alburquerque Operations Office of a Request for Information which he had submitted under the Privacy Act. In considering the Appeal, the DOE found that although the deleted portions of the documents responsive to Churchman's request were originally generated by the Office of Personnel Management (OPM), they were now included in records maintained by the DOE, and therefore releasable by the DOE under the Privacy Act. As a result, the matter was remanded to the PAO of the Albuquerque Operations Office for a new determination.

SRE Inc., April 29, 1983; HFA-0131

SRE, Inc. filed an Appeal from a partial denial by the Freedom of Information Authorizing Official of the DOE Albuquerque Operations Office of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that both of the documents which were initially withheld under exemption 5 were pre-decisional and deliberative intra-agency memoranda prepared in connection with an audit of SRE's performance under a DOE Grant project, and therefore should not be released to the public. The Appeal was accordingly denied.

W. R. Thomason Inc., April 29, 1983; HFA-0133

W. R. Thomason Inc. (Thomason) filed an Appeal from a partial denial by the Manager of the DOE's Idaho Operation Office of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the Manager properly withheld certified payroll records found to be responsive to Thomason's request under 5 U.S.C. 552(b) (4) and (6). The Decision and Order also determined that Thomason's claim that the original search for responsive material was deficient was moot, since the Manager had located additional information and had agreed to release it to the applicant. The Appeal was therefore denied.

Tierra Engineering Consultants, Inc., April 29, 1983; HFA-0126

Tierra Engineering Consultants, Inc. filed an Appeal from a partial denial by the POI Authorizing Official of the Albuquerque Operations Office of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the Evaluation Board's score sheet was a pre-decisional, deliberative intra-agency document which was properly withheld under Exemption 5 and that release of the document would be contrary to the public interest. Accordingly, the DOE determined that the Appeal should be denied.

Remedial Order

American Pacific International, Inc., 4/25/83; BRO-1423

American Pacific International, Inc. objected to a Proposed Remedial Order which the Western District Office of Enforcement issued to the firm on January 9, 1981. In the Proposed Remedial Order, the Western District found that API had sold motor gasoline and crude oil at prices exceeding the maximum lawful prices under the DOE regulations. The DOE concluded that the Proposed Remedial Order should be issued as a final Order. The important issues discussed in the Decision and Order include the application and constitutionality of the "new item rule," 10 CFR 212.111.

Request for exception

Somerset Refining, Inc., 4/29/83; BEE-1500

Somerset Refining, Inc. filed an Application for Exception from the provisions of 10 C.F.R. 211.67 in which the firm sought exception relief from the Entitlements Program. In considering the request, the DOE found that exception relief was necessary for the fourth

VOL 48 ISS 94 MY 13 1983 UMI

quarter of 1980, during which the crude oil cost disparity that the firm experienced caused the firm to incur operating losses. Accordingly, exception relief was granted.

Refund Applications

Standard Oil Co. (Indiana)/Bob Tansel American, 4/27/81; RF21-7060, RF21-7061

On March 14, 1983, the Office of Hearings and Appeals issued a Decision and Order approving refunds from the Standard Oil Company (Indiana) consent order fund for 59 claimants. *Standard Oil Co. (Indiana)/Crova Sales & Service, Inc.*, 10 DOE ¶85,079 (1983). One of those claimants, Bob Tansel American, was granted refunds for two motor gasoline retail stations. Subsequent to the issuance of the Decision, it was determined that due to an arithmetic error the refunds approved for both stations were too high. Accordingly, the DOE issued a new Decision modifying the original refund amounts.

Standard Oil Co. (Indiana)/Craven Oil Co., Inc., 4/27/83; RF21-1442

The DOE issued a Decision and Order concerning 137 Applications for Refund filed by wholesalers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In considering these applications, the DOE concluded that each of the 137 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding total $371,689.

Standard Oil Co. (Indiana)/Edward J. Fleming, et al., 4/29/83; RF21-775 et al.

The DOE issued a Decision and Order concerning 114 Applications for Refund filed by resellers of Amoco middle distillates. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In considering these applications, the DOE concluded that each of the 114 applicants should receive a refund based upon the total volume of their Amoco middle distillate purchases. The refunds granted in this proceeding total $85,236.

Standard Oil Co. (Indiana)/J.S. Pate Oil Co., Inc., 4/27/83; RF21-1446

The DOE issued a Decision and Order concerning 107 Applications for Refund filed by resellers of Amoco middle distillates. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In considering these applications, the DOE concluded that each of the 107 applicants should receive a refund based upon the total volume of their Amoco middle distillate purchases. The refunds granted in this proceeding total $59,703.

Standard Oil Co. (Indiana)/Nelms Oil Company, et al., 4/29/83; RF21-212 et al.

The DOE issued a Decision and Order concerning 94 Applications for Refund filed by wholesalers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In considering these applications, the DOE concluded that each of the 94 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding total $107,012.

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of March 14 Through March 18, 1983

During the week of March 14 through March 18, 1983, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Environmental Policy Institute, 3/16/83; HFA-0116

Environmental Policy Institute (EPI) filed an Appeal from a denial by the Director of the Division of Freedom of Information and Privacy Acts Activities of a Request for a waiver of search and copying fees to be incurred in responding to a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the firm was a bona fide public interest group, that there was a current public interest in the subject matter to which the requested documents pertained, and that the information contained in the documents was likely to be disseminated to the public. Accordingly, EPI's Appeal was granted.

Motion for Discovery

Exxon Company, U.S.A., Cities Service Company, 3/14/83; HED-0113, HEJ-0036, HED-0111, HEJ-0035

On March 11, 1983, Exxon Company, U.S.A. submitted a Motion for Discovery and Protective Order in connection with a Proposed Decision and Order issued to Husky Oil Co. of Delaware on February 4, 1983, in Case No. BEX-0210. Cities Service Company also submitted a Motion for Discovery and Protective Order related to the same Proposed Decision and Order. In their Motions, the intervenors requested Husky's confidential data in the record of the current exception proceeding, BEX-0210, and several prior Husky proceedings. In considering the Motions, the DOE determined that Husky's financial data was material and relevant to an evaluation of the appropriateness of exception relief tentatively granted to Husky under the Delta standards. Accordingly, the Motions filed by Exxon and Cities Service were granted.

Interlocutory Orders

Office of Special Counsel, 3/17/83; HRZ-0011

The Office of Special Counsel sought a determination that Texaco Inc. had waived any privileges attaching to certain documents identified by the firm in response to an OSC discovery motion on the ground that the firm's invocation of affirmative defenses put its state of mind at issue. In considering OSC's request, the DOE found that Texaco had withdrawn those defenses. Accordingly, the Motion was denied.

Texaco Inc. 3/15/83; HRZ-0138, HRR-0049

Texaco Inc. sought reconsideration of two discovery orders issued by the DOE. In one motion, Texaco sought reconsideration of a denial of a motion to compel the OSC to supplement a response to a Texaco interrogatory. In considering Texaco's request, the DOE found that the interrogatory had been fully answered. Accordingly, the request was denied. In a separate motion, Texaco sought reconsideration of an order rescinding certain discovery it was granted. In considering this request, the DOE found that the discovery had become irrelevant in light of the decision of the Temporary Emergency Court of Appeals in *DOE v. Louisiana*, 690 F.2d 180 (TECA 1982). Accordingly, this request was denied.

Refund Applications

OKC Corporation, Sooner Transport Corporation, Bestway Marketing Company, Leo's-Winstead's, Inc., 3/17/83; RF13-4, RF13-11, RF13-20

Each of the applicants indicated above filed an Application for Refund pursuant to 10 CFR Part 205, Subpart V, in which the firm claimed a portion of the $4.75 million obtained by the DOE from OKC Corporation pursuant to a Consent Order which settled DOE allegations that OKC had overcharged purchasers of crude oil, residual fuel oil and refined petroleum products. *See Office of Enforcement: In the Matter of OKC Corp.*, 9 DOE ¶82,551 (1982) (*OKC*). In considering these applications, the DOE determined that the applicants, each of which claimed purchases of refined products from OKC no greater than an average of 50,000 gallons per month, had met the standards set forth in the *OKC* Decision and Order and in the Subpart V regulations. Accordingly, these applications were granted.

Standard Oil Company (Indiana)/Crova Sales & Service, Inc. et al., 3/14/83; RF21-32 et al.

The DOE issued a Decision and Order concerning 59 Applications for Refund from branded retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). Each retailer therefore submitted detailed information concerning its Amoco purchase volumes. After analyzing this information, the DOE concluded that each of the 59 applicants should receive a refund based upon the total volume of its Amoco motor gasoline purchases during the consent order period. Accordingly, these applications were granted in full.

Standard Oil Company (Indiana)/Jones Oil Company, Inc., et al., 3/18/83; RF21-1115, et al.

The DOE issued a Decision and Order concerning 180 Applications for Refund filed by wholesalers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel* 10 DOE ¶85,048 (1982). Each applicant therefore submitted detailed information concerning its purchases of Amoco gasoline. After analyzing this information, the DOE concluded that each of the 180 applicants should receive a refund based upon it Amoco motor gasoline purchases. The refunds granted in this proceeding totaled $703,738.

Standard Oil Co. (Indiana)/Jones Oil Company, Inc., et al., 3/18/83; RF21-1116, et al.

The DOE issued a Decision and Order concerning 133 Applications for Refund filed by resellers of Amoco middle distillates. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). Each applicant therefore submitted detailed information concerning its purchases of Amoco middle distillates. After analyzing this information, the DOE concluded that each of the 133 applicants should receive a refund based upon its Amoco middle distillate purchases. The refunds granted in this proceeding totalled $93,366.

Standard Oil Co. (Indiana)/Strickland Service Standard et al., 3/15/83; RF21-2951 et al.

The DOE issued a Decision and Order concerning 155 Applications for Refund filed by retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In considering these applications, the DOE concluded that each of the 155 applicants should receive a refund based upon the total volume of its Amoco motor gasoline purchases. The refunds granted in this proceeding totaled $158,745.

Standard Oil Co. (Indiana)/Westland Standard II et al., 3/17/83; RF21-1906 et al.

The DOE issued a Decision and Order concerning 67 Applications for Refund filed by retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In considering these applications, the DOE concluded that each of the 67 applicants should receive a refund based upon the total volume of its Amoco motor gasoline purchases. The refunds granted in this proceeding totaled $63,360.

Vickers Energy Corporation/Marvin R. Gillaspy, d.b.a. Marv's Vickers Service; Vickers Energy Corporation/Bob Cox, d.b.a., Bob's Vickers, 3/18/83; RF1-297, RF1-309

The DOE issued a Decision and Order concerning Applications for Refund filed by Marvin R. Gillaspy d.b.a. Marv's Vickers Service and Bob Cox d.b.a. Bob's Vickers, both retailers seeking a portion of the Vicker Energy Corporation Consent Order Fund. They elected to apply for a refund based upon the small claim procedures established for purchasers of less than 50,000 gallons per month of Vickers motor gasoline. After analyzing these two claims, the DOE concluded that each of the applicants should receive a refund based upon the total volume of his Vickers motor gasoline purchases. Accordingly, each application was granted.

Vickers Energy Corporation/The Service Oil Company, 3/14/83; RF1-25

The DOE issued a Decision and Order concerning an Application for Refund filed by The Service Oil Company, a reseller and retailer seeking a portion of the Vickers Energy Corporation Consent Order Fund. Service Oil elected to apply for a refund based upon purchases of Vickers motor gasoline exceeding the 50,000 gallons per month threshold established for small claims, and therefore submitted detailed information concerning its operations during the consent order period. After analyzing this information, the DOE concluded that Service Oil should receive a refund based upon the volume of its Vickers motor gasoline purchases for which it made a showing of injury. Accordingly, the application was granted in part.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-59125; TSH-FRL 2367-3]

Certain Chemicals; Premanufacture Exemption Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's revised statement of interim policy published in the **Federal Register** of November 7, 1980 (45 FR 74378). This notice, issued under section 5(h)(6) of TSCA, announces receipt of two applications for exemptions, provides a summary, and requests comments on the appropriateness of granting each of the exemptions.

DATE: Written comments by May 31, 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS-59125]" and the specific TME number should be sent to: Document Control Officer (TS-793), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Management Support Division, Environmental Protection Agency, Rm. E-401, 401 M Street SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M Street SW, Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Reading Room E-107.

TME 83-51

Close of Review Period. June 15, 1983.

Importer. Confidential.

Chemical. (G) Modified ethylene=tetrafluoroethylene copolymer.

Use/Import. (S) Wire and cable coating, chemical process equipment parts, parts for electrical equipment. Import range: 500 kg/minimum—5000 kg/maximum.

Toxicity Data. No data submitted.

Exposure. Processing and disposal: dermal, a total of 8 workers, up to 9 hrs/da, up to 14 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to land. Disposal by landfill.

TME 83-52

Manufacturer. PPG Industries, Inc.

Chemical. (G) Aromatic carbonate.

Use/Production. (S) Monomer to produce cured thermoset articles. Prod. range: 4,000 lbs/max.

Toxicity data. Acute oral: 1.116 g/kg; Acute dermal: >2.0 g/kg; Irritation: Skin—Moderate, Eye—Minimal.

Exposure. No direct exposure except during sampling.

Environmental Release/Disposal. Disposal by publicly owned treatment works (POTW) and incineration.

Dated: May 9, 1983.

Ronald A. Stanley,

Acting Director, Management Support Division.

FEDERAL COMMUNICATIONS COMMISSION

[File No. 26058-CL-P-(5)-82 etc.]

GTE Mobilnet of San Jose, Inc., et al.; Hearing

In re Applications of; GTE MOBILNET OF SAN JOSE, INC., File No. 26058-CL-P-(5)-82, ADVANCED MOBILE PHONE SERVICE, INC. For a construction permit to establish a new cellular system operating on frequency block B in the Domestic Public Cellular Radio Telecommunications Service to serve the San Jose, California, Standard Metropolitan Statistical Area (SMSA), File No. 26025-CL-P-(3)-82.

In re Applications of McCaw Communications of San Jose, Inc., CC Docket No. 83-476; File No. 26120-CL-P-(6)-82, Cellular Mobile Systems of California, Inc., File No. 26192-CL-P-(7)-82, Cellular Network, Inc., File No. 26087-CL-P-(5)-82, Intrastate Radio Telephone, Inc. of San Francisco, File No. 26125-CL-P-(5)-82, California Celcom Communications Corporation, File No. 26154-CL-P-(5)-82; For a construction permit to establish a new cellular system operating on frequency block A in the Domestic Public Cellular Radio Telecommunications Service to serve the San Jose, California, Standard Metropolitan Statistical Area; designating applications for consolidated hearing on stated issues.

Memorandum Opinion and Order Granting Application, Dismissing Application, and Designating Applications for Hearing

Adopted: April 26, 1983

Released: May 6, 1983.

By the Common Carrier Bureau:

1. Presently before the Chief, Common Carrier Bureau, under delegated authority are (a) the captioned applications of GTE Mobilnet of San Jose, Inc. (GTE), Advanced Mobile Phone Service, Inc. (AMPS), McCaw Communications of San Jose, Inc. (McCaw), Cellular Mobile Systems of California, Inc. (CMS), Cellular Network, Inc. (Cellnet), Intrastate Radio Telephone, Inc. of San Francisco (Intrastate), and California Celcom Communications Corporation (Celcom), to construct cellular radio systems to serve the San Jose, California, Standard Metropolitan Statistical Area (SMSA), and (b) various motions, petitions, and pleadings related to the applications.

2. As discussed below, after carefully reviewing the applications and related pleadings, we find that the public interest will be served by our approving the GTE/AMPS settlement agreement and granting the GTE application. Concerning the five nonwireline applications, we find all applicants except McCaw and Cellnet to be fully qualified to construct and operate a cellular system in San Jose. Since the proposals of McCaw, CMS, Cellnet, Intrastate, and Celcom to use the same frequencies in the same geographical area are mutually exclusive, a comparative proceeding will be held to determine which of the applicants would best serve the public interest. For the reasons discussed below, we are designating financial issues against the McCaw application and against the Cellnet application.

McCaw Application

3. *Financial qualifications.* Petitioner CMS challenges the applicant's financial showing, arguing that neither the parent company nor its San Jose subsidiary (the applicant) has demonstrated the availability of necessary funds. The McCaw financial showing is complex, involves a number of different investors, and is closely linked to cellular applications filed by sister companies in three other markets. CMS attacks each portion of the financial showing, arguing that each financial arrangement is defective in some fashion. We will discuss below the applicant's financing plan for all four markets and dispose of the particular questions raised.

4. We discuss at this point the corporate structure of the applicant and its parent, as well as the applicant's principal investors. The applicant, McCaw Communications of San Jose, Inc. (McCaw), is one of four subsidiaries of the parent McCaw Cellular Communications, Inc. (MCCI). Three other subsidiaries of MCCI have filed applications in San Francisco, Denver, and Kansas City. The parent MCCI is in turn owned by McCaw RCC, whose principal shareholders are McCaw Communications Companies, Inc. (MCC); Daniels & Associates Inc.; and the Centennial Fund. These three shareholders have made equity commitments to MCC for investment in the four cellular subsidiaries. In addition, a back-up equity commitment has been made by Affiliated Publications, Inc. (API), to be made available if any of the three equity contributors should be unable to meet their respective commitments. API owns forty-five percent of McCaw Communications Companies, Inc. (MCC). To recapitulate, three investors (MCC Daniels and Centennial) have made equity commitments to MCCI, parent of the applicant McCaw. Similar commitments have been made through the same corporate structure to the three sister companies of McCaw of San Jose. Additionally, a back-up equity commitment has been made by API, principal in MCC. In addition to the equity financing described above, MCCI also relies on a $35 million bank loan from Continental Bank. The various forms of financing are discussed below.

5. Estimated cost of construction and first year operating expenses for each system are as follows:

San Jose	$10,252,000
San Francisco	18,838,000
Denver	13,877,000
Kansas City	12,881,000
Total	55,848,000

6. *MCC equity contribution.* The first equity contribution is a $5 million subscription from McCaw Communications Companies, Inc.

VOL
48
ISS

MY
13
1983
UMI

(MCC). The applicant has submitted a letter from MCC stating that MCC "* * * hereby commits $5 million of equity capital, based on all four of your applications being successful." The letter also makes *pro-rata* apportionments to the four markets, in the event the applicant is not successful in every market in which it applied. By way of demonstrating the availability of $5 million, the applicant has submitted a balance sheet of MCC (Application, Exhibit 10, Appendix B, Item 5). The petitioner contends that the equity backer's net liquid assets are less than $5 million, so the funds are not available. The long-standing Commission standard for demonstrating availability of an applicant's finances has been net liquid assets, that is, the excess of current assets over current liabilities. *Advanced Mobile Phone Service, Inc. et al. (Chicago Order),* 91 FCC 2d 512 (1982); *Central Texas Broadcasting Co.,* 74 FCC 2d 393, 401–02 (1979); *Merrimack Valley Broadcasting Co.,* 82 FCC 2d 166, 168–69, 174–75 (1980); *WVOC Inc.,* 32 FCC 2d 765 769 (Rev. Bd. 1971); *The Tuscarawas Broadcasting Co.,* 4 FCC 2d 466, 468 (Rev. Bd. 1966). The balance sheet (application, Appendix B, Item 5) shows current assets of $2,562,685, and current liabilities of $1,650,309. Net liquid assets are thus $912,376, which is insufficient to meet the $5 million equity commitment.[1] The applicant argues that stockholder-subscribers, as distinguished from applicants, are not held to the net liquid assets standard where the subscribers' total assets are vastly in excess of the commitment. McCaw cites *Tel-Page Corp. of Wisconsin,* 46 RR 2d 668, 672 (1979), and *Radio Dispatch Corp.,* 61 FCC 2d 425 (Rev. Bd. 1976). In our view, however, the net liquid assets standard must be applied to cellular applications based on the *Chicago Order,* where the Commission explicitly adopted it. The MCC balance sheet shows total assets of $23 million. There is no way to determine how much of the total is easily convertible to cash or how much of the total may already be committed to other projects or liabilities of the firm. We conclude, therefore, that only $912,000 in net liquid assets has been shown to be available from MCC.

7. *Daniels equity contribution.* The second $5 million equity contribution is from Daniels & Associates, Inc. (Daniels). Daniels relies on a $5 million letter of credit from the American Security Bank. The petitioner questions whether the funds are in fact available from the bank since the letter includes a "covenants clause" in which the bank refers to "standard business covenants generally utilized in loans secured by cable TV systems, including debt to cash flow and debt to subscribers limitations." The Petitioner contends that the applicant has not included the specifics of these restrictions and consequently has failed to show that Daniels can meet these bank limitations, whatever they may be. After examining the letter of credit, however, we conclude that the funds are available. The letter specifies that the funds are to be used for McCaw's cellular systems. The letter also specifies interest rate, terms of the loan, and security interest. The covenants appear to be reasonable and customary and do not, in and of themselves, cast doubt on the availability of the loan. We find, therefore, that $5 million in equity funding is available to the applicant from Daniels. *See Multi-State Communications v. FCC,* 590 F. 2d 1117, 1119 (D.C. Cir. 1978), *cert. denied* 440 U.S. 959 (1979).

8. *Centennial equity contribution.* The third $5 million equity commitment is from the Centennial Fund. Centennial relies on a balance sheet (Application, Exhibit 10, Appendix B, Item 4.1) to demonstrate its ability to meet the equity commitment. The petitioner argues that the balance sheet demonstrates that the funds are not available. In its reply, the applicant has submitted additional information further explaining the items on the balance sheet. The balance sheet indicates that Centennial has $75,000 cash and temporary investments of $3.9 million which we consider to be liquid assets.[2] However, the Centennial balance sheet also relies on other assets which we cannot conclude are liquid. Specifically, Centennial lists $6.7 million in subscribed capital, not yet paid to centennial. In its reply, the applicant indicates that the capital subscriptions will be paid in two equal installments on March 31, 1983, and March 31, 1984. These anticipated payments cannot be considered as liquid assets. We therefore conclude that $4.65 million in equity $3.9 million plus $75,000) is available from Centennial.

9. *API back-up equity funding.* For the reasons discussed above, we find the following amounts of equity funding are available to the applicant: $912,000 from MCC, $5 million from Daniels, and $4.65 million Centennial. Thus, out of a $15 million equity commitment, we find that $10.56 million is available. This leaves an equity deficiency of $4.44 million, which we correct to $5.44.[3] As a precautionary measure, the applicant has submitted a back-up source of equity funding from Affiliated Publications, Inc. (API), whereby API guarantees to provide any of the $15 million which may not be available from three equity participants. To demonstrate the availability of these back-up funds, API has submitted a balance sheet (Exhibit 10, Appendix B, Item 2.1, p. 18). The petitioner contends that the balance sheet fails to demonstrate the availability of the funds. After reviewing the balance sheet, however, we conclude that the funds are available. API's current assets are $40.5 million. Current liabilities are $18.3 million. The Commission's longstanding standard in determining financial qualificiations is net liquid assets, the difference between current assets and current liabilities. In this case, the difference is $22.2 million. We are unable, however, to credit 100 percent of the $40.5 million current assets figure because it includes $24.8 million in accounts receivable. In previous orders where such accounts have been aged, we have permitted 75 percent of such accounts to be included in calculating net liquid assets. *See Atlanta Order, supra,* para. 13. *See also Kaiser Broadcasting,* 62 FCC 2d 246 (1977). The McCaw application includes no information as to whether these accounts have been aged or in general how collectible those accounts actually are. We are therefore unable to conclude that at least 75 percent of these accounts (or $16.8 million) are available to API to meet its back-up equity commitment. The applicant's shortfall, however, is only $5.44 million, approximately 22 percent of all accounts receivable. Even without a showing of aging of these accounts, we will consider that this small percentage of the accounts receivable are collectible and therefore conclude that API has at least $5.44 million available to meet its backup commitment. On this basis, we conclude that the $16 million equity commitment is available to McCaw, in light of the back-up funding available from API.

10. *Equipment financing.* In two markets (Kansas City and Denver), the commitments of equity and loans are insufficient to cover projected costs. Each of the applications for these two markets also contains a letter from an equipment supplier which offers to furnish cellular equipment and provides a financing schedule whereby in each market, $3.2 million in equipment payments are deferred for a total of $6.4 in equipment financing (Direct Case, Exhibit 10, App. A, Item 4). The two equipment financing arrangements are crucial, because without the deferred payments of $6.4 million, the applicant's available funds are insufficient to cover projected costs. The petitioners argue that the equipment financing arrangement is fatally defective because the supplier's letter commits the applicant to purchase 3,000 mobile units and this purchase is not included in the applicant's projected costs. In its reply, the applicant states that a closer reading of the equipment supplier's letter reveals that the applicant is not obligated to purchase the mobile units but may instead utilize a third party leasing arrangement. This in fact is the applicant's intention, as stated in the application (Exhibit 8, Appendix A, p. 13). The allegation, however, is relevant to our assessment of the applicant's basic financial qualifications. Section 22.917 of our rules does not require that the cost of mobile equipment be included in an applicant's financial projections. *See Metrocom of St. Louis et al. (St. Louis Order),* CC Mimeo 2045, released January 28, 1982, at para. 10. The mobile equipment will be leased in the quantity needed by subscribers. Related costs will therefore be covered by revenues or subscribers' deposits. The Commission has traditionally sanctioned this type of financing and has credited the full amount of credit to the applicant. *See, e.g., Merrimack Valley Broadcasting, Inc.,* 82 FCC 2d 166, 167–68 (1980). We therefore conclude that adequate funds are available to cover projected costs in these markets.

11. *Continental Bank Loan.* The applicant submits a letter from the Continental Illinois National Bank committing $35 million in credit to the parent MCCI. The petitioner CMS questions whether the bank letter is sufficiently detailed to demonstrate the availability of the funds. After reviewing the letter, we conclude that the applicant has failed to demonstrate that the $35 million in credit is available. Although exact details such as interest rates and payment terms are not absolutely required, the applicant must submit sufficient information for the Commission to make its reasonable assurance determination. *See Multi-State, supra.* The bank letter specifies no interest rate but instead states that the rate is "* * * to be negotiated at the time of FCC approval." Application, Exhibit 10, Appendix A, Item 2.1. Although the letter provide for quarterly payments over an eight year period, it furnishes no information as to the dollar amount of these payments. Under these circumstances, we cannot conclude that the Continental Bank letter provides reasonable assurance. *See Advanced Mobile Phone Service, Inc., et al. (Philadelphia Order),* CC Mimeo 1882, released January 21, 1983, at para. 6.

12. *Accuracy of cost estimates.* CMS questions the accuracy of McCaw's projected costs because the applicant's technical proposal makes reference to using microwave links and yet does not include the cost for such facilities in its projected costs. McCaw responds, however, that the proposed microwave links will not be installed prior to the fifth year of installation, so the cost of these facilities was logically omitted from the projected costs of construction and first year operation costs. The details of the application support this explanation. *See* Direct Case, Exhibit 8, Appendix, A. 4, in which telephone control and telephone interconnect costs are provided for in the financial projections for the construction period and first year of operation. The cost estimates appear to be reasonable, and the petitioner has failed to raise any serious question that has not been adequately explained by McCaw in its Opposition.

13. *Conclusion.* For the reasons discussed above, the applicant has failed to demonstrate that the $35 million loan is available. We will therefore designate an issue as to whether McCaw is financially qualified in San Jose and in the three other markets (San Francisco, Denver, and Kansas City) where McCaw applied. We have chosen to designate in this order a Financial issue as to McCaw's entire financing arrangement because we believe this approach is the most efficient way to consider the various McCaw applications, *i.e.,* it can be detemined whether McCaw has financing for one market, or all four markets, or some number in between. McCaw will at that point have greater discretion for deciding how many (and which) applications to prosecute. The alternative is to examine each application on a case-by-case basis. This approach duplicates the efforts of all parties and (in the event that McCaw can demonstrate the availability of some but not all of its financial arrangement) depends not on which applications McCaw prefers to prosecute but on the luck of the draw as to which markets are examined (and in what order) by the Commission. We will therefore examine in hearing the overall financial package of McCaw (*i.e.,* the availability of the $35 million loan) and, depending on how much funding is available, permit McCaw to modify or dismiss other applications accordingly.[4] The Administrative Law Judge may use our summary procedures to resolve this financial issue if McCaw submits an amendment submitting a bank letter which meets our "reasonable assurance" test or submits an amendment otherwise showing reasonable assurance of sufficient funds to cover its proposals.

14. *Technical qualifications.* Petitioner objects that McCaw has failed to demonstrate that microwave control facilities are available, so the application is defective. McCaw has responded by filing a corrective amendment to reflect that the applicant will use microwave facilities only during the fifth year and will use wireline control facilities during the construction period and first four years of operation. This intent is in fact reflected in the application which bases cost estimates on wireline control facilities. Direct Case, Exhibit 8, Appendix A–10. Additionally, McCaw has in its reply submitted copies of correspondence which shows that the applicant has already coordinated an 11 GHz microwave control system so that it will be available when the applicant is ready to phase it in. We therefore conclude that McCaw has fully responded to the questions raised by the petitioner, and we find the applicant technically qualified.[5]

---

[1] The current assets figure in the balance sheet is not broken down into sub-categories such as cash and accounts receivable. Nor is any information provided as to the nature of any such accounts (whether they have been aged for collection purposes). We are thus unable to determine what portion of any accounts receivable may be counted as part of net liquid assets. *See Celcom Communications Corp. of Georgia, et al.* (Atlanta Order), CC Mimeo 1988, released January 26, 1983, at para. 13. Our determination is not changed, however, since the net liquid assets are insufficient even if 100% of current assets are counted.

[2] In its reply, McCaw explains that the temporary investments are short term (thirty days or less) certificates of deposit. These instruments are clearly liquid.

[3] The application gives the figure $15 million as the total equity commitment from the parent company to the four McCaw subsidiaries. We note that the actual equity requirement is $16 million: $3.25 million in San Jose, $6.25 million in San Francisco, $3.25 million in Kansas City, and $3.25 million in Denver. The deficiency of $4.1 million in available financing must, therefore, be corrected to $5.1 million.

[4] In the other markets where McCaw has filed (San Francisco, Denver, and Kansas City), any applicant whose proposal is electrically mutually exclusive with McCaw's application may file a motion for limited intervention on the financial issue in this proceeding

[5] In any event, we have held that the absence of information about microwave channels does not render an application defective. Metrocom of St. Louis, *et al.* (St. Louis Order), CC Mimeo 2045, released January 28, 1983, at para. 5.

VOL 48 ISS 94 MY 13 1983 UMI

CMS

15. *CGSA extension* CMS' proposed CGSA extends into the central San Francisco SMSA. Pursuant to Rule Section 22.903(a), a CGSA may not extend into another central SMSA. Therefore, we will require that CMS file a conforming amendment to bring the nonconforming CGSA and 39 dBu contour four Cell Nos. CAO1003, 91004, and 91005, into compliance with the rules. The amended 39 dBu contours shall not cover any area in the SMSA not previously covered by the noncomforming 39 dBu contour. This amendment should consider the effects, if any, that this change may have on other parts of the application. Due to this circumatance, brief extensions of time may be granted at the discretion of the Administrative Law Judge.[6]

16. *Cost estimates.* Petitioner questions the accuracy of the applicant's cost estimates, arguing that the total system will cost $9.2 million, whereas CMS has only $3.45 million available and has estimated its equipment costs at only $3 million. In its reply CMS states that, although a fully expanded multiple-site system will involve equipment costs in excess of $3 million, CMS plans initially to construct a 7-cell system, to use this system during the first year of operation, and to construct additional cells as user demand increases. CMS states that its cost estimates were based on the equipment for a 7-cell system rather than for the larger system contemplated subsequent to the first year of operation. The petitioner argues that the Commission's cellular rules require that cost estimates for construction expenses include all equipment involved in a fully developed system, even if the expanded system will not initially be constructed. We reject this interpretation. The rules contemplate a construction period and operations following construction. The Commission also contemplates that licensees will expand their systems. One of the comparative criteria for judging competing cellular applicants is how the applicants intend to expand their systems in order to meet increasing demand. CMS has properly included in its cost estimates the equipment which it intends to construct prior to commencing operations. These figures do not appear to be unreasonable, and the petitioner has not made any showing which draws into question the accuracy of these figures. We conclude that the applicant's cost estimates are reasonable and will not designate an issue on this basis.

17. *Financial qualification.* The petitioner also questions whether the applicant has adequate funds available to construct and operate its proposed system. The Commission has already concluded that the Graphic Scanning corporation, CMS' parent, is financially qualified to construct and operate cellular systems in all thirty markets, including San Jose, for which CMS has applied. *See Chicago Order, supra,* at paras. 6–12. Additionally, the San Jose application includes a letter (Appendix VIII–C) dated June 2, 1982, from the parent comany to CMS committing $6,400,000 for the CMS San Jose cellular system. The letter specifically states that none of these funds have been committed to other cellular system applications or to other projects. We find that this satisfies the requirement of section 22.917(b) that resources used to demonstrate financial ability regarding one cellular system may not include funds committed elsewhere, and we find CMS financially qualified to construct and operate the proposed cellular system in the San Jose market.

Cellnet Application

18. *Financial qualifications.* Petitioner CMS questions the accuracy of Cellnet's estimated costs for construction and first year of operation. CMS contends tht the applicant has furnished different and conflicting figures for these costs in various parts of the application and direct case. In its reply, Cellnet asserts that the petitioner's arguments are based on a misunderstanding of the figures presented in the application. the Cellnet reply includes a detailed analysis of its estimated construction costs and operational expenses for the first year. After reviewing the application and the explanatory materials in Cellnet's reply, we conclude that the applicant's cost estimate complies with the cellular rules.[7]

19. CMS further questions whether Cellnet has funds available to cover its estimated construction ($5,370,000) and first year operating ($1,605,000) costs. Cellnet relies on several sources which are discussed below. The funding arrangements for Cellnet's San Jose application also include funds for Cellnet's San Francisco application; Cellnet estimates construction costs for the San Francisco application at $15,058,000 and first year operating costs at $4,353,000. *See* Item 47, San Francisco application; Exhibit 14, application. Thoma testimony, direct Case; reply to CMS petition to deny, at pages 8 and 10. We will examine in this order the funding for both applications.

20. *Continental Bank Loan.* In Exhibit 14, Appendix 3 to its application, Cellnet submits a $5 million letter of credit from Continental Illinois National Bank (Continental Bank). CMS questions whether the bank letter is sufficiently detailed to demonstrate the availability of the funds. After reviewing the letter, we conclude that it does not provide reasonable assurance that funds are available. Although exact details such as interest rates and payment terms are not absolutely required, the applicant must submit sufficient information for the Commission to make its reasonable assurance determination. *See Multi-State, supra.* the bank letter specifies no interest rate but instead states that the rate is "* * * to be negotiated at the time of FCC approval." Although the letter provides for quarterly payments over seven (possibly eight) years, it furnishes no information as to the dollar amount of these payments. Under these circumstances, we cannot conclude that the Continental Bank letter provides reasonable assurance. *See Advanced Mobile Phone Service, Inc., et al. (Philadelphia Order),* CC Mimeo 1882, release January 21, 1983, at para. 6. A similar letter of credit for $15 million is submitted in Celnet's San Francisco application. For the same reason, we conclude that these funds have not been shown to be available.

21. *Equity funding.* Cellnet also furnishes a letter making a $1.7 million equity commitment to Pagenet from the Golder, Thoma fund (GTF) a venture capital firm. Application, Exhibit 14, Appendix 2. GTF holds a majority interest in Pagenet. One of the general partners of GTF, Mr. Carl D. Thoma, is Chairman of the Board and Chief Financial Officer of both the parent Pagenet and the applicant Cellnet. The petitioner argues that the applicant has not demonstrated the ability of the investor (GTF) to meet its commitment to the parent, nor that the parent is committed to pass these funds on to the applicant subsidiary. The petitioner cites language in the application where Pagenet describes other planned acquisitions and argues that the applicant fails to show that the funds advanced will not be diverted to these other projects. Initially, we reject the contention that the parent will for some reason unspecified by the petitioner fail to use equity funds for their stated purpose. Which is to construct a cellular system in San Jose. We also reject the contention that the parent Pagenet may commit these funds to other projects than the San Jose celluar system. The application contains a certification that none of the funds listed (including the equity commitment to Pagenet) are committed to any other project, including any other cellular application. Exhibit 14, Appendix 2. We do not require more. The petitioner has presented no factual materials to cause us to question this certification. The applicant's showing complies with the requirements of section 22.917(b). *See Chicago Order, supra,* at para. 6. We conclude, however, that the applicant Cellnet has failed to demonstrate the availability of the equity funding from the investor GTF. In its reply, Cellnet submits an affidavit from the principal of GTF and a letter from an attorney representing GTF. See Appendx A and attachment I, Cellnet reply. These materials state that the GTF funding is based on cash commitments from the limited partners comprising GTF. Although the attorney's letter states that the limited partner's commitments are unconditional, irrevocable, and subject only to 20 days notice, these contributions have not yet been paid and cannot be considered by GTF (or the applicant) as cash or other liquid assets. We therefore conclude that the $1.7 million equity funding has not been shown to be available to Cellnet.

22. The letter committing $1.7 million equity funding for the San Jose application also commits $5 million for the San Francisco Cellnet application. For the same reasons as discussed above, we conclude that the application has not shown these funds to be available for the San Francisco proposal.

23. The San Jose application also relies on a $300,000 cash advance from Pagenet. The petitioner disputes the availability of these funds. In its reply, however, the applicant submits an affidavit from a principal of Pagenet stating that the $300,000 has in fact been transferred to the applicant. This moots the petitioner's objections.

24. For the reasons discussed above, we find that Cellnet has provided reasonable assurance that $300,000 is available. Since this amount is not sufficient to cover the applicant's construction and first-year operating costs in San Jose, we will designate a financial qualification issue. Because we have also concluded that the $20 million financing for Cellnet's San Francisco proposal has not been shown to be available, we will at the same time designate an issue in this proceeding for that market. We believe this approach is the most efficient for the same reasons as discussed above as regards the McCaw application.[8] Aslo as in the case of McCaw, the Administrative Law Judge may use our summary procedures to resolve the financial qualifying issue if Cellnet submits an amendment in response to our findings here.

25. *Cell-splitting plan.* The petitioner argues that the Cellnet application has failed adequately to indicate the basis which will be used to determine whether sufficient congestion exists to warrant cell-splitting, and that the application does not comply with Section 22.913(a)(5). The application states (Exhibit 23) that the applicant will determine when cell-splitting is warranted based on market study forecasts, monitoring of system user statistics compiled through actual operating experience, and Grade of Service design limits. These design limits require a service objective of P.02. The application goes on to explain this service objective in detail. We conclude that Cellnet has complied with the requirements of Section 22.913(a)(5) and will not designate a qualifying issue on this basis. *See Advanced Mobile Phone Service, Inc. et al. (Philadelphia Order),* CC Mimeo 1882, released January 21, 1983, at para. 31. Cell-splitting plans and proposed system expansion may be examined in the comparative portion of this proceeding to the extent relevant to the issues designated in this order. *Report and Order* CC Docket No. 79–318, 86 FCC 2d 469 at 502–03 (1981); *Advanced Mobile Phone Service, Inc. et al. (Buffalo Order),* CC Mimeo 1320, released December 14, 1982, at para. 20.

Celcom Application

26. *Site Availability.* Petitioner CMS argues that Celcom has not demonstrated the availability of the proposed sites, referring to language in the application (Exhibit No. 4) where Celcom states that it will own or lease each of the proposed sites. CMS contends that this language indicates that Celcom has not finalized arrangements to make sites available as required by the rules. We have examined the application, however, and conclude that Celcom has reasonable assurance that sites are available. In its application, Celcom has identified each of the site locations and showed their coordinates. In its reply Celcom further indicates that, based on signed statements from the owners or their agents, Celcom has a good faith belief that all cell sites are available. The petitioner has not demonstrated that any of the sites would not be available to Celcom. Absent specific evidence rebutting Celcom's showing, we find that Celcom has adequately demonstrated site availability. *See Philadelphia Order, supra.*

27. *Financial qualifications.* CMS argues that Celcom has not adequately demonstrated its costs and has not shown the availability of sufficient funds to meet its costs. The petitioner questions the accuracy of the applicant's estimates of operating expenses. In its reply, the applicant provides a detailed analysis of its cost projections including operating expenses. The information submitted in the application and the reply pleading is not unreasonable on its face and meets the requirements of the cellular rules. The petitioner has presented nothing to cause us to question the applicant's estimates. Concerning the availability of adequate funds, the petitioner refers to a letter of credit (Appendix C, Exhibit No. 5) from the Michigan National Bank, offering to serve as the lead bank in a consortium of banks which would lend the applicant up to $15 million. The letter identities the participating banks and contains the basic payment terms and the formula for the interest rate. The petitioner argues that there is no indication that the banks would in fact participate in the consortium. These same arguments were raised against Celcom in Pittsburgh and Atlanta and were rejected in our recent *Pittsburgh Order* and *Atlanta Order.*[9] Further, Celcom has submitted a letter from the Michigan National Bank which unequivocally states that all three banks have agreed to participate and that the loan is adequately secured. Accordingly, no further consideration of this issue is warranted.

[6] On August 17, 1982 CMS submitted amendments to modify its CGSA. Since we are directing a specific amendment to cover this problem, we are returning the amendments under separate cover. A "Motion to Strike" the amendments was filed by Celcom. Because of our action returning the amendments the Celcom "Motion to Strike" is dismissed as moot.

[7] The petitioner's misunderstanding of certain parts of the application is grounded primarily in confusion over the unusual format of the Cellnet application, which bases cost estimates on the third year of operation rather than the first. Additionally, the application includes second and third columns of figures which adjust cost estimates for inflation. While there may be sound business reasons (as explained in the reply) for this approach, we note the difficulty in determining from the application's format whether the financial showing complies with the rules. The applicant's reply has significantly clarified the information contained in the application.

[8] Any applicant in the San Francisco market whose proposal is electrically mutually exclusive with Cellnet's application may file a motion for limited intervention on the financial issue in this proceeding.

[9] Advanced Mobile Phone Service, Inc. *et al.* (Pittsburgh Order), CC mimeo 1169, released December 6, 1982; Celcom Communications Corp. of Georgia *et al.* (Atlanta Order), CC Mimeo 1969, released January 20, 1983, at paras. 3–6.

VOL 48 ISS 94 MAY 13 1983 UMI

Intrastate Application

28. *Technical issues.* Petitioners Celcam and CMS attack the Intrastate application on a number of technical grounds. They argue that the application violates Section 22.909(a)(2) for proposing a control point outside the San Jose CGSA without requesting Commission approval. They further contend that, had the applicant requested Commission approval for such remote control facilities, the request would have been denied because such facilities, having additional points of interconnection, are more prone to service outages and service degradation. The petitioners also question whether the applicant will provide operating personnel on duty during normal rendition of service, as required by Section 22.909(a)(2). Celcam further argues that Intrastate's proposed CGSA impermissibly extends into the central SMSA of San Francisco and also into the Santa Cruz SMSA.

29. First, we reject the view that Intrastate's application violates Section 22.909(a)(2) by proposing remote control points. The rule states that "[t]he location of the control point may not be moved beyond the boundary of the authorized service area without prior Commission approval." It does not say that an applicant may not propose, and receive approval for, a remote control point. The *Report and Order*, in which the rule was adopted, does not address the rationale for the rule. Consequently, we must look at it in the context of Part 22, generally, and Section 22.513, specifically. Traditionally, the control point and the message center (defined in Section 22.2) were at the same location—the transmitter site. Developments in technology enabled carriers to automate their systems and to move control points to remote locations in the interest of economic or technical efficiency. The Commission was concerned, however, that the message center not be moved because local customers might have had to pay toll charges to reach the message centers. In that vein, Section 22.513 allows a control point, message center or contro! point/message center to be located outside the service area as long as the customer can access the system with a local call. More recently in its *Revision and Update of Part 22*, 47 FR 43, 842 (1982), the Commission proposed to delete Section 22.513 upon finding tentatively that marketplace competition provided adequate protection from excessive charges. *Id.* at 43, 878–79. In today's environment, there is neither an economic nor a technical reason for arbitrarily restricting the choice of control point location. The petitioners here have presented no evidence that Intrastate's choice will adversely affect the public, and we do not find any reason to include a qualifying or comparative issue based on the control point location.

30. Second, we reject the contention that the application extends into the San Francisco SMSA. In its reply, Intrastate states that it has re-examined its calculations and confirmed that no such extension exists. The petitioner Celcom has submitted no calculations or contour maps to support its allegation. Under the circumstances, we will accept the materials submitted by Intrastate in its application and reply. Concerning the alleged extension into the Santa Cruz SMSA, we have examined the amount of 39 dBu contour overlap and determined that it constitutes approximately 12 per cent of the cell site in question. The overlap area is mountainous, uninhabited area and unlikely to interfere with the service area which cellular applicants will propose to cover in the Santa Cruz area. The applicant has directionalized its antenna in order to minimize overlap. Furthermore, Intrastate explains in its application that, in order to econimize on construction costs, it chose to use a single antenna site on a high mountain instead of multiple sites at lower elevations. We conclude that the overlap is *de minimis* and that any necessary frequency coordination will be minimal. *See Memorandum Opinion and Order on Further Reconsideration*, 90 FCC 2d 571 (1982) at para. 20.

31. Finally, we reject the argument that the application is defective for not providing operating personnel as required by the rules. In its reply, Intrastate explains that it will have operators on duty at the control point during regular workdays and during other hours will monitor the system from its message and alarm center. Monitoring personnel will be able to telephone or page maintenance personnel in the event of a malfunction. This arrangement complies with the requirements of Section 22.909(a)(2). In view of the above, we conclude that Intrastate is technically qualified to construct and operate a cellular system in San Jose.

32. *Financial qualifications.* CMS contends that, in describing its financing arrangements, Intrastate has revealed that its proposal violates the cellular rules by proposing a *consolidated* cellular system to serve both the San Jose and San Francisco markets instead of separate systems for each market, as required by the rules.

33. We have examined the pertinent language in Intrastate's financial showing (Application, Exhibit 15, pp. 1–2). We conclude that the petitioner's argument is based on a misreading of the application. The applicant states:

> [IRTS] is proposing to build an initial thirteen-cell system in the San Francisco—Oakland SMSA and an initial five-cell system in the San Jose SMSA. If it is the successful applicant in both SMSA's, [IRTS] will consolidate the facilities into a single eighteen-cell system with a common switch at Hayward, California.

Clearly, Intrastate proposes separate systems and, only if the successful applicant in both markets, will Intrastate at that point in the future seek Commission approval to modify its facilities into a consolidated system. Intrastate's separate proposals for San Jose and San Francisco are thus in compliance with our rules and do not violate our prohibition against regionalized proposals which include more than one SMSA. Nor does the fact that Intrastate's single financing package to cover the proposals in both markets violate our rules. Section 22.917(b) states that resources used to demonstrate an applicant's financial ability cannot include funds committed to another project or committed to another cellular application. This rule was intended to prohibit double commitment of the same funds, not to prohibit applicants from obtaining one financing package to cover all cellular ventures. Nothing in the application or in the pleadings leads us to believe that funds committed to the San Jose proposal are also committed either to the San Francisco proposal or any other venture. Accordingly, we will not designate a financial issue on this basis.

34. CMS also questions the cost estimates submitted by Intrastate. These estimates use an incremental cost analysis, showing the increase in costs above Intrastate's present RCC business costs which will result from Intrastate's cellular operations. The petitioner argues that an applicant is not permitted to use such an incremental cost analysis without providing the Commission with evidence that this approach is a reasonable way to estimate costs. We reject this view. Intrastate estimates construction expenses for the San Jose system at $2,300,000. Application, Exhibit 15, Attachment E. This figure includes a cellular central office, cell sites, system spares, installation costs, and miscellaneous expenses. First year operation costs are estimated at $541,904. Exhibit 15, Attachment F. This figure includes maintenance and repairs, salaries, telephone expense, office supplies, sales and advertising, depreciation and amortization, loan service, taxes, and other expenses. These categories are further itemized into 27 sub-categories. The figures and the cost analysis are not unreasonable on their face. The petitioner has presented no factual materials which call any specific item into question. The fact that, in arriving at these estimates, the applicant considered the increment in costs to run its existing facilities, does not compel a different result. The Commission has in the past sanctioned an applicant's reliance on its operating experience in estimating expenses and revenues. *See Cohen & Siegel*, 68 FCC 2d 702 (1978). Accordingly, we will not designate an issue on this basis.

35. Petitioner CMS also questions the availability of certain equity funding listed in the Intrastate application. We find it unnecessary to examine this matter, however, since, even without the equity funding, Intrastate has $10 million available to cover its construction and first year operating costs. The petitioner does not contest the availability of these funds, which will cover projected expenses of both the San Jose and San Francisco systems proposed by Intrastate. The $10 million funding is based on a letter dated June 4, 1982, from the Chase Manhattan Bank committing up to $10 million to Intrastate for cellular systems in San Jose and San Francisco. The letter specifies interest rate and payment period. We conclude that these funds are available to the applicant for the stated purpose, and we find Intrastate is financially qualified in both San Jose and San Francisco. Any financial issues unique to Intrastate's San Francisco proposal will be disposed of in the order which discusses that market.

GTE Application

36. GTE is the remaining applicant for Block B (wireline) in the San Jose market under the terms of a Limited Partnership Agreement submitted on October 19, 1982. This Agreement is one of a series of similar agreements by which AMPS and GTE, which had filed in 15 of these markets, together with 18 other wireline companies, proposed to settle their electrically mutually exclusive applications in 18 of the top 30 markets. Pursuant to the terms of the Agreements, AMPS will operate cellular systems in twelve markets and GTE will operate cellular systems in six markets, including San Jose. Each partner will continue to prosecute its cellular applications in its specified markets, while the other partners to the agreements will withdraw any applications in those markets. A Limited Partnership Agreement virtually identical to the San Jose Agreement was approved by the Commission in *Advanced Mobile Phone Service, Inc. (Los Angeles Wireline Order)*, FCC 83——, released April —, 1983. We find the Commission's decision to be dispositive of all objections to the San Jose Agreement itself.[10]

37. GTE also submitted a "Request for Waiver or Acceptance of Amendments," along with amendments filed Sept. 13, 1982. The filing related to service contour overlaps of the GTE San Jose proposal into the San Francisco SMSA. We find it unnecessary to rule on the pleading or amendments. GTE also filed a cellular proposal for the San Francisco SMSA.[11] The two systems proposed by GTE are fully coordinated. Because there is no other wireline applicant for the proposed coverage of the San Francisco SMSA, and because there is no real possibility of harmful electrical interference, there is no need to require GTE to amend its application or shrink its 39 dBu contours to avoid overlap into the San Francisco SMSA. *See Advanced Mobile Phone Service, Inc. (New York Order)*, CC Mimeo 2418 released February 18, 1983, at para. 41. Accordingly, the "Request for Waiver or Acceptance of Amendments" will be dismissed as moot, and the amendments will be returned under separate cover.

Conclusions

38. Based on our analysis of the applications and our resolution of the contested issues in this order, we find that the applicants are legally, technically, financially and otherwise qualified to construct and operate their proposed cellular systems, except to the extent discussed here. We are requiring CMS to bring its application into conformance with the rules as specified in this order. We emphasize that the amendment ordered here may not be used to give CMS a comparative advantage in the hearing proceeding.

39. Accordingly, *it is ordered*, pursuant to Section 22.29 of the Commission's Rules, that the Joint Request for Approval of Limited Partnership Agreement filed by GTE Mobilnet of San Jose, Incorporated, and Advanced Mobile Phone Service, Inc. *is granted* and the accompanying Limited Partnership Agreement is *approved*.

40. *It is further ordered*, That the amendment to the GTE Mobilnet of San Jose, Inc., application *is accepted*, that the amendment is exempted from the cut-off provisions under Section 22.31(e)(3) and (4); and the amended GTE application, File No. 28058–CL–P–(5)–82, is granted.

41. *It is further ordered*, That the request for withdrawal of the application filed by Advanced Mobile Phone Service, Inc., File 28025–CL–P–(3)–82, IS GRANTED and the application is dismissed.

42. *It is further ordered*, That GTE's "Request for Waiver or Acceptance of Amendments" IS DISMISSED as moot, and the related amendments will be returned under separate cover.

43. *It is further ordered*, That the authorization is conditioned upon GTE's filing an amendment to the Limited Partnership Agreement which eliminates the language contained in Section 11.1 of the Agreement, imposing restraints on the alienation of partnership interests.[12]

44. *It is further ordered*, Pursuant to Section 309 of the Communications Act of 1934, as amended, that the above-captioned applications are designated for hearing in a consolidated proceeding, upon the following issues:[13]

(a) To determine whether McCaw Cellular Communications, Inc. (MCCI), has a $35 million loan available from the Continental Illinois National Bank and is financially qualified to construct and

[10] The Commission required the deletion of one provision of the Los Angeles Agreement which restrained alienation of partnership interests. We also require deletion of that provision here. *See* para. 43, *infra*.

[11] Both AMPS and GTE have filed cellular applications for the San Francisco SMSA. Pursuant to a proposed settlement agreement between the two parties, GTE has filed an amendment to its application. Both the original and the modified GTE application are fully coordinated with the GTE San Jose application.

[12] The Commission will hold issuance of GTE's authorization until the amendment is received by the Mobile Services Division, Common Carrier Bureau. We also remind the partners that, pursuant to Section 212 of the Communications Act, officers or directors of more than one carrier are required to have authorizations to hold interlocking directorships.

[13] There are two issues that are not to be considered in the comparative hearing. The first is the financial qualifications of the applicants other than McCaw and Cellnet. Financial ability is a basic rather than a comparative qualification for cellular licensing. Cellular Communications Systems, 86 FCC 2d 469, 501–02 (1981). Except as noted, we have found the applicants included in the comparative hearing to be financially qualified. The second issue not to be considered is the qualifications of Cellular Mobile Systems of California, Inc. or its parent Graphic, to the extent that such qualifications may be affected by the issues included in the Commission's order designating certain 35 and 43 MHz paging applications for hearing, A.S.D. Answer Service, Inc., *et al.* (ASD), FCC 82–391, released August 24, 1982. Those issues will be thoroughly reviewed in that separate proceeding and should not be reargued in the context of a cellular hearing. As set forth in para. 23, *infra*, the Commission reserves the right to reexamine and reconsider the qualifications of Cellular Mobile Systems of California, Inc. to hold a cellular license should *ASD* be resolved adversely to any of CMS' affiliate or parent companies or to any of their principals.

VOL 48 ISS 94 MAY 13 1983 UMI

operate for one year its four proposed cellular systems;

(b) To detemine whether Cellular Network, Inc., and its parent Pagenet have equity funding available from the Golder, Thoma Fund of $1.7 million for San Jose and $5 million for San Francisco, as well as a loan from the Continental Illinois National Bank of $5 million for San Jose and $15 million for San Francisco, and is financially qualified to construct and operate for one year its four proposed cellular systems;

(c) To determine on a comparative basis the geographic area and population that each applicant proposes to serve;[14] to determine and compare the relative demand for the services proposed in said areas; and to determine and compare the ability of each applicant's cellular system to accommodate the anticipated demand for both local and roamer service;

(d) to determine on a comparative basis each applicant's proposal for expanding its system capacity in a coordinated manner within its proposed CGSA in order to meet anticipated increasing demand for local and roamer service;[15]

(e) to determine on a comparative basis the nature and extent to the service proposed by each applicant, including each applicant's proposed rates, charges, maintenance, personnel, practices, classifications, regulations and facilities (including switching capabilities);[16] and

(f) to determine, in light of the evidence adduced under the foregoing issues, what disposition of the referenced applications would best serve the public interest, convenience and necessity.

45. *It is further ordered,* That the burden of proceeding with the introduction of evidence upon the financial qualification issue, and the burden of proof, shall be upon McCaw Communications of San Jose, Inc., and upon Cellular Network, Inc.

46. *It is further ordered,* That CMS is directed to file the conforming amendment specified in this order within 15 days after publication of this order in the **Federal Register** and that the date for filing rebuttal cases under Section 22.916(b)(4) of the Rules is deferred pending establishment of procedural dates by the Administrative Law Judge. Procedures for deciding the issues designated against McCaw and Cellnet shall be determined by the judge in the judge's discretion.

47. *It is further ordered,* That the Separated Trial Staff (the Hearing Division and other individuals specifically designated) of the Common Carrier Bureau is made a party to the proceeding.[17]

48. *It is further ordered,* That the applicants shall file written notices of appearances under Section 22.916(b)(3) of the Commission's Rules within 10 days after publication of this order in the **Federal Register.**

49. *It is further ordered,* That the hearing shall be held according to the procedures specified in Section 22.916 of the Rules, except as otherwise noted herein, at a time and place and before an Administrative Law Judge to be specified in a later order.

50. *It is further ordered,* That exceptions to the initial decision of the Administrative Law Judge under Section 1.276 of the Commission's Rules shall be taken directly to the Commission.

51. *It is further ordered,* That except to the extent granted here, the Petitions to Deny filed by the various parties ARE DENIED, and the Celcam Motion to Strike *is dismissed* as moot.

52. *It is further ordered,* That any authorization granted to CMS as a result of the comparative hearing shall be conditioned on, and without prejudice to reexamination and reconsideration of that company's basic qualifications to hold a cellular license following a final decision in the hearing designated in *A.S.D. Answering Service, Inc., et al.,* FCC 82-391 released August 24, 1982, and shall be specifically conditioned upon the outcome of that proceeding.

53. *It is further ordered,* That the GTE authorization and any other authorization granted as a result of this proceeding shall be conditioned upon the obtaining of the appropriate antenna structure clearances.

54. This Order is issued under Section 0.291 of the Commission's Rules and *Order Delegating Authority,* FCC 82-435, released October 6, 1982, and is effective on its release date. Petitions for reconsideration under Section 1.106 or applications for review under Section 1.115 of the Rules may be filed within the time limits specified in those Sections. See also Rule 1.4(b)(2).

55. The Secretary shall cause a copy of this order to be published in the **Federal Register.**

Gary M. Epstein,

Chief, Common Carrier Bureau.

[FR Doc. 83-12855 Filed 5-12-83; 8:45 am]

BILLING CODE 6712-01-M

[14] For purposes of comparison, the geographic area that an applicant proposes to serve includes that area within the proposed 39 dBu contours which, in turn, falls within the proposed Cellular Geographic Service Area and the relevant Standard Metropolitan Statistical Area. Consideration should be given to the presence of densely populated regions as well as highways and areas likely to have high mobile usage characteristics, indications of a substantial public need for the services proposed. *See* 86 FCC 2d at 502.

[15] In making this comparison, preference should be given to designs entailing efficient frequency use, including not only the applicant's plans with regard to cell-splitting and additional channels, but also the degree of frequency reuse the system will be capable of, and the applicant's ability to coordinate the use of channels with adjacent or nearby cellular systems. *See* 86 FCC 2d at 502-03.

[16] *See* 86 FCC 2d at 503 for a discussion of the relative importance of the evidence submitted under this issue.

[17] Members of the Separated Trial Staff are non-decision making personnel and they will not participate in decision making or agency review on an *ex parte* basis in this case, either directly or through contact with other Common Carrier Bureau personnel. Any investigative or prosecuting functions will be performed by the Separated Trial Staff in connection with its role as a party to the adjudication of these cellular radio applications. All other personnel of the Common Carrier Bureau, unless identified in a subsequent order as required to be separated, are designated as decision making and they may advise the Commission as to the ultimate disposition of any appeal of an Initial Decision in this proceeding. *See* Communications Act of 1934 as amended § 409(c) [47 U.S.C. § 409(c)]; Administrative Procedure Act § 554(d) (5 U.S.C. § 554(d)); Section 1.221 of the Commission's Rules.

FEDERAL EMERGENCY MANAGEMENT AGENCY

California; Notice of Major Disaster and Related Determinations

[FEMA-682-DR]

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of California (FEMA-682-DR), dated May 5, 1983, and related determinations.

DATE: May 5, 1983.

FOR FURTHER INFORMATION CONTACT: Sweall H.E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287-0501.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter of May 5, 1983, the President declared a major disaster under the authority of the Disaster Relief Act of 1974, as amended, (42 U.S.C. 5121 *et seq.,* Public Law 93-288) as follows:

I have determined that the damage in certain areas of the State of California, resulting from an earthquake occurring on May 2, 1983, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288. I therefore declare that such a major disaster exists in the State of California.

In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Pub. L. 93-288 for Public Assistance will be limited to 75 percent of total eligible costs in the designated area.

Pursuant to Section 408(b) of Pub. L. 93-288, you are authorized to advance to the State its 25 percent share of the Individual and Family Grant program, to be repaid to the United States by the State when it is able to do so.

The time period prescribed for the implementation of Section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, and redelegated to me, I hereby appoint Mr. Tommie C. Hamner of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of California to have been affected adversely by this declared major disaster:

The City of Coalinga in Fresno County for Individual Assistance and Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance. Billing Code 6718-02)

Richard W. Krimm,

Acting Deputy Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

[FR Doc. 83-12867 Filed 5-12-83; 8:45 am]

BILLING CODE 6718-01-M

[FEMA-678-DR]

Mississippi; Amendment to Notice of Major-Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the Notice of a major disaster for the State of Mississippi (FEMA-678-DR), dated April 16, 1983, and related determinations.

DATE: May 6, 1983.

FOR FURTHER INFORMATION CONTACT: Sewall H.E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287-0501.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of Mississippi dated April 16, 1983, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of April 16, 1983.

Covington County for Public Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance. Billing Code 6718-02)

Richard W. Krimm,

Acting Deputy Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

FEDERAL HOME LOAN BANK BOARD

[No. AC-236]

United Federal Savings and Loan Association, Sarasota, Florida; Final Action Approval of Post-Approval Amendments to Mutual-to-Stock Conversion Application

Notice is hereby given that on April 27, 1983, the General Counsel of the Federal Home Loan Bank Board ("Board") acting pursuant to authority delegated to him by the Board, approved Post-Approval Amendment No. 2 to the mutual-to-stock conversion application of United Federal Savings and Loan Association, Sarasota, Florida ("Association"). The application had been approved by the Board by Resolution No. 81-458, dated August 12, 1981. Copies of the application and all amendments thereto are available for inspection at the Secretariat of the Board, 1700 G Street NW., Washington, D.C. 20552, and at the Office of the Supervisory Agent, Federal Home Loan Bank of Atlanta, Post Office Box 56527, Atlanta, Georgia 30343.

Dated: May 4, 1983.

By the Federal Home Loan Bank Board.

John M. Buckley, Jr.,

Acting Secretary.

[FR Doc. 83-12868 Filed 5-12-83; 8:45 am]

BILLING CODE 6720-01-M

GENERAL SERVICES ADMINISTRATION

Intent to Prepare a Supplement to the Final Environmental Impact Statement, Number ETN 78002, dated December 7, 1978, for the Renovation of Union Station, Nashville, Tennessee.

AGENCY: General Services Administration.

ACTION: Notice.

Purpose: The Supplement will evaluate the environmental impacts associated with the proposed discontinuation of the renovation of Union Station, Nashville, Tennessee, and the subsequent transfer of the property to the Disposal Division, General Services Administration, where no disposal action will be taken until all laws and regulations are appropriately addressed.

Direct Comments or Inquiries to: Barbara B. Bishop, Office of Public Buildings and Real Property (4PEP), General Services Administration, 75 Spring Street, SW., Atlanta, Georgia 30303, (404) 221-3080.

Alternatives Considered: The alternatives being considered are:

a. No action;

b. Continued renovation of Union Station; or

c. Declaration of Union Station excess to the needs of the General Services Administration.

Environmental Issues: The significant environmental issues to be discussed in the Supplement include the following:

a. Historic preservation, including reference to Section 106 of the National Historic Preservation Act of 1966 and the Memorandum of Agreement between the Advisory Council on Historic Preservation (ACHP), the Tennessee State Historic Preservation Officer (SHPO), and the General Services Administration. This issue includes weatherizing the building in order to protect the historically and architecturally significant elements of the structure. Another issue to be addressed will be to set forth constraints to protect the significant historical and architectural elements of this National Landmark building should a decision be made to excess Union Station.

b. Potential health hazards from the potential presence of asbestos insulation on building piping.

c. Potential health hazards from the probable presence of the fungus *Histoplasma capsulatum* which causes a respiratory disease called histoplasmosis. The fungus is commonly found in soil containing bird droppings. Testing for the presence of this fungus is currently being conducted at the Union Station site.

d. Potential health hazards from the known presence of the fungus *Cryptococcus neoformans* which grows in pigeon manure. The fungus causes a disease in humans known as meningitis. The disease attacks the covering of the brain and central nervous system and has a 50 percent mortality rate. The Centers for Disease Control has confirmed the presence of this fungus in Union Station within the last 30 days.

e. Potential health hazards from the probable presence of the fungus

VOL 48 ISS 94 MAY 13 1983 UMI

Cryptococcus neoformans in the train shed which is connected to Union Station by a concourse. The shed is not owned by the General Services Administration. Any development of Union Station will or may be impacted by the probable presence of this fungus in the train shed.

Copies of the Supplement will be available in the near future. A scoping meeting is not planned; therefore, comments and suggestions concerning the Supplement are invited from all affected and interested parties and should be received in writing as soon as possible, but not later than fifteen (15) days after publication of the Notice in the Federal Register.

Dated: May 5, 1983.

Donald F. Layfield,

Regional Administrator of General Services.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Cooperative Agreements; Preventive Health Services-Tuberculosis Control Clinical Trial; Availability of Funds for Fiscal Year 1983

The Centers for Disease Control (CDC) announces the availability of funds in Fiscal Year 1983 for Cooperative Agreements for a Tuberculosis Control Clinical Trial. This program is authorized by Section 301 of the Public Health Service Act (42 U.S.C. 241), as amended, Catalog of Federal Domestic Assistance Number 13.283.

Eligible applicants for this program are the official public health agencies of State and local governments and other public and private organizations.

Because of the limited funds available in Fiscal Year 1983, consideration for awarding funds will be limited to agencies or institutions that treated, in each of the preceding 2 years, at least 25 tuberculosis patients that would have met the eligibility requirements as stated in the CDC protocol "Short-Course Chemotherapy of Pulmonary Tuberculosis-U.S. Public Health Service Therapy Trial 21" (Study 21 Protocol).

Applicants must demonstrate that tuberculosis cooperative agreement funds will be used primarily for providing services necessary to enroll and treat eligible tuberculosis patients, as outlined in the Study 21 Protocol, and for ensuring that those patients are montiored for compliance with the assigned therapy regimens.

Evaluation and ranking of applications will be based on the following factors:

1. The estimated number of study eligible patients to be enrolled annually. Justification for the estimate should be provided. Applicants estimating that they will enroll fewer than 25 eligible patients annually will not be considered for awards.

2. Evidence of an applicant's capability to successfully meet the responsibilities of participating treatment centers, as listed on page 7 of the study protocol.

3. Evidence that the applicant has access to a mycobacteriology laboratory that has the expertise and willingness to provide all of the services required in the study protocol.

4. The exent to which an applicant's budget request is reasonable and consistent with the intended use of funds made available through a cooperative agreement.

5. Evidence that an applicant has access to adequate facilities, staff, and supplies to meet the requirements of the study protocol.

6. Evidence of the applicant's ability to monitor patients' compliance with thereapy and to take appropriate action (as specified in the protocol) when noncompliance is identified.

Purpose and Cooperative Activities

A. *Purpose.* The primary purpose of this multicenter clinical trial is to compare the efficacy, toxicity, and acceptability of a 6-month regimen of isoniazid (I) and rifampin (R), supplemented with pyrazinamide (Z) for the first 2 months, with a control regimen of 9 months of I and R in patients with pulmonary tuberculosis. The secondary purpose of this trial is to determine the acceptability of supervised twice-weekly therapy for patients who fail to adhere to the self-administered daily regimens. The study will be conducted in accordance with the Study 21 Protocol.

B. *Cooperative Activities.* The collaborative and programmatic involvement of recipients of funds and of CDC is as follows:

1. *Recipient Activities.* Each treatment center shall perform the following activities:

a. Participate in the conduct of the study to determine if the 6-month regimen is effective, safe, and acceptable therapy for pulmonary tuberculosis in accordance with the Study 21 Protocol.

b. Identify and select patients 18 years of age and older with newly diagnosed pulmonary tuberculosis, obtain informed consent, and conduct diagnostic medical workup, including cheat X-ray, sputum examination, complete blood count, and blood chemistries. All study participants must meet specified criteria for the diagnosis of pulmonary tuberculosis, as well as other criteria outlined in the protocol. The above information will be forwarded to CDC for approval and assignment of each patient to a study regimen.

c. Administer protocol drugs and conduct appropriate followup monitoring for response to therapy and the development of adverse drug reactions.

d. Collect and process sputa for acid-fast smear and mycobacterial culture and perform followup blood tests to monitor for drug toxicity. Ship positive mycobacterial cultures to CDC for drug susceptibility testing.

e. Assure accuracy and reliability of information collected and recorded on study forms. Submit study data to CDC as collected.

2. *Centers for Disease Control Activities.* CDC will perform the following activities:

a. Design the study including: Statistical program systems requirements, specifications, development, and implementation, and statistical analysis of all data.

b. Randomly assign patients to study regimens.

c. Provide required reporting forms, strips for isoniazid urine tests, and letters and trophies used as achievement awards.

d. Provide a computer-generated weekly diary which lists all patients in a center who should be scheduled for visits that week and the procedures and reports required at that visit.

e. Receive reports and evaluate regimens. This includes coding, keypunching, error-editing, program testing, and production of tables for anylsis of all data generated, and preparation of interim and final reports based upon information and data collected from all participating centers.

f. Periodically visit each center to discuss progress of the study and adherence to the protocol.

g. Perform drug susceptibility tests on mycobacterial isolates as required by the protocol and speciate all organisms found to be drug resistant.

It is anticipated that enrollment of patients will continue for up to 2 years. Patients will be followed for an additional 2 years after completion of treatment. Quarterly reports will be prepared by CDC and sent to all participating treatment centers. Financial status reports are required no later than 90 days after the end of each budget period. Final financial status and progress reports are required 90 days after the end of a project period.

During Fiscal Year 1983, approximately $180,000 will be available to fund two or three new cooperative agreements and 10 to 12 continuation awards. Individual project awards are expected to range from $7,000 to $20,000.

Applications should be submitted for a 1-year budget period and a 1- to 2-year project period. Continuation awards within the project period will be made by CDC on the basis of satisfactory progress in meeting project objectives and on the availability of funds. Funding estimates outlined above may vary and are subject to change due to budgetary uncertainties.

Cooperative agreement funds may be used to support personnel and to purchase supplies and services directly related to the clincal trial. Project funds may not be used to supplant funds supporting existing tuberculosis control services provided by a State or locality, or to support construction costs.

New applications for a cooperative agreement must include a narrative which summarizes: (1) The background and need for project support including information that relates to factors by which the applications will be evaluated; (2) the objectives of the proposed project which are consistent with the purpose of the clinical trial and which are specific, measurable, realistic, and time-framed; (3) the methods which will be employed to accomplish the objectives (of special importance will be the methods used to monitor and insure patients' compliance with therapy); (4) the methods which will be employed to evaluate the successfulness of enrolling eligible patients; (5) fiscal information pursuant to utilization of awarded funds in a manner consistent with the purpose and objectives of the project; and (6) any other information which will support the request for assistance.

Continuation applications need to provide only new short-term objectives for the new budget period; and progress report on activities performed during the prior budget period; a description of any changes in the method of operation, need for cooperative agreement support, and evaluation procedures compared to information provide in previous applications; and fiscal and other supporting information as indicated in (5) and (6) in the preceding paragraph.

The original and one copy of application must be submitted to the address in 1.a. below on or before 4:30 p.m. (e.d.t.) on July 5, 1983. Applicants may meet the deadline by either delivering or mailing the application on or before the date, provided the following conditions are met:

1. *Mailed applications.* Applications mailed through the U.S. Postal Service shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date by Leo A. Sanders, Chief, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, N.E., Room 107A, Atlanta, Georgia 30305, or

b. Sent by first class mail postmarked on or before the deadline date, and received by the granting agency in time for submission to the independent review group. (Applicants are cautioned to request a legible U.S. Postal Service postmark or use U.S. Postal Service express mail, or certified mail, and obtain a legible dated mailing receipt from the U.S. Postal Service. Private metered postmarks will not be acceptable as proof of timely mailing.)

2. *Applications submitted by other means.* Applications submitted by any means except mailing first class through the U.S. Postal Service shall be considered as meeting the deadline only if they are physcially received at the place specified in paragraph 1. above before close of business on or before the deadline date (4:30 p.m. e.d.t., July 5, 1985).

3. *Late applications.* Applications which do not meet the criteria in either paragraph 1. or 2. above are considered late applications and will not be considered in the current competition.

Applications are not subject to the review requirements of the National Health Planning and Resource Development Act of 1974, as amended, or to intergovernmental review pursuant to Executive Order 12372.

Information on application procedures, copies of application forms, copies of the Study 21 Protocol, and other material may be obtained from Leo A. Sanders, Chief, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, at the address in paragraph 1.a. above, or by calling (404) 262-6575, or FTS 236-6575. Technical assistance may be obtained from Mr. Donald E. Kopanoff, Division of Tuberculosis Control, Center for Prevention Services, Centers for Disease Control, Atlanta, Georgia 30333, telephone (404) 329-2523, or FTS 236-2523.

Dated: May 4, 1983.

William H. Foege,

Director, Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 83M-0138]

Alcon Laboratories, Inc.; Premarket Approval of OPTI-CLEAN™ Cleaning Solution

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application for premarket approval under the Medical Device Amendments of 1976 of the OPTI-CLEAN™ Cleaning Solution sponsored by Alcon Laboratories, Inc., Fort Worth, TX. After reviewing the recommendation of the Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and Dental Devices Panel, FDA notified the sponsor that the application was approved because the device had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by June 13, 1983.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Charles H. Kyper, National Center for Devices and Radiological Health (HFK-402), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7445.

SUPPLEMENTARY INFORMATION: On June 2, 1982, Alcon Laboratories, Inc., Fort Worth, TX, submitted to FDA an application for premarket approval of the OPTI-CLEAN™ Cleaning Solution for use in a heat or chemical lens care system to clean daily or extended wear soft (hydrophilic) contact lenses with 55 percent or less water content. The application was reviewed by the Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and Dental Devices Panel, an FDA advisory committee, which recommended approval of the application. On April 7, 1983, FDA approved the application by a letter to the sponsor from the Associate Director for Device Evaluation of the Office of Medical Devices.

Before enactment of the Medical Device Amendments of 1976 (the amendments) (Pub. L. 94-925, 90 Stat. 539-583), cleaning solutions for use in cleaning hydrophilic contact lenses were regulated as new drugs. Because the amendments broadened the definition of

VOL 48 ISS 94 MY 13 1983 UMI

the term "device" in section 201(h) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321(h)), such cleaning solutions are now regulated as class III devices (premarket approval). As FDA explained in a notice published in the Federal Register of December 10, 1977 (42 FR 63472), the amendments provide transitional provisions to ensure continuation of premarket approval requirements for class III devices formerly regulated as new drugs. Furthermore, FDA requires, as a condition for approval, that sponsors of applications for premarket approval of soft contact lenses or the cleaning solutions for the above use comply with the records and reports provisions of Part 310 (21 CFR Part 310), Subpart D, until these provisions are replaced by similar requirements under the amendments.

A summary of the safety and effectiveness data on which FDA's approval is based is on file with the Dockets Management Branch (address above), and is available upon request from that office. A copy of all approved final labeling is available for public inspection at the Office of Medical Devices—contact Charles H. Kyper (HFK-402), address above. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

The labelling of the OPTI-CLEAN ™ Cleaning Solution states that the solution is indicated for use in a heat or chemical lens care system to clean daily or extended wear soft (hydrophilic) contact lenses with 55 percent or less water content. Sponsors of any such soft (hydrophilic contact lenses that have been approved for marketing are advised that whenever FDA publishes a notice in the Federal Register of the agency's approval of a new solution for use with such an approved soft contact lens, the sponsor of each such lens shall correct its labeling to refer to the new solution at the next printing or at such other time as FDA prescribes by letter to the sponsor. A sponsor who fails to update the restrictive labeling may violate the misbranding provisions of section 502 of the act (21 U.S.C. 352) as well as the Federal Trade Commission Act (15 U.S.C. 41–58), as amended by the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act (Pub. L. 93–637). Furthermore, failure to update the restrictive labeling to refer to the new cleaner that may be used with an approved lens may be grounds for withdrawing approval of the application for the lens under section 515(e)(1)(F) of the act (21 U.S.C. 360e(e)(3)(1)(F)).

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 505(g) of the act (21 U.S.C. 360e(g)), for administrative review of FDA's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and FDA's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before June 13, 1983, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: May 5, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 83-12721 Filed 5-12-83; 8:45 am]
BILLING CODE 4160-01-M

[Docket No. 80N-0276; DESI 7630]

Drugs for Human Use; Certain Anabolic Steroids, Drug Efficacy Study Implementation; Withdrawal of Approval

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of four new drug applications for certain anabolic steroid products for which FDA offered an opportunity for hearing, but for which no hearing was requested. The products lack substantial evidence of effectiveness.

EFFECTIVE DATE: June 13, 1983.

ADDRESS: Requests for an opinion of the applicability of this notice to a specific drug product should be identified with Docket No. 80N-0276 and reference number DESI 7630 and directed to the Division of Drug Labeling Compliance (HFN-310), National Center for Drugs and Biologics, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Nicholas Reuter, National Center for Drugs and Biologics (HFN-8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of January 18, 1983 (48 FR 2206), the Director of the National Center for Drugs and Biologics revoked the temporary exemption (37 FR 266231) for the continued marketing of certain anabolic steroid drug products. The manufacturers of these products had not complied with the marketing conditions announced on October 31, 1980 (45 FR 72292). The notice also proposed to withdraw approval of the new drug applications, including conditionally approved abbreviated applications, that provide for these products and offered an opportunity for a hearing on the proposal. The basis of the proposal was a lack of substantial evidence of effectiveness.

Products for Which No Hearing Was Requested

Because the holders of the following new drug applications did not request a hearing, approval of the applications is now being withdrawn.

1. NDA 8-736; Methylandrostenediol Aqueous Suspension containing methandriol 25 or 50 mg/mL; Maurry Biological Co., Inc., South Western Ave., Los Angeles, CA 90047.

2. NDA 11-761; Adroyd Tablets containing oxymetholone 2.5, 5, or 10 mg/tablet; Parke-Davis, Division of Warner-Lambert Co., 201 Tabor Rd., Morris Plains, NJ 07950.

3. NDA 12-226; Dianabol Tablets containing methandrostenolone 2.5 or 5 mg/tablet; Ciba Pharmaceutical Co., Division Ciba-Geigy Corp., 556 Morris Ave., Summit, NJ 07901.

4. NDA 12-733; Anadrol Tablets containing oxymetholone 2.5 mg/tablet; Syntex Laboratories, Inc., 3401 Hillview Ave., Stanford Industrial Park, Palo Alto, CA 94304.

(This notice does not affect Anadrol-50 Tablets, containing oxymetholone 50 mg/tablet, marketed by Syntex for use in the treatment of certain anemias.)

Approval of the new drug applications for the following anabolic steroids was withdrawn in previous Federal Register notices, at the request of the applicants because they had discontinued marketing the products. (The January 18, 1983 notice incorrectly stated the reasons for the previous actions withdrawing approval.) These products were named in the January 18 notice offering an opportunity for a hearing because the question of the effectiveness of the drugs had not previously been resolved and neither those applicants nor firms marketing identical, similar, or related drugs had had an opportunity to request a hearing on that decision or on issue relating to the legal status of the products. No hearing on these products has been requested.

1. NDA 7-630; Stenediol Injection containing methandriol 25 or 50 mg/mL; Organon, Inc., 375 Mount Pleasant Ave., West Orange, NJ 07052.

2. NDA 10-400; Nilevar Tablet containing norethandrolone 10 mg/tablet; G. D. Searle & Co., P.O. Box 5110, Chicago, IL 60680.

3. NDA 11-019; Nilevar Injection containing norethandrolone in sesame oil, 25 mg/mL; G. D. Searle & Co.

4. NDA 11-638; Nilevar Drops; containing norethandrolone 8.3 mg/mL; G. D. Searle & Co.

Any drug products that are identical, related, or similar to one of the eight products name above and are not the subject of an approved application are covered by the applications listed above, and are subject to this notice. Any person who wishes to determine whether a specific product is covered by this notice should write to the Division of Drug Labeling Compliance at the address given above.

The Director of the National Center for Drugs and Biologics, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053 as amended (21 U.S.C. 355)), and under authority delegated to him (see 21 CFR 5.82 and 47 FR 26913 published in the Federal Register of June 22, 1982) finds that, on the basis of new information before him with respect to the products, evaluated together with the evidence available to him when the applications listed above were approved, there is a lack of substantial evidence that the drug products will have the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling. Therefore, pursuant to this finding, approval of application numbers 8-736, 11-761, 12-226, and 12-733 and all amendments and supplements applying to them is withdrawn effective June 13, 1983. Shipment in interstate commerce of the above products or of any identical, related, or similar product that is not the subject of an approved new drug application will then be unlawful.

Products for Which Hearing Was Requested

This notice does not apply to the products that are the subject of the following conditionally approved abbreviated new drug applications, the holders of which have requested hearings. These products will be addressed in a future Federal Register notice.

1. ANDA 87-465; Methandrostenolone 2.5 mg tablets; Bolar Pharmaceutical Co. Inc., 130 Lincoln St., Copiage, NY 11726.

2. ANDA 87-466; Methandrostenolone 5 mg tablets; Bolar Parmaceutical Co. Inc.

3. ANDA 87-945; Methandrostenolone 5 mg tablets; Par Parmaceutical Inc., 12 Industrial Ave., Upper Saddle River, NJ 07458.

4. ANDA 87-951; Methandrostenolone 2.5 mg tablets; Par Parmaceutical Inc.

Products for Which Exemption Has Not Been Revoked

The six products covered by the NDA's and the conditionally approved ANDA's listed below are still subject to the exemption identified above and the action taken in this notice does not apply to them. Nandrolone phenpropionate which was listed in the January 18, 1983 notice as still exempt was the subject of a subsequent Federal Register notice (48 FR 11515) which revoked the exemption.

1. NDA 12-885; Winstrol Tablets containing stanozolol 2 mg/tablet; Winthrop Laboratories, Division of Sterling Drug Inc., 90 Park Ave., New York, NY 10016. (Note: NDA 13-268 for Winsteroid Tablets (stanozolol) listed in the June 24, 1970 notice has been assimilated into NDA 12-885 at the request of the holder because both NDA's cover the same product.)

2. NDA 13-132; Deca-Durabolin Injection containing nandrolone decanoate 50 mg/mL, 100 mg/mL, or 200 mg/mL (previous notices listed the 50 mg/mL strength only); Organon, Inc.

3. ANDA 86-385; Nandrolone Decanoate 50 mg/mL; Carter Glogau Laboratories, Inc., 5160 W. Bethany Home Rd., Glendale, AZ 85301.

4. ANDA 86-598; Nandrolone Decanoate 100 mg/mL; Carter Glogau Laboratories, Inc.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053 as amended (21 U.S.C. 355)), and under authority delegated to the Director of the National Center for Drugs and Biologics (see 21 CFR 5.82 and 47 FR 26913 published in the Federal Register of June 22, 1982).

Dated: May 2, 1983.

Harry M. Meyer, Jr.,

Director, National Center for Drugs and Biologics.

BILLING CODE 4160-01-M

Elanco Products Co., Corderm Ointment, Renazide Tablets, Tylan Boluses, and Methagon Tablets; Withdrawal of Approval of NADA'S

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of four new animal drug applications (NADA's) providing for use of the following products: (1) Corderm Ointment, a corticosteroid/antibiotic for canine use; (2) Renaxide Tablets, a canine diuretic; (3) Tylan Boluses, an antibiotic for intrauterine use in beef cattle; and (4) Methagon Tablets, a corticosteroid for canine and feline use in certain dermatoses. The sponsoring firm, Elanco Products Co., requested the withdrawal of approvals.

EFFECTIVE DATE: May 23, 1983.

FOR FURTHER INFORMATION CONTACT: David N. Scarr, Bureau of Veterinary Medicine (HFV-214), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3183.

SUPPLEMENTARY INFORMATION: Elanco Products Co., a Division of Eli Lilly & Co., 740 S. Alabama St., Indianapolis, IN 46206, is sponsor of the following four NADA's: (1) NADA 13-133, Corderm Ointment (Flurandrenolide/neomycin), originally approved on September 27, 1962, for use on dogs for topical management of allergic dermatitis, otitis externa, and superficial pyoderma which may be threatened or complicated by bacterial infections; (2) NADA 13-547, Renazide Tablets (cyclothiazide), originally approved on May 24, 1963, for use in dogs for its diuretic and saluretic effects; (3) NADA 13-730, Tylan Boluses (tylosin base), originally approved on July 10, 1963, for treating intrauterine infections in beef cattle; and (4) NADA 33-240, Methagon Tablets (flumethasone), originally approved December 1, 1966, for use in dogs and cats to help control the pruritis, irritation, and inflammation associated with certain dermatoses.

By letter of October 7, 1982, to the Bureau of Veterinary Medicine, Elanco

VOL 48 ISS 94 MY 13 1983 UMI

requested withdrawal of approval of the NADA's because the products are not being manufactured or marketed and the firm has no intention of marketing them in the future.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA's and all supplements for NADA 13–133, Corderm Ointment; NADA 13–547, Renazide Tablets; NADA 13–730, Tylan Boluses; and NADA 33–240, Methagon Tablets, is hereby withdrawn, effective May 23, 1983.

Approval of NADA's 33–240 and 13–730 have not been codified in the Code of Federal Regulations, but approval of NADA's 13–547 and 13–133 is reflected in § 520.526 *Cyclothiazide tablets* and § 524.1000 *Flurandrenolide with neomycin sulfate ointment.* In a separate document published elsewhere in this issue of the **Federal Register**, the agency is removing those sections that reflect approval of the NADA's.

Dated: May 2, 1983.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

BILLING CODE 4160-01-M

Advisory Committees; Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meetings are announced:

Panel on Review of Allergenic Extracts

Date, time, and place. June 3 and 4, 9 a.m., Rm. 115, Bldg. 29, 8800 Rockville Pike, Bethesda, MD.

Type of meeting and contact person. Open public hearing, June 3, 9 a.m. to 10 a.m.; open committee discussion, June 3, 10 a.m. to 5 p.m., June 4, 8:30 a.m. to 1:30 p.m.; Clay Sisk, National Center for Drugs and Biologics (HFN–6), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5455.

General function of the committee. The committee reviews and evaluates data on the safety, effectiveness, and appropriate use of allergenic products intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, or issues pending before the committee.

Open committee discussion. The committee will continue the reevaluation of allergenic biological products previously classified in Category IIIA, the designation for those licensed biological products judged to have insufficient available data to classify as safe and effective, but which should remain licensed pending completion of further testing as provided in 21 CFR 601.25(e). The products are being reclassified under the procedures described in the **Federal Register** of October 15, 1982 (47 FR 46138) and 21 CFR 601.26. Allergenic extracts of pollens, molds, basidiomycetes, insects, foods, house dust, and inhalant allergens will be discussed.

Dematologic Drugs Advisory Committee

Date, time, and place. June 13, 9 a.m., Conference Rms. G and H, Parklawn, Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 4:30 p.m.; David Bostwick, National Center for Drugs and Biologics (HNF–140), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–6798.

General function of the committee. The committee reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drug products for use in the treatment of dermatological disorders.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. The committee will discuss ketoconazole (NDA 18–533, Janssen Pharmaceutica) and lindane (NDA 6–309, Reed and Carnrick, Inc.).

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meetings are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

Dated: May 9, 1983.

William F. Randolph,

Acting Assistant Commissioner for Regulatory Affairs.

[FR Doc. 83-12347 5-12-83; 8:45 am]

BILLING CODE 4160-01-M

Consumer Participation: Notice of Open Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following consumer exchange meetings:

Philadelphia District Office, chaired by Loren Y. Johnson, District Director. The topic to be discussed is Direct-to-Consumer Advertising of Prescription Drugs.

Date: Friday, May 20, 1983, 10 a.m. to 12 m.

Address: Federal Bldg., Rm. 3300–10, 6th and Arch Sts., Philadelphia, PA 19106.

For further information contact: Theresa A. Young, Consumer Affairs Officer, Food and Drug Administration, U.S. Customhouse, Rm. 900, 2d and Chestnut Sts., Philadelphia, PA 19106, 215–597–0837.

Houston Station, chaired by Anthony J. Whitehead, Chief. The topics to be discussed are Health Quackery and Direct-to-Consumer Advertising of Prescription Drugs.

Date: Wednesday, May 25, 1983, 10 a.m. to 12 m.

Address: Food and Drug Administration, 1440 North Loop, Suite 250, Houston, TX 77009.

For further information contact: Sheryl Lunnon-Baylor, Consumer Affairs Officer, Food and Drug Administration, 1440 North Loop, Suite 250, Houston, TX 77009, 713–229–3530.

Boston District Office, chaired by Frederick R. Carlson, District Director. The topics to be discussed are Updates on Insulin and Nutrition Labeling and Direct-to-Consumer Advertising of Prescription Drugs.

Date: Thursday, May 26, 1983, 10 a.m. to 12:30 p.m.

Address: New England Dairy and Food Council, 155 Legion Way, Cranston, RI 02910.

For further information contact: Carolyn L. Hommel, Consumer Affairs Officer, Food and Drug Administration, 585 Commercial St., Boston, MA 02109, 617–223–5857.

Minneapolis District Office, chaired by John Feldman, District Director. The topics to be discussed are the Reclassification of Prescription to Nonprescription or Over-the-Counter (OTC) Status and Direct-to-Consumer Advertising of Prescription Drugs.

Date: Wednesday, June 1, 1983, 9:30 a.m. to 11:30 a.m.

Address: United Way Bldg., 2059 Atwood St., Madison, WI 53704.

For further information contact: Blanche Erkel, Consumer Affairs Officer, Food and Drug Administration, 240 Hennepin Ave., Minneapolis, MN 55401, 612–725–2121.

SUPPLEMENTARY INFORMATION: The purpose of these meetings is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance relationships between local consumers and FDA's District Offices, and to contribute to the agency's policymaking decisions on vital issues.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

May 9, 1983.

[FR Doc. 83-12348 Filed 5-12-83; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 83N–0154]

International Drug Scheduling; Convention of Psychotropic Substances; Benzodiazepines

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) requests interested persons to submit data or comments concerning abuse potential, actual abuse, and medical usefulness of 12 "benzodiazepine" or "minor tranquilizer" drugs. This information will be considered in preparing a response from the United States to the World Health Organization (WHO) regarding the abuse liability of these drugs. WHO will use this information to consider whether to recommend that international restrictions be placed on these drugs. Benzodiazepines are used to treat anxiety or seizure disorders and have a tranquilizing action on the central nervous system. This notice requesting information is required by law.

DATE: Comments by June 13, 1983.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Edwin V. Dutra, Jr., National Center for Drugs and Biologics (HFN–7), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–6490.

SUPPLEMENTARY INFORMATION: The United States is a party to the 1971 Convention on Psychotropic Substances. Article 2 of the Convention on Psychotropic Substances provides that if a party to that Convention or WHO has information about a substance that is not yet under international control, which in its opinion may require such control, it shall so notify the Secretary-General of the United Nations and provide the Secretary-General with information in support of its opinion.

The Controlled Substances Act (CSA) (Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970) provide that, when WHO notifies the United States under Article 2 of the Convention on Psychotropic Substances that it has information that may justify adding a drug or other substance to one of the schedules of that Convention, transferring a drug or substance from one schedule to another, or deleting it from the schedules, the Secretary of State must transmit the notice to the Secretary of the Department of Health and Human Services (HHS). The Secretary of HHS must then publish the notice in the **Federal Register** and provide opportunity for interested persons to submit comments to assist HHS in preparing scientific and medical evaluations about the drug or substance.

Normally, the **Federal Register** notice is published after the Secretary of HHS receives a notice from WHO on behalf of the Secretary-General identifying substances that WHO will consider recommending for possible international control. The United Nations notice usually contains a call for the submission of information on the abuse potential of each identified substance and also requests the submission of any other pertinent or relevant data. FDA has learned from the Department of State that WHO has forwarded such a notice concerning the 12 benzodiazepine substances named below.

Although the official notification from WHO on behalf of the Secretary-General has not been received by the Secretary of HHS, FDA is publishing this **Federal Register** notice at this time to give interested persons a full 30 days to comment on the United Nations' request and at the same time to allow FDA, on behalf of HHS, adequate time to review any submissions from interested persons and to transmit to the United Nations the requested material by July 15, 1983.

When the official United Nation's notification is received by the Department of State and forwarded to HHS it will be published in a subsequent **Federal Register** notice as required by the Controlled Substances Act [21 U.S.C. 811(d)(2)(A)].

Therefore, as required by section 201(d)(2)(A) of the Controlled Substances Act [21 U.S.C. 811(d)(2)(A)], FDA on behalf of HHS invites interested persons to submit data or comments regarding the named benzodiazepine drugs. The 12 minor tranquilizer drugs are clotiazepam, delorazepam, ethyl loflazepate, etifoxine, haloxazolam, loprazolam, lormetazepam, pirenzepine, proprizepine, tibezonium, tofisopam, and zopiclone.

None of these drugs are currently commercially available in the United States nor are any of them currently controlled domestically under the CSA. Also, none of the 12 drugs listed above are currently scheduled internationally.

Data and information received in response to this notice will be included in the materials that HHS forwards to WHO, through the Secretary of State, for WHO's consideration in deciding whether to recommend international control of any of these drugs. Such control could limit, among other things, the manufacture and distribution (import/export) of these drugs, and could impose certain recordkeeping requirements on them.

HHS will not make any recommendations to WHO regarding whether any of these 12 drugs should be subjected to international controls. Rather, HHS will defer such consideration until WHO has made official recommendations to the Commission on Narcotic Drugs, which

VOL 48 ISS 94 MY 13 1983 UMI

are expected to be made in the fall of 1983. Any HHS position regarding international control of these drugs will be preceded by another **Federal Register** notice soliciting public comment on the WHO recommendations, as required by 21 U.S.C. 811(d)(2)(B).

Interested persons may, on or before June 13, 1983, submit to the Dockets Management Branch (address above) written comments regarding this action. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Note.—In the **Federal Register** of April 10, 1981 (46 FR 21447) and May 7, 1982 (47 FR 19793), FDA requested the submission of information similar to the information requested by this notice for 27 other benzodiazepine drugs. In the April 1981 document, FDA requested information about chlordiazepoxide, clonazepam, clorazepate, diazepam, flurazepam, lorazepam, medazepam, nitrazepam, oxazepam, oxazolam, prazepam, and temazepam.

WHO recommended these 12 drugs for international control by the Commission on Narcotic Drugs (CND) at the February 1982 CND meeting. At that CND meeting, however, a vote on these 12 drugs was deferred pending a WHO review of additional substances.

In the May 1982 document, FDA requested information about alprazolam, bromazepam, camazepam, clobazam, cloxazolam, estaolam, fludiazepam, flunitrazepam, halazepam, ketazolam, nimetazepam, nordazepam, pinazepam, tetrazepam, and triazolam. Fourteen of these 15 drugs along with the 12 drugs listed in the April 1981 document were recommended for international control be WHO to the CND at the February 1983 meeting. (WHO did not recommend international control of halazepam.) At that 1983 meeting, however, none of the 26 drugs recommended for control by WHO (of the 27 considered by WHO) received a sufficient number of votes at the CND to be controlled under the treaty. All the previously considered drugs (from April 1981 and May 1982) and the 12 drugs that are the subject of this notice are now expected to be considered together by WHO when making its recommendations to the CND for the possible international control of each member of the entire class at the February 1984 meeting.

The information and comments submitted in response to the April 10, 1981 and May 7, 1982 notices on these other 27 benzodiazepine drugs have been retained by FDA. Thus, it is not necessary for interested persons to resubmit those data for these other 27 drugs. However, any new information on these other 27 drugs, i.e., information generated since those notices were published or information not previously submitted, may be submitted to the Dockets Management Branch (address above).

Dated: May 9, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

Public Health Service

Title V of the Public Health Service Act; Miscellaneous Delegation of Authority

Correction

In the correction appearing on page 19232 in the issue of Thursday, April 28, 1983, in the second column, the reference to "Section 301" should have read "Section 501".

BILLING CODE 1505-01-M

Office of the Secretary

Delegation of Authority Under Social Security Act, As Amended

Notice is hereby given that on April 18, 1983, the Secretary of Health and Human Services delegated to the Inspector General, with the authority to redelegate: (1) The authorities for controlling fraud and abuse in the Department's health care financing program under sections 1128, 1156(b), 1160(b) (as set forth prior to the enactment of the Tax Equity and Fiscal Responsibility Act of 1982, Pub. L. 97-248), and 1862(d) (1) and (2) of the Social Security Act, as amended; and (2) the authorities to take action under sections 1866(b)(2) (D), (E), and (F), and to take actions under section 1866(c)(1) with respect to actions taken under section 1888(b)(2) (D), (E), and (F). The authorities to conduct hearings and to issue regulations were excluded from the delegation.

The Secretary also rescinded previous delegation of these authorities to the Administrator, Health Care Financing Administration.

The delegation provides the Inspector General with additional authority to investigate allegation of fraud and abuse in the Department's health care financing programs and to suspend or exclude certain health care practitioners and providers of health care services from participation in these programs.

Dated: May 3, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4110-12-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-83-1239]

Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, telephone (202) 755-5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Notice of Submission of Proposed Information Collection To OMB

Proposal: CDBG Special Quarterly Status Report.
Office: Community Planning and Development.
Form Number: None.
Frequency of Submission: Quarterly.
Affected Public: State or Local Governments.
Estimated Burden Hours: 19,260.
Status: New.
Contact: Bob Duncan, HUD (202) 755-6306, Robert Neal, OMB, (202) 395-7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 28, 1983.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA-6986-A, AA-6986-B]

Alaska Native Claims Selection; Cape Fox Corp.

In accordance with departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611 (1976) (ANCSA)), will be issued to Cape Fox Corporation for

VOL 48 ISS 94 MY 13 1983 UMI

approximately 428 acres. The lands involved are within T. 74 S., R. 90 E., and T. 75 S., R. 92 E., Copper River Meridian, Alaska.

The decision to issue conveyance will be published once a week, for four (4) consecutive weeks, in the Ketchikan Daily News, upon issuance of the decision. For information on how to obtain copies, contact Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal Government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of the decision by personal service or certified mail, return receipt requested, shall have thirty days from the receipt of the decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt, and parties who received a copy of the decision by regular mail which is not certified, return receipt requested, shall have until June 13, 1983 to file an appeal.

Any party known or unknown who is adversely affected by the decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Managment, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are: Cape Fox Corporation, P.O. Box 8558, Ketchikan, Alaska 99901; Sealaska Corporation, One Sealaska Plaza, Suite 400; Juneau, Alaska 99801.

Ruth Stockie,

Section Chief, Branch of ANCSA Adjudication.

T. 4N., R. 1W., T. 5N., R. 1W.

2. These plats, representing the (1) reestablishment of the record meander lines and survey of accretion and present meander lines of the Pacific Ocean and Humboldt Bay in section 6, T. 4N., R. 1W., and (2) the dependent resurvey of a portion of the south boundary and subdivisional lines, and the reestablishment of the record meander lines, the extension survey of the south boundary over accreted land, the survey of the subdivision and present meanders of the Pacific Ocean and Humboldt Bay, section 31, and Parcel A in section 6, T. 4N., R. 1W., and section 31, T. 5N., R. 1W., Humboldt Meridian, under Group No. 727, California, were accepted April 25, 1983.

3. The plat will immediately become the basic record for describing the land for all authorized purposes. The plat has been placed in the open files and is available to the public for information only.

4. This survey was executed to meet certain administrative needs of this Bureau.

5. All inquiries relating to this land should be sent to the California State Office, Bureau of Land Management, Federal Office Building, 2800 Cottage Way, Room E-2841, Sacramento, California 95825.

Herman J. Lyttge,

Chief, Records & Information Section.

[FR Doc. 83-12890 Filed 5-12-83; 8:45 am]

BILLING CODE 4210-84-M

California; Use Fee Schedule for Permitted Recreation Activities

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice, California; Special Recreation Permit Fees.

SUMMARY: The document establishes the fee schedule for permitted recreation related activities which occur on Federal lands managed by the Bureau of Land Management in California.

EFFECTIVE DATE:

FOR FURTHER INFORMATION CONTACT: John Skibinski, Outdoor Recreation Planner, Bureau of Land Management, (916) 484-4701.

SUPPLEMENTARY INFORMATION: Costs associated with Special Recreation Permit management have risen dramatically over the past several years, as have the costs associated with providing and maintaining the services, facilities and the natural resources where permitted recreation activities occur. In order to continue with a viable recreation use permit program, a greater portion of those costs must be borne by groups and/or individuals who derive the greatest direct benefits from the Bureau's recreation permit programs.

On May 28, 1982, California BLM announced the proposed 1983 recreation fee increases through news releases and other means requesting comments on the proposed fee increases until June 15, 1982. An extension on the comment period was requested by the interested public and was granted until July 15, 1982. After review of the public comments presented, the California State Director found it to be in the best interest of the United States to increase recreation fees. With respect to river management fees, this decision will provide consistency in California between the two major federal land use agencies, the U.S. Forest Service and the BLM.

Pursuant with Section 304 of Pub. L. 94-579 of 1976 (43 U.S.C. 1734) and regulations in 43 CFR 8372.4, the following fees apply:

1. Commercial use fees (other than permits for events that are both commercial and competitive) for all recreation use on rivers managed by the Bureau in California are $3.00 per user day except for the following rivers:

	Fee/user day
South Fork of the American River	$1.50
Sacramento River	2.00

2. Competitive use fees for off road vehicle events and other activities (includes competitive commercial events) are $2.00 per user day or five percent of the gross receipts, whichever is greater;

3. Special area (individual/group/family use permits) fees are $2.00 per user day where the authorized officer determines that fees are required;

4. Noncommercial, noncompetitive (over 50 vehicles) off road vehicle use fees are $2.00 per user day.

The authorized BLM officer may charge higher fees than those listed in the categories above when the anticipated costs of processing, issuing, and monitoring the permit would exceed the minimum fee.

For the purpose of this fee schedule, a "user day" is defined as one person/user in any part of a calendar day. User days are based on actual participants, not spectators, unless the spectators are required by the permittee to pay a fee.

Dated: May 6, 1983.

Ed Hastey,

State Director.

BN	17	40	NW¼NW¼.
T20N, R44E			
BN Sec.	33	240	E½SW¼, SE¼.
BN	35	640	All.

Total acres of BN coal 11,553.24.

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the Bureau of Land Management, at the address shown below. Any adverse comments will be evaluated by the Montana State Director, BLM, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final decision of the Department of Interior.

FOR FURTHER INFORMATION CONTACT: Information related to the exchange, including the environmental assessment and land report, is available for review at the Miles City District Office, P.O. Box 940, Miles City, Montana 59301.

SUPPLEMENTARY INFORMATION: The publication of this notice segregates the affected public lands or interest in lands from settlement, sale, lease, location and entry under the public land laws, including the mining laws but not from

VOL 48 ISS 94 MY 13 1983 UMI

exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976.

This exchange is in the public interest and provides better land management by blocking up the existing checkerboard coal ownership pattern.

The exchange will be made subject to:

1. The reservation to the United States of all minerals except coal in the Federal estate being transferred.
2. All valid existing rights of record.
3. Satisfactory evidence that qualified surface owner consents are available for the lands overlying the federal coal to be exchanged in the North Tract. It must also be shown that qualified surface owner consents are available overlying all coal in the South Tract, with the exception of State owned coal.
4. The Federal Government will require a one percent (1 percent) freestanding royalty on the total production in the North Tract.
5. A four year delay stipulation will be required preventing Meridian from filing for a mine plan or facility siting permit to allow the successful federal bidder an opportunity to develop and organize plans.

This exchange is consistent with Bureau of Land Management policies and planning and has been discussed with State and local officials. The public interest will be served by completion of this exchange.

Dated: May 6, 1983.

Bruce G. Whitmarsh,

Acting District Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Advisory Committee on Minerals Accountability; Monthly Meeting

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of monthly meeting.

SUMMARY: The purpose of the Advisory Committee on Minerals Accountability is to develop over a 1-year period an expanded policy of cooperation with States and Indian tribes in the royalty management area and to develop a detailed plan for carrying out Federal/State/Indian cooperation on a comprehensive basis. The purpose of the Advisory Committee meeting will be to have industry representatives address the Committee on any subject and to voice any complaints or opinions concerning the Royalty Management Program.

The meeting will be open to the public. However, facilities and space to accommodate attendees are limited and persons will be accommodated on a first-come, first-serve basis. Any member of the public may file with the Advisory Committee a written statement concerning the matters to be discussed.

Notice of the next monthly meeting will be published 15 days before the meeting is to take place.

DATE: Wednesday, May 25, 1983, 9:00 a.m.

ADDRESS: Holiday Inn Golden Gateway, 1500 Van Ness Avenue, San Francisco, California.

FOR FURTHER INFORMATION CONTACT: John Sullivan, Department of the Interior, 18th & C Streets, N.W., Room 4216, Washington, D.C. 20240, telephone: (202) 343-3526.

SUPPLEMENTARY INFORMATION: The Advisory Committee was created by the Secretary of the Interior on November 15, 1982 (Order No. 3071).

The Committee will have one or more Executive Sessions at this meeting.

Dated: May 11, 1983.

David C. Russell,

Acting Director, Minerals Management Service.

BILLING CODE 4310-MR-M

National Park Service

Trail Markers; Michigan et al.

AGENCY: National Park Service, Interior.

ACTION: Marking of designated national scenic trail route and notice of intent to secure trademark registration of the trail marker symbol.

In the matter of, Michigan, Minnesota, New York, North Dakota, Ohio, Pennsylvania; intent to utilize trail markers bearing a distinctive symbol to mark segments of the North Country National Scenic Trail and intent thereby to establish use of the marker logo for purposes of securing trademark registration.

SUMMARY: This notice is to advise that the National Park Service will proceed to implement plans for the marking of the North Country National Scenic Trail route established as a component of the National Trails System by Pub. L. 96-199, March 5, 1980. Implementation will establish official use of the specific trail marker symbol design (figure 1) for purposes of securing trademark registration of the design.

DATE: Action described will commence May 13, 1983.

ADDRESS: Written comments should be sent to: Director, National Park Service, Attention: Chief, Park Planning and Special Studies Division, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Jeff Chidlaw, Planner, Park Planning and Special Studies Division, (202) 272-3566.

SUPPLEMENTARY INFORMATION: Uniform marking of each national scenic trail with an appropriate and distinctive symbol is required under provisions of Section 7(c) of the National Trails System Act, Pub. L. 90-543 as amended (82 Stat. 919; 16 U.S.C. 1241 et seq.). In order to prevent proliferation of the distinctive symbol, (figure 1) approved by the North Country National Scenic Trail Advisory Council, and to assure against its use for other than the purpose of marking the scenic trail route the National Park Service will proceed to secure trademark registration under 15 U.S.C. through specific use identifying to the public the designated trail route and the services provided by the Park Service in establishing and maintaining such routes for outdoor recreation and conservation purposes.

(Figure 1)

Trail markers bearing the symbol will be erected at appropriate points where the North Country National Scenic Trail route crosses lands administered by Federal agencies and will be maintained by each Federal agency in accordance with standards established by the Secretary of the Interior. Where the North Country National Scenic Trail route crosses non-Federal lands written cooperative agreements will be entered into with State and local Government agencies for lands under their administration and with private landowners for the erection and maintenance of trail markers to be provided by the Secretary.

Dated: May 3, 1983.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Board for International Food and Agricultural Development; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the fifty-sixth meeting of the Board for International Food and Agricultural Development (BIFAD) on June 1–2, 1983.

On June 1, from 5:30 p.m. to 7:30 p.m. the Board will meet with the BIFAD Support Staff to prepare for the June 2 meeting and consider future staff actions. This meeting will be held in Room 710, National Association of State Universities and Land Grant Colleges, 1 Dupont Circle, Washington, D.C. The meeting will continue from 8:00 a.m. to 8:45 a.m. on June 2, in Room 1207, New State Department Building, 22nd and C Street, NW., Washington, D.C.

On June 2, the regular BIFAD meeting will be held to consider: a report on development and implementation of AID policy on advanced development countries; a staff study of the process for matching university resources and AID project needs; BIFAD recommendations on the study of incentives for university involvement in Title XII programs; university standards of performance on AID projects; increasing use of historically Black Colleges and Universities in AID projects; a status report on SECID resource conservation and utilization project in Nepal; AID policy on "Women in Development"; and a report on activities of the Joint Committee on Agricultural Research and Development (JCARD). This meeting will begin at 9:00 a.m.; recess at 12:00 noon, and reconvene from 1:30 to 3:15 p.m. It will be held in Room 1107, New State Department Building, 22nd and C Streets, NW., Washington, D.C.

The meetings are open to the public. Any interested person may attend, may file written statements with the board before or after the meetings, or may present oral statements in accordance with procedures established by the Board, and to the extent the time available for the meetings permit. An escort from the "C" Street Information Desk (Diplomatic Entrance) will conduct you to the meeting.

Dr. Erven J. Long, Coordinator, Research and University Relations, Bureau for Science and Technology, Agency for International Development, is designated as A.I.D. Advisory Committee Representative at this meeting. It is suggested that those desiring futher information write to him in care of the Agency for International Development, International Development Cooperation Agency, Washington, D.C. 20523, or telephone him at (703) 235–8929.

Dated: May 9, 1983.

Erven J. Long,

A.I.D. Advisory Committee Representative, Board for International Food and Agricultural Development.

BILLING CODE 6116-01-M

Housing Guaranty Program; Investment Opportunity; Barbados

The Agency for International Development (A.I.D.) has authorized guaranties of a loan or loans to the Government of Barbados (Borrower) as part of A.I.D.'s development assistance program. The proceeds of these loans, amounting to Fifteen Million Dollars ($10,000,000), will be used to finance shelter projects for low income families residing in Barbados. The following is the name, address, and telephone number of the representative of the Borrower to be contacted by interested U.S. lenders or investment bankers:

Barbados

Project: 538–HG–002—$10,000,000 Ministry of Finance, Government Headquarters, Bay Street, Bridgetown Barbados
Attention: Martin Cox or Ralph Carvallo
Telephone: (809) 61671 or 63688

Investors should contact the Borrower as soon as possible and indicate their interest in providing financing for this Housing Guaranty project. Following its discussions with interested investor, the Borrower will decide upon a procedure for selecting an investor and will inform interested investors of the procedure to be followed.

Selection of investment bankers and/or lenders and the terms of the loans are initially subject to the individual discretion of the Borrower and thereafter subject to approval by A.I.D. The lenders and A.I.D. shall enter into a Contract of Guaranty covering the loans. Disbursements under the loans will be subject to certain conditions required of the Borrower by A.I.D. as set forth in an implementation agreement between A.I.D. and the Borrower.

The full repayment of the loans will be guaranteed by A.I.D. The A.I.D. guaranty will be backed by the full faith and credit of the United States of America and will be issued pursuant to the authority of Section 222 of the Foreign Assistance Act of 1961, as amended (the "Act").

Lenders eligible to receive an A.I.D. guaranty are those specified in Section 238(c) of the Act. They are: (a) U.S. citizens; (2) domestic U.S. corporations, partnerships, or associations substantially beneficially owned by U.S. citizens; (3) foreign corporations whose share capital is at least 95 percent owned by U.S. citizens; and (4) foreign partnerships or associations wholly owned by U.S. citizens.

To be eligible for an A.I.D. guaranty, the loans must be repayable in full no later than the thirtieth anniversary of the disbursement of the principal amount thereof and the interest rates may be no higher than the maximum rate estabished by A.I.D.

Information as to the eligibility of investors and other aspects of the A.I.D. Housing Guaranty program can be obtained from: Director Office of Housing and Urban Programs, Agency for International Development, Room 625, SA–12, Washington, D.C. 20523, Telephone: (202) 632–9637.

Dated: April 6, 1983.

Sean P. Walsh,

Deputy Director (Acting), Office of Housing and Urban Programs.

BILLING CODE 4710-02-M

INTERNATIONAL JOINT COMMISSION, UNITED STATES AND CANADA

IJC Meetings on Great Lakes Water Uses

The diversions and consumptive uses of Great Lakes waters will be the subject of public meetings to be held in seven Great Lakes communities by the International Joint Commission this June.

The Canadian and United States governments have welcomed the decision of the IJC to initiate a public consultation process on diversions and consumptive uses. Information obtained from the comments of those interested in the matter will be considered by the Commission in preparing a report to the Governments of Canada and the United States pursuant to a Reference received from the Governments in 1977.

Discussion will focus on the report of the International Great Lakes Diversions and Consumptive Uses Study Board, a technical Board of advisors to the Commission, as well as on its broader policy implications, but will also be open to any related issues.

The Board's report to the Commission, released last year, concluded that the greatly increasing consumptive use of Great Lakes water by a wide variety of interests will have a significant effect on the levels of the Lakes in future years, and should be monitored.

In addressing the diversions aspect, the Board found that present diversion rates could be modified without structural changes at existing locations, but concluded that managing diversions to raise extreme low lake levels was not feasible. The Board also concluded that these diversion rates could not be managed to reduce extreme high levels without causing an overall long-term economic loss. The Board did not have a mandate to investigate speculative large scale diversions out of the Great Lakes Basin.

An earlier series of public workshops assisted the Board in preparing its technical report. The present meetings are expected to expand the public discussion. Citizens of both countries may participate in either Canada or the United States. The public is encouraged to send written comments to IJC offices if unable to attend.

The Commission encourages any persons having opinions or points of views on diversions and consumptive uses to participate. Prepared briefs will also be received as is customary, but they should be summarized for verbal presentation.

The following is the schedule and locations:

June 7, 1983—Chicago, Illinois, American Congress Hotel, 532 South Michigan Avenue, Sessions beginning at: 2 p.m. and 7 p.m.

June 8, 1983—Duluth, Minnesota, Radisson Hotel, 505 West Superior Street, Sessions beginning at: 2 p.m. and 7 p.m.

June 9, 1983—Windsor, Ontario, Cleary Auditorium, 201 Riverside Drive West, Sessions beginning at: 2 p.m. and 7 p.m.

June 13, 1983—Cleveland, Ohio, Cleveland Engineering Society, 3100 Chester Avenue, Sessions beginning at: 2:30 and 7 p.m.

June 14, 1983—Rochester, New York, Rochester Inst. of Technology, Webb Auditorium, Sessions beginning at: 2:00 and 7 p.m.

June 15, 1983—Toronto, Ontario, Harbourfront, York Quay Centre, 235 Queen's Quay West, Sessions beginning at: 2:00 and 7 p.m.

June 16, 1983—Cornwall, Ontario, Cornwall Civic Complex, 100 Water Street East, Sessions beginning at: 2:00 and 7 p.m.

Dated: May 10, 1983.

David A. La Roche,

Secretary, United States Section.

INTERSTATE COMMERCE COMMISSION

[No. 38895] [1]

Motor Carriers; International Transport, Inc., et al.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final exemption of existing operations and provisional exemption of future operations.

SUMMARY: The provisional exemption of petitioners' existing operations granted at 47 Fed. Reg. 55537 (December 10, 1982) is made final. Additionally, in accordance with current Commission policy, a provisional exemption of petitioners' future contracts is granted.

DATE: Comments are due on May 31, 1983. The provisional exemption of petitioners' future contracts will become final on June 15, 1983, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: No. 38895, Room 2139, Interstate Commerce Commission, Office of Proceedings, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Suzanne Higgins, (202) 275–7181

[No. 38990 et al.] [1]

Motor Carriers; James S. Batt, d.b.a. Batt Trucking—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final exemption of existing operations and provisional exemption of future operations.

SUMMARY: The provisional exemption of petitioners' existing operations granted at 48 Fed. Reg. 6423 (February 11, 1983) is made final. Additionally, in accordance with current Commission policy, a provisional exemption of petitioners' future contracts is granted.

DATES: Comments are due on May 31, 1983. The provisional exemption of petitioners future contracts will become final June 15, 1983, unless in response to timely filed adverse comments, the Commission issues a future decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: No. 38990 et al., Room 2139, Interstate Commerce Commission,

[1] This proceeding embraces 18 petitions for exemption filed by motor contract carriers: No. 38990, James S. Batt, d/b/a Batt Trucking; No. 38992, W. R. BATTLES, d/b/a Jobbers Freight Service; No. 38993, Enterprise Transporation Company; No. 38994, Lykes Transport, Inc.; No. 38995, Romer, Inc.; No. 38996, Service Transportation, Inc.; No. 38997, Associated Transport Service, Inc. MC–F–15108, RONALD AND FLORENCE WHITEFORD—continuance in control exemption—WHITEFORD NATIONALEASE, INC, d.b.a. DEDICATED TRUCK SERVICE AND WHITEFORD TRUCK LINES, INC. Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423 and (2) Petitioner's representative: Alki E. Scopelitis, 1301 Merchants Plaza East Tower, Indianapolis, IN 46204. Pleadings should refer to No. MC–F–15108. Decided: May 3, 1983. Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C 11343(b)(2), the continuance in control of Whiteford Nationalease, Inc., doing business as Dedicated Truck Service (MC–164764) by Whiteford Truck Lines, Inc. (MC–136635). By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett, Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

MC–F–15151, DICK IRVIN, INC.—purchase exemption—SHOEMAKER TRUCKING COMPANY (Loren Wetzel, trustee-in-bankruptcy). Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423 and (2) Petitioner's representative: David E. Wishney, Attorney at Law, P.O. Box 837, Boise, ID 83701. Pleadings should refer to No. MC–F–15151. Decided: May 6, 1983. Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(2), the purchase by Dick Irvin, Inc. of the interstate operating rights of Shoemaker Trucking Company contained in Docket No. MC–138875 [Sub-Nos. 55, 74F, 93F, 108F, 116F, 127F, 147F, 214F, 239F, 277F, 298, and 299, and paragraphs (1)(m), (7)(g), (13), (16), (19), (22), (45)(b), (45)(d), (51), and (56) of Sub-No. 312X]. By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate

MC–F–15092, APPLE CITY EXPRESS, INC.—purchase exemption—SPECTOR RED BALL, INC. Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423 and (2) Petitioners' representatives for Spector: J. Raymond Chesney, 3177 Irving Blvd., P.O. Box 47407, Dallas, TX 75247. For Apple City: L. W. Ward, P.O. Box AB, Murphysboro, IL 62966. Pleadings should refer to No. MC–F–15092. Decided: May 6, 1983. Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a), the purchase by Apple City Express, Inc., (MC–159973) of that portion of the operating authorities of Spector Red Ball, Inc., set forth in Certificate No. MC–2229, Sub-No. 171, authorizing the transportation of general commodities (with exceptions), over a regular route extending between Memphis, TN, and New Orleans, LA, those portions of Sub-No. 257 at pages 2 through 26, authorizing the regular route transportation of general commodities (with exceptions) and certain specified commodities, and certain limited irregular route transportation, serving numerous points in named midwestern and southern States, those portions of Sub-No. 119 at sheets 1 through 8 and 10 through 14, authorizing the regular route transportation of general commodities (with exceptions) and certain specified commodities, serving named points in Arkansas, Louisiana, and Mississippi, that portion of Sub-No. 254 at sheet 5, authorizing the transportation of refractories, serving points in three named Missouri counties as off-route points, that portion of Sub-No. 258 at sheet 2, authorizing the transportation of general commodities (with exceptions), serving Raymond, MS, and named plant sites in Whitley County, IN, and near Henderson, TN, as off-route points, that portion of Sub-No. 259 at sheet 5, authorizing the transportation of general commodities (with exceptions), serving Frankfort, IN, as an off-route point, that portion of Sub-No. 260 at sheets 3 through 5, authorizing the transportation of general commodities (with exceptions, serving named facilities near Nashville, TN, as an off-route point, and operating over specified alternate routes in Illinois and Kentucky, that portion of Sub-No. 265 at sheets 2 and 3, authorizing the transportation of general commodities (with exceptions), serving named facilities near Brownsville, TN, as an off-route point, and the transportation of lawn and garden equipment and specified related commodities, serving named facilities near Sebastopol, MS, as an off-route point, that portion of Sub-No. 266 at sheets 2 and 3, authorizing the transportation of general commodities (with exceptions), serving named facilities near Murray, KY, as an off-route point and serving Prentiss, MS, as an off-route point, that portion of Sub-No. 267 at sheet 5, authorizing service at Lexington, TN, as an off-route point, that portion of Sub-No. 269 at sheet 3, authorizing the transportation of general commodities (with exceptions), serving Calvert City, KY, as an off-route point, that portion of Sub-No. 131 at sheets 2 and 3, authorizing the transportation of general commodities (with exceptions), serving specified points in Louisiana and Texas, that portion of Sub-No. 182 at sheet 2, authorizing the transportation of general commodities (with exceptions), serving named points in Mississippi and Louisiana over specified alternate routes, and the following certificates authorizing the regular route transportation of general commodities (with exceptions): Sub-Nos. 54 and 116, authorizing service at named Arkansas and Louisiana points, Sub-Nos. 126, 130, and 145, authorizing service at named Louisiana points, Sub-Nos. 136, 139, and 140, authorizing service at named off-route points in Mississippi, and Sub-Nos. 148, 150, 168, 187, and 230, authorizing service at named off-route points in Louisiana. By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitnesses-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

BILLING CODE 7035–01–M

[Finance Docket No. 30158]

Rail Carriers; The Atchison, Topeka and Santa Fe Railway Co.; In Lease Exemption—Toledo, Peoria and Western Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Under 49 U.S.C. 10505, the Interstate Commerce Commission exempts from the prior approval requirements of 49 U.S.C 11343, the Atchison, Topeka and Santa Fe Railway Company's lease of an 11.7–mile Line to the Toledo, Peoria and Western Railroad Company. The lease involves Santa Fe's line between milepost 36.6 at Pekin Junction and milepost 48.3 near Morton, IL.

DATES: This exemption shall be effective on June 13, 1983. Petitions to stay the effectiveness of this decision must be filed by May 23, 1983. Petitions for reconsideration must be filed by June 2, 1983.

ADDRESSES: Send pleadings referring to Finance Docket No. 30158 to:

(1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representative: Michael W. Blaszak, 80 East Jackson Boulevard, Chicago, IL 60604

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

Decided: May 3, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Vice Chairman Sterrett concurred except for the third ordering paragraph. Commissioner Andre would not have imposed a deadline for consummation of the exempted transaction.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–1 (Sub-No. 144)]

Rail Carriers; Chicago and North Western Transportation Company—Abandonment—in Waukesha, Jefferson, and Dane Counties, WI; Notice of Findings

The Commission has issued a certificate authorizing Chicago and North Western Transportation Company to abandon its 48.2-mile rail line between Waukesha, WI (milepost 20.6) and Cottage Grove, WI (milepost 71.0) in Waukesha, Jefferson, and Dane Counties, WI. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) a financially responsible person has offered financial assistance (throughly subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Mr. Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–43 (Sub-No. 99)]

Rail Carriers; Illinois Central Gulf Railroad Company—Abandonment—in Smith and Jones Counties, MS; Notice of Findings

The Commission has found that the public convenience and necessity permit the Illinois Central Gulf Railroad Company to abandon its 10.3 mile rail line between milepost 131.5 near Taylorsville, Smith County, MS, and milepost 141.8 at Soso, Jones County, MS. A certificate will be issued authorizing this abandonment unless within 15 days after this publication the Commission also finds that: (1) a financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Mr. Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Agatha L. Mergenovich,

Secretary.

[Docket No. AB–55 (Sub-No. 67)]

Rail Carriers; Seaboard System Railroad, Inc.—Abandonment—in Orange County, FL; Notice of Findings

The Commission has issued a certificate authorizing Seaboard System Railroad, Inc. to abandom its 10.33-mile rail line from milepost AVB–832.07 near Ococee, to milepost AVB–821.74 at Dr. Phillips, in Orange County, FL. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) a financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

BILLING CODE 7035–01–M

Motor Carriers; Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 40 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions

VOL 48 ISS 94 MAY 13 1983 UMI

stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Please direct status inquiries about the following to Team 2, (202) 275–7030.

Volume No. OP2–210–FC

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC–FC–81344. By decision of May 6, 1983 issued under 49 U.S.C. 10926 and the transfer rules of 49 C.F.R. 1161, Review Board Number 2 approved the transfer to transferee B & B FORWARDING, INC., Torrance, CA, of Permit FF–623, issued March 8, 1983, to transferor, B & B FOREST PRODUCTS d.b.a. B & B FORWARDING, Torrance, CA, authorizing the transportation as a freight forwarder, in connection with the transportation of household goods, baggage, and transportation equipment, between points in the U.S. Representative: Robert J. Gallagher, 1000 Connecticut Ave., NW, Suite 1200, Washington, DC 20036.

MC–FC–81411. By decision of May 6, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1161, Review Board Number 2, approved the transfer to CHRISTIAN CARRIERS, INC. (corporation), Buena Park, CA, of authority issued to RAYMOND W. GILLIAN AND JOSEPH L. MONDERINE, d.b.a. R & L PROPERTIES, CHRISTIAN CARRIERS (partnership) Buena Park, CA, in Certificate MC–153842, , issued June 1, 1982, authorizing the transportation of passengers and their baggage, in the same vehicle with passengers, in round-trip charter operations, beginning and ending at points in Orange County, CA, and extending to points in the United States. Representative Raymond W. Gilligan, 5871 Altura Blvd., Buena Park, CA, 90620.

Please direct status inquiries about the following to Team 4 at (202) 275–7669.

Volume No. OP4–FC–276

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC–FC–81445, filed April 29, 1983. By decision of May 5, 1983 issued under 49 U.S.C. 10926 and the Commission's transfer rules at 49 CFR Part 1161, Review Board Number 3 approved the transfer to Joseph Merola d.b.a. Transport Service, Pardeesville, PA, of Certificate No. MC–158956, issued March 28, 1983, to Joseph Callavini (An Individual), Lattimer, PA, authorizing the transportation of paper and paper products, between points in Columbia County, PA and Gregg County, TX, on the one hand, and, on the other, points in the U.S. (except AK and HI). Representative: Raymond Talipski, 121 S. Main St., Taylor, PA 18517 (717) 344–8030.

Please direct Status inquiries about the following to Team 5 at (202) 275–7289.

Volume No. OP5–FC–216

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC–FC–81437. By decision of May 5, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1161, Review Board Number 1 approved the transfer to ACTION DELIVERY SERVICE, INC., Grand Prairie, TX, of Certificates Nos. MC–150088 Subs 1, 2, 3, 4, 5, 6, 7, 8, and 10, and Permit No. MC–150088 Sub 9, issued September 17, 1981, April 22, 1981, February 9, 1981, February 9, 1981, March 3, 1981, August 7, 1981, November 19, 1981, June 30, 1982, July 6, 1982, and June 17, 1982, respectively, to STERLING TRANSPORT DIVISION, INC., (A. William Brackett, Trustee in Bankruptcy) Grand Prairie, TX, authorizing the transportation of household appliances, air conditioning units, television sets and stands, between points in Pulaski County, AR, on the one hand, and, on the other, points in TX and OK; such commodities as are dealt in or used by retail, variety or department stores, between Memphis, TN, and points in CO, KS, MO, LA, TX, AR, and OK; specified food products between points in named counties in TX, and points in AR, LA, OK, and NM; carpet from points in Hempstead County, AR, to points in Dallas and Tarrant Counties, TX; malt beverages between points in named counties in TX, on the one hand, and, on the other, points in named counties in AR; general commodities, with exceptions, between points in Dallas County, TX, on the one hand, and, on the other, points in TX; and general commodities, with exceptions, between points in the U.S. under continuing contract(s) with Sterling Warehousing & Distribution, Inc., of Grand Prairie, TX. An application for TA has been filed. REPRESENTATIVES: A. William Brackett, Attorney for Transferee, 623 South Henderson, 2nd floor, Fort Worth, TX 76104; and Daniel J. Sherman, Trustee in Bankruptcy, 509 North Montclair, Dallas, TX 75201.

Intent to Engage in Compensated Intercorporate Hauling Operations

This is to provide notice as required by 49 U.S.C. 10524(b) (1) that the named corporations intend to provide or to use compensated intercorporate hauling operations as authorized in 49 U.S.C. 10524(b).

1. Parent corporation and address of principal office: Florida Rock Industries, Inc., 155 East 21st Street, Jacksonville, FL 32206.

2. Wholly owned subsidiaries which will participate in the operations, and address of their respective principal offices:

Rich-E-Mix Concrete Products, Inc., 155 East 21st Street, Jacksonville, FL 32206

Virginia Concrete Company, Inc., 155 East 21st Street, Jacksonville, FL 32206

Cardinal Concrete Company, 155 East 21st Street, Jacksonville, FL 32206

Florida Rock & Tank Lines, Inc., 155 East 21st Street, Jacksonville, FL 32206

Commonwealth Aggregates, Inc., 155 East 21st Street, Jacksonville, FL 32206

Motor Fuel Carriers, Inc., 155 East 21st Street, Jacksonville, FL 32206

Maryland Rock Industries, Inc., 155 East 21st Street, Jacksonville, FL 32206

Breton Bay Water Transportation Co., 155 East 21st Street, Jacksonville, FL 32206.

1. Parent corporation and address of principal office: Fluor Corporation, 3333 Michelson Drive, Irvine, California 92730.

2. Directly and indirectly wholly owned subsidiaries which will participate in the operations and states of incorporation:

(i) Aftermarket Diesel, Inc., a South Carolina corporation
(ii) Deer Park Equipment Company, a California corporation
(iii) Fluor Alaska, Inc., an Alaska corporation
(iv) Fluor Canada Ltd.-Fluor Canada Ltee., a Canada corporation
(v) Fluor Constructors, Inc., a California corporation
(vi) Fluor Distribution Companies, Inc., a California corporation
(vii) Fluor Engineers, Inc., a California corporation
(viii) Fluor Northwest, Inc., an Alaska corporation
(ix) Fluor Pipe and Piling Company, a Delaware corporation
(x) Fluor Power Services, Inc., a Delaware corporation
(xi) Fluor Supply Company, a Texas corporation
(xii) Kilsby-Roberts Co., an Illinois corporation
(xiii) Liquefied Coal Development Corporation, a California corporation
(xiv) Republic Supply Company of California (The), a California corporation.

1. Parent corporation and address of principal office: Guttman Oil Company, Speers Road, Belle Vernon, PA 15012

2. Wholly-owned subsidiaries which will participate in the operations, and State(s) of incorporation: Mid-Penn Refining Company, a Pennsylvania corporation.

BILLING CODE 7035-01-M

[Docket AB–1; Sub-152]

Chicago and North Western Transportation Company—Abandonment—in Blackhawk and Tama Counties, IA; Findings

On April 15, 1983, the Commission issued a certificate authorizing the Chicago and North Western Transportation Company to abandon its 9.3-mile rail line between milepost 28.8 near Buckingham and milepost 38.1 near Hicks, in Blackhawk and Tama Counties, IA. The abandonment certificate will become effective 15 days after this publication unless the Commission also finds that (1) a financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Fiscal Year 1984 Final Planning Estimates for Wagner-Peyser Activities

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice announces fiscal year 1984 Final Planning Estimates for Wagner-Peyser Activities.

FOR FURTHER INFORMATION CONTACT: Richard C. Gilliland, Director, United States Employment Service (Attention: TEEPP) 601 D Street, NW., Washington, D.C. 20213, Telephone: 202/376–6289.

SUPPLEMENTARY INFORMATION: Section 6(b)(5) of the Wagner-Peyser Act, as amended by Pub. L. 97–300, October 13, 1982, requires that the Secretary shall provide final planning estimates to all States not later than May 15, of the fiscal year preceding the year in which the fund will be used. Preliminary planning estimates were made available on March 15 (48 FR 10950), as required by statute.

The revisions to the Act also require that at least 97 percent of the funds appropriated for allotments to States be distributed by the formula provisions contained in Sections 6(a) and (b) of the Act. An amount not to exceed 3 percent of the sums available for allotment shall be reserved by the Secretary in accordance with Section 6(b)(4).

The statute requires that FY 1983 payments available to the States be used to compute each State's relative share of FY 1983 resources. State specific allocation data and fiscal data contained in approved FY 1983 State plans were used for this purpose. Identifiable activities not authorized under the amended legislation were excluded from the data base.

The FY 1984 appropriation request for Wagner-Peyser activities subject to the formula allotment requirements of Section 6 is $707,993,000. Of this amount, $1,712,498 is allotted to Guam and the Virgin Islands in accordance with Section 6(a); $685,040,712 is allotted to States in accordance with the formula in Section 6(b). Calendar year 1982 (January 1982–December 1982) average annual civilian labor force and unemployment data were used in making the formula calculations. The final planning estimates reflect changes to the data base made as a result of recent benchmarking by the Bureau of Labor Statistics.

The Secretary reserved $21,239,790 under the provision of Section 6(b)(4); the distribution of these funds is included in these final planning estimates. Of this total, $8,573,620 was allocated to the 12 States whose relative share decreased from FY 1983 to FY 1984 and which have a civilian labor force (CLF) below 1 million and are below the median CLF density. These States are held harmless at 100 percent of their FY 1983 relative share. The remaining $12,666,120 was distributed to the remaining 23 States losing in relative share from FY 1983 to FY 1984.

Further information regarding the allocation methodology is available upon request.

Signed at Washington, D.C., on May 1, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

Occupational Safety and Health Administration

[V-83-2]

Block 67 Limited

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTIONS: (1) Notice of application for variance and interim order. (2) Grant of interim order.

SUMMARY: This notice announces the application of Block 67 Limited, for variance and interim order pending a decision on the application for variance from the standard prescribed in 29 CFR 1910.66(b)(3), concerning the design requirements of powered platforms for exterior building maintenance.

It also announces the granting of an interim order until a decision is rendered on the application for variance.

DATES: The effective date of the interim order is May 13, 1983. The last date for interested persons to submit comments is June 13, 1983. The last date for affected employers and employees to request a hearing on the application is June 13, 1983.

ADDRESSES: Send comments or requests for a hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third St. & Constitution Ave., NW., Room N-3662, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Mr. James J. Concannon, Director, Office of Variance Determination, at the above address, Telephone: 202-523-7183.

Or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 555 Griffen Square Building, Room 602, Dallas, Texas 75202

U.S. Department of Labor, Occupational Safety and Health Administration, 2320 LaBranch Street, Room 2118, Houston, Texas 77004

Notice of Application

Notice is hereby given that Block 67 Limited, s/Gerald D. Hines Interests, 2100 Post Oak Tower, Houston, Texas, has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance from the standard prescribed in 29 CFR 1910.66(b)(3) powered platforms for exterior building maintenance—design requirements.

The address of the place of employment that will be affected by the application is as follows: Texas Commerce Tower in United Energy Plaza, 600 Travis Street, Houston, Texas 77002.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by 29 CFR 1910.66(b)(3) which states that all new powered platforms for exterior building maintenance shall meet the requirement of Part II and III of ANSI A120.1-1970. The ANSI standard requires that the design of the building or structure face in conjunction with the design of the building contact member on the working platform shall provide continuous contact of the working platform with the building or structure in order to absorb wind forces and horizontal components of dead and live loads on the working platform.

The face of the building shall be provided with continuous T-rails, indented mullions, or equivalent guides which will positively engage building contact members on the working platform. On buildings where the working platform has a rise of less than 130 feet, guides providing positive engagement are not required.

The applicant contends that its design does not allow for continuous vertical mullions and, therefore, does not provide continuous T-rails or indented mullions required by ANSI A120.1-1980, since the building height is approximately 1000 feet.

The applicant proposes to use a system of intermittent stabilization of his Type "F" (four-point suspension) powered platform on the the southwest building facade to prevent horizontal translation of the platform with respect to the face of the building. The system will consist of stainless steel round head machine screws, threaded into stainless steel building anchors located in the facade's spandrel panel at every third floor (approximately 40 feet) from the ninth to the fifty-fourth floor, and at every other floor (approximately 26 feet) from the fifty-fourth floor to the seventy-second floor. They are spaced horizontally, in vertical rows, to allow a stabilization for each of the two suspension wire ropes near each end of the platform. The stablization attachment, a quick connect—quick disconnect tie, each containing a fixed length lanyard and two nylon rollers to allow positioning of the suspension wire ropes vertically parallel to the face of the building, will be attached to each anchor as each elevation of tie-in anchorage is reached during tthe decent of the working platform. The process will be reversed as the platform ascends. The removal will be assured in that the platform will be provided with electrical interlocks to interrupt power to its hoist(s) in the event either interlock contacts a stabilizer during the ascent of the platform. The platform will also be equipped with building facade rollers.

The platform has been designed for two modes of operation on the building's southwest facade. The first is the main 40 foot by 2½ foot platform, which will be used for window cleaning and light maintenance of the curtain wall area between the two end buttresses. The second mode is a small auxiliary triangular shaped platform, approximately 54 inches by 80 inches overall, which will be secured on the inboard side at one or the other end of the main platform, to allow the triangular shaped masonry buttresses to be occasionally serviced. The maximum projection inboard will be 54 inches. The appendage platform will be positively secured to the main platform by L-shaped hooks and gravity lock pins.

The applicant contends that its alternative method of securing the powered platform, as described above, is as safe and healthful as the requirements of the standard from which a variance is sought.

All interested persons, including employers and employees who believe they would be affected by the grant or denial of the application for variance are invited to submit written data, views, and arguments relating to the pertinent application no later than June 13, 1983. In addition, employers and employees who believe thay would be affected by a grant or denial of the variance may request a hearing on the application no later than June 13, 1983, in conformance with the requirements of 29 CFR 1905.15. Submission of written comments and requests for a hearing should be in quadruplicate, and must be addressed to the Office of Variance Determination at the above address.

Grant of Interim Order

The applicant also requested an interim order to be effective until a decision is made on the application for variance.

It has been determined that an interim order from 29 CFR 1910.66(b)(3) shall be issued. Therefore, it is ordered, pursuant to the authority in section 6(d) of the Occupational Safety and Health Act of 1970, in 29 CFR 1905.11(c) and in Secretary of Labor's Order No. 8-76 (41 FR 25059) that Block 67 Limited is hereby subject to the following conditions in lieu of complying with 29 CFR 1910.66(b)(3) of the Occupational Safety and Health Standards:

1. The employer shall assure that all procedures required for the proper functioning of the intermittent stabilization system are carried out, in particular the requirement for connecting the lanyards attached to the suspension ropes to the building anchors during the descent of the platform.

2a. The main platform shall be no greater than 40 feet in length nor 2½ feet in width.

2b. The main platform with its appendage shall not be more than 40 feet long and 7 feet in overall width at the appendage.

3. The weight of the platform (no load) shall be no less than 1500 pounds.

4. The platform shall have openings or gaps to facilitate upward air flow.

5. The suspension rope angulation shall be designed into the suspension system and the tie-in lanyard so that the platform shall exert a minimum pressure of approximately 8 pounds against the face of the building.

6. The anchors in the face of the building shall be spaced vertically a maximum distance of 43 feet apart. The minimum tensile strength of the anchor bolt shall be 600 pounds.

7. The powered platform shall not be operated when the wind velocity is 25 miles per hour or greater. At the very least, an instrument which will accurately measure wind velocity shall be located on the roof of the building.

8. Operators shall be provided with full-body, parachute-type, harnesses, which include leg straps, connected to a lanyard of no greater than 3 feet in length. This lanyard shall, in turn, be connected by means of an automatic blocking rope grab to a horizontal wire rope fastened in a taut manner across the rear of the platform. The ends of this wire rope shall be secured to structural members of the platform, and the mid-point of the rope secured to the rear guardrail. This system, consisting of the harness, the lanyard, the anchorage points, and any additional hardware involved, shall at a minimum be capable of withstanding a static load of 5000 pounds.

9. The platform shall be provided with a sensing device that will interrupt its power supply in the event that the platform contacts the tie-in lanyard assembly, to prevent further ascent and ensure that the lanyard assembly can be disengaged from the building anchor.

10. The intermittent stabilization system including its building anchor, shall have a factor of safety of 4 against failure.

11. Operators shall have knowledge of and training in the operation of the intermittent stabilization system.

12. The employer shall comply with all provisions in this interim order and, in addition, shall not be relieved from compliance with all other applicable provisions of 29 CFR 1910.66.

Block 67 Limited shall give notice of this grant of interim order to employees affected thereby by the same means required to be used to inform them of the application for variance. This interim order shall become effective on May 13, 1983. The Assistant Secretary may revoke this interim order at any time if the applicant does not comply with any requirement of the interim order or the relevant standards; or if other information indicates that revocation of the interim order is warranted. Unless revoked, the interim order will remain in effect until a decision is made on the application for variance.

Signed at Washington, D.C., this 10th day of May 1983.

Thorne G. Auchter,

Assistant Secretary of Labor.

BILLING CODE 4510-26-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the Department issuing this form.

The title of the form.

The Agency form number, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small business or organizations are affected.

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202-523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room S-5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202-395-6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Safety Defect Record of Self-Propelled Equipment
MSHA 422R
Other—each shift equipment is to be used
Businesses or other institutions; small business or organization
SIC: Multiple
14,900,000 responses; 2,731,666 hours

Requires operator before placing self-propelled equipment into operation to make a visual and operational check of various primary operating systems affecting safety, i.e., brakes, lights, tires,

VOL 48 ISS 94 MY 13 1983 UMI

steering, and related items. Any safety defects found are reported to the responsible supervisor who is required to make a record of the reported defects and schedule repairs of same.

Ventilation Tests and Examinations in Underground Coal Mines
MSHA 222R, 223R, 226R, 227R, 228R
Other and weekly
Businesses or other institutions; small business or organization
SIC 111 and 121
4,173,698 responses; 1,893,200 hours
3 forms

Standards require that main fans be inspected daily; that preshift examinations be made for hazardous conditions; that examinations be made weekly for hazardous conditions, including tests for methane and for compliance with mandatory health and safety standards; that weekly tests be made of air entering the main intakes and leaving the main returns, etc.; and that tests be made at 4-hour intervals for methane.

Inspections of Fire-Fighting Equipment
MSHA 419R
On occasion
Businesses or other institutions; small business or organization
SIC: Multiple
14,900 responses; 715,200 hours

Firefighting equipment inspection needs vary with the type of equipment, use, environmental exposure, and manufacturer's recommendations. Inspections are necessary to assure protection intended when the need arises. The equipment involved includes firefighting trucks, hoses, hydrants, fittings, extinguishers, sprinklers, etc.

Rock Bolt Test Procedures and Rock Bolt Anchorage Capacity Tests
MSHA 418R
On occasion
Businesses or other institutions; small business or organization
SIC: Multiple
450 responses; 7,200 hours

Rock bolting is an acceptable method of ground support in a majority of the strata encountered in underground mines. The anchorage method varies with the strata and individual methods may vary within a single mine. Each anchorage method must be tested to assure the ultimate competency of the ground and to prevent ground tested to assure the ultimate competency of the ground and to prevent ground falls.

First Aid Training for Supervisory Employees
MSHA 219R
Annually
Businesses or other institutions; small business or organization
SIC: 111 and 121
5,419 responses; 2,710 hours

Used in training new employees in fundamentals of first aid and to practice such in event of a mine accident to prevent furhter injury to a miner.

BILLING CODE 4510–43–M

LIBRARY OF CONGRESS

American Folklife Centers Board of Trustees; Meeting

In accordance with Pub. L. 94–463, the Board of Trustees of the American Folklife Center announces its meeting to be held in two sessions: one, on Thursday afternoon, June 2, 1983 from 2–4:30 p.m., and another on Friday Morning, June 3, 1983, from 9:30–1:00 p.m., in the Whittall Pavilion of the Library of Congress. The meeting will be open to the public. It is suggested that persons planning to attend this meeting as observers contact Eleanor Streb, American Folklife Center (202) 287–6590.

The American Folklife Center was created by the U.S. Congress with passage of Pub. L. 94–201, the American Folklife Preservation Act, in 1976. The Center is directed to "preserve and present American folklife" through programs of research, documentation, archival preservation, live presentation, exhibition, publications, dissemination, training, and other activities involving the many folk cultural traditions of the United States. The center is under the general guidance of a Board of Trustees composed of members from Federal agencies and private life widely recognized for their interest in American folk traditions and arts.

The Center is structured with a small core group of versatile professionals who both carry out programs themselves and oversee projects done by contract by others. In the brief period of the Center's operation it has begun energetically to carry out its mandate with programs that provide coordination, assistance, and model projects for the field of American folklife.

Raymond L. Dockstader,

Deputy Director, American Folklife Center.

BILLING CODE 1410–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Quality Assurance During Construction; Meeting

The ACRS Subcommittee on Quality Assurance During Construction will hold a meeting on June 1, 1983, Room 1046, 1717 H Street, NW, Washington, DC.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff., Persons desiring to make oral statements should notify the Cognizant Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendence.

The agenda for subject meeting shall be as follows:

Wednesday, June 1, 1983—8:30 a.m. Until the Conclusion of Business

The Subcommittee will be briefed by the NRC Staff on its quality assurance initiatives, including those related to the "Ford Amendment" of Pub. L. 97–415. The Subcommittee will also review the priorities given in NUREG–0933, A Prioritization of Generic Safety Issues, to generic items related to construction quality assurance. Finally, the Subcommittee will discuss with the Institute of Nuclear Power Operations (INPO), INPO's efforts related to construction quality assurance (e.g., Construction Projects Evaluation Program).

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. David C. Fischer, (telephone 202/634–1414) between 8:15 a.m. and 5:00 p.m., EST.

Dated: May 9, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

[Docket Nos. 50–313 and 50–368]

Arkansas Power & Light Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amended Nos. 79 and 46 to Facility Operating License Nos. DPR–51 and NPF–6 issued to Arkansas Power & Light Company (the licensee), which revised the Technical Specifications (TS) for operation of Arkansas Nuclear One, Unit Nos. 1 and 2 respectively (the facilities), located in Pope County, Arkansas. The amendments are effective as of the date of issuance.

The amendments revise the TS to require verification of leak rate testing of the purge valves.

The applications for the amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendments.

For further details with respect to this action, see (1) the applications for amendments dated September 17, 1981 and March 12, 1982, as supplemented March 16, 1983, (2) Amendment Nos. 79 and 46 to Facility Operating License Nos. DPR–51 and NPF–6, and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555 and at the Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 3rd day of May, 1983.

For the Nuclear Regulatory Commission.

Charles M. Trammell,

Acting Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83–12938 Filed 5–12–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–368]

Arkansas Power & Light Co.; Issuance of Amendment to Facility Operating License and Negative Declaration

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 47 to Facility Operating License No. NPF–6 issued to Arkansas Power & Light Company (the Licensee), which revised the Technical Specifications for operation of Arkansas Nuclear One, Unit 2 (the facility), located in Pope County, Arkansas. The amendment was effective as of the date of issuance.

The amendment revises the Environmental Technical Specifications (Appendix B to Facility Operating License), to delete the requirement for remote aerial surveillance monitoring and to delete the requirement to conduct bird impaction event studies.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for the revised Technical Specifications and has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action other

BILLING CODE 7590-01-M

[Docket No. 50-335]

Florida Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 57 to Facility Operating License No. DPR-67, issued to Florida Power & Light Company (the licensee), which revised Technical Specifications for operation of the St. Lucie Plant, Unit No. 1 (the facility), located in St. Lucie County, Florida. The amendment is effective as of the date of issuance.

The amendment provides for the removal of the chlorine detectors from the control room air intakes because the main source of chlorine at the site no longer exists.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 9, 1983 (2) Amendment No. 57 to License No. DPR-67 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

[FR Doc. 83-12940 Filed 5-12-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-410]

Niagara Mohawk Power Corp., et al.,[1] Nine Mile Point Nuclear Station, Unit 2; Receipt of Application for facility operating License; Availability of Applicant's Environmental Report; Consideration of Issuance of Facility Operating License; and Opportunity for Hearing

Notice is hereby given that the Nuclear Regulatory Commission (the Commission) has received an application for a facility operating license from the Niagara Mohawk Power Corporation, acting for itself and as agent for Rochester Gas & Electric Corporation, Central Hudson Gas & Electric Corporation, New York State Electric & Gas Corporation and Long Island Light Company (the applicants) for a facility operating license. Niagara Mohawk Power Corporation has sole responsibility for design, procurement, construction, operation and all related functions with respect to Nine Mile Point Nuclear Station, Unit 2, a boiling water nuclear reactor (the facility) located on the southeast shore of Lake Ontario, in the town of Scriba, Oswego County, New York. The reactor is designed to operate at a core power level of 3323 megawatts thermal, with an equivalent net electrical output of approximately 1080 megawatts.

Pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in 10 CFR Part 51, the applicants filed an environmental report as part of the application. The report, which discusses environmental considerations related to the proposed operation of the facility, is being made available at the State Clearinghouse, New York State Division of the Budget, State Capitol, Albany, New York 12224 and Central New York Regional Planning and Development Board, Midtown Plaza, 700 East Water Street, Syracuse, New York 13210.

After the environmental report has been analyzed by the Commission's staff, a draft environmental statement will be prepared. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the **Federal Register**, a notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The notice will also contain a statement to the effect that any comments of Federal agencies and State and local officials will be made available when received. The draft environmental statement will focus only on any matters which differ from those previously discussed in the final environmental statement prepared in connection with the issuance of the construction permit. Upon consideration of comments submitted with respect to the draft environmental statement, the Commission's staff will prepare a final environmental statement, the availability of which will be published in the **Federal Register**.

The Commission will consider the issuance of a facility operating license to the applicants which would authorize the Niagara Mohawk Power Corporation to posses, use and operate the Nine Mile Point Nuclear Station Unit 2 in accordance with the provisions of the license and the technical specifications appended thereto, upon: (1) The completion of a favorable safety evaluation of the application by the Commission's staff; (2) the completion of the environmental review required by the Commission's regulations in 10 CFR Part 51; (3) the receipt of a report on the applicant's applications for a facility operating license by the Advisory Committee on Reactor Safeguards; and (4) a finding by the Commission that the

[1] Rochester Gas & Electric Corporation, Central Hudson Gas & Electric Corporation, New York State Electric & Gas Corporation and Long Island Lighting Company

application for the facility license, as amended, complies with the requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations in 10 CFR Chapter 1. Construction of the facility was authorized by Construction Permit No. CPPR-112, issued by the Commission on June 24, 1974.

With regard to Executive Order 11988, Floodplain Management, (See Volume 42, **Federal Register** 26921, 1977) the Nine Mile Point Nuclear Station Unit 2 facility must identify structures and construction activities located on the floodplain. The subject of floodplain management will be discussed in the Commission's environmental statement referenced above.

Prior to issuance of an operating license, the Commission will inspect the facility to determine whether it has been constructed in accordance with the application, as amended, and the provisions of the contruction permit. In addition, the license will not be issued until the Commission has made the findings reflecting its review of the application under the Act, which will be set forth in the proposed license, and has concluded that the issuance of the license will not be inimical to the common defense and security or to the health and safety of the public. Upon issuance of the license, the applicants will be required to execute an indemnity agreement as required by Section 170 of the Act and 10 CFR Part 140 of the Commission's regulations.

By June 13, 1983 the applicants may file a request for a hearing with respect to issuance of the facility operating license and any person whose interest may be affected by this proceeding may file a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceeding" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary of the Commission, or designated Atomic Safety and Licensing Board, will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend his petition, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, the petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW, Washington, DC by June 13, 1983. A copy of the petition must also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Conner & Wetterhahn, P. C., Suite 1050, 1747 Pennsylvania Avenue, NW, Washington, DC 20006, Attention: Troy B. Conner, Jr., Esquire, attorney for the applicants. Any requests for additional information regarding the content of this notice should be addressed to the Chief Hearing Counsel, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer, or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(iv) and 2.714(d).

For further details pertinent to the matters under consideration, see the application for the facility operating license, including the Final Safety Analysis Report and the Environmental Report, forwarded on April 6, 1983, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, DC and at the Penfield Library, State University College at Oswego, Oswego, New York 13126. As they become available, the following documents may be inspected at the above locations: (1) the safety evaluation report prepared by the Commission's staff; (2) the draft environmental statement; (3) the final environmental statement; (4) the report of the Advisory Committee on Reactor Safeguards (ACRS) on the application for facility operating license; (5) the proposed facility operating license; and (6) the technical specifications, which will be attached to the proposed facility operating license.

Copies of the proposed operating license and the ACRS report, when available, may be obtained by request to the Director, Division of Licensing, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of the Commission's staff safety evaluation report and final environmental statement, when available, may be purchased at current rates, from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161.

Dated at Bethesda, Maryland this 2nd day of May 1983.

BILLING CODE 7590-01-M

[Docket No. 50-336]

Northeast Nuclear Energy Co., et al.; Issuance of Amendment To Facility Operating License

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 85 to Facility Operating License No. DPR-65, issued to The

VOL 48 ISS 94 MAY 13 1983 UMI

Connecticut Light and Power Company, The Hartford Electric Light Company, Western Massachusetts Electric Company, and Northeast Nuclear Energy Company (the licensees), which temporarily revised the Technical Specifications (TS) for operation of the Millstone Nuclear Power Station Unit No. 2 (the facility) located in the Town of Waterford, Connecticut. The amendment was effective upon the date of its issuance.

The amendment added a footnote to 3.9.4.a to allow the use of a temporary equipment hatch door to maintain containment integrity during fuel movement or core alterations while the Unit is shutdown for Cycle 6 refueling.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated April 25, 1983, (2) Amendment No. 85 to License No. DPR-65 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Waterford, Connecticut. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 5th day of May, 1983.

BILLING CODE 7590-01-M

[Docket Nos. 50-282 and 50-306]

Northern States Power Co. (Prairie Island Nuclear Generating Plant Unit Nos. 1 and 2); Exemption

I

The Northern States Power Company (the licensee) is the holder of Facility Operating License Nos. DPR-42 and DPR-60 which authorize operation of the Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2. These licenses provide, among other things, that they are subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

The facility comprises two pressurized water reactors at the licensee's site located in Goodhue County, Minnesota.

II.

On November 19, 1980, the Commission published a revised Section 10 CFR 50.48 and a new Appendix R to 10 CFR Part 50 regarding fire protection features of nuclear power plants (45 FR 76602). The revised Section 50.48 and Appendix R became effective on February 17, 1981. Section III. of Appendix R contains fifteen subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. One of these fifteen subsections, III.G., is the subject of this exemption request. Specifically, Subsection III.G.2 requires that one train of cables and equipment necessary to achieve and maintain safe shutdown be maintained free of fire damage by one of the following means:

a. Separation of cables and equipment and associated non-safety circuits of redundant trains by a fire barrier having a 3-hour rating. Structural steel forming a part of or supporting such fire barriers shall be protected to provide fire resistance equivalent to that required of the barrier;

b. Separation of cables and equipment and associated non-safety circuits of redundant trains by a horizontal distance of more than 20 feet with no intervening combustibles or fire hazards. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area; or

c. Enclosure of cables and equipment and associated non-safety circuits of one redundant train in a fire barrier having a 1-hour rating. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area.

III

By letter dated June 30, 1982 as supplemented by letter dated October 22, 1982, the licensee requested an exemption from the requirements of Subsection III.G.2 of Appendix R in nine (9) fire areas, as follows.

Train A Hot Shutdown Panel; Instrument Air Room and Auxiliary Feedwater Pump Room, Fire Area 31

Train B Hot Shutdown Panel; Instrument Air Room and Auxiliary Feedwater Pump Room, Fire Area 32

Auxiliary Building Ground Floor Level Unit 1, Fire Area 58

Auxiliary Building Ground Floor Level Unit 2, Fire Area 73

Auxiliary Building Mezzanine Level Unit 2, Fire Area 74

Unit 1 Normal Switchgear Room, Fire Aea 37

Auxiliary Building Operating Level Unit 1, Fire Area 60

Auxiliary Building Operating Level Unit 2, Fire Area 75

Auxiliary Building Mezzanine Level Unit 1, Fire Area 59

The acceptability of the exemption request for five of these fire areas is addressed below. More details are contained in the NRC staff's related Safety Evaluation (SE) dated May 4, 1983, which is included herein by reference.

IV

Train A Hot Shutdown Panel; Instrument Air Room and Auxiliary Feedwater Pump Room, Fire Area 31

Train B Hot Shutdown Panel; Instrument Air Room and Auxiliary Feedwater Pump Room, Fire Area 32

The licensee requested and exemption from Subsection III.G.2 to the extent that these areas lack twenty feet separation free of intervening combustibles between components of redundant trains needed for safe shutdown or one hour fire rated enclosure of one of the redundent trains.

Fire Area 31 contains Motor Control Centers MCC-2A1 and 2A2, #12 (motor-driven Unit 1) and #22 (turbine-driven Unit 2) Auxiliary Feedwater Pumps, #123 Instrument Air Compressor with associated equipment, and "A" Train Hot Shutdown Panel for Units 1 and 2. One of the two motor control centers (either 2A1 or 2A2) is necessary for safe shutdown as are the auxiliary feedwater pumps. It should be noted, however, that opposite train pumps are located in Fire Area 32, thereby ensuring separation by 3-hour fire rated barriers. Of the three instrument air compressors, one is located in Fire Area 31, representing Division A. The other two compressors (Division B) are located in Fire Area 32, again providing separation by 3-hour fire rated barriers.

Fire Area 32 contains Motor Control Centers MCC-1A1 and MCC-1A2 (only one of which is necessary for safe shutdown), #11 (turbine driven, Unit 1) and #21 (motor driven, Unit 2) Auxiliary Feedwater Pumps, #121 and #122 Instrument Air Compressors with associated equipment, and "B" train Hot Shutdown Panel for Units 1 and 2.

The safe shutdown evaluation identified the coexistence of redundant power and control cables required for safe shutdown with less than twenty feet horizontal separation. The redundant cables are installed in open horizontal cable trays between 16 and 18 feet above the floor, and within 3 feet of the ceiling. The redundant cables cross over one another and are separated by approximately one foot at the crossover. The licensee proposes to install thermal barriers on the top and bottom of the Division B cable trays and wrap all Division B conduits in one-hour fire rated barriers. By letter dated October 22, 1982, the licensee proposed to modify the existing automatic sprinkler systems presently installed at the ceiling level, to also provide area sprinkler coverage in accordance with NFPA-13 below the cable trays and piping in the areas.

The combustibles in Fire Area 31 are lubricating oil and cable insulation. The combustibles comprise a fuel load of 10,714 BTU/sq. ft., which if totally consumed, would correspond to a fire severity of 8 minutes on the ASTM E-119 standard time temperature curve.

The combustibles in Fire Area 32 are lubricating oil and cable insulation. The combustibles comprise a fuel load of 16,954 BTU/sq. ft., which if totally consumed, would correspond to a fire severity of 12 minutes on the ASTM E-119 standard time temperature curve.

The fire protection in these areas consists of automatic sprinklers, ionization smoke detectors, nearby standpipe hose stations that could service both fire areas and portable fire extinguishers. Other features in these areas offering compensation for the lack of 20 feet separation or one hour barriers are the thermal shield installed on both the top and bottom of the Division B cable trays. The thermal shields are not considered equivalent to a one-hour fire rated barrier, as they may only inhibit fire damage for several minutes. However because of the low in-situ combustible fuel loads, we find for anticipated transient combustible exposure fires the thermal shields will protect the Division B cable trays from direct flame impingement or a descending hot layer for a reasonable time period until the automaic sprinklers installed at the ceiling level and below the cable trays are activated to mitigate the effects of the fire.

In addition, the low in-situ fuel load in conjunction with the proposed thermal shields provides reasonable assurance that the automatic detection and sprinkler systems will be activated before the redundant cables are damaged.

Based on our evaluation, we conclude that with the modifications proposed by the licensee and the existing level of safety in the Train A and Train B Hot Shutdown Panel, Instrument Air and Auxiliary Feedwater Pump Rooms (Fire Areas 31 and 32) are equivalent to the requirements specified in Subsection III.G.2 of Appendix R and therefore the licensee's exemption request is granted for these fire areas.

Unit 1 Normal Switchgear Room, Fire Area 37; Auxiliary Building Operating Level Unit 1, Fire Area 60; Auxiliary Building Operating Level Unit 2, Fire Area 75

These areas do not comply with subsection III.G.2 because they do not have an automatic fire suppression system. There is no alternative shutdown capability independent of these areas. Fire protection in these areas consists of ionization smoke detectors standpipe hose stations, and portable fire extinguishers. In addition all redundant motor control centers and associated cables entering and leaving these areas are horizontally separated by at least 20 feet or more.

The licensee justifies the request for the exemption from Subsection III.G.2 on the basis of (1) all cables are qualified to IEE-383, (2) the in-situ combustible loadings are light, and (3) ionization smoke detection is provided in each area.

We agree with the licensee that, because there are negligible in-situ combustibles in these areas, any postulated fire would be limited to transient combustible material. Hazardous quantities of transient combustibles would not be expected in these fire areas for several reasons. First, the areas are not adjacent to or near any major plant traffic route. Second, maintenance and operations in these areas do not involve the use of combustible materials. Third, accessibility to these areas is restricted to personnel performing essential duties in the areas because of potential radiation hazards. On this basis, we agree with the licensee that any fires in these areas resulting from transient combustibles would be of limited severity and duration. The installed early warning detection system would be able to promptly detect incipient fire conditions, and the separation between redundant trains in each area will maintain the intergrity of the cables and equipment until the fire brigade is able to respond and to extinguish the fire. The fire brigade should be capable of reaching each of these areas within a few minutes after an alarm is received in the control room. It is our opinion that this combination of protective features provides reasonable assurance that one train of equipment necessary for safe shutdown will be maintained free of fire damage.

Based on our evaluation, the level of existing protection for Fire Areas 37 Unit 1 Normal Switchgear Room, Fire Area 60 Auxiliary Building Operating Level, Unit 1 and Fire Area 75 Auxiliary Building Operating Level, Unit 1 provides a level of fire protection equivalent to the requirements specified in Subsection III.G.2 of Appendix R. Therefore, the exemption from the requirements specified in Subsection III.G.2 for these fire areas is granted.

V.

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or common defense and security and is otherwise in the public interest and hereby grants an exemption from the requirements of Subsection III.G.2 of Appendix R to 10 CFR Part 50 to the extent discussed in Section IV above.

The NRC staff has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 4th day of May, 1983.

BILLING CODE 7590–01–M

[Docket Nos. 50–338 and 50–339]

Virginia Electric and Power Co.; Issuance of Amendments to Facility Operating Licenses

The Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 47 and 30 to Facility Operating License Nos. NPF–4 and NPF–7 issued to the Virginia Electric and Power Company (the licensee) for operation of the North Anna Power Station, Units No. 1 and No. 2 (the facility) located in Louisa County, Virginia. The amendments are effective as of the date of issuance.

The amendments revise the audit frequencies of the North Anna Power Station Emergency Plan and Security Plan and their implementing procedures to provide for a review at least once per twelve (12) months by the Quality Assurance Department. The amendments are administrative in nature and do not involve a safety related matter.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in these license amendments. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated November 22, 1982; (2) Amendment Nos. 47 and 30 to Facility Operating License Nos. NPF–4 and NPF–7 and (3) the Commission's related letter dated May 4, 1983. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and at the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901. A copy of items (2) and (3) may be obtained upon request to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 4th day of May 1983.

BILLING CODE 7590–01–M

[Docket No. [50–266 and 50–301]

Wisconsin Electric Power Co.; Issuance of Amendment to Facility Operating Licenses

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 73 to Facility Operating License No. DPR–24 and Amendment No. 78 to Facility Operating License No. DPR–27 Issued to Wisconsin Electric Power Company (the Licensee), which revised Technical Specifications for operation of Point Beach Nuclear Plant, Unit Nos. 1 and 2 (the facilities) located in the Town of Two Creeks, Manitowoc County, Wisconsin. The amendments are effective upon the date of issuance.

The amendments allow temporary isolation of the shared motor driven auxiliary feedwater pumps for a unit during periods of startup, shutdown and surveillance testing provided the turbine driven auxiliary feedwater pumps are operable and capable of automatically delivering flow.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments does not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated March 24, 1983, (2) Amendment Nos. 73 and 78 to License Nos. DPR–24 and DPR–27, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Joseph Mann Library, 1516 16th Street, Two Rivers, Wisconsin 54241. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

OFFICE OF PERSONNEL MANAGEMENT

Federal Prevailing Rate Advisory Committee Annual Report; Notice of Availability

Pursuant to the provisions of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) and 41 CFR Part 101–6, notice is hereby given to the availability of the Federal Prevailing Rate Advisory Committee 1982 Annual Report.

The report summarizes the activities and recommendations of the Committee to the Director, Office of Personnel Management in dealing with the Federal prevailing rate systems for craft, trade, and labor employees paid from either appropriated or nonappropriated funds during calendar year 1982.

Single copies of the report will be furnished without charge. Multiple copies can be furnished at a fair and equitable fee upon written request addressed to the Chairman, Federal Prevailing Rate Advisory Committee, Office of Personnel Management, Room 1340, 1900 E Street, N.W., Washington, D.C. 20415.

The report may be otherwise examined and/or copies obtained at the above office and address between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday, legal holidays excluded.

William B. Davidson, Jr.,

Chairman, Federal Prevailing Rate Advisory Committee.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13224; 812–5421]

Bankers National Life Insurance Co. et al.; Application for Order Granting Exemptions

May 9, 1983.

Notice is hereby given that Bankers National Life Insurance Company ("Bankers National"), Bankers National Variable Account B ("Variable Account B"), a separate account registered under the Investment Company Act of 1940 ("Act") as a unit investment trust, and BNL Securities Inc. (collectively, "Applicants"), 1559 Littleton Road, Parsippany, N.J. 07054, filed an application on January 5, 1983 and amendments thereto on March 16, 1983, April 15, 1983, and May 2, 1983 for an order of the Commission pursuant to Section 6(c) of the Act granting exemptions from the provisions of Sections 2(a)(32), 2(a)(35), 22(c), 26(a), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rule 22c–1 thereunder to the extent necessary to permit the transactions described in the application and pursuant to Section 11 of the Act approving the terms of certain offers of exchange. All interested persons are referred to the application and amendments on file with the Commission for a statement of the facts and representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder for a statement of the relevant provisions.

Bankers National established Variable Account B for the purpose of funding certain variable annuity contracts which it intends to offer. Purchase payments under the contracts less a front-end sales load and applicable permium taxes, are allocated to a sub-account of Variable Account B investing in either the BNL Money Market Portfolio or the BNL Government Securities Portfolio of the Bankers National series Trust (the "Portfolios"). Contractowners will be permitted to transfer accumulated contract values between sub-accounts. Applicants state that the following deductions will be made from contract values: (i) A contract administrative charge of $36.00 per contract on each contract anniversary or upon total redemption of a contract prior to a contract anniversary; (ii) a mortality risk premium equal on an annual basis to 0.75% of the daily net asset value of Variable Account B; (iii) a transfer processing fee of $5.00 for each transfer; and (iv) any applicable premium taxes.

Applicants assert that the mortality risk premium is reasonable in relation to the risk assumed under the contracts, is consistent with the protection of investors in that it is designed to be competitive while not exposing Bankers National to undue risk of loss, and falls within the range of similar charges under comparable variable annuity products. In this respect, applicants represent that they reviewed the prospectuses of several comparable products to determine whether the charges were reasonable in relation to industry practice. Bankers National has examined other comparable variable annuity contracts and has determined that the mortality risk premium is less than or equivalent to the risk charges assessed in those other contracts. Applicants represent that they have reviewed the contracts and registration statements of other separate accounts offering variable annuity contracts with comparable provisions and guarantees, which include pre-retirement death benefits, guaranteed annuity rates, non-guaranteed administrative charges and mortality charges. Based upon this review, applicants have concluded that the mortality risk premium is fair and reasonable. Applicants further represent that they will maintain and preserve at their offices, available to the Commission, the list of variable annuity contracts reviewed by them and the description of the basis upon which Applicants determined those contracts to be comparable. Applicants further represent that the contract administrative charge and transfer processing fee have been set at a level no higher than the estimated actual costs of administering the contracts and without expectation of profit.

Section 6(c) of the Act provides, in pertinent part, that the Commission may exempt any person from any provision of the Act or its rules and Regulations if and to the extent necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants request, pursuant to that provision, that they be granted exemptions from the provisions of sections 26(a) and 27(c) to allow: (i) The assets of variable account B to be held by the custodian, First Pennsylvania Bank, in open account in lieu of actual share certificates, and under an agreement that does not create a trust; (ii) deduction of the mortality risk premium; (iii) deduction of the contract administrative charge; (iv) the imposition of the transfer processing fee; and (v) deduction for premium taxes. Applicants also request exemptions from the provisions of Sections 2(a)(32), 2(a)(35), 22(c), 27(c)(1), and 27(d) of the Act and Rule 22c–1 thereunder to the extent necessary to permit the imposition of the full contract administrative charge upon total redemption prior to a contract anniversary date.

Finally, Applicants request approval pursuant to Sections 11(a) and 11(c) of the Act to the extent requested to permit the transfer between the Portfolios described in the application.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 31, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

Self-Regulatory Organization; Boston Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

May 9, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and

VOL
48
ISS
94
MAY
13
1983
UMI

Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Moog, Inc.
Class A Common Stock, $1 Par Value (File No. 7-6626)
UAL, Inc.
Convertible Preferred Series B, No Par Value (File No. 7-6627)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 31, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12971 Filed 5-12-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 22926; 70-6821]

Central Power and Light Co.; Proposed Issuance and Sale of Adjustable Rate Preferred Stock at Competive Bidding

May 6, 1983.

Central Power and Light Company ("CP&L"), 120 North Chaparral St., Corpus Christi, Texas 78401, an electric utility subsidiary of Central and South West Corporation, a registered holding company, has filed a post-effective amendment to a declaration previously filed with this Commission pursuant to Sections 6 and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42 and 50 promulgated thereunder.

By prior order in this proceeding (HCAR No. 22873, March 8, 1983), the Commission authorized CP&L to issue and sell $100 million principal amount of first mortgage bonds and reserved jurisdiction over a proposal to issue and sell up to 500,000 shares of preferred stock at competitive bidding, with a fixed dividend rate, in one or more series from time to time through December 31, 1983. The declaration has now been amended to seek authorization to sell all or part of the preferred stock either with a fixed dividend rate or an adjustable dividend rate, depending on market conditions at the time of sale.

With regard to the adjustable rate preferred stock, the dividend rate for the initial dividend payment period will be a fixed percentage. Thereafter, the adjustable dividend rate will be determined quarterly on the basis of a certain percentage ("reset-amount") above or below the highest of (1) the average of the two most recent weekly per annum market discount rates for three-month U.S. Treasury bills, as published by the Federal Reserve Board during a specified period prior to each dividend payment period, (2) the average yield to maturity for actively traded marketable U.S. Treasury fixed interest rate securities (adjusted to constant maturities of ten years) during a specified period prior to each dividend payment period, or (3) the average yield to maturity for actively traded marketable U.S. Treasury fixed interest rate securities (adjusted to constant maturities of twenty years) during a specified period prior to each dividend payment period. In no event will the effective annual dividend rate, as adjusted in any quarter, be less than 5% or greater than 15%.

In the event that any series of preferred stock is sold with an adjustable dividend rate, the terms of such series will include a prohibition for five years against redeeming such series with funds derived from the issuance of equity or debt securities at a lower effective cost of financing than the effective annual dividend cost to CP&L based upon the initial dividend rate for the appropriate series.

CP&L intends to issue and sell the preferred stock through a primary shelf registration program in accordance with Rule 415 of the Securities Act of 1933 (17 CFR 230.417). When specific provisions relating to the initial dividend period and the reset amount have been determined, except as indicated hereafter, CP&L proposes to employ alternative competitive bidding procedures in accordance with the Commission's statement of policy pursuant to Rule 50(a)(5) under the Act (HCAR No. 22623, September 2, 1982). CP&L states, however, that the sales of additional preferred stock may require the assistance of underwriters, dealers or agents if market conditions at the time of the offering of the securities are unfavorable. Accordingly, CP&L may amend this filing to seek an exemption from Rule 50 to offer the preferred stock through either negotiated or private sales.

The declaration, as amended by the post-effective amendment, and any further amendments thereto are available for public inspection through the Commission's Office of Public Reference. Any interested persons wishing to comment or request a hearing should submit their views in writing by June 1, 1983, to the Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above and proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration as now amended or as it may be further amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13221; 812-5506]

Fidelity Tax Exempt Money Market Trust; Application for Order Granting Exemption

May 6, 1983.

Notice is hereby given that Fidelity Tax Exempt Money Market Trust ("Applicant"), 82 Devonshire Street, Boston, Massachusetts 02109, an open-end, diversified management investment company, filed an application on March 24, 1983, and an amendment thereto on April 29, 1983, pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act"), for an order of the Commission amending a previous order dated December 26, 1979 (Investment Company Act Release No. 10999), which exempted the Applicant from Section 2(a)(41) of the Act and the provisions of Rules 2a-4 and 22c-1 thereunder. The requested amended order would grant an exemption from Section 12(d)(3) of the Act to permit Applicant to acquire rights to sell its portfolio securities to broker-dealers and would exempt Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit it to value such rights in the

manner proposed in the application. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below. Such persons are also referred to the Act and the Rules thereunder for the complete text of those provisions thereof from which an exemption is being sought.

The application states that under the previous order Applicant may compute its net asset value per share according to the amortized cost method subject to certain conditions, including, inter alia, a requirement that Applicant neither (a) purchase any instrument with a remaining maturity of greater than one year (except that Project Notes may have a maturity not to exceed 375 days), nor (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. Applicant states that the conditions contained in its existing order comply in all respects with proposed Rule 2a-7 under the Act.

Applicant now requests that the previous order be amended to permit it to purchase securities together with a right to resell then to brokers or dealers at an agreed upon price or yield within a specified period prior to the maturity date of such securities ("stand-by commitments") and to value such commitments in the manner proposed in the application. Applicant states that it intends to enter into stand-by commitments solely for the purpose of maintaining portfolio liquidity. It represents that its acquisition of stand-by commitments will not affect the valuation or assumed maturity of the underlying municipal obligations which would continue to be valued at amortized cost.

Section 6(c) of the Act provides, in part, that the Commission upon application may conditionally or unconditionally exempt any person, security or transaction or any class or classes of persons, securities or transactions, from any provision or provisions of the Act or of the rules thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

According to the application, the stand-by commitments will have the following features: (1) They will be in writing and will be physically held by the Applicant's custodian; (2) they may be exercisable by the Applicant at any time or during specified periods prior to the maturity of the underlying security; (3) they will be entered into only with dealers, banks and broker-dealers who, in the judgment of the Board of Trustees, present an minimal risk of default; (4) Applicant's right to exercise them will be unconditional and unqualified; (5) although they may not be transferable, municipal obligations purchased subject to such commitments could be sold to a third party at any time, even though the commitment was outstanding; and (6) their exercise price will be (i) Applicant's acquisition cost of the municipal obligations which are subject to the commitment (excluding any accrued interest which the Applicant paid on their acquisition), less any amortized market premium or plus any amortized or original issue discount during the period Applicant owned the securities, plus (ii) all interest accrued on the securities since the last interest payment date during the period the securities were owned by the Applicant.

The Applicant states that it intends to acquire stand-by commitments solely to facilitate portfolio liquidity and does not intend to exercise its rights thereunder for trading purposes. Applicant further states that since it values its municipal obligations on an amortized cost basis, the amount payable under a stand-by commitment will be substantially the same as the value assigned by Applicant to the underlying security. Applicant submits there is little risk of an event occurring which would make amortized cost valuation of its portfolio securities inappropriate. In the unlikely event that the market or fair value of securities in its portfolio were not substantially equivalent to their amortized cost value, the securities may, in the discretion of the Trustees, be valued on the basis of available market information and held to maturity. In such event, however, Applicant expects to refrain from exercising the stand-by commitments in such a situation to avoid imposing a loss on a dealer and jeopardizing Applicant's business relationship with that dealer.

If necessary and advisable, the Applicant states that it will pay for the stand-by commitments, either separately in cash or by paying a high price for portfolio securities which are acquired subject to the commitment. As a matter of policy, the total amount "paid" in either manner for outstanding stand-by commitments held in Applicant's portfolio will not exceed ½ of 1% of the value of its total assets calculated immediately after any stand-by commitment is acquired.

It is contended that the acquisition of stand-by commitments will not affect the Applicant's net asset value per share and will not pose new investment risks. It is further contended that it is difficult to evaluate the likelihood of use or the potential benefit of a stand-by commitment. Therefore, it is expected that Applicant's Trustees will determine that stand-by commitments have a "fair value" of zero, regardless of whether any direct or indirect consideration was paid. Where the Applicant has paid for a stand-by commitment, its cost will be reflected as unrealized depreciation for the period during which the commitment is held. In addition, Applicant states that for purposes of complying with the condition of its amortized cost order that the dollar-weighted average maturity of its portfolio shall not exceed 120 days, the maturity of portfolio security shall not be considered shortened or otherwise affected by any stand-by commitment to which such security is subject.

Applicant represents that the relationship between it and the dealer will be comparable to a fully collateralized broker-dealer repurchase agreement or security loan and that the risk of loss that would result from the failure of a broker or dealer to fullfill its obligation under the stand-by commitment is not qualitatively different from the risk of loss faced by an investment company holding securities pending settlement after having agreed to sell the securities to a broker or dealer in the ordinary course of business. It is contended that Applicant's acquisition of stand-by commitments will not meaningfully expose its assets to the entrepeneurial risks of the investment banking business. Applicant further states that it will not acquire stand-by commitments to promote reciprocal practices, to encourage the sale of its share, or to obtain research services.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 31, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

VOL 48 ISS 94 MAY 13 1983 UMI

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12994 Filed 5-12-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19747; File No. SR-OCC-83-10]

Filing and Immediate Effectiveness of Proposed Rule Change by Options Clearing Corporation

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 21, 1983, the Options Clearing Corporation ("OCC") filed with the Securities Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change reduces the fees applicable to clearing options on Government National Mortgage Association certificates, U.S. Treasury bills, bonds and notes, bank certificates of deposit, foreign currencies, stock indices, and other underlying non-equity instruments on which OCC may undertake to issue, clear and settle options in the future. The proposal, which reduces the fees for market-maker/specialist scratch trades from $.05 contract to $.015 per contract and for all other trades from $.40 to $.075 per contract, is designed to reflect more accurately the operating costs of OCC's non-equity options system based on current and anticipated volume levels. OCC believes that the proposed fee schedule allocates reasonable fees in an equitable manner among OCC's Clearing Members since the costs associated with the clearance of non-equity options are borne by those Clearing Members that participate in the clearance of non-equity options. Accordingly, OCC believes that the proposed rule change is consistent with Section 17A(b)(3)(D) of the Act.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of the Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested person are invited to submit written datn, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street N.W., Washington, D.C. 20549. Reference should be made to File No. SR-OCC-83-10.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in acordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street, N.W., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspectin and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12976 Filed 5-12-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19746; File No. SR-NSCC-83-5]

Filing and Immediate Effectiveness of a Proposed Rule Change by the National Securities Clearing Corporation.

May 9, 1983.

The National Securities Clearing Corporation ("NSCC") filed a proposed rule change on April 20, 1983, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934, that establishes the Funds Only Settlement service ("FOSS"). Under new NSCC Rule 41, NSCC participants must use FOSS to effect New York City delivery to, and receipt from other NSCC participants of items not related to securities ("FOSS items"), *e.g.*, marks-to-the-market related to member-to-member stock loan activity. Previously, NSCC participants used NSCC's Envelope Settlement Service ("ESS") to effect delivery and receipt of those items. FOSS items will not include securities or due bills. Thus, the effect of the proposal is to create a physically and legally separate delivery vehicle for FOSS items and to permit ESS to be used exclusively for the delivery of securities-related items.

FOSS's proposed operating procedures contained in new NSCC Rule 41 are almost identical to the procedures for ESS in NSCC Rule 9, § 1. For example, FOSS items, like ESS items, will be delivered inside envelopes with attached credit lists. FOSS envelopes and credit lists, however, will be distinctively colored for easy identification. The only significant procedureal differences between ESS and FOSS are that (1) FOSS envelope deliveries can be made for the present only at NSCC's New York City facilities; (2) each FOSS envelope may be used to charge the account of a single receiving NSCC participant and can contain no more than five different FOSS items; and (3) a receiving NSCC participant, in the case of any irregularity or error, may adjust the questioned FOSS item directly with the delivering NSCC member.

In addition, the proposal amends NSCC's Statement of Policy respecting NSCC's guarantee of ESS debits or credits. Previously, NSCC indicated in the Statement that NSCC would not guarantee debits and credits regarding items not related to securities which had been delivered or received through ESS. Under the proposal, the Statement is amended to clarify that NSCC's guarantee for securities-related debits and credits extends only to ESS items and does not cover items processed through FOSS.

Finally, the proposal includes FOSS fees and adjusted ESS fees. For each FOSS envelope delivered, received or reclaimed, NSCC will charge $.35 per envelope. NSCC has increased its per envelope ESS delivery charge from $.35 to $.45 during the "night zone," from $.50 to $.65 during the "early a.m. zone" and from $1.00 to $1.25 during the "late a.m. zone." NSCC states in its filing that these fee revisions are necessary because certain costs connected with ESS, such as bar code reader equipmen., guard service and insurance, do not apply to FOSS, and, as a result, will need to be spread over reduced ESS activity. The propsed FOSS fees reflect the lower estimated costs for operating FOSS independently from ESS.

NSCC believes that FOSS will benefit both NSCC and its participants in several ways. First, NSCC believes that separation of FOSS from ESS will enable NSCC to monitor more effectively the value of ESS activity, payment of which is guaranteed by NSCC under its Rules. Because of this enhanced monitoring capability, NSCC should be able to track more accurately its potential financial exposure from ESS activity. Second, because NSCC's potential financial exposure should be more readily identifiable, NSCC should be able to tailor its safeguarding mechanisms to that exposure, *e.g.*, NSCC might be able to adjust the portion of its participants' clearing fund obligations related to ESS usage. Third, because of the proposal, NSCC should be better able to locate and control pending ESS and FOSS items and to take appropriate action under its Rules regarding those items. *See, e.g.*, NSCC Rules 9 and 12. As a result, NSCC and its participants should have enhanced protection against financial exposure from participant default.

In its proposal, NSCC states that the proposed rule change is consistent with the Securities Exchange Act of 1934 in that the proposal will facilitate the prompt and accurate clearance and settlement of securities transactions, while assuring the safeguarding of securities and funds which are in the custody or control of NSCC or for which it is responsible.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Reference should be made to File No. SR-NSCC-83-5.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12979 Filed 5-12-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19744; SR-MSTC-82-19; SR-MCC-82-15]

Midwest Securities Trust Company ("MSTC") and Midwest Clearing Corporation ("MCC"); Order Approving Proposed Rule Change

May 9, 1983.

On September 10 and October 4, 1982, MSTC and MCC, respectively, filed with the Commission pursuant to Section 19(b)(2) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(2) ("Act") and Rule 19b-4 thereunder, proposed changes to MSTC's and MCC's audit rules. These changes provide that: (1) the annual financial statements of MSTC and MCC be audited in accordance with generally accepted auditing standards by a firm of independent public accountants selected by MSTC's and MCC's Board of Directors, respectively; and (2) a study and evaluation of the system of internal accounting control pertaining to participants' security positions and related money balances be conducted on an annual basis by independent public accountants in accordance with standards established by the American Institute of Certified Public Accountants. MSTC's and MCC's existing rules and proposed changes are identical to one another and each consist of two sections.

Notice of the proposed rule changes together with their substantive terms was given, with regard to MSTC, by publication of a Commission Release (Securities Exchange Act Release No. 19615, March 18, 1983) and by publication in the **Federal Register** (48 FR 12879, March 28, 1983) and with regard to MCC, by publication of a Commission release (Securities Exchange Act Release No. 19614, March 18, 1983) and by publication in the **Federal Register** (48 FR 12880, March 28, 1983).

The amendments to the first section of MSTC's Rule 17 and MCC's Rule 23 adopt the language of the American Institute of Certified Public Accountants with respect to the auditing of financial statements of corporations.

The amendments to the second section provide that a study and evaluation of the system of internal accounting control pertaining to participants' security positions and related money balances be conducted annually by independent public accountants in accordance with standards established by the American Institute of Certified Public Accountants. These changes expand the scope of work performed by MSTC's and MCC's independent public accountants. The amendments also allow MSTC and MCC flexibility in the timing and degree of physical count and confirmation verification of participants' security positions and open transactions. This procedure is consistent with the manner in which other clearing agencies perform count and confirmation verification. Additionally, MSTC and MCC have stated that the language "participants' security positions and related money balances" encompasses all activities that they perform for their participants and, in particular, all activities performed within the MST System. The MST System is an automated securities processing and reporting system that provide a variety of services for MSTC's and MCC's participants, including trade recording and processing, settlement, depository and other special services.

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies and, in particular, the requirements of Section 17A of the Act. In addition, the Commission finds that the proposed rule changes are consistent with the guidelines as set forth in Securities Exchange Act Release No. 16900 regarding the registration of clearing agencies and, in particular, with respect to the scope and period of the study and evaluation of the system of internal accounting control.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule changes be, and they hereby are, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

VOL 48 ISS 94 MY 13 1983 UMI

[Release No. 19743; SR-MSRB-82-11]

Municipal Securities Rulemaking Board; Order Approving Proposed Rule Change

May 9, 1983.

The Municipal Securities Rulemaking Board ("MSRB"), 1150 Connecticut Avenue, N.W., Washington, D.C., 20036, submitted on July 23, 1982, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to require the managing underwriter of a new issue of municipal securities to ensure that an application is made for the assignment of CUSIP numbers to the new issue and to ensure that the assigned CUSIP numbers are affixed to or imprinted on the certificates of a new issue. It is the MSRB's belief that the generalized use of the CUSIP numbering system in the clearance and processing activities of the municipal securities industry will contribute to the improved efficiency of such activities and will enable dealers to place greater reliance on the CUSIP identification of these securities.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 18959, August 13, 1982) and by publication in the **Federal Register** (47 FR 36737, August 23, 1982). All written statements filed with the Commission and any person relating to the proposed rule change were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the public in the Commission's Public Reference Room.

Of the seven comment letters received by the Commission on the proposed rule change five supported[1] and two opposed, the proposed rule change.[2] The two commentators opposed to the proposed rule change view the eligibility criteria for assignment of CUSIP numbers as being overly inclusive. Under the proposed rule, the managing underwriter will be required to obtain a CUSIP number for any new issue which meets one of the following criteria:[3] (1) the par value of the issue is at least $500,000; (2) the par value of the issue is at least $250,000 and the issuer has outstanding debt in excess of $250,000; or (3) the issuer has outstanding debt in excess of $500,000, and a CUSIP subscriber requests assignment of a number to an issue regardless of par amount. Both commentators noted that, in their experience, bond issues of $500,000 are marketed locally and are frequently bought by one investor who keeps the issue until maturity, thus assignment of CUSIP numbers would impose a cost without a commensurate benefit. While this observation applies to any bond issue which is bought and held to maturity by one investor, the goal of the proposed rule is to affix CUSIP numbers to as large a universe as is practicable thereby encouraging the use of and reliance upon CUSIP numbers. Indeed, when the MSRB first published this proposed rule change,[4] a number of commentators felt that the proposed eligibility criteria would omit a substantial number of new issues and thereby limit the effectiveness of the rule. In light of these views, the MSRB decided to leave the eligibility criteria as initially proposed and consider changing the eligibility criteria as a separate matter.[5]

The MSRB also received a comment letter raising a potential anticompetitive aspect of the proposed rule change.[6] The commentator questioned the appropriateness of requiring underwriters to provide the information required by Rule G–34 solely to the CUSIP Service Bureau rather than providing the information to "all interested parties." The MSRB, in its contract with the CUSIP Service Bureau,[7] addressed this concern. The contract provides for limited use of the information provided pursuant to Rule G–34.[8] If the information is to be used for any other purpose or made available to any other person, the CUSIP Service Bureau is required to make the information available to all interested parties at the same time.

The commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a self-regulatory organization and, in particular, the requiremnts of Section 15B of the Act and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[9]

George A. Fitzsimmons,

Secretary.

[Release No. 19742; SR-MSRB-83-2]

Municipal Securities Rulemaking Board; Order Approving Proposed Rule Change

May 9, 1983.

The Municipal Securities Rulemaking Board ("MSRB"), 1150 Connecticut Avenue, N.W., Washington, D.C. 20036, submitted on March 8, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to require inclusion of the CUSIP number on the customer confirmation for any municipal issue to which a CUSIP number has been assigned. The MSRB believes that the rule change will promote more accurate identification of and more efficient transfer of municipal securities held by customers.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 19647, April 4, 1983) and by publication in the **Federal Register** (48 FR 15357, April 8, 1983). All written statements filed with the Commission and all written communications between the Commission and any person relating to the proposed rule change were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the public at the Commission's Public Reference Room.

The Commission received one comment letter on the proposed rule change, which was in favor of the change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a self-regulatory organization and, in particular, the requirements of Section 15B and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[1]

George A. Fitzsimmons,

Secretary.

[Release No. 19636A; SR-PSE-83-3]

Pacific Stock Exchange, Inc.; Order Approving Proposed Rule Change

May 9, 1983.

On January 28, 1983, Securities Exchange Act Release No. 19636 was issued approving a proposed rule change by the Pacific Stock Exchange, Inc. ("PSE") 618 Spring Street, Los Angeles, CA 90014, to amend PSE Options Floor Procedure Advice B–6, concerning a market maker's use of floor brokers to effect transactions for the market maker's account. The advice was amended to provide, among other things, that a market maker "if possible" prepare a written order ticker. The **Federal Register** publication of the release, 48 FR 14796, April 5, 1983, incorrectly referred to a "floor broker" as the subject of this exchange requirement; the correct designation should be "market maker".

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George a. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 19222; 811–699]

Pligrowth Fund, Inc.; Application for Order

May 6, 1983.

Notice is hereby given that Pligrowth Fund, Inc. ("Applicant"), Two Shell Plaza, 777 Walker, Suite 2000, Houston, TX 77002, registered as an open-end, diversified, management investment company under the Investment Company Act of 1940 ("Act"), filed an application on January 24, 1983, for an order of the Commission pursuant to Section 8(f) of the Act, declaring that it has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it was organized under the laws of Delaware and registered under the Act on November 11, 1955. The application further states that on March 22, 1982, Applicant's Board of Directors approved a Plan and Agreement of Merger ("Plan") pursuant to which Applicant and Southwestern Investors, Inc., would be merged into Plitrend Fund, Inc. ("Merger"). On June 11, 1982, a Notice of a Special Meeting of Stockholders, Prospectus/Proxy Statement, and Proxy Card were mailed to holders of record of Applicant's capital stock as of May 26, 1982. At that Special Meeting, held on July 23, 1982, Applicant's stockholders approved and adopted the Plan, and the Merger was consummated on July 26, 1982. The application also states that Applicant has no assets and no shareholders, is not a party to any litigation or administrative proceedings, and is not engaged in any business activities other than those necessary for the winding-up of its affairs.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and that upon the effectiveness of such order, the registration of such company under the Act shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 31, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83–12988 Filed 5–12–83; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–19739; File No. SR–AMEX–82–22, Amdt. No. 3]

Self-Regulatory Organizations; Proposed Rule Change by American Stock Exchange, Inc. Relating to Stock Index Options

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 2, 1983 the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. ("Amex" of the "Exchange") is amending File No. SR–AMEX–82–22 to make certain revisions to the "Information Technology" index and the "Oil and Gas" index, which were proposed in that submission as underlying indices for Exchange-traded options. The Exchange is also redesignating the "Information Technology" index as the "Computer Technology" index.

The Exchange is also proposing to establish $100 million equivalent value as the ceiling for position limits (to be expressed in terms of numbers of option contracts) which the Exchange may establish in respect of options on industry indices. (For the purpose of establishing position limits, the dollar value of a position is deemed to be the product of the current index group value and the index multiplier times the

VOL 48 ISS 94 MAY 13 1983 UMI

number of contracts on the same side of the market.)

In addition, the Exchange is proposing to adopt a Commentary under its rule governing stock index option trading rotations, halts and suspensions (Rule 918C) to provide that, in the case of options on an industry index, an opening trading rotation may not be commenced until underlying stocks accounting for at least 50% of the aggregate market value of all of the stocks on which the index is based have opened for trading in the primary market(s) for such stocks, and that trading in such options will be halted if trading has been halted or suspended in the primary market(s) for any combination of underlying stocks accounting for 20% or more of the current index group values.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of adjusting the group of stocks comprising the proposed "Information Technology" index as originally filed is to concentrate the focus of the index more specifically on corporations which are strongly involved in the computer industry. The index has, accordingly, been redesignated as the "Computer Technology" index. The "Oil and Gas" index has been modified to add Texas Oil and Gas Corp., and to delete General American Oil.

The Exchange is proposing to fix $100 million equivalent dollar value as the ceiling for industry index option position limits in order to establish position limits for industry index options at a level which would bear an appropriate relationship to position limits which the Commission has approved for options on broad-market stock indices and for options on individual stocks. With respect to the Oil and Gas and Computer Technology index options, the Exchange is proposing to establish 8,000 contracts as the initial position and exercise limits.

[1] Although the Commission has approved minimum customer margin requirements applicable to "uncovered" short positions in options on broad market indices, the appropriate margin for options on industry indices has not yet been determined. *See* Securities Exchange Act Release Nos. 19587 (especially footnote 17) and 19686 (March 10, 1983 and April 18, 1983), 48 FR 11193 and 17425 (March 16, 1983 and April 22, 1983). *See* File Nos. SR-CBOE-82-20 and SR-Amex-82-20.

The Exchange is proposing to adopt the standards herein proposed regarding openings and trading halts for industry index options because Rule 918C contemplates that the Exchange will establish such standards for each stock index option approved for trading on the Exchange, and the Exchange believes that the proposed standards are comparable to those adopted in regard to other stock index options.[1]

The Exchange believes that the implementation of trading in industry index options and, in particular, in options on the proposed Computer Technology and Oil and Gas indices, under the Exchange's general rules governing stock index options (Part V, Section 11 of the Exchange's rules) as proposed to be amended by this submission would be consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange. Such trading would specifically comport with Section 6(b)(5) of the Act, in that members of the public would be provided with useful new hedging and trading opportunities under a scheme of regulation designed to facilitate the maintenance of a fair and orderly market, prevent fraudulent and manipulative acts and practices, and promote just and equitable principles of trade.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule changes will not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section.

Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 6, 1983.

George A. Fitzsimmons,

Secretary.

Exhibit A.—Computer Technology Index (Previously designated as "Information Technology" Index)

Chart I attached hereto lists the stocks included in the Computer Technology index, together with information as to the exchanges on which they are listed, the exchanges on which options on those stocks are traded, and the price per share, number of shares outstanding, and market value of each stock. Italics indicate the names of stocks which have been added to the Information Technology index in connection with converting that index into the Computer Technology index.

Chart II lists the stocks which have been deleted from the Information Technology index in connection with converting that index into the Computer Technology index, together with the same categories of information included in Chart I.

BILLING CODE 8010-01-M

[Release No. 34-19675A; File No. SR-NASD-83-1]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on January 20, 1983, the National Association of Securities Dealers, Inc. ("Association") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to supplement its earlier notice published in 48 FR 17166 (April 21, 1983) and solicit comments on the additional issues presented in this notice.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change adds a new section to Schedule D to Article XVI of the Association's By-Laws for the purpose of implementing a system for the exchange of information on direct participation program (primarily limited partnership) securities ("System"). The provisions of the proposed rule change describe qualifications for subscribers to the System and the securities on which information may be entered into the System.

II. Self Regulatory Organization's Statement Regarding the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these comments may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

This proposed rule change is the result of many months study by the Association's Real Estate Committee of possible means for developing a system for the exchange of information on direct participation program securities, during which a survey of members was conducted in early 1980 to determine interest in such a System. Almost 20

VOL 48 ISS 94 MAY 13 1983 UMI

percent of the membership responded, with 69 percent favoring establishment of a System.

In order to implement such an information system, the Association is proposing to amend Schedule D to Article XVI of the Association's By-Laws to incorporate certain technical rules as new Part XV. This proposed rule change is consistent with Sections 15A(b)(6) and 15A(b)(11) of the Securities Exchange Act of 1934, as amended ("Exchange Act").

Description of System

The proposed rule change would enable the Association to establish an "electronic bulletin board" that will provide a means of communications for an exchange of information but no execution capability. Broker/dealers participating in the System will not be required to maintain firm, continuous or two-sided quotations and will not necessarily function as market-makers in the normal sense. The System will be accessed through NASDAQ terminals and will provide subscribing members with on-line ability to enter and update indications of interest in any security approved for the System and to query a data base to review information on individual securities or groups.

Analysis of Proposed Amendment to Schedule D to By-Laws

Following is a discussion of the provisions of proposed Part XV to Schedule D.

Section A: General

Section A contains a general prohibiton on the entry of information into the System except in accordance with the proposed rule.

Section B: Definitions

Section B incorporates definitions of "direct participation program system," "eligible broker/dealer," "authorized security," and "trading unit" into the proposed rule. The terms defined in Section B are, for the most part, self-explanatory. The term "trading unit" is defined to be the minimum number of direct participation program securities which can be transferred as a unit pursuant to the terms contained in the partnership agreement of the program.

Section C: Eligible Broker/Dealers

Paragraph 1 of Section C sets forth the qualifying criteria which a broker/dealer must meet in order to be considered eligible to enter information into the System. The first two criteria, Subparagraphs 1.a. and b., are the familiar requirements that a broker/dealer must be registered with the Securities and Exchange Commission and a member in good standing of the Association, as well as qualified with the Association to conduct a general securities business or a business in direct participation programs.

Subparagraph 1.c. of Section C requires that a broker/dearler must maintain net capital of at least $25,000 to be eligible to enter information into the System. The Association's interpretation of the $25,000 net capital requirement relates only to actual capital held and not to the firm's ability to hold customer funds or securities. Under this interpretation, a firm can elect to participate in the System by obtaining the requisite additional capital, although the firm is not qualified to handle customer funds and securities.

In addition, the Association has determined that broker/dealers unable to meet the $25,000 net capital standard may be able to arrange to have access to the system through other broker/dealers. Under this interpretation, a firm without sufficient net capital may be able to enter into a relationship with a firm with the requisite $25,000 net capital to clear the transaction in the System.

Paragraph 2 of Section C establishes the general requirement that a broker/dealers entering information into the System must have reasonable grounds to believe that the information represents a bona fide indication of interest in the purchase or sale of a trading unit of securities. In addition, where the indication of interest is for the sale of a trading unit, the broker/dealer must have reasonable grounds to believe that the unit will be transferred to a purchaser.

Section D: Authorized Securities

Paragraph 1 of Section D requires that the security be issued by a direct participation program and be currently registered under Section 12(g) of the 1934 Act; that the issuer be current in its reporting requirements under the 1934 Act; that the partnership have issued and outstanding at least 10,000 trading units owned by not less than 300 persons; and that at least one broker/dealer stands ready to enter information into the System on the security.

Paragraph 2 of Section D describes the circumstances under which an otherwise eligible security shall not be authorized for entry into the System and an authorized security will be subject to suspension or cancellation of its authorization. Such circumstances include the suspension of the security from being traded over-the-couter, failure by the issuer to promptly disclose to the public any material information which may affect the value of its securities or influence investors' decisions, and the fact that the security is no longer registered under Section 12(g) of the 1934 Act. Paragraph 2 of Section D also includes the restriction that an eligible security is not authorized where the security is the subject of a public offering which has not yet been terminated.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will promote competition to the extent that the System will provide a more efficient means to publicize offers to buy or sell partnership securities, resulting in a more efficient pricing mechanism for such securities. At the same time, the proposed rule change will have an impact on competition to the extent that only members of the Association qualified to deal in direct participation program securities that maintain net capital of at least $25,000 will be eligible to enter information into the System, while other members of the Association and non-members will not be similarly eligible. However, the Association believes that the burden imposed is not unduly burdensome or inappropriate in light of the regulatory objectives sought to be achieved in furtherance of the Association's obligations under the Exchange Act.

(C) Self-Regulatory Organization's Statement of Comments on the Proposed Rule Change Received From Members, Participants, or Others

The proposed rule change was published for member comment in Notice to Members 82–13 (March 9, 1982). The Association received a total of 18 comments on the rule proposal. After due consideration of the comments received, the Board of Governors approved an amended version of the rule. The Commission, however, is particularly interested in receiving comments on the following matters which were among the issues raised in the comment letters.

1. Should the issuer of a DPP security be involved in the decision concerning whether to include the Security in the System?

2. Is the requirement of 10,000 trading units an appropriate standard for determining if a DPP should be authorized for entry into the System?

3. Should restrictions apply to when a broker/dealer can enter quotes for an Approved Security into the System: during the public offering, after the public offering, or after a specified "seasoning period" following the offering?

4. Will the inclusion of an Approved Security in the System and the subsequent secondary trading of the security affect its tax status as a partnership?

5. Is the requirement of a minimum of $25,000 worth of net capital for a Qualified Member appropriate or should the amount be greater or lower?

6. If a DPP contain a provision whereby the issuer will buyback interests in the DPP at a specified price, should the quotes entered into the System be no lower than the "buy-back" price or should such quotes, at least, indicate the estimated buy-back price?

7. In light of the fact that the value of a DPP security is often dependent on a particular investor's tax objectives, will broker-dealers have a resonable basis for the submission of priced indications of interest?

8. Should the System display trade information (*e.g.*, price, time or size of the last transaction) concerning the prior sales of an Approved Security?

9. Due to the possibility that different units of the same DPP may have different tax bases, should information on a security inserted into the System include details regarding the current tax bases of the units offered for sale?

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this Notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filings will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22931; 70-6863]

Southwestern Electric Power Co.; Proposal To Issue and Sell Pollution Control Bonds; Exception From Competitive Bidding

May 9, 1983.

Southwestern Electric Power Company ("SWEPCO") P.O. Box 1106, Shreveport, Louisiana 71156, an electric utility subsidiary of Central and South West Corporation, a registered holding company, has filed an application-declaration and an amendment thereto with this Commission pursuant to Sections 6(a), 7, 9(a)(1), 10, and 12(d) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 44 and 50(a)(5) promulgated thereunder.

By order dated August 20, 1981 (HCAR No. 22171), the Commission authorized SWEPCO to enter into an Installment Sale Agreement ("Agreement") with the Sabine River Authority of Texas (the "District"), an instrumentality of the State of Texas. Pursuant to the Agreement, the District would finance certain pollution control facilities for a SWEPCO generating plant being contructed near Hallsville, Texas. The District issued $72,500,000 of 11½% Pollution Control Revenue Bonds in September 1981, due October 1, 1984 (the "1981 Bonds"). SWEPCO pledged revenues to the District to cover the costs of the 1981 Bonds. Republic Bank Dallas N.A. is Trustee under the bond indenture. The bonds were payable from and secured by SWEPCO's pledge of revenue. After construction of the facilities, title to the facilities will automatically vest in SWEPCO.

SWEPCO seeks Commission authorization to enter into an Amendment to the Agreement ("Amendment") for the issuance and sale of additional bonds ("Bonds") prior to October 1, 1984, to refinance the 1981 Bonds and to cover additional facilities costs. The Bonds will bear interest payable semi-annually and will mature within 30 years. The District will issue and sell the Bonds through negotiation pursuant to an Underwriting Agreement, subject to SWEPCO's approval. SWEPCO will not be a party to the underwriting agreement, but will make certain representations to the underwriters. The terms and conditions of the Bonds will be determined by negotiation. The Amendment will contain an unsecured commitment by SWEPCO to pay the District at specified times amounts sufficient to cover the Bonds' debt service, including principal, interest, and redemption premiums, as well as other District expenses associated with the Bonds. The Bonds will be special obligations of the District payable only out of SWEPCO's payments under the Amendment and are not general obligations of the District.

SWEPCO requests an exception from the competitive bidding requirements of Rule 50 pursuant to subsection 50(a)(5) because the District's Bonds are being issued and sold by the District through its selected underwriters.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 2, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

VOL 48 ISS 94 MAY 13 1983 UMI

[Release No. 22927; 70-6820]

West Texas Utilities Co.; Proposal To Issue and Sell Adjustable Rate Preferred Stock at Competitive Bidding

May 6, 1983.

West Texas Utilities Company ("West Texas"), 301 Cypress, Abilene, Texas 79601, an electric utility subsidiary of Central and South West Corporation, a registered holding company, has filed a post-effective amendment to a declaration previously filed with this Commission pursuant to Sections 6 and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42 and 50 promulgated thereunder.

By prior order in this proceeding (HCAR No. 22916, April 20, 1982), West Texas was authorized to issue and sell at competitive bidding up to 250,000 shares of preferred stock, with a fixed dividend rate, from time to time during the period ending December 31, 1983. The declaration has now been amended to seek authorization to sell all or part of the preferred stock either with a fixed dividend rate or an adjustable dividend rate, depending on market conditions at the time of sale.

With regard to the adjustable rate preferred stock, the dividend rate for the initial dividend payment period will be a fixed percentage. Thereafter, the adjustable dividend rate will be determined quarterly on the basis of a certain percentage ("reset amount") above or below the highest of (1) the average of the two most recent weekly per annum market discount rates for three-month U.S. Treasury bills, as published by the Federal Reserve Board during a specified period prior to each dividend payment period, (2) the average yield to maturity for actively traded marketable U.S. Treasury fixed interest rate securities (adjusted to constant maturities of ten years) during a specified period prior to each dividend payment period, or (3) the average yield to maturity for actively traded marketable U.S. Treasury fixed interest rate securities (adjusted to constant maturities of twenty years) during a specified period prior to each dividend payment period. In no event will the effective annual dividend rate, as adjusted in any quarter, be less than 5% or greater than 15%.

In the event that any series of preferred stock is sold with an adjustable dividend rate, the terms of such series will include a prohibition for five years against redeeming such series with funds derived from the issuance of equity or debt securities at a lower effective cost of financing than the effective annual dividend cost to West Texas based upon the initial dividend rate for the appropriate series.

West Texas intends to issue and sell the preferred stock through a primary shelf registration program in accordance with Rule 415 of the Securities Act of 1933 (17 CFR 230.415). When specific provisions relating to the initial dividend period and the reset amount have been determined, except as indicated hereafter, West Texas proposes to employ alternative competitive bidding procedures in accordance with the Commission's statement of policy pursuant to Rule 50(a)(5) under the Act (HCAR No. 22623, September 2, 1982). West Texas states, however, that the sales of additional preferred stock may require the assistance of underwriters, dealers or agents if market conditions at the time of the offering of the securities are unfavorable. Accordingly, West Texas may amend this filing to seek an exemption from Rule 50 to offer the preferred stock through either negotiated or private sales.

The declaration, as amended by the post-effective amendment, and any further amendments are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 1, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues or fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as now amended or as it may be further amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. PA-7]

Privacy Act of 1974; Amendments to System of Records

AGENCY: Securities and Exchange Commission.

ACTION: Notification of amendments to the system of records.

SUMMARY: The Commission is amending two systems of records governing maintenance of employee performance appraisal related documents in order to conform the rules to new regulations concerning government-wide maintenance of Employee Performance File ("EPF") systems recently adopted by the Office of Personnel Management.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Laurie Schaffer, Office of the General Counsel (202) 272-2453.

SUPPLEMENTARY INFORMATION: The Commission today announces amendments to its System of Records (the "System") published[1] pursuant to the Privacy Act of 1974.[2] the amendments, which are effective immediately, change two sections of the System: SEC-47, concerning Office of Personnel Code of Conduct and Employee Performance Files;[3] and SEC-50, concerning Office of Personnel Position Classification files.[4] The amendments are necessary in order to conform the Commission's system with recent amendments to Office of Personnel Management ("OPM") regulations governing maintenance and use of personnel records by federal agencies.[5]

Prior to the amendments to federal personnel regulations enacted by OPM, records and files maintained by the Commission to implement its employee performance appraisal plan were considered part of the government-wide Privacy Act system of records, identified as OPM/GOVT-1, General Personnel Records.[6] Recently OPM determined that performance appraisal records of government employees should be categorized as a new system of records in order to facilitate accurate description of the categories of records in personnel folders, identify the purposes for which such records are maintained and narrow the scope of permissible routine uses of the information. Performance appraisal records, whether maintained in an envelope in lieu of a separate file or in automated or microform versions, are considered part of a new system of records, identified as OPM/GOVT-2 and may be disclosed only according to routine uses promulgated in the OPM/GOVT-2 EPF system notice.[7]

Accordingly, in order to avoid duplicative designations, the Commission is amending the System to delete certain categories, and routine uses of records and to change the method of record retrieval. The following categories of records are being deleted from SEC-47: (1) Initial performance evaluations; (2) employee questionnaires; (3) reports on employees completing their probationary year; and (4) award recommendations. The categories of records which are being deleted from SEC-50 are: (1) organization charts and (2) annual performance rating and position classification certifications. In addition, the category entitled "super-grade position submissions" in SEC-50 is being changed to "supergrade history file." Amendments to the sections in SEC-47 and 50 concerning routine uses and retention and retrieval are also being made to reflect the changes in the categories.[8]

SEC-47 and SEC-50 as amended are set forth below.

1. In "Categories of records" remove paragraphs (a) through (d) and redesignate paragraphs (e) through (g) as paragraphs (a) through (c).

2. In "Routine uses of records" remove paragraphs (1) through (5) and redesignate paragraphs (6) through (13) as paragraphs (1) through (8); revise newly redesignated paragraph (1).

3. Revise paragraph titled "Retention and disposal".

4. In "Systems manager(s) and address" remove "500 North Capitol" and add "450 5th Street, NW."

5. In "Notification procedure" remove "1100 L Street" and add "450 5th Street."

6. In "Records source categories" remove paragraphs (a) through (d) and redesignate paragraphs (e) through (g) as paragraphs (a) through (c).

As amended, SEC-47 reads as follows:

---

[1] *See* 41 FR 41550 (September 22, 1976).

[2] 5 U.S.C. 552a(e)(4)(1974). *See* 5 CFR 293, Subpart D which requires each agency to establish and maintain an Employee Performance File Record System.

[3] *See* 41 FR 41590 (September 22, 1976).

[4] *See* 41 FR 41593 (September 22, 1976).

[5] *See* Office of Personnel Management, Federal Personnel Bulletin 293-20 (February 22, 1982); *see also* 47 FR 3231 (January 22, 1982).

[6] *See* 45 FR 76415 (November 25, 1980).

[7] *See* 47 FR 3232 (January 22, 1982).

[8] The routine uses that are being deleted are those which reflect the internal purposes for which the Commission uses the records. However, these deletions are not intended to restrict the Commission's use of the records. Under the Privacy Act of 1974 (5 U.S.C. 552a), records may be disclosed to officers and employees of the SEC who have a need for the record in performance of their duties without the requirement that the internal agency uses be published.

SEC-47

SYSTEM NAME:

Office of Personnel Code of Conduct and Employee Performance Files—SEC.

SYSTEM LOCATION:

Securities and Exchange Commission, Washington, D.C. 20549. Such records also may be maintained in other Offices and Divisions in the Commission and Regional and Branch Offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

SEC employees, past and present.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system of records includes information in the following categories of records:

(a) Adverse action cases, regulatory appeal files, grievances and complaints relating to an employee; (b) Code of conduct files-established under SEC employee conduct regulations (17 CFR 200.735-1 et seq.): Rule 2—Outside employment material; Rule 3—Employee securities transactions; Rule 4—Actions in cases of personal interest; Rule 5—Negotiations for private employment; Rule 6—Practice by former members and employees of the SEC; Rule 7—Employee Debts; Rule 9—Statements of employment and financial interest (GS 15's and above); Rule 10—Statements of employment and financial interest (Special Employees); (c) Investigatory materials gathered in connection with the individual's initial appointment to the agency as well as materials gathered in connection with investigations into allegations of employee misconduct.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records and the information contained in these files may be used for the following:

1. Assigned Office of Personnel Staff uses records in category (b) above to verify employee compliance with SEC Conduct Regulations.

* * * * *

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

* * * * *

RETENTION AND DISPOSAL:

Records n category (a) are retained 2 years and then discarded. Records in category (b) are kept for 5 years and then discarded. When employee leaves the SEC, his/her conduct files are stored for 2 years by the Office of Records and then destroyed; the computer listing of his/her securities transactions is destroyed upon his/her separation from the SEC. The Rule 6 file, established when a former employee returns to practice before the SEC, is retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549.

NOTIFICATION PROCEDURE:

All requests to determine whether this system of records contains a record pertaining to the requesting individual may be made in person during normal business hours at the SEC Public Reference Room at 450 5th Street, NW., Washington, D.C., or by mail addressed to the Securities and Exchange Commission, Public Reference Section, Washington, D.C. 20549.

* * * * *

RECORD SOURCE CATEGORIES:

Records in category (a) are obtained from the supervisor/manager(s) initiating action, employee concerned and his/her designated representative; and other individuals making complaints; records in category (b) are obtained from employee concerned. Employee concerned submits information re: Rules 2-6 and 9-10. Both alleged creditor and employee concerned submit information in Rule 7 (employee debts) file. Information in category (c) is gathered, where practicable, from the individual as to whom the information pertains and other individuals including former employers and associates, friends, co-workers, relatives, neighbors. Information may also be received from Federal, State or local law enforcement authorities or other governmental agencies.

1. In "Categories of records" remove paragraphs (c) through (e) and add new paragraph (c).

2. In "Routine uses of records" remove paragraphs (3) and (5), redesignate paragraph (4) as paragraph (3) and paragraphs (6) through (1) as paragraphs (4) through (8).

3. Revise paragraph titled "Retrievability".

4. In "System manager(s) and address" remove "500 North Capitol Street" and add "450 5th Street, NW."

5. In "Notification procedures" remove "1100 L Street" and add "450 5th Street". As amended. SEC-50 reads as follows:

VOL 48 ISS 94 MAY 13 1983 UMI

SEC–50

SYSTEM NAME:

Office of Personnel Position Classification Files—SEC.

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

This system of records contains the following categories of records: (a) Official position descriptions; (b) classification and audit reports; and (c) super-grade history file.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS OF USERS AND THE PURPOSES OF SUCH USE.

These records and the information contained in these records may be used as follows:

1. Official position descriptions indicate the duties to be performed by employees, in particular grade or pay positions and are utilized in connection with position management and control and for organizational job alignment purposes.

2. Classification and audit reports are used to indicate to employees, supervisors, and administrative assistants how title, grade, and series for a particular job was determined.

3. Super-grade history file contains information about the establishment and staffing of positions in grades GS–16, 17, and 18. They are used for historical reference.

* * * * *

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

* * * * *

RETRIEVABILITY:

Position descriptions are retrieved by number or title; other data is retrieved by name.

* * * * *

SYSTEM MANAGER(S) AND ADDRESS:

Director of Personnel, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549.

NOTIFICATION PROCEDURE:

All requests to determine whether this system of records contains a record pertaining to the requesting individual may be made in person during normal business hours at the SEC Public Reference Room at 450 5th Street, NW., Washington, D.C. or by mail addressed to the Securities and Exchange Commission, Public Reference Section, Washington, D.C. 20549.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, May 9, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. Doyle L. Arnold, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Coporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Application of First Amercian Bank for Savings, Boston, Massachusetts, an insured mutual savings bank, for consent to acquire the assets of and assume the liability to pay deposits made in Workingmen's Co-Operative Bank, Boston, Massachusetts, a non-federally-insured institution, and to establish the eight existing offices of Workingmen's Co-Operative Bank as branches of First American Bank for Savings.

Application of Heritage Bank, Anaheim, California, for consent to convert into a non-FDIC-insured institution.

Request of West Olympia Bank, Los Angeles, California, for reconsideration of a previous denial of an application for consent to establish a branch to be located at 901 South Western Avenue, Los Angeles, California.

Request of Fideliety Bank & Trust Company (In Organization), Salem, New Hampshire, for modification of conditions imposed in granting Federal deposit insurance.

Recommendation regarding the Corporation's assistance agreement involving an insured bank pursuant to section 13(c) of the Federal Deposit Insurance Act.

Memorandum and resolution re: Proposed revision of the delegations of authority relating to personnel matters.

The Board further determined, by the same majority vote, that no earlier notice of the changes in the subject matter of one meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

Dated: May 9, 1983.

Federal Deposit Insurance Corporation.
Noyle L. Robinson,
Executive Secretary.

Part II

Environmental Protection Agency

Premanufacture Notification; Premanufacture Notice Requirements and Review Procedures; Final Rule and Notice Form

VOL 48 ISS 94 MY 13 1983 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 720

[OPTS-50002G; TSH-FRL 2998-5]

Premanufacture Notification; Premanufacture Notice Requirements and Review Procedures

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule and notice form.

SUMMARY: This rule establishes premanufacture notice requirements and review procedures under section 5 of the Toxic Substances Control Act ("TSCA" or "the Act"). Section 5 of TSCA requires persons to notify EPA at least 90 days before manufacturing or importing a new chemical substance for commercial purposes. On January 10, 1979, EPA proposed a rule and forms to implement the section 5 notice requirements; the rule and forms were reproposed in part on October 16, 1979, and supplemented by a processor reporting proposal on August 15, 1980 and a clarification of importer reporting requirements on September 23, 1980. In this notice, EPA is issuing a final rule and notice form. The notice requirements and procedures established in this rule will replace the Interim Policy under which EPA has been conducting the new chemical notice review program since it began on July 1, 1979.

DATE: This rule is effective July 12, 1983.

FOR FURTHER INFORMATION CONTACT: Jack P. McCarthy, Director, Industry Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-511, 401 M St., SW., Washington, D.C. 20460, Toll-free: (800-424-9065), in Washington, D.C.: (554-1404), Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION:

OMB Control Number 2070-0012.

This preamble discusses EPA's approach to implementing TSCA section 5 notice requirements, the provisions of this rule, and the contents of the notice form. EPA has also prepared several documents in support of this rule, including a Regulatory Impact Analysis, EPA's Response to Comments on Premanufacture Notice Requirements and Review Procedures for New Chemical Substances, and an Instructions Manual for Premanufacture Notification of New Chemical Substances ("Instructions Manual"). These documents are available from the Industry Assistance Office, Office of Toxic Substances (OTS), at the address above.

Following is an index to the remainder of this preamble.

I. Introduction

A. Statutory Framework

Under section 5(a) of TSCA, 15 U.S.C. section 2604(a), persons must notify EPA at least 90 days before manufacturing or importing a new chemical substance for commercial purposes. A new chemical substance, as defined in section 3(2) of the Act, is any chemical substance that is not included on the list, or "Inventory," of existing chemical substances, compiled by EPA under TSCA section 8(b). EPA first published the TSCA Chemical Substance Inventory on June 1, 1979, and amended it in July 1980 and May 1982, with Cumulative Supplements. The Inventory is also regularly updated by the addition of new chemical substances which have undergone section 5 review and have entered commercial production.

Section 5(d)(1) of the Act specifies information that submitters must provide in section 5(a) notices: (1) test data in their possession or control; (2) descriptions of health and environmental effects data that they know or can reasonably ascertain; and (3) known or reasonably ascertainable information on chemical identity; proposed categories of use; proposed volume of production; byproducts resulting from manufacture, processing, use, or disposal; workplace exposure; and manner or method of disposal. Section 5(b) of the Act imposes additional data requirements for chemical substances subject to testing rules under section 4 and for chemicals that EPA, by rule under section 5(b)(4), has determined may present unreasonable risks of injury to health or the environment.

Once EPA receives a section 5 notice, EPA has 90 days to review it, unless for good cause EPA extends the review period under section 5(c) for up to an additional 90 days. During the review period, EPA may act under section 5(e) or 5(f) to regulate the production or use of the new chemical substance. Section 5(e) authorizes EPA to prohibit or limit the manufacture (including import), processing, distribution in commerce, use, or disposal of a new chemical substance until information sufficient to evaluate its health and environmental effects is provided. EPA can take this action if it determines that the available information is insufficient for a reasoned evaluation and either (1) the substance may present an unreasonable risk of injury to health or the environment, or (2) the substance will be produced in substantial quantities and there may be significant or substantial human exposure to the substance or substantial release to the environment. Under section 5(f), EPA may regulate a new chemical substance if it finds that there is a reasonable basis to conclude that the manufacture, processing, distribution in commerce, use, or disposal of the substance will present an unreasonable risk of injury to health or the environment.

If EPA has not prohibited manufacture or import of the chemical substance during the review period, these activities may begin as soon as the review period expires, subject to restrictions or testing requirements imposed during the review period. When manufacture or import begins and the notice submitter provides a notice of commencement, EPA adds the substance to the inventory. Thereafter, any person may manufacture or import the substance without submitting a section 5 notice to EPA (unless EPA has issued a significant new use rule on the chemical under section 5(a)(2)).

Certain chemicals are exempt from the section 5 notice requirements. They include categories of substances excluded from the TSCA definition of chemical substance: tobacco and tobacco products; nuclear materials; firearms and ammunition; and substances used solely as pesticides, foods, food additives, drugs, or cosmetics. In addition, section 5(h) authorizes exemptions from section 5 notice requirements for new chemical substances produced for test marketing or research and development, and for substances which exist temporarily as a result of a chemical reaction in the manufacture or processing of another chemical substance to which there is no human or environmental exposure. Also, under section 5(h)(4) EPA may, upon application and by rule, exempt the manufacturer or importer of any new chemical substance from all or part of the section 5 requirements if the Agency determines that the manufacture, processing, distribution in commerce, use, and disposal of the substance will not present an unreasonable risk of injury to health or the environment.

Section 5(d)(2) of the Act requires EPA to publish certain information on section 5 notices in the **Federal Register**, including at the least: (1) information on the identity and uses of the new substance, (2) a description of test data submitted under section 5(b), and (3) the results of the tests. In addition, at the beginning of every month, EPA must publish a list of: (1) new chemical substances undergoing section 5 review and (2) new chemical substances for which the notice review periods have expired since the previous monthly **Federal Register** notice.

Under section 14 of the Act, EPA is prohibited from disclosing confidential business information submitted under TSCA, including section 5, except in certain circumstances. Specifically, EPA may disclose confidential business information if it determines that disclosure is necessary to protect human health or the environment against an unreasonable risk of injury to health or the environment, and, to the extent necessary, if the information is relevant in any proceeding under the Act. Also, EPA is not prohibited from disclosing health and safety studies (including underlying data) on chemical substances for which a section 5 notice was received. However, the Act does not authorize EPA to reveal any such data that would disclose confidential processes or portions of a mixture.

B. Background

Section 5 notice requirements went into effect on July 1, 1979, 30 days after the publication of the Initial Inventory. On that date, persons who intended to manufacture new chemical substances, or import them in bulk, became subject to section 5 notice requirements. On July 30, 1980, EPA published a Cumulative Supplement to the Initial Inventory, which included chemical substances reported by processors and users and substances imported as part of mixtures or articles. This supplement, together with the Initial Inventory, make up the Revised Inventory. Thirty days after publication of the Revised Inventory, on August 30, 1980, section 5 notice requirements went into effect for persons who imported new chemical substances as part of a mixture. Under the Interim Policy and this final section 5 notice rule, importers of new chemical substances as part of an article are not subject to the section 5 notification requirements.

Since section 5 notice requirements went into effect, EPA has operated the notice review program under an Interim Policy. In the preamble to the January 10, 1979, proposed section 5 notice rule, EPA announced its Interim Policy for handling notices submitted before the publication of the Inventory. EPA modified this policy in an Interim Policy Statement published in the **Federal Register** of May 15, 1979 (44 FR 28564). This statement extended the Interim Policy's coverage to all notices filed before the effective date of the final section 5 rule and notice form.

EPA issued a Revised Interim Policy Statement in the **Federal Register** of November 7, 1980 (45 FR 74378). This statement clarified the May 15 statement and discussed in more detail the type of information EPA expected to receive in notices, EPA's interim procedures for handling confidential information, and procedures for submitting and reviewing test-marketing exemption applications. The operation of the review program under the Interim Policy is discussed later in this preamble.

EPA proposed a rule to implement section 5 notice requirements in the **Federal Register** of January 10, 1979 (44 FR 2242). This proposal included a description of the applicability of section 5 requirements, the general procedures for submitting notices, information requirements in the notices, and EPA's procedures for processing information in notices, including confidential business information. EPA also proposed notice forms for manufacturers, importers, foreign manufacturers and suppliers, and processors and customers.

In response to public comment on the January 10 proposal, EPA reproposed certain parts of the rule and forms in the **Federal Register** of October 16, 1979 (44 FR 59764). In particular, the reproposal shortened the notice form, reducing the information required; it revised procedures for asserting and substantiating claims of confidentiality; and it revised the proposed supplemental reporting requirement under section 8(a) of TSCA. In addition, EPA proposed in the **Federal Register** of August 15, 1980 (45 FR 54642) that persons notify EPA before they processed for TSCA commercial purposes substances that were manufactured or imported for purposes exempt from TSCA reporting. In the **Federal Register** of September 23, 1980, EPA proposed a clarification of reporting responsibilities of importers in the January proposal (45 FR 63806). Finally, EPA issued a statement in the **Federal Register** of July 2, 1982 (47 FR 28969) stating that, under the Interim Policy, submitters were no longer required to substantiate confidentiality claims at the time a notice is submitted.

With this notice, EPA is now promulgating final section 5 notice requirements and review procedures. This rule modifies the earlier proposals

VOL

in light of EPA's experience under the Interim Policy and public comments on the rule. The rule will become effective 30 days after publication of this notice. Until then, EPA will continue to operate the notice review program under the Interim and Revised Interim Policy Statements.

II. General Approach to Notice Review

In conducting its review of a new chemical substance, EPA assesses the risks associated with all phases of the life cycle of the substance, including its manufacture, import, processing, distribution in commerce, use, and disposal. The review is based on information provided by the submitter in the notice and on information EPA may obtain elsewhere, for example, in the literature searches on new substances and their structural analogues that EPA conducts as part of its new chemical review. However, it is ultimately the notice submitter's responsibility to provide enough information for an adequate risk assessment.

In conducting its review, EPA considers a number of different factors, including the potential toxicity of the substance which is determined from test data submitted in the notice or obtained elsewhere, data on structural analogues, and structure-activity analyses. EPA also reviews the potential for humans and the environment to be exposed to the substance during uses proposed by the notice submitter. Also, because EPA must assess the "reasonableness" of any risk, it considers such nonrisk factors as the possible economic benefits of the substance and the availability of substitutes—or whether a substance is intended as a substitute for a more toxic substance.

Because the Act explicitly requires EPA to assess risks associated with the entire life cycle of new chemicals, EPA evaluates both the new chemical substance and related substances, such as impurities, byproducts, degradation products, unintended reaction products, and other chemical substances associated with the manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance, even if these related substances are on the Inventory.

On the basis of its assessment, EPA may take action during the review period under section 5(e) to regulate the substance while EPA obtains more data, or under section 5(f) to regulate manufacturing, processing, distribution in commerce, use, or disposal, if EPA determines that the substance will present an unreasonable risk. EPA may also issue a follow-up reporting requirement under section 5(a)(2) or 8(a) or regulate the chemical under section 5(b)(4) (risk list). EPA, however, can regulate a substance only if it takes positive action, either by order or by rule. Without such action during the review period, a substance can enter commercial production unregulated under TSCA. As a result, section 5 of the Act does not establish a registration program, and EPA has not in any sense "approved" substances that have passed through review without regulation.

From commencement of the notice review program on July 1, 1979, to March 31, 1983, EPA received 2,201 valid premanufacture notices. Of the total number, the review period had expired on 1,878 and 777 had entered commercial production. In addition, EPA reviewed 196 test-marketing exemption applications under section 5(h)(1) of the Act and granted 173 such exemptions. During this period, EPA issued seven section 5(e) orders regulating the production of 18 new chemical substances pending the development of additional data, and entered into voluntary control agreements with the submitters of 49 notices. In addition, submitters withdrew nine section 5 notices in the face of likely regulation.

Under the Interim Policy, EPA has gained experience in reviewing notices, which it has used in developing the final section 5 notice rule, and it has established review procedures that will continue when this rule is effective. The following sections outline our general review procedures for notices on new chemicals.

A. Notice Review Process

The notice review process established by EPA has six major phases: prenotice communication, process start-up, initial review, detailed review, regulatory response, and process closeout. All new chemicals are not subject to each phase.

1. *Prenotice Communication.* The EPA Office of Toxic Substances, which is responsible for the section 5 notice review program, employs a Prenotice Communications Coordinator to assist persons preparing a notice or considering the submission of a notice. The Prenotice Communications Coordinator provides guidance on a wide variety of topics, and refers persons to the appropriate EPA staff members for guidance on other questions. Topics for prenotice inquiries include the scope of TSCA and this rule, the contents of the TSCA Chemical Substance Inventory, the notice form, section 5 exemptions, premanufacture testing, confidentiality and generic name development, and notice review procedures.

The Prenotice Communications Coordinator can be reached by telephone at 202–382–3745 or by writing to the Prenotice Communications Coordinator, Chemical Control Division (TS–794), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

2. *Process Start-up.* Process start-up begins when EPA receives a notice. The OTS Document Control Officer assigns a premanufacture notice number to the notice and acknowledges the receipt of the notice to the submitter. The acknowledgment includes the date when the OTS Document Control Office received the notice. The 90-day review period begins on the date of receipt.

During process start-up, OTS staff review the notice to determine whether the substance and proposed uses are subject to section 5 notice requirements and whether all required information has been submitted. In addition, the Chemical Substance Inventory is searched to ensure that a section 5 notice is required, and the **Federal Register** notice required under section 5(d)(2) is prepared. This notice includes the identity of the new chemical substance; the premanufacture notice number; the name of the submitter; information on production, exposure, and use; and test results. Information claimed as confidential is omitted from the notice or masked by generic descriptions. At the same time, the OTS Reading Room establishes a public file containing a nonconfidential version of the notice.

A Notice Manager is assigned to each notice. The Notice Manager coordinates the review and serves as the EPA contact on all matters concerning the notice. Persons wishing to contact the managers of particular notices can obtain their names and telephone numbers from the Prenotice Communications Coordinator.

3. *Initial Review.* During the initial review period, EPA identifies chemical substances which require more detailed review and which are candidates for possible regulatory action. During this phase, EPA conducts a preliminary analysis of the chemical identity, physical and chemical properties, proposed uses, potential toxicity, environmental effects, human exposure, environmental release, and economic benefits. EPA uses the information contained in the notice, in certain cases searches the scientific literature for data on the substance and related substances, and, when necessary, seeks additional information from the submitter. Initial review ends when the staff reviews available risk data and nonrisk information and decides whether more detailed review is necessary, possibly in support of an action under section 5(e) or 5(f), or under other sections of the Act.

4. *Detailed Review.* During detailed review, the Agency assesses the concerns it identified during initial review. EPA also examines the benefits to society of the new chemical substance and the availability of substitutes. After assessing the risks and certain nonrisk information, EPA analyzes possible regulatory or other control measures. If necessary, EPA extends the notice review period under section 5(c).

5. *Regulatory Response.* After completion of its detailed review, EPA may decide to regulate the substance during the review period. It may issue an order under section 5(e) if EPA finds that the substance may present an unreasonable risk of injury to health or the environment, or that it may be produced in substantial quantities, pending the development of additional data. EPA may control the substance under section 5(f) if it finds that the substance will present an unreasonable risk. EPA may also identify the substance as a candidate for regulation under section 5(a)(2), 5(b)(4), or 8.

6. *Process Closeout and Entry on the Inventory.* If EPA does not take action to regulate a substance during the review period, the submitter may manufacture or import the new chemical substance without restriction, as soon as the notice review period expires. The submitter must notify EPA by letter when manufacture or import begins. This letter must be sent to the Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, 401 M Street, SW., Washington, D.C. 20460. This notice of commencement must contain: the specific identity of the chemical substance, its premanufacture notice number, and the date when manufacture or import begins. When EPA receives this letter, the substance is added to the Inventory.

B. Test-Marketing Exemption Applications

Under section 5(h)(1) of the Act, persons may apply for an exemption from section 5(a) or 5(b) reporting requirements to manufacture or import a new chemical substance for test-marketing purposes. EPA may grant an exemption if the applicant shows to EPA's satisfaction that the test-marketing activities will not present any unreasonable risk of injury to health or the environment. Therefore, EPA must make an affirmative finding that the test marketing will not present any unreasonable risk, and manufacture or import cannot begin until EPA grants the exemption. This standard differs from the finding EPA must make to take regulatory action on a new chemical under section 5(e); to act under section 5(e), EPA must conclude only that there may be an unreasonable risk. Under section 5(h)(6), EPA has only 45 days to approve or deny an exemption application. This limits the extent to which EPA can gather information beyond that contained in the test-marketing application.

To ensure an adequate review, test-marketing exemption applicants should include in their applications, at a minimum: (1) all existing data regarding health and environmental effects of the substance, including physical/chemical properties or, in the absence of such data, a discussion of toxicity based on structure-activity relationships and relevant data on chemical analogues; (2) the maximum amount to be manufactured or imported for test marketing; (3) the maximum number of persons who may be provided the substance during test maketing; (4) the maximum number of persons who may be exposed to the substance as a result of test marketing; (5) information on estimated duration and routes of exposure; and (6) a description of the test-marketing activity, including the length of time that will be required and how the activity may be distinguished from full-scale commercial production and from research and development. These items are set out in § 720.38(b) of the final rule.

C. Regulatory Actions

By March 31, 1983, EPA had issued seven orders under section 5(e) to control a total of 18 new chemical substances. The first three orders would have prohibited production of the new substances pending the development of further information. However, in each of the three cases, the manufacturer or importer withdrew its notice from review, rather than allow the order to go into effect. EPA also issued four consent 5(e) orders. These consent orders allow manufacture of the new chemical substance under specific restrictions pending the development of additional information. In addition, nine section 5 notices have been withdrawn by submitters in the face of likely regulation under section 5(e) or 5(f), but before orders were actually issued.

EPA has also reached voluntary agreements with a number of notice submitters rather than taking formal regulatory action. By March 31, 1983, the submitters of 19 notices had agreed to conduct testing in response to EPA concerns. Measures to control exposure, including labeling, Material Safety Data Sheets, and worker protection devices, where agreed to by the submitters of 30 notices, and the review periods for an additional 43 notices were suspended in response to EPA's concerns, to allow the submitters time to develop additional information voluntarily.

III. Provisions of the Rule

This unit discusses the provisions of the rule and specifically points out where these provisions differ from the January 1979, October 1979, and August 1980 proposals. In a separate document, Response to Comments on the Premanufacture Notice Requirements and Review Procedures, EPA discusses in more detail its response to comments on the earlier proposals. The Response to Comments is available in the OTS Public Reading Room.

A. Applicability

1. *Who Must Report.* Section 720.22 of the rule specifies who is subject to the section 5 notice requirements. These provisions closely follow those proposed in January 1979, which were based on the reporting requirements for the Initial Inventory. A detailed discussion of who must report follows.

a. *U.S. manufacturers.* Persons who intend to produce or manufacture a new chemical substance in the United States for a commercial purpose must submit a notice. Only manufacturers that are incorporated, licensed, or doing business in the United States may submit a notice. Persons who extract a new chemical substance from a previously existing substance, or a complex combination of substances, are manufacturers of that new chemical substance.

EPA has revised the definition of "manufacturer" in the final rule to include certain persons who contract with a manufacturer to make a chemical substance (sometimes known as "toll manufacture"). Under the definition in the final rule, a person who contracts with a manufacturer is also a manufacturer if the substance is manufactured or produced exclusively for that person, and that person specifies the identity of the substance and controls the total amount produced and the basic technology for the plant process. In this situation, the person who contracts with the actual manufacturer must submit the notice. This provision does not apply to the person who simply orders a specific chemical or a chemical with certain properties from a manufacturer. Instead, this provision only applies to the

VOL
48
ISS
94
MY
13
1983
UMI

situation where the person not only specifies the chemical identity, but spells out the basic process for making the chemical (althought the actual manufacturer may make adjustments in the specified process that are necessary to adapt the process to the manufacturer's own equipment.)

The rule further restricts this provision to persons who have an exclusive relationship with the manufacturer (i.e., the manufacturer does not sell the chemical to anyone else). As a result, the person placing the order also determines the total amount to be manufactured. Therefore, if more than one person orders the new chemical, neither of them has specified the total amount to be manufactured and neither is responsible for submitting the notice; instead, the person who actually manufactures the chemical must submit the notice.

EPA has added this provision to deal with the situation in which one person decides to manufacture a specified amount of a certain chemical using a certain process, but contracts with a manufacturer to actually make the chemical. In this case, EPA believes the person contracting with the manufacturer is the most knowledgeable party and should be responsible for submitting the notice. EPA recognizes, however, that the actual manufacturer will often have extensive information that would be useful to EPA in its review of the new chemical. Therefore, EPA strongly encourages joint submissions (see § 720.40(e)) in this situation. Since both persons involved in the transaction are manufacturers, both are liable for the manufacture of the new chemical if a notice has not been submitted, or the review period has not expired.

EPA did not adopt the proposed requirement that manufacturers of new chemicals solely for export submit notices under section 5(a) of the Act. ("Manufacture solely for export" is defined in § 720.3(s) of the rule.) Instead, EPA will soon propose that manufacturers of chemicals solely for export submit notices to EPA under section 8(a) prior to manufacture. EPA eliminated the requirement that manufacturers of new chemical substances solely for export submit a section 5 notice in response to comments that questioned EPA's legal authority to require such reporting. These comments will be addressed more fully in the preamble to the proposed section 8(a) reporting rule for export-only chemicals.

The definition of "manufacture solely for export" places certain restrictions on domestic activity. The manufacturer of an export-only chemical may process it only at sites under the control of the manufacturer. Distribution in commerce is limited to the activities necessary to export the chemical. Also, the manufacturer of an export-only chemical may not use the chemical for any purpose, except in small quantities solely for research and development.

b. *Importers.* Under § 720.22(b) of this rule, persons who intend to import a new chemical substance for a commercial purpose are subject to section 5 notice requirements. This includes chemicals imported in bulk or as part of a mixture. Because it would be enormously difficult for an importer to determine the identity and Inventory status of each chemical substance in imported articles (e.g., automobiles), the rule does not require persons to submit notices on new substances imported as part of articles. However, new chemicals imported in containers used for transportation or for other purposes are imported in bulk, not as part of an article, and are subject to the notice requirements.

EPA has eliminated the separate importer notice forms; importers must now complete the general notice form. In their notices, however, importers are required to provide information only on exposure which occurs within the United States.

In the January 1979 proposal and in § 720.3(1) of this rule, EPA defines importer to include the person primarily liable for the payment of duties, the consignee, the importer of record, the actual owner, and any transferee. This definition, which is adopted from the definition of the U.S. Customs Service of the Treasury Department, is consistent with other definitions of importer issued under the Act.

Several commenters on the January 1979 proposal suggested that EPA's definition of importer did not adequately indicate which party in an import transaction was responsible for submitting a section 5 notice. In response to these comments, EPA clarified importer reporting responsibilities under section 5 in the **Federal Register** of September 23, 1980 (45 FR 63806). This clarification has been incorporated into the final rule in § 720.3(z) and § 720.22(b).

Under § 720.22(b), the "principal importer" in any transaction leading to the import of a new chemical substance must submit a section 5 notice. The principal importer is the first importer who selects the new chemical substance and determines the total amount to be imported. The principal importer must know that the substance will be imported, and only a person incorporated, licensed, or doing business in the United States may submit the notice. Occasionally, no one person may fit this definition exactly. In this case, the Prenotice Communications Coordinator should be contacted to determine the appropriate person to submit the notice. Otherwise, the incorrect party may submit the notice, and the notice review period will not begin to run until EPA determines who should have submitted the notice and that person actually submits it. Early consultation with the Prenotice Communication Coordinator will avoid this delay. If import of a new chemical substance occurs before the principal importer submits a notice and the review period expires, all importers involved in the transaction are liable.

The following paragraphs further explain the definition of principal imported.

i. *Selecting the chemical substance to be importer.* The principal importer selects the new chemical substance for import. Selecting the substance to be imported includes selecting it by a trade name or generic name as well as by its specific chemical identity. Therefore, the principal importer need not know the specific chemical identity of the imported substance. If the specific chemical identity of the new chemical substance is known only to the foreign manufacturer or supplier, and the manufacturer or supplier does not wish to reveal the identity to the U.S. importer, it can report the identity directly to EPA. (See § 720.40(e) of the rule.) In this way, foreign companies can protect confidential business information. In any case, however, EPA must know the identity of the substance before the review period can begin.

Importers, like manufacturers, are responsible for determining whether their substances are on the Inventory and therefore whether they are new chemical substances subject to section 5 notice requirements. A principal importer that does not know the identity of a chemical substance it intends to import may have its foreign manufacturer or supplier, or some other person, report the chemical identity to EPA using the *bona fide* procedures described in § 720.25 of the rule. The principal importer would provide the evidence of a *bona fide* intent to import the chemical. EPA will then search the Inventory for the substance. If a notice is required, EPA will inform the importer. As a result, confidential chemical identity will be protected, and importers need not file unnecessary notices.

ii. *Knowing that the substance will be imported.* A principal importer must know that the new chemical substance will be imported into the United States, rather than manufactured domestically. If a person orders a new chemical substance directly from a foreign firm, EPA will consider that person to know that he or she is importing the substance. If a person orders a chemical from a U.S. firm and does not know and has no reason to know that the U.S. firm will fill the order by importing a new chemical, the person would not be subject to notification requirements or liable under section 15 for failure to submit a notice. In that case, the U.S. firm filling the order would be required to report.

iii. *Specifying the total amount to be imported.* The principal importer specifies the total amount of the chemical substance to be imported. If orders are collected from several customers, the person who collects the orders is the person who specifies the total amount to be imported and is subject to the notice requirements of this rule. Individual customers of the principal importer do not specify the total amount, even though one might have a disproportionately large order.

iv. *Incorporated, licensed, or doing business in the United States.* A principal importer must be incorporated, licensed, or doing business under the laws of the United States.

c. *Processors.* In August 1980, EPA proposed that persons be required to submit a section 5 notice to EPA before they processed for TSCA commercial purposes substances previously exempt from reporting. Specifically, this applied to byproducts; tobacco and tobacco products; nuclear materials; substances used solely as pesticides, firearms, ammunition, foods, food additives, drugs, and cosmetics; substances manufactured before January 1, 1975, and not processed and reported for the Inventory after that date; research and development (R and D) chemicals; and substances granted test-marketing exemptions.

EPA proposed processor notification requirements to close a gap in section 5 rules. EPA recognized that not many chemicals would be subject to notification requirements under this portion of the rule; however, EPA saw a need to review the risks associated with the processing and use of previously exempt substances for TSCA purposes before these activities occurred.

Persons who commented on the proposal argued that the requirement was unnecessary for R and D and test-marketed substances. They argued that manufacturers of test-marketed substances know how persons who buy the substances are using them because this information is necessary to make sure they are in compliance with the terms of the particular exemption. Also, manufacturers of R and D chemicals often know how their customers are using these chemicals. Therefore, EPA has eliminated the processor notification requirement for R and D and test-marketed substances. Of course, if a company that manufactures or imports a chemical for R and D or test-marketing purposes learns that its customer is using the chemical substance for nonexempt commercial purposes, manufacture or import of the chemical substance for sale to that customer for that purpose must cease until a section 5 notice is submitted and the review period expires.

EPA now also believes processor notification is inappropriate for nuclear materials, tobacco, and tobacco products because these substances are exempt from TSCA, regardless of how they are used. In addition, EPA believes that notification by processors of pesticides for nonexempt commercial uses is unnecessary because the uses of registered pesticides are regulated under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Of course, if a person intends to manufacture a pesticide for nonpesticide uses, these uses would not be subject to FIFRA. However, in this case, the manufacturer would be required by the statute to notify EPA under section 5(a)(1)(A) if the substance were not on the Inventory.

EPA also believes that notification for the processing of food and food additives for nonexempt purposes is unnecessary. These substances will already have been approved for human ingestion by the Food and Drug Administration (FDA). FDA also has jurisdiction over cosmetics and devices, as defined by the Federal Food, Drug, and Cosmetic Act. Therefore, EPA believes that notification by processors of food, food additives, and cosmetics is unnecessary, especially since persons would still be required under section 5(a)(1)(A) to notify EPA before they manufactured these substances for nonexempt uses.

Finally, EPA believes that processor notification requirements are unnecessary for the nonexempt processing of byproducts which have no separate commercial purpose. As is true of R and D and test-marketed substances, the manufacturer of a byproduct is expected to know of any nonexempt uses planned by its customer. In such cases, the byproduct would then be manufactured for a commercial purpose and the manufacturer would be required to submit a notice. Notification requirements are also unnecessary for nonexempt processing of substances which have not been manufactured since January 1975, since such processing rarely occurs.

Based on public comments and its reevaluation of the proposal, EPA now believes that processor notice requirements are unnecessary. Therefore, EPA has not included these requirements in the final rule.

d. *Agents and joint submitters.* Under § 720.40(e) of the rule, persons required to submit a section 5(a) notice may designate an agent to submit the notice for them. Both the person originally subject to the notice requirements and the agent must sign the certification on the form. Therefore, both persons are responsible for false or misleading statements in the notice. The person originally subject to the notice requirements remains responsible for the submission to EPA of all required information known to or reasonably ascertainable by him or her and all test data in the person's possession or control.

Persons may also submit joint section 5(a) notices to EPA. For example, a principal importer may ask other parties in the U.S., such as customers, to complete certain sections of the form if they have relevant information. All persons submitting the notice must sign the certification on the form. They must also assert all confidentiality claims according to the procedures of this rule. However, the person responsible for the notice under section 5(a) is not absolved of statutory notice requirements by arranging a joint submission. This person is required to complete all mandatory sections of the form, to the extent that he or she knows or can reasonably ascertain the required information, even if another person also submits a certain section. If a joint notice is submitted, the notice review period will not begin until EPA has received all required parts of the notice. Therefore, the person subject to the notice requirements should indicate to EPA who else will be submitting parts of the notice and identify those parts. EPA will acknowledge receipt of the notice when it has received submissions from all of the joint submitters.

2. *What chemical substances must be reported.* Section 5(a)(1)(A) of the Act requires persons to notify EPA before manufacturing or importing any new chemical substance, except for substances exempt under section 5(h). New chemical substances are chemical substances not included in the TSCA

VOL 48 ISS 94 MY 13 1983 UMI

Chemical Substance Inventory compiled and updated under section 8(b).

Under section 3(2) of TSCA and § 720.3(e) of the rule, chemical substances are defined as any organic or inorganic substance of particular molecular identity, including any combination of such substances occurring in whole or in part as a result of a chemical reaction or occurring in nature, and any element or uncombined radical. However, the following substances are excluded from the TSCA definition of chemical substance: mixtures; tobacco and tobacco products; nuclear materials; firearms and ammunition; and substances used solely as pesticides, foods, food additives, drugs, and cosmetics.

Manufacturers and importers are responsible for determining whether a substance is a new chemical substance under TSCA and therefore whether they are subject to section 5 notice requirements. The published Inventory will enable persons to determine whether many specific chemical substances have been entered on the list and therefore are not new. However, in difficult cases, EPA will assist persons in ascertaining whether specific substances are on the Inventory.

If a chemical substance is listed on the public Inventory under a generic name to mask its confidential identity, persons will not be able to determine if a specific substance falling into that category is a new chemical substance. Therefore, under § 720.25(b) of the rule, EPA has established procedures for informing persons whether a substance they intend to manufacture or import is a substance on the confidential Inventory, or whether it is a new substance subject to the section 5 notification requirements. Under these procedures, persons requesting this information from EPA first must demonstrate a *bona fide* intent to manufacture or import the substance by submitting the items listed in § 720.25(b)(2). These items have not changed from the proposed rule, except that the person need not have a sample of the substance available. EPA has found that samples are unnecessary to establish a person's intent to manufacture or import the chemical or to determine whether the chemical substance is on the Inventory. If an importer cannot provide certain requested items related to chemical identity because its foreign manufacturer or supplier claims them confidential, the importer can request the foreign manufacturer or supplier to send them directly to EPA.

EPA will respond to these inquiries within 30 days of receipt of a complete request. If the Agency determines that a substance is not on the Inventory, it will notify the person submitting the *bona fide* inquiry that a section 5 notice must be submitted before the substance is manufactured or imported. If EPA determines that the substance is on the Inventory, it will inform the person that a notice is not required. At the same time, EPA will inform the person who originally submitted the confidential substance for the Inventory that another person has demonstrated a *bona fide* intent to manufacture or import the substance and has been notified that the substance is on the confidential Inventory.

3. *Exempt chemical substances.* Section 5(h) of the Act exempts, or authorizes EPA to exempt, certain chemical substances from section 5 notice requirements. In §§ 720.36 and 720.38 of this rule, EPA clarifies several of these exemptions. The sections have not been substantively changed from the corresponding sections of the January 1979 proposal. The most important of the exemptions are discussed below.

a. *Small quantities solely for research and development.* Chemical substances manufactured or imported only in small quantities solely for research and development (R and D) are exempted from section 5 notice requirements if the submitter complies with § 720.36 of this rule.

Like the Inventory reporting rules, this rule defines "small quantities solely for research and development" as quantities that are not greater than reasonably necessary for scientific experimentation, research, or analysis (including activities associated with product development). As the Inventory rule and support documents indicate, research and development activities include tests of physical, chemical, production and performance characteristics. The chemical must be used by, or directly under the supervision of, a technically qualified person. The manufacturer or importer must evaluate information on the chemical and inform all persons engaged in experimentation, research, or analysis on the new chemical substance of any risk to health.

The section 5 notice rule deletes a note included in the Inventory definition. The note provided that, for purposes of the Inventory, any substance manufactured, imported, or processed in quantities of less than 1,000 pounds a year would be presumed to be manufactured solely in small quantities for R and D, unless the submitter could certify that the substance was used for purposes unrelated to R and D.

This note was intended to provide guidance for manufacturers in evaluating low volume chemicals to determine whether they were eligible for the Inventory. If the note were included in the section 5 notice rule, however, it might be misconstrued to mean that section 5 notices are not required for any substance produced in quantities of less than 1,000 pounds a year, or that section 5 notices must be submitted for all substances produced in quantities greater than 1,000 pounds a year. This deletion does not change the R and D exemption of the Inventory reporting rule, but it eliminates a possible source of misunderstanding about how substances qualify for such exemptions. In the future, the Agency may clarify the R and D exemption by establishing a more precise definition of "small quantities" for specific substances or groups of substances.

The final rule makes clear the manufacturer's responsibility under section 5(h)(3) to ensure that certain persons are notified of any risk to health that the manufacturer believes may be associated with R and D activities on a substance. This notification must go to all persons engaged in experimentation, research, or analysis on the substance, including manufacture, processing, use, transport, storage, or disposal of the substance for research and development purposes. The technically qualified individual supervising the R and D activities must ensure that the notice to these persons is adequate. The rule does not prescribe methods of notification. Rather, it identifies certain acceptable procedures, and leaves it to the individual manufacturers or importers to ensure that they adequately inform all the persons who must be notified.

Section § 720.36(d) states that, upon request, manufacturers and importers must make available to EPA any information evaluated by the manufacturer or importer in determining the need for notification. This provision differs from § 720.38(d) of the proposed rule which would have required the manufacturer or importer to make this information available to any person exposed to the R and D substance, as well as EPA. EPA has dropped this requirement because it reduces the burden on manufacturers or importers since making this information available to persons exposed to the R and D substance often would require preparation of nonconfidential summaries, and possible disclosure of sensitive information such as medical records. This change will not endanger the health of exposed persons since they will be notified of any risk by the

manufacturer or importer. In addition, EPA will have access to this information, so it can ensure that the notification of exposed persons is adequate.

The R and D provisions apply to all substances manufactured or imported after the effective date of the final rule, including substances manufactured or imported earlier under the R and D exemption. Therefore, persons that have been manufacturing or importing a chemical under a R and D exemption before the effective date of the final rule cannot continue to manufacture, import, process, distribute in commerce, use, or dispose of this chemical under the exemption until they have complied with all the requirements described in § 720.36.

b. *Test-marketing exemptions.* Section 5(h)(1) of TSCA and § 720.38 of this rule authorizes EPA, upon application, to grant exemptions from any requirements of section 5(a) or 5(b) of the Act for test-marketing purposes. To grant such an exemption, the Agency must find that the test marketing will not present any unreasonable risk of injury to health or the environment. Section 5(h)(6) and § 720.38(d) provide that EPA must either approve or deny the application within 45 days of its receipt and must publish a notice of its decision in the **Federal Register.** If EPA grants an exemption, it may impose restrictions on the test-marketing activities. The manufacturer or importer must submit a section 5 notice for activities beyond those permitted under the exemption.

In Unit II.B. of this preamble, EPA provides guidance to persons submitting test-marketing exemption applications and describes the information these applications should include.

c. *Nonisolated intermediates.* Under § 720.30(g)(8) of the rule, "any nonisolated intermediate" is not subject to the notice requirements. Intermediates are defined in § 720.3(n) as substances that are consumed in whole or in part in chemical reactions used for the intentional manufacture of other substances or mixtures, or that are intentionally present for the purpose of altering the rate of such reactions. Under § 720.3(w), a nonisolated intermediate is an intermediate that is not intentionally removed from the equipment in which it is manufactured.

This definition modifies the definition of intermediate in the Inventory reporting rule (40 CFR Part 710). Under the Inventory rule, substances that were not intentionally removed from the equipment in which they were manufactured were not considered intermediates and were not subject to the reporting requirements of the Inventory rule. In the section 5 notice rule, EPA has defined these substances as intermediates, but has exempted them from reporting requirements as "nonisolated intermediates." The change in definition is only for the sake of clarity, and does not change the status of these substances.

EPA is exempting nonisolated intermediates for several reasons. First, such substances are often extremely difficult to identify; in developing the reporting rule for the TSCA Inventory, EPA received numerous comments on this point. Second, because exposure to such substances generally is limited, they generally pose little risk to human health and the environment. Third, in excluding nonisolated intermediates from the Inventory, the Inventory reporting rule stated that these and other excluded substances will not be subject to the section 5 notice requirements. (See § 710.4(d).)

d. *Byproducts.* This rule expands the definition of byproduct contained in the Inventory rule to include substances which are formed without a separate commerical purpose during the processing, use, and disposal of the new chemical. Section 5(d)(1)(A) of the Act authorizes EPA to require information on such substances. This expanded definition is consistent with the definition of "byproduct" proposed in January 1979. Under both the proposed rule and the final rule, substances which were not eligible for inclusion on the Inventory are not subject to the section 5 notice requirements.

B. Information Submissions

1. *Scope of information requirements.* On January 10, 1979, EPA proposed notice requirements which included a notice form requiring reporting of detailed information on production, processing, use, and exposure of a new chemical substance. The mandatory section of the form was designed to give EPA enough information to conduct a detailed review for possible regulatory action under section 5(e) or 5(f). The form included an optional section, asking for information on industrial hygiene, engineering safeguards, and certain nonrisk factors. Based on public comments on the January proposal and EPA's early experience in reviewing notices, EPA reproposed a shortened form on October 16, 1979. This proposed form was designed to require only information needed for an initial assessment of a new chemical substance. Under both proposals, if EPA determined that it needed more information from the submitter or other persons, it could ask those persons to submit it voluntarily, or it could require the information through mandatory supplemental reporting under section 8 ("letter-writing" authority) or action under section 5(e).

In revising the information requirements for the final rule, EPA has considered the comments received on the previous proposals and EPA's information needs identified in its review of over 2,200 notices under the Interim Policy. The requirements are limited to (1) information clearly specified in the statute in sections 8(a)(2) (A) through (G) except (E), and (2) other information that is essential to the initial review of the potential health and environmental risks presented by a new substance and which reasonably falls within the intent of section 5(d)(1).

This rule further reduces the information requirements from those of the October 1979 proposal. Several commenters on the October 1979 proposal stated that EPA failed to require information identified in the January 1979 proposal as necessary for review of the risks associated with new chemicals. EPA agrees that much of this information can be important in the review of a new chemical substance. However, the Agency does not believe it is reasonable to require all such information for every substance reviewed under section 5 since EPA has found that detailed information is necessary only after it identifies a specific risk concern. The information required on the final notice form is sufficient for EPA to identify substances of potential concern and to determine what additional information is needed in those cases for which more detailed review is necessary.

Under the Interim Policy, EPA has contacted submitters during the review period and requested that they supply additional information when this information was important for its review. Submitters have been generally cooperative in providing the information. In developing this rule, EPA has assumed that such cooperation will continue in the future. Failure to supply such information when it is important to the review may unnecessarily complicate the review, and may result in extension of the review period under section 5(c). If EPA does not receive the information it believes is necessary for review, it will take action under section 5(e), when appropriate, to regulate the substance pending submission of the information.

Notice submitters must provide all information requested in the form to the extent that they know or can reasonably ascertain it. Submitters are also required to provide test data in their possession

VOL
48
ISS
94
MY
13
1983
UMI

or control and descriptions of other data known to or reasonably ascertainable by them, if those data concern the environmental or health effects of the substance. These requirements are described in more detail in the following sections. In addition to required information, submitters may provide EPA with any other information they believe should be considered in its review of the substance. The notice is incomplete, and the review period will not begin, unless information in the notice form and attachments is in English, except that published scientific literature submitted with the notice need not be translated.

The Importer Form proposed in October 1979 has been incorporated into the general notice form resulting in a single form that will be used by all submitters reporting under section 5(a)(1)(A). This change will simplify notification for submitters since they will have to become familiar with only one form and there will be no confusion as to which form should be submitted. EPA recognizes that some importers may not have the same amount of information available to them as domestic manufacturers. Importers, just as domestic manufacturers, need only submit information specified on the form to the extent that they know or can reasonably ascertain it. Importer notices, however, will be held to the same standard as domestic notices in determining whether the notice is complete or whether action under section 5(e) is necessary to obtain additional information.

The units below discuss the level of detail required in completing the form, and other general issues.

a. *Known to or reasonably ascertainable by.* Section 5(d)(1)(A) of the Act requires that notices contain certain information on chemical identity, use, and exposure insofar as it is "known to the person submitting the notice or insofar as reasonably ascertainable." This rule defines known or reasonably ascertainable information as "all information in a person's possession or control, plus all information that a reasonable person similarly situated might be expected to possess, control, or know." In response to commenters who believed that the phrase "or could obtain without unreasonable burden or cost" is unclear, EPA has dropped this phrase from the definition. This is not a substantive change, however, since such information is included in "information that a reasonable person . . . might be expected to possess, control or know." Therefore under the new definition, just as it is in the proposed definition, cost and burden are factors in determining whether information is known to or reasonably ascertainable by the submitter.

Many commenters on the January and October proposals expressed difficulty in determining what information EPA considers to be "reasonably ascertainable." Specifically, they were uncertain about the effort that EPA expects them to make in obtaining certain types of information, and what would constitute an "unreasonable burden or cost." In two parts below—" Information From Other Persons" and "Test Data"—EPA discusses in more detail its interpretation of "reasonably ascertainable" in specific contexts. Also, in Unit C.1.c. below, "Incomplete Submissions," EPA briefly describes notices received under the Interim Policy that did not contain "reasonably ascertainable" information. However, EPA believes that it is not possible to define "know to or reasonably ascertainable" more explicitly.

Also, as discussed in the preamble to the October 1979 proposal, a detailed definition of "reasonably ascertainable" may result in inequitable treatment of notice submitters. What would be a reasonable effort for one company under certain circumstances might be extremely burdensome for the same company under different circumstances, or for another company in the same situation. The meaning of this phrase will depend on the specific circumstances surrounding the development of the new chemical. The nature of the substance, the projected sales volume and profit, and the size of the company are factors in determining what information can reasonably be obtained. Therefore, EPA believes that "reasonably ascertainable" can be defined only on a case-by-case basis and that notice submitters must be responsible for deciding when and how to obtain required data, and when required information is not reasonably ascertainable. Certainly, in most instances, data-gathering that is so costly as to preclude commercialization is not reasonable.

To minimize the burden on submitters, EPA has dropped the provision in the proposed rule that would have required submitters to provide a brief description of their procedures for identifying data that are known to or reasonably ascertainable by them. EPA believes this provision is unnecessary; EPA generally can judge from the notice itself whether it includes information that is known to or reasonably ascertainable by the submitter. EPA will also check this as part of its compliance inspections.

b. *Information from other persons.* In many cases, persons other than the notice submitter may have information necessary or useful for EPA's review. For example, processors and other customers may have information on exposure associated with use or release, and foreign manufacturers and suppliers may have information on chemical identity, impurities, and health and safety data. Some of this information must be submitted because it is considered to be in the submitter's possession or control, for example, information that the submitter's parent company or subsidiary has if the related company was involved with R and D, test marketing, or commercial development of the new chemical. Other information may be reasonably ascertainable by the submitter, if not already known, and therefore also must be included in the notice.

EPA, however, has not adopted the requirement proposed in January 1979, that submitters contact customers and ask them to submit a Processing and Consumer Use Form. EPA also has eliminated the request in the October 1979 form that submitters report the number of customers intending to use the new chemical substance in ways not known to the submitter and to report the percentage of production volume allocated to those customers during the first three years of production. The form does, however, ask submitters to estimate how much of the substance will be manufactured or imported for each known category of use.

EPA has eliminated mandatory customer contact because information from processors and other customers often is not necessary for substances that do not undergo detailed review. EPA has found that when this information is necessary, EPA reviewers can generally obtain it either informally from the submitter or from the published literature. Submitters, however, are still encouraged to obtain use and exposure data from potential customers for inclusion in the notice. The more complete the information in a notice, the less likely it is that EPA will need to seek more information later, possibly requiring an extension of the review period under section 5(c), or regulatory action to obtain information under section 5(e).

The elimination of mandatory customer contact will reduce the burden on submitters and their customers without significantly reducing the effectiveness of EPA's review. By requiring the submitter to estimate how much of a substance will be manufactured for known uses, EPA will be able to determine whether processing and use are likely to cause a problem, or whether more information is needed.

In the final rule, EPA has also eliminated the requirement that importers contact foreign manufacturers and suppliers, since much of the information they could provide (e.g., exposure to workers and release to the environment outside the U.S.) is not subject to EPA's review, and EPA generally does not have the authority to require foreign companies to report. More importantly, EPA believes that under the notice requirements in the final rule, the principal importer will contact its foreign manufacturer or supplier when necessary to obtain required information. For instance, if the principal importer does not know the specific identity of the new substance, it will contact the foreign manufacturer to obtain it; otherwise, the submission will be incomplete and EPA will not review it. Of course, the principal importer is encouraged to have its foreign manufacturer or supplier submit any other information useful for review to the importer or directly to EPA.

c. *Test data and other data.* Section 720.50 of the rule describes notice requirements for test data and other data related to the health and environmental effects of a new chemical substance. Under section 5(d)(1)(B) of the Act, submitters must report all test data related to health and environmental effects which is in their possession or control. Under section 5(d)(1)(C), they must provide a description of "any other" health and environmental effects data which they know of or can reasonably ascertain.

Health and environmental effects data on both the new chemical substance and related substances are necessary for an effective evaluation of risks that may be presented by a new substance. Therefore, the requirements to submit data apply to both the new chemical substance and related chemicals. Related chemicals include impurities, byproducts, degradation products, unintended reaction products, and other chemical substances related to the manufacture, processing, distribution in commerce, use, or disposal of the new substance.

To eliminate unnecessary reporting, § 720.50(c) imposes lesser requirements for data on related chemicals than are imposed for data on the new substance itself. Unlike the October 1979 proposed rule, the final rule does not limit the reduced requirements to related chemicals on the Inventory. Instead, they apply to all related chemicals, regardless of their Inventory status. The submitter is not required to provide published data on these substances because EPA can obtain the data elsewhere, regardless of whether or not they are on the Inventory. Therefore, submitters need only describe unpublished data on related chemicals.

i. *Definition of test data.* Section 720.3(gg) defines "test data." Tests, in EPA's definition, include both formal and informal tests and experiments. However, EPA no longer includes recorded observations, monitoring, or measurements as "tests"; instead, these would be "test data" if they were obtained in the course of a test or experiment. EPA believes this change more closely reflects the general understanding of these terms. Test data also include objectives, experimental methods and materials, protocols, results, and data analyses of tests and experiments, as well as raw data and other information relevant to the development and analysis of the data.

In the January 1979 proposal, the definition of "test data" included risk assessments. The final rule eliminates this provision, since EPA no longer believes that an analysis of the risk presented by the combined effects of hazard and exposure is described by the word "test." EPA has also eliminated the word "study" from the final definition of "test data" for the same reasons. Risk assessments are more appropriately included within the term "health and safety study," which is defined in § 720.3(k). EPA has added risk assessments to the examples of health and safety studies listed in § 720.3(k)(2).

In addition to reflecting more adequately the use of the term "test data" in the Act, the new definition will reduce the burden on submitters. Since risk assessments are now "other data" under the final rule, not "test data," submitters need only describe risk assessments which are known or reasonably ascertainable. Under the proposal, submitters were required to provide copies of all risk assessments which were in their possession or control.

The new definition of "test data," and the reduced reporting requirements which result, will not significantly affect EPA's ability to review the risk presented by new substances. If a risk assessment described by the submitter is needed for review, EPA will ask the submitter to provide it voluntarily. If the submitter does not provide it, EPA may extend the review period or take action to obtain it under section 5(e) of the Act.

ii. *Notice requirements for test data.* Section 720.50(a)(2) of the rule requires submitters to provide full reports on test data in their possession or control that are relevant to the health and environmental effects of the manufacture, processing, distribution in commerce, use, or disposal of the new chemical substance. These include data on the new chemical substance in pure form, technical grade, and formulated form. The rule requires a full report to be submitted for data on health effects, ecological effects, environmental fate characteristics, monitoring data, and physical and chemical properties related to health and environmental effects.

A full report must include experimental methods and materials, results, discussion and data analyses, conclusions, references, and the name and address of the laboratory that developed the data. EPA has dropped the requirement that the submitter provide data in a specified "full report format"; any format is acceptable if it includes the items listed. If the test data have been published in the open scientific literature, § 720.50(a)(3)(ii) authorizes submitters to provide only a standard literature citation. This provision reduces the requirements of the January 1979 proposal, which allowed submitters to cite articles containing test data only if the periodical in which the articles appeared was listed in Appendix I of the proposed form. Any other test data in the submitter's possession or control may be submitted in summary form. However, the submitter must provide a full report upon request by EPA.

Sections 720.50 (a)(4)(i) and (b)(4) of the rule exempt incomplete reports (e.g., from ongoing studies) from the full report requirements. However, submitters must describe the nature and objective of any incomplete study, report, or test; name and address of the laboratory developing the data; progress to date; types of data collected; significant preliminary results; and anticipated completion date. In addition, if the study or report yields significant preliminary or final results before the end of the notice review period, and if the results were not submitted with the notice, the submitter must provide the relevant study, report, or test results to the OTS Document Control Officer within 10 days of receipt; but in no event later than 5 days before the end of the notice review period. If the information becomes available during the last 5 days of the review period, the submitter must immediately inform its EPA contact for that notice by telephone. (See "New Information" below.)

iii. *Possession or control.* In the final rule, EPA has retained the definition of

VOL 48 ISS 94 MY 13 1983 UMI

"possession or control" proposed on January 10, 1979. Several commenters on the January proposal suggested that this definition would impose an undue burden on notice submitters, while others believed that EPA's definition did not go far enough. EPA, however, believes that its proposed definition is appropriate. Under this definition, the Agency is likely to obtain all relevant data without imposing an unreasonable burden. In particular, by limiting the definition to affiliated companies associated with the development of the new chemical substance, EPA has focused the information requirement on the companies most likely to have relevant data and to profit from the new substance. Comments on "possession or control" are addressed more specifically in EPA's Response to Comments, which is available in the Public Reading Room.

iv. *Other data known to or reasonably ascertainable by the submitter.* Section 5(d)(1)(C) requires submitters to describe "any other data," including data from health and safety studies, on health and environmental effects that they know or can reasonably ascertain. In § 720.50(b) of the rule, EPA interprets "any other data" to be (1) test data not in the submitter's possession or control but known to or reasonably ascertainable by the submitter, and (2) any data, other than test data, that the submitter possesses, controls, knows, or can reasonably ascertain. For example, if the submitter knows of toxicity or environmental fate data in the possession or control of another person, the submitter is required under section 5(d)(1)(C) and § 720.50(b) to describe those data to EPA. If the data have been published in the open literature, the submitter need only provide a standard citation. If the data have not been published, or the study is incomplete, the submitter need only describe the data and provide a summary of the results (if available), or provide the names and addresses of persons who have the data.

The final rule requires less information to describe data from incomplete studies than was required by the January 1979 proposal. EPA recognizes that information such as a study's nature and purpose, progress to date, and significantly preliminary results on another persons's ongoing study will seldom be available to the submitter. Also, as a result of the revised definition of "test data," discussed in Unit B.1.c.i. above, risk assessments are "other data" under the final rule, and must be described to EPA as required by § 720.50(b).

Section 720.50(b)(1)(ii) clarifies EPA's interpretation of "known to or reasonably ascertainable" as it applies to data submitted under section 5(b)(1)(C). In this context, known to or reasonably ascertainable includes data known to employees or other agents associated with research and development, test marketing, or commercial marketing of a new chemical substance. These data include data learned by employees as a result of discussions, symposia, and scientific articles.

v. *Data that need not be submitted.* Efficacy data and monitoring data on exposure of human or ecological populations outside the United States need not be submitted. In addition, persons are not required to resubmit any data previously submitted to EPA, as long as they were not claimed confidential. Submitters should identify the data previously submitted, the date it was submitted, and the EPA office which received it. However, it is sometimes difficult or time-consuming for the Office of Toxic Substances to obtain such information from other EPA offices in time to complete its review. Therefore, EPA encourages submitters to include all relevant information with the notice.

Relevant data previously submitted to another Federal agency must be included with the section 5 notice. This represents a change from the proposed rules which would not have required notices to include information already submitted to other agencies. EPA made this change because experience under the Interim Policy indicates that it is difficult to obtain information from other agencies in time to analyze and use it during the 90-day review period. EPA does not believe this change will be burdensome to submitters, since relatively few data described or submitted as part of section 5 notices have been previously submitted to other Federal agencies.

d. *New information or data.* During the notice review period, submitters may obtain additional information that may be relevant to EPA's review. Section 720.40(f) of the rule requires submitters to provide EPA with this information if it materially adds to, changes, or makes significantly more complete the information contained in the original notice. Examples of information that must be submitted under this provision include: preliminary or final results of health and environmental effects tests not previously known to the submitter, or not complete at the time of notice submission; new uses not described in the notice; significant increases in estimated production volume; new information significantly adding to information on chemical identity (e.g., significant changes in impurity levels, new information characterizing complex reaction products or polymers); and similar information.

The proposed rule would have required this information to be submitted to EPA "immediately." Commenters asked for more specific guidance on how long they would have to submit new information. The final rule now specifies that the information must be submitted within 10 days of receipt, but no later then 5 days before the end of the review period. If the information becomes available during the last 5 days of the review period, the submitter must telephone its EPA contact for the notice "immediately." EPA interprets this to mean as soon as possible, generally within 24 hours.

2. *Section-by-Section Review of the Notice Form.* The following paragraphs describe the major differences between the form proposed on October 16, 1979, and the final form issued with this rule.

a. *Submitter identification.* This section remains generally the same as in the October form. However, submitters are now asked to provide prenotice communication, *bona fide* request, and test-marketing exemption numbers to help coordinate the Agency's review. The parent company no longer must be identifed because the Agency believes that it can be obtain this information from the submitter during the review period in the few instances it is needed.

The form also eliminates the requirement that submitters state the intended date of commencement of manufacture or import and submit evidence of intent to manufacture if the intended date is more than 3 years after the date of the notice. EPA agrees with commenters that the submitter's certification on the form is sufficient evidence of intent to manufacture or import. However, EPA generally encourages manufacturers and importers to submit notices as close as is feasible to 180 days before manufacture or import is expected to begin, since early notices are more likely to have more complete information.

b. *Chemical identity.* For the most part, the requirements for information on the new substance's identity remain the same as in the October 1979 proposal. However, manufacturers and importers of new polymers must provide slightly different information than that specified in October. Instead of providing the range of composition of

each monomer in the polymer, manufacturers need only estimate the typical composition of the monomers and other reactants, e.g., catalysts and initiators. This information is necessary to evaluate fully the composition of the polymer. Submitters also must provide a representative structural diagram. The Agency has found that the majority of submitters have been able to develop such diagrams. To define further the composition of the new polymer, submitters must provide an estimate of the percent of the polymer composition below 500 and 1,000 molecular weight and describe how the estimates were made. The Agency believes that such information is essential to characterize fully the unique identity of the new polymer and its associated risks.

The rule requires that manufacturers provide at least one generic name for the substance, when chemical identity has been claimed confidential. EPA agrees with commenters that the requirement to provide three names, contained in the October proposal, is unnecessary, since the three names generally mask the identity of the substance to a similar degree. EPA encourages submitters to consult with EPA to develop a useful generic name before submitting the notice. If EPA determines that the generic name provided with the notice is inadequate, submitters will be required to develop a new name when the identity is added to the Inventory upon commencement of manufacture.

In general, the specific chemical identity of a substance is a critical element of the notice. If a submission does not adequately provide this information, EPA will determine that it is incomplete. If the submitter does not know the identity of a new chemical substance—for example, because it imports the substance under a trademark or makes it from unknown reactants—the submitter may authorize another person to report the specific identity or information that allows EPA to determine the identity. The submission, however, will be considered incomplete and the review period will not begin until EPA receives this information. For a discussion of incomplete submissions, see Unit III.C.1.e. below.

c. *Production and use information.* This rule requires reasonable estimates of the maximum production volume during the first year of production and the maximum 12-month production volume during the first 3 years of production. EPA believes that these projections provide sufficient information to perform its exposure assessment and economic analysis. The proposed rule would have required submitters to report both maximum and minimum projections for each of the first 3 years of manufacture. Since EPA's review of notices under the Interim Policy has typically focused on the first year production volume and anticipated maximum volume, more detailed requirements are not justified.

The final rule requires information on the intended categories of use of the new substance in a level of detail similar to that contained in the January proposal. However, it does not require that the submitter consult the standard use classification system developed by EPA for providing its use description. EPA believes that the general concepts of "function" and "application" provide an appropriate method of categorizing uses. A description of use in terms of the substance's chemical function and the general application of that function will provide EPA with sufficient information to identify the populations exposed to the new substance and the nature of that exposure. The submitter also must provide the estimated percent of production volume devoted to each category of use.

Many commenters stated that EPA does not have the authority to require information beyond the broadest category of use (e.g., surfactant, photographic chemical) or that use information, at the level of detail required, is not typically known by the manufacturer. EPA disagrees. The category of use description required under these rules is consistent with the general intent under section 5(d)(1) to provide EPA with the information necessary for review. Adequate information on the use of a substance is critical in the evaluation of the potential risks associated with human exposure to and environmental release of the new substance in that use. EPA has found that the information required in this section is the minimum necessary to conduct a review of such risks. In addition, EPA has found that such information is available to the great majority of notice submitters because substances are typically manufactured for a particular use.

Under section 5(d)(2) of the Act, EPA must issue the uses or intended uses of a new substance for publication in the **Federal Register**. EPA will publish the use as reported in the notice unless it is claimed confidential. Consistent with the Act's requirements and the October proposal, this rule requires manufacturers who claim use to be confidential to provide a nonconfidential (generic) use description which EPA can issue for publication in the **Federal Register**.

d. *Hazard information.* This rule retains the requirement to submit a copy or reasonable facsimile of any hazard information which will be provided to workers or customers, e.g., a Material Safety Data Sheet. Several commenters stated that hazard information is not required under section 8(a)(2). EPA believes that such information falls clearly within the requirements of section 5(d)(1)(C) of the Act since it provides data on the potential exposure and health effects of the new substance. Such information has been an important factor in EPA's evaluation of new substances under the Interim Policy.

e. *Transportation and detection methods.* EPA has eliminated proposed questions on transport and detection methods. Again, experience indicates that data in response to these questions is not especially useful in notice review.

f. *Human exposure and environmental release information.* EPA has retained the requirement that submitters describe the manufacture and processing operations involving the new chemical substance at sites they control. Commenters on the October proposal stated that providing this information would be unduly burdensome and might jeopardize the confidentiality of process information. However, in its review of notices under the Interim Policy, EPA has found the process description necessary to make qualitative estimates of potential workplace exposure, to estimate the amounts of the new substance and byproducts released, and to evaluate estimates provided in other parts of the form. EPA has also found that process descriptions based on known or reasonably ascertainable information may be developed by submitters in less time than was originally anticipated, and that OTS procedures adequately protect any confidential business information contained in the notice.

In response to these comments, however, the Agency has reduced the amount of information it will require in the process description from the requirement proposed in October. EPA does not require that a mass balance of materials entering and leaving major unit operations and chemical conversions be provided, nor must submitters report the methods of transfer of materials and whether the operations are open or closed to the workplace. Based on its experience under the Interim Policy, EPA has found that identification of major unit operations and chemical conversions, identity and mass of materials entering

VOL
48
ISS
94
MY
13
1983
UMI

the process, and points of release of the new substance is sufficient for its initial review and is information known to or reasonably ascertainable by submitters.

The sections of the form on occupational exposure to and environmental release of the new substance are largely unchanged from the October form. Instead of requiring the specific routes by which workers will be exposed, submitters need only identify the activities of workers. This more generic approach will still provide EPA with a more accurate indication of exposure potential. Submitters also are not required to provide estimates of the concentration of the new substance in the workplace because EPA can make such estimates from the process description to the extent necessary for its initial review. Submitters are now required to identify the type of control technology used to control environmental release since control equipment is frequently used and since manufacturers typically have identified the equipment that will be used by the time the notice is submitted. The final rule does not require estimates of the duration of release for each point of release. EPA will instead use reasonable estimates based on the duration of the process in its release analysis.

g. *Sites controlled by others.* The section on industrial sites controlled by others has been modified to require general information on the activities of customers who process and use the new chemical substance. Submitters must provide a narrative description of processing and activities focusing on those aspects which relate to the potential for human exposure and environmental release of the new chemical substance to the extent that they know or can ascertain this information.

The October proposal would have required submitters to provide the same quantitative estimates for sites controlled by others as for the sites which they controlled themselves. However, manufacturers typically do not have such detailed quantitative information on activities not under their control. Furthermore, the specific circumstances of customers' operations may vary, and all customers may not yet be known, so that it may be difficult to make quantitative estimates. The narrative description required in the form will provide sufficient information for EPA to evaluate potential worker exposure and environmental release at customers' sites for EPA's initial review, and allow identification of additional information needs where the Agency has identified a specific concern. In this case, EPA may contact the submitter or possible customers to obtain additional information.

h. *Consumer and commercial user exposure.* EPA has eliminated this section from the final form. Thus, manufacturer estimates of exposure that would result from commercial and consumer use of the new chemical substances or final products containing the new substance are not required. EPA intends to use the information provided in the "use" section of the form and other information, such as production volume, physical/chemical properties, and its own knowledge of typical commercial and consumer exposure scenarios, to evaluate commercial and consumer exposure. EPA's experience under the Interim Policy indicates that it can conduct such an evaluation where the submitter provides the information required in other sections of the form.

i. *List of attachments.* The list of attachments is generally the same as it was in the October form. For a discussion of test data requirements, see Unit III.B.1.c. of this preamble.

j. *Optional information.* The final form does not contain a detailed optional information section as was proposed in the January 1979 form. EPA believes such a detailed section may limit the information that might be submitted and, by identifying specific questions, may make optional information seem mandatory. The Instructions Manual describes generally those items in which additional information would be most helpful in EPA's review. For example, submitters may wish to provide information on relative risk, process chemistry, efficacy, additional exposure and environmental release information, industrial hygiene, engineering safeguards, use restrictions, and economic and other benefits of the new substance. Information in these areas may eliminate the need for extensive communication between EPA and the submitter during the review period and may reduce the possibility of an extension of the notice review period under section 5(c) or regulation under section 5(e) or 5(f). Although submitters are encouraged to submit optional information, they are in no way required to do so.

k. **Federal Register** *notice.* EPA has eliminated the section of the October form which requested information for the section 5(d)(2) **Federal Register** notice. Sections for generic descriptions of confidential chemical identity and category of use have been moved to other parts of the form. In compiling the section 5(d)(2) notice, the Agency will assemble the necessary information from the various parts of the notice. For a further discussion of generic descriptions, see Unit III.D. of this preamble.

l. *Confidentiality claims.* Submitters may assert claims of confidentiality for any information on the notice form and any attachments to the form, although they should note that under section 14(b), claims for information in health and safety studies will be denied unless disclosure would reveal process information, proportions of a mixture, or information unnecessary to interpret the study. (See Unit III.D.4) Instructions for making claims are given on the form. If chemical identity or use is claimed confidential, the submitter must provide a generic chemical name or generic use that is as specific as possible.

EPA no longer requires substantiation of confidentiality claims when the notice is submitted. However, any submitter that claims information confidential must supply two copies of the notice: One complete copy, and one "sanitized" copy with all confidential information deleted. EPA will put the sanitized copy in the public record. The notice is incomplete, and the review period does not begin, until EPA has received both the complete notice and the sanitized notice. EPA explains its confidentiality policy in more detail in Unit III.D. of this preamble.

C. Notice and Review Procedures

1. *Submission and Processing of Notices.*

a. *Acknowledgement of receipt.* Under § 720.65(a), EPA will acknowledge receipt of each notice by letter to the submitter. The 90-day notice review period begins on the date of receipt indicated on the letter of acknowledgement.

b. *Consolidated notices.* In the course of reviewing section 5 notices under the Interim Policy, groups of notices were often submitted for substances which were similar in structure and use. These notices contained a large amount of duplicative information, such as exposure, release, or use data. In response to requests for relief from submitters, EPA has developed procedures for submission of a "consolidated" notice. Persons who intend to manufacture or import two or more structurally related new chemical substances may contact the Prenotice Communications Coordinator to obtain approval to submit a single "consolidated" section 5 notice for the related substances. The submitter must identify each new chemical substance individually; a consolidated notice cannot be submitted for an open-ended

category of chemicals. A consolidated section 5 notice is suitable for chemical substances with the same or similar uses and for which there are similar test data or other information. Manufacturers may not submit a consolidated notice on a series of intermediates and a final product in a given process because these chemicals do not sufficiently share common test data or other information.

EPA will not accept a consolidated notice unless the submitter has contacted the Prenotice Communications Coordinator to determine whether the group of chemicals are sufficiently similar that they are suitable for review in a consolidated notice. EPA encourages submitters to submit consolidated notices when appropriate; such notices will reduce the burden on the submitter of preparing multiple section 5 notices sharing common information. Consolidated notices also will improve the efficiency and consistency of EPA's review by allowing the staff to review structurally related chemicals, and the data and other information that are common to them, at the same time.

c. *Incomplete submissions.* Under § 720.65(c) of this rule, EPA may determine that a submission is incomplete, and therefore does not constitute a notice under section 5 of the Act. For example, failure to provide chemical identity or otherwise to supply information required in the notice form, if that information is known to or reasonably ascertainable by the submitter, will result in a submission that does not constitute a notice. A submission is incomplete if all information (except information published in the scientific literature) is not in English or test data and other data are not complete. A submission is also incomplete if the submitter claims information confidential and does not submit a second copy of the notice from which all confidential information has been deleted. The review period will not begin until the submission is complete.

If a submission is incomplete, EPA may first request the missing information from the submitter by telephone. If the submitter does not provide it quickly, EPA will inform the submitter in writing within 30 days of receiving the submission that it is incomplete. However, if EPA obtains additional information during the notice review period, from the submitter or elsewhere, that indicates the original submission was incomplete, EPA may declare the notice incomplete within 30 days of receiving the new information.

Under § 720.65(c) (4) and (5), submitters may file objections to an EPA finding that a submission is incomplete with the Director of the Office of Toxic Substances ("the Director"). The Director, or his or her delegate, will determine whether the original submission was complete or incomplete, or will modify the requirements for completing the submission. If the Director affirms that the original submission was incomplete, the notice period will not begin to run until EPA receives the missing information. If the Director finds that the original submission was complete, the 90-day review period will resume on the date that EPA notifies the submitter that the notice is complete. Therefore, if EPA informed the submitter that the notice was incomplete on the 15th day, the day after EPA finds the notice was complete would be the 16th day. However, if EPA can complete its review by the date 90 days from the date of the original submission, the Director may inform the submitter that the review period began when EPA received the original notice and has run without interruption. EPA recognizes that resuming the review period on the date EPA notified the submitter that the submission was incomplete may conceivably delay the start of manufacture or importation in some cases; however, EPA has an overriding responsibility to conduct an adequate review which ensures against a potential risk to human health or the environment. EPA will avoid delaying the starting date whenever possible.

If EPA identifies a minor problem in the submission, such as failure to date it or a typographical error that renders an entry ambiguous, it may, under § 720.65(b), ask the submitter to correct the notice. The submitter is under no obligation to make the correction, but failure to do so may cause EPA to extend the review period under section 5(c) of the Act. Of course, if the submitter corrects the minor problem, EPA may still extend the period under section 5(c) if good cause otherwise exists.

The final rule modifies the procedures for incomplete submissions proposed in January 1979. Under the proposed procedures, submitters had no formal appeal procedures if EPA determined that a submission did not meet the standards for review, and the review period for submissions with minor errors could be stopped until the errors were corrected. EPA has changed these requirements in response to comments and because of its experience under the Interim Policy.

EPA, however, disagrees with commenters who argued that EPA has no authority to determine that a submission is incomplete, and that EPA's only remedy is section 5(e). The Act explicitly requires the submitter to provide certain information in a section 5(a) notice that is known to or reasonably ascertainable by the submitter. A submission that fails to meet the minimum statutory requirements, therefore, is not a complete notice under the Act, and EPA is justified in refusing to review it. Section 5(e) is not an appropriate remedy for this situation. The purpose of section 5(e) is to allow EPA to regulate new chemical substances "pending the development of information" necessary for a reasoned evaluation of health and environmental effects. Its purpose is not to gather information that the submitter already knows or can reasonably ascertain and that is required by the Act to be submitted in the initial notice.

Under the Interim Policy, EPA has received several submissions that, it believed, did not include required information that was known or reasonably ascertainable by the submitter and which therefore did not meet the statutory requirements. For example, one submission did not include the molecular structure of the new chemical substance. EPA scientists determined that representative molecular structures for the substance were in fact known to or reasonably ascertainable by the submitter, because a knowledgeable chemist would be able to derive the structure from process information. Therefore, the notice review period did not begin until this information was provided to EPA.

In another case, the submitter described the category of use of a new chemical substance only as "photographic chemical" without specifying its end use in terms of its function and application (e.g., reducing agent in developer solution). The term "photographic chemical" was inadequate for EPA's assessment of potential human exposure and environmental release. In a third type of problem, submitters often have described the chemistry of the manufacturing operation without indicating the order and type (e.g., distillation, mixing) of the manufacturing steps. For example, manufacturers of coatings for manufactured parts have sometimes failed to provide information on coating operations at sites they do not control. In such cases, if EPA staff cannot quickly obtain the information from the submitter in response to a telephone request, EPA will declare the notice incomplete and the review period will not begin until EPA receives the information.

VOL 48 ISS 94 MY 13 1983 UMI

d. *Extension of review period.* Section 5(c) of the Act provides that EPA may extend the 90-day review period for up to an additional 90 days for good cause. Section 720.75(c) of this rule provides that EPA will notify the submitter if EPA extends the period and gives examples of circumstances that EPA believes could constitute good cause for extension. EPA will also issue for publication a **Federal Register** notice when it extends a review period under section 5(c). The notice will describe the extension and give the reasons for it.

e. *Suspension of review period.* Section 720.75(b) of this rule provides that a notice submitter may voluntarily suspend the running of the review period at any time, but only if the Director, or his or her delegate, agrees. If the Director does not agree, EPA will notify the submitter and the review period will continue to run. The suspension must be for a specified period of time. If the notice submitter makes the request orally, the Director may grant a suspension for 15 days. EPA will send the submitter a written confirmation of the suspension if it is granted orally. The Director will extend the suspension if the OTS Document Control Officer receives a written confirmation of the request within 15 days of the approved oral request. In this case, the running of the review period is suspended as of the date of the confirmed oral request. The notice submitter also may request a suspension in writing. In this case, the suspension begins the date the Document Control Officer receives the request, if EPA approves the request.

Under the Interim Policy, EPA has found suspension of the review period may be beneficial when questions concerning a new chemical substance that arise during the notice review period can be adequately addressed by the notice submitter. Suspension of the review period is often helpful in these cases because a submitter may not be able to respond to EPA's concerns within the review period, even if EPA extends the period to 180 days under section 5(c). For example, in one instance the Agency needed more detailed use and exposure information which the submitter was able to obtain from potential customers. In other cases, the notice review period was suspended to allow time for voluntary health effects testing, and for chemical analysis to determine the levels of certain impurities. Voluntary suspensions benefit both EPA and notice submitters because they save EPA resources and often eliminate the need for regulatory action.

f. *Closeout and commencement of manufacture.* Under § 720.75(d), EPA will notify submitters when the notice review period has ended, if EPA has not taken action under section 5(e) or 5(f) of the Act. EPA will inform submitters that they can begin manufacture or import for commercial purposes. This action does not constitute EPA approval or certification of the substance and does not preclude later regulatory action by EPA. Submitters may begin to manufacture or import a new chemical substance after the close of the review period, even if they have not been notified by EPA that the review period has ended. In the final rule, EPA has dropped the notice of continuing review proposed in January 1979, since the closeout notification can serve the same purpose, i.e., informing the submitter of any concerns EPA may have about the new chemical substance, and any regulatory actions being considered. Also, there is no obligation that EPA inform a submitter that it is contemplating regulation of the new chemical substance.

Section 720.102 requires that submitters notify EPA when they begin to manufacture or import the new chemical substance, so EPA may add the substance to the Inventory. The submitter must provide chemical identity, premanufacture notice number, and the date that manufacture or import for commercial purposes begins. EPA proposed this requirement in January 1979 and believes that most notice submitters to date have notified EPA when they began manufacture or import. However, any persons who already have begun to manufacture or import a chemical substance after undergoing notice review, but who have not yet submitted a notice of commencement or manufacture, must submit the notice by the effective date of this rule to allow EPA to update the Inventory.

2. *Supplemental Reporting.* In January 1979, EPA proposed supplemental reporting ("letter-writing") authority which would have enabled EPA to obtain additional written information on a new chemical substance or related chemicals during the notice review period. EPA also proposed an analogous provision for requesting health and safety studies. EPA based its authority to obtain certain information known to or reasonably ascertainable by the submitter and others on section 8 of the Act. Even after the scope of reporting was narrowed in the October 1979 reproposal, many commenters objected to the supplemental reporting provisions, arguing that EPA does not have authority to require such reporting.

Since the reporting requirements in the final rules are reduced from those in the proposed rules, the ability of EPA to obtain additional information during the review period is especially important. While EPA still believes it has the authority under section 8 to obtain additional information from the submitter and others who may have information about the new chemical substance during the notice review period, EPA has not adopted supplemental reporting authority because it has proved unnecessary to an effective section 5 notice review program. EPA also has eliminated the provision for requesting health and safety studies on the new chemical substances or related chemicals. EPA has found that telephone calls to submitters are generally adequate to obtain additional information during the notice review period. In the occasional case where a submitter is unwilling to provide the information, EPA has the option of taking action under section 5(e) (regulation of a new chemical substance pending development of new information) or section 11 (subpoena authority). Although these actions are more resource-intensive and time-consuming than a supplemental reporting request, such formal actions will rarely be necessary. However, EPA is prepared to act under these authorities when submitters do not provide the necessary information.

3. *Actions Under Sections 5(e) and 5(f).* In the final rule, EPA has deleted §§ 720.36 and 720.37 of the January 1979 proposal, which described EPA's procedures for taking action under sections 5(e) and 5(f). It is not necessary to include these provisions in the rule, because many of the procedures are already set out in the statute, and because submitters will be notified of the remaining procedures when EPA takes action against a specific substance. In dropping these sections, EPA has deleted the provision that would allow it to notify persons other than the notice submitter, who would be affected by the order, of the basis of a proposed section 5(e) or 5(f) action. Many commenters objected to this provision, arguing that only the notice submitter could be subject to a section 5(e) or 5(f) order. EPA will notify only those persons subject to a section 5(e) or 5(f) order, and it will allow only those persons to file objections to the order. Of course, any person who uses a new chemical substance that the person knows or has reason to know was manufactured, imported, processed, or distributed in commerce in violation of a section 5(e) or 5(f) order is in violation of section 15 of TSCA.

EPA has also eliminated § 720.37(b)(6) of the January 1979 proposal, which provided that EPA would consider subsequent notice submissions for substances subject to a section 5(f) order to be applications for modification or revocation of the order, rather than section 5 notices. This section was eliminated because EPA recognizes that a subsequent submission for a chemical substance subject to a section 5(f) order might describe different conditions of exposure which might not present an unreasonable risk. Therefore, EPA will consider these submissions to be section 5 notices, and they will undergo review.

4. *Recordkeeping.* The final rule retains the provision in the proposed rule that requires notice submitters to retain documentation of information in the notice. This would include the sources of information provided in the notice, e.g., production volume estimates in marketing plans. Submitters also must keep records of production volume for the first three years of production and the date of commencement of manufacture or import, and documentation of this information. In addition, submitters must keep copies of "other data," which they were required to describe in § 720.50(b), if they are in the submitter's possession or control. This information must be retained for 5 years from the date of commencement of manufacture.

EPA has dropped the provision that the submitter retain health and safety data referenced in the notice for 30 years. EPA believes this provision is unnecessary because the submitter must include these data, or a standard literature citation to these data, with its notice. Therefore, EPA will already have the data in its own files.

Persons who manufacture or import a chemical substance under the terms of an R and D exemption must retain documentation of compliance with the exemption requirements, including copies of the information they used to determine the need to make any notification of risk to health or to persons exposed to the chemicals. This information must be retained for 5 years from the final date of manufacture or import under the exemption.

Persons who are granted a test-marketing exemption application must retain documentation of information submitted in the notice. They also must document compliance with any restrictions EPA imposes when it grants the exemption. This information must be retained for five years from the final date of manufacture or import under the exemption.

5. *Compliance and Inspections.* It is unlawful for any person to fail or refuse to comply with any provision of section 5 or any rule promulgated under section 5. Manufacture or processing of new chemical substances without complying with section 5 and this rule is a violation of section 15. When more than one manufacturer or importer is involved in a transaction, each one is liable for manufacture or import of a new chemical substance if a notice has not been submitted or the review period has not expired, even though only one person involved in each transaction (e.g., the principal importer) may submit the notice.

Section 15 of TSCA makes it unlawful for any person to: (i) Use for commercial purposes a chemical substance or mixture which such person knew or had reason to know was manufactured, processed, or distributed in commerce in violation of this rule.

(ii) Fail or refuse to establish and maintain records or to permit access to or copying of records as required by the Act or a rule promulgated under the Act.

(iii) Fail or refuse to permit entry or inspection as required by section 11.

Violators may be subject to criminal and civil liability. Persons who submit materially misleading or false information in connection with the requirement of any provision of this rule may be subject to penalties calculated as if they never filed their notices. Under the penalty provision of section 16 of TSCA, any person who violates section 15 could be subject to a civil penalty of up to $25,000 for each violation. Each day of operation in violation could constitute a separate violation. Knowing or willful violations of this rule could lead to the imposition of criminal penalties of up to $25,000 for each day of violation and imprisonment for up to one year. Other remedies are available to EPA under sections 7 and 17 of TSCA such as seeking an injunction to restrain violations of the rule and the seizure of chemical substances manufactured or processed in violation of the rule.

Individuals as well as corporations could be subject to enforcement actions. Sections 15 and 16 apply to "any person" who violates various provisions of TSCA. Thus, in actions under section 16, EPA may, at its discretion, proceed against individuals, such as corporate officials, as well as the companies themselves. In particular, this includes individuals who report false information or who cause it to be reported.

EPA will also direct its resources to detecting violations of other aspects of the section 5 notice rule, particularly the terms of exemptions for research and development and for test marketing.

EPA will conduct inspections under section 11 of TSCA to assess compliance with the requirements of section 5 and this final rule. Inspectors will compare the information in the submitter's notice with the actual conditions of manufacture or import to verify that the information was correct, estimates were reasonable, and any exposure controls described in the notice are in place.

D. Confidentiality

The Act recognizes the importance to industry of maintaining the confidentiality of certain business information; section 14 allows a submitter to claim confidentiality for any information submitted to EPA under the Act. However, the Act also makes clear that the public interest in chemical regulation must also be considered, and in certain cases, outweighs the protection of confidential business information. Thus, section 14 also provides that health and safety studies may be revealed and that any confidential information may be revealed if necessary to protect health or the environment from an unreasonable risk of injury.

Certain provisions of section 5 also highlight EPA's responsibility to provide meaningful information to the public concerning new chemical substances. Section 5(d)(1) states explicitly that a section 5 notice must be made available for "examination by interested persons," subject to the confidentiality provisions of section 14. Further, section 5(d)(2) requires EPA to issue for publication a **Federal Register** notice upon receipt of each section 5 notice, that identifies the chemical substance, lists the intended uses, and describes test data, also subject to the confidentiality provisions of section 14. More generally, the Act includes a variety of provisions under which citizens can petition EPA to take particular actions on section 5 notices. These provisions indicate that Congress intended informed citizen involvement in review of new chemical substances, although EPA is to be the primary decisionmaker. Public participation cannot be effective unless meaningful information is made available to interested persons.

In addition to these responsibilities which are related directly to the Act, EPA has general responsibilities under the Freedom of Information Act (FOIA). Under the FOIA, persons may request disclosure of any information submitted in a notice. When such a request is made, EPA, in accordance with the

VOL
48
ISS
94
MY
13
1983
UMI

procedures of 40 CFR Part 2, Subpart B, must review information which is claimed confidential to determine whether it is entitled to confidential treatment. If EPA determines that the information is confidential and therefore does not disclose it, the FOIA requester may bring an action in Federal court to review EPA's decision.

The confidentiality provisions in the final rule take into account various requirements under the Act, including the need: (1) to provide nonconfidential information to the public, (2) to give EPA information it needs to respond to FOIA requests, (3) to allow persons to assert claims of confidentiality with the minimum burden, and (4) to reduce uncertainty about the criteria EPA will use in making its confidentiality determinations. In determining the final confidentiality provisions, EPA also considered its experience with section 5 notices under the Interim Policy as well as comments received on the January 1979 and October 1979 proposals. EPA believes these provisions represent a balance between the industry's need for confidentiality of business information and the public interest in having access to information about new chemicals.

1. *Assertion of Confidentiality Claims.* A person may assert a claim of confidentiality for any information submitted to EPA. Submitters must assert the claim when they submit the confidential information. If the information to be claimed confidential is contained on the notice form, submitters must assert their claims by marking the box on the form adjacent to the item. To assert a claim for information in an attachment to the form, submitters must clearly mark all confidential items in the attachment.

Any submitter that claims information confidential must provide two copies of its submission: a complete copy of the notice including all confidential information and a "sanitized" copy in which all confidential information has been deleted. EPA will assume that the submitter has prepared a sanitized copy that accurately deletes any information claimed confidential. EPA will place the submitter's sanitized copy in the public file. If the submitter does not provide a sanitized copy, the submission is incomplete and the notice period will not begin. EPA believes this provision is in the best interest of the submitter, the public, and EPA.

Alternatively, if the submitter does not provide the sanitized copy with the notice, EPA could consider the submission complete and allow the submitter to provide the sanitized version early in the notice review period. However, this would deprive the public of access to the notice information for a significant portion of the review period. EPA could also prepare the sanitized copy itself. However, this would require substantial EPA resources and there is a chance that EPA inadvertently would not delete all of the information claimed confidential. In addition, EPA believes it is more efficient for the submitter, which is more familiar than EPA with the nature, extent, and rationale for the claims, to prepare the sanitized copy. EPA also considered the alternative of putting the entire notice, including information claimed confidential, in the public file if the submitter did not provide a sanitized version. However, EPA believes this would be unnecessarily harsh. Therefore, EPA believes that treating the notice as incomplete until it receives the sanitized version is the most equitable policy.

2. *Generic Information.* A submitter that claims chemical identity or use confidential must provide generic information for release to the public. By requiring generic chemical names and uses, EPA can meet its obligation to provide the public with important information on the risks of new substances without revealing confidential business information. EPA requires that the generic information be provided on the notice form so it can include this information in the section 5(d)(2) **Federal Register** notice. If EPA had to request the generic information after it received the notice, or develop the generic information itself, EPA could not meet the requirement that the **Federal Register** notice be published 5 days after EPA receives the notice form.

Unlike the proposed rule, the final rule does not state that the generic chemical name must disclose "toxicologically significant information to the maximum extent possible"; instead, the generic name should reveal the substance's chemcial identity to the maximum extent possible. EPA has found that, prior to a substantive review of the hazard potential of a new substance, it is often difficult to identify toxicologically significant portions of the molecule. Therefore, at the beginning of the notice review period, it is more useful to require instead that the chemical identity be revealed as fully as possible. The generic use should also be as specific as possible. EPA encourages submitters to contact the EPA Prenotice Communications Coordinator to discuss appropriate generic names and uses before actually submitting the notice.

The proposed rule would have required that submitters provide three generic chemical names with the section 5 notice; however, the final rule requires only one. EPA's experience in the section 5 program has shown that three names are not necessary since, generally, all three names provided are similar in specificity. EPA will publish the generic name given in the notice in the section 5(d)(2) **Federal Register** notice. However, when the manufacturer or importer submits a notice of commencement of manufacture using the same generic name, EPA may determine that the generic name is more generic than necessary to protect confidential chemical identity. EPA will then propose a more specific name. If that name is unacceptable, the submitter must explain why EPA's name would disclose confidential business information and propose an alternative. EPA will publish the submitter's alternative name if it is acceptable. Otherwise, EPA will put the generic name it devised on the public Inventory, 30 days after giving notice to the submitter.

EPA has not adopted the proposed requirement that submitters provide generic information on physical/chemical properties (in terms of ranges) and submitter's identity (in terms of geographic location, annual sales, and type of company) if they are claimed confidential. EPA made this change in response to commenters who stated that it is difficult to develop generic descriptions of physical/chemical properties and submitter's identity which provide useful information without disclosing confidential business information. Also, unlike chemical identity and category of use, EPA is not required to issue any information concerning physical/chemical properties or the submitter's identity for publication in the **Federal Register**. Therefore, generic information on these categories is not necessary.

3. *Substantiation of Claims.* The final rule does not require substantiation of any confidentiality claims when a section 5 notice is submitted. However, a confidentiality claim for chemical identity must be substantiated when the notice of commencement of manufacture is submitted.

This approach reflects a substantial modification of the confidentiality procedures proposed in January 1979 and October 1979. The January proposal would have required submitters to substantiate confidentiality claims at the time of submission only for chemical identity and health and safety data, while the October proposal would have required substantiation of all confidentiality claims at the time of submission (though it allowed assertion and substantiation by category.) EPA believed that this "up-front" substantiation would be necessary to allow EPA to respond to FOIA requests in a timely manner.

Under the Interim Policy, submitters were encouraged to substantiate all confidentiality claims when the notice was submitted; if they did not substantiate their claims, EPA sent a letter requesting substantiation. EPA changed this policy in a notice published in the **Federal Register** of July 3, 1982 (47 FR 28969). In that notice, EPA explained that because EPA had not received large numbers of FOIA requests, "up-front" substantiation of claims was not necessary to make timely responses to FOIA requests. Also, the substantiation requirement had not reduced the number of confidentiality claims as expected. The final rule adopts the same policy. EPA will request substantiation for information submitted in section 5 notices only when it receives an FOIA request for the information claimed confidential, or when EPA has its own reasons for making a final confidentiality determination, for example, when EPA is contemplating regulatory action. By not requiring "up-front" substantiation of all claims, submitters will not have to incur the burden of substantiation unnecessarily.

The final rule requires submitters to substantiate claims of confidentiality for chemical identity at the time a notice of commencement of manufacture or import is submitted, and provides that EPA may disclose a chemical identity claimed as confidential but not accompanied by adequate substantiation. As EPA stated in the Interim Policy of May 15, 1979, all information submitted to EPA under the section 5 notice program before the effective date of the final rule will become subject to the confidentiality policies of this rule (45 FR 28567). The Interim Policy does not require submitters to substantiate claims of confidentiality when the notice of commencement is submitted, although EPA encourages them to do so. As a result, EPA has received notices of commencement in which chemical identity was claimed confidential without any accompanying substantiation. Under the final rule, these chemical identities could be disclosed when it goes into effect.

In the May 1979 Interim Policy EPA stated that it would give submitters "ample opportunity to update or modify confidentiality claims prior to becoming subject to any new requirements." EPA believes that 45 days after the effective date of this rule is an ample period for submitters with unsubstantiated claims of confidentiality of chemical identity in notices of commencement of manufacture or import to substantiate those claims. EPA will notify each affected person by letter. If EPA has not received substantiation for the claim within 45 days after the effective date of this rule, it may place the specific chemical identity on the public Inventory consistent with EPA's general procedures for handling confidential information in 40 CFR Part 2.

4. *Health and Safety Studies.* Section 14(a) of TSCA prohibits EPA from disclosing confidential business information reported under the Act except in certain specific circumstances. Section 14(b), however, states that EPA is not prohibited from disclosing health and safety studies of substances for which section 5 notification is required, unless disclosure reveals confidential processes or portions of a mixture. Therefore, EPA cannot refuse to disclose such information in response to an FOIA request, and EPA will deny any claim of confidentiality for the protocol, data, analysis, and results in a health and safety study if the submitter does not establish that disclosure would reveal the following confidential information: (1) process information, (2) portions of a mixture, or (3) information unrelated to the effects of the substance on human health and the environment.

In some submissions, chemical identity may be claimed confidential and attachments to the notice form may contain health and safety studies on the new chemical. EPA will disclose the specific chemical identity that is the subject of those studies if disclosure of chemical identity: (1) is necessary to interpret the health and safety study, and (2) would not reveal confidential process or mixture information. Disclosure of chemical identity is discussed in more detail below.

5. *Specific Chemical Identity.* A major issue in this rulemaking has been the confidentiality of the specific chemical identity that is the subject of a section 5 notice. This issue is of particular concern when health and safety studies are submitted for the substance. Under section 14(b) of TSCA, EPA may not withhold from the public data from health and safety studies unless the data would disclose confidential manufacturing or processing processes or the proportions of specific chemical substances in a mixture. The disclosure requirement applies to data in the study and data underlying the study.

As EPA stated in the January 1979 proposal, the Agency considers the specific chemical identity always to be part of a health and safety study even when it does not appear in the study. Consequently, the chemical identity would be subject to the disclosure requirements of section 14(b). However, in many cases the chemical identity is one of the most commercially sensitive pieces of information in the section 5 notice. Because of the substantial concern expressed by industry about the harm of disclosing confidential chemical identities, EPA explored ways of limiting the commercial harm of such disclosure while still meeting the requirements of section 14(b) of TSCA and providing the public with adequate information about health and safety studies.

In January 1979, EPA proposed that confidential chemical identities would not be released prior to commencement of manufacture or import, even when health and safety studies had been submitted in the notice. After commencement of manufacture, chemical identity would be disclosed if health and safety studies had been submitted and the identity was not exempt under section 14(b) by virtue of revealing a confidential process or confidential proportions of substances in a mixture. Because of the sensitivity of this issue, under its Interim Policy, EPA has honored claims of confidentiality for specific chemical identity, even when health and safety studies have been submitted, reserving a final decision on the issue for this final rule.

This issue generated a great deal of comment. Industry has expressed its concerns about disclosure of confidential chemical identities at any time, while public interest groups and others are concerned that health and safety studies would be meaningless without knowledge of the specific chemical identity involved. In an attempt to meet both these concerns, EPA has chosen an approach that balances the need for confidentiality, the need to understand health and safety studies, and the provisions of TSCA.

Under § 720.85 of the rule, in the absence of any health and safety studies, chemical identity will be held confidential as long as it meets the general tests for confidentiality in 40 CFR Part 2. This is true both before and after commencement of manufacture or import. Under § 720.90(c) of the rule, if any health and safety studies have been submitted for the chemical substance in question, the specific chemical identity will be held confidential only if disclosure would reveal confidential manufacturing or processing processes or the confidential proportions of
